Common Data Matrix

Because at some Point in Time You'Re Going To Want To Know that Information You'Re Going To Want To Share the Protection Rules You'Re Going To Want To Share the Quality Rules You'Re Going To Want To Share Rules around Updating Metadata or Updating Databases You'Re Going To Want To Know that Information and a Lot of Organizations Are Kind Of Working on the Fly with that Knowledge the Common Data Matrix as a Tool Is Something That You Can Develop Yourself and that You Can Create and Use in Whatever Ways That You Need To but It Really Helps You To Put Your Arms around Who Does What with the Data in the Organization

So We May Be Going to these People and Trying To Identify Who the Key Business Users Are When We Asked Them Where Do We Compared to these Best Practices That We Just Define So What Is Your Feeling and that's that You'Re Talking to a Business Person You Know in that Finance Area of Your Organization as an Example and Ask Them Well What Does Your Senior Leadership Know about Data Governance Do They Support You in Your Activities

Practice around Communicating Data Governance Best Practice to Your Organization So in the Last Couple of Minutes That I Have I Want To Talk about Applying Data Governance Best Practice through Daily Operation There's There's Really Two Ways That Organizations Apply Data Governance in Their Organization One Is Proactively and One Is Reactively So by Doing It Proactively We'Re Going To Build It into What We Do So if We'Ve Got a System Development Life Cycle Methodology or We'Ve Got a Way To Solve Problems We'Re Going To Build It into those Steps We'Re Going To Apply Governance To Process Rather than Redo

So Far I'M Going To Share with You a Couple More and I Know this One Is Too Small To Read and the Intention Isn't Really There for You To Read It the Idea Is To Talk about It Conceptually Here's the Steps of the Process Here's the Roles That You Define as Part of Your Governance Program and Here's What each of the Different Roles Does in East Different Step of Your Methodology So I'Ve Seen this Actually Work for Common Waterfall Methodology I'Ve Seen at Work for Agile Methodologies As Well Where We Take Processes That We'Ve Defined and We Identify the Roles That Needs the Roles from Governance Perspective from a Data Perspective That Need To Be Engaged and We Get Very Specific

So I'Ve Seen this Actually Work for Common Waterfall Methodology I'Ve Seen at Work for Agile Methodologies As Well Where We Take Processes That We'Ve Defined and We Identify the Roles That Needs the Roles from Governance Perspective from a Data Perspective That Need To Be Engaged and We Get Very Specific around What Does that Specific Role Will Do Doing that during that Specific Step of the Methodology so this Is Again Proactively Building Governance into What We Do another Example of It Is this Is a Kind of a Project Plan That an Organization Was Following these Were Different Roles Associated with the Program They Define How Long It Was Going To Take and How Exactly How Much Time So this Person Was Responsible for that Activity

Another Example of It Is this Is a Kind of a Project Plan That an Organization Was Following these Were Different Roles Associated with the Program They Define How Long It Was Going To Take and How Exactly How Much Time So this Person Was Responsible for that Activity and They Were Expected They Were Going To Spend Two Days out of that One Week on that Specific Action so What We'Re Doing Again Is We'Re Applying Governance We'Re Applying the Execution and Enforcement of Authority to each of the Steps of the Processes but We'Re Being Very Specific to the Processes That We'Re Applying Data Governance to another Example Is Is this One Where this Organization Defined Six Primary Processes That They Wanted To Follow When It Came to Data Governance This Reminder I Will Send a Follow Up Email within Two Business Days to the Seminar Was like for the Slides the Recording and I Will Send Out a Copy of the Matrices from Bob As Well and Anything Else Requested throughout the Webinar Just To Dive Right In Above Have You Ever Had To Get Hr Involved Which Is Finding the New Rules or Responsibilities if Not Do You Think that Hr Should Be Involved with these New Definitions Well To Be Honest with You Now I Don't Necessarily Believe that the Hr Should Be Involved in Defining the Roles That People Do and What They Do They May Help You To Identify or if It's Necessary Right the Responsibilities of the Job of the Stewarding or the Governance

Believe that the Hr Should Be Involved in Defining the Roles That People Do and What They Do They May Help You To Identify or if It's Necessary Right the Responsibilities of the Job of the Stewarding

or the Governance Excuse Me Responsibilities into People's Job Description Certainly You'Re Going To Want To Get Hr Involved in that but if You Take a Non-Invasive Approach What We'Re Really Doing Is Formalizing the Things That People Already Do that's Part of Their Everyday Job So Don't Need Them I Least from My Experience I Don't Recall over Getting Them Involved in the Defining of the Roles for Data Governance

You Don't Sell It as Being a New Function You Sell It as Being a Formal Formalizing Accountability for the Things That People Are Presently Doing So Again That Comes Back to the Best Practice of What Do We Tell Our Management and What Don't We Tell Our Management if We Tell Them It's a New Function and It Has To Be and We've Got To Support It and Fund It and Source It and All those Types of Things Then that's Exactly What They'Re Going To Believe and that's What They'Re Going To Expect and It's Going To Be Expensive and Complex but if We Say You Know What I Already Have Time Associated with Doing this and I'M Putting a Program Together around Formalizing People's Accountability Formalizing Communications It Does Not Have To Feel like a New Function
