The oil is pumped through a pipeline

Some oil pipelines can be thousands of miles long

The oil is piped to an oil refinery

The oil is also processed into small polymer pellets

The polymer pellets are further processed in this factory

The pellets are poured into a furnace

The pellets are then melted into a thick liquid plastic

The liquid plastic is poured into a mold

The liquid cools and hardens into solid plastic

60 percent of garbage produced in the US is recyclable

10% recycled plastic is added in to the mix to make even more plastic
