The American Mission

"There's the mission the public knows, and the mission we'll never see. Matthew Palmer knows both, which is what makes *The American Mission* crackle with complexity and authenticity. What a debut." —Brad Meltzer, #1 New York Times bestselling author of *The Fifth Assassin* Global headlines come to life as intrigue and international politics collide in the Congo in this electrifying debut thriller from Matthew Palmer. After a devastating experience in Darfur strips Alex Baines, former rising star of the State Department, of his security clearances, he is faced with two choices: spend the rest of his career in visa-stamping limbo or move to the private sector. On the verge of resigning, he receives a call from his old mentor with an incredible opportunity to start over, restoring both his security clearances and his reputation. The job isn't quite what Alex imagined it to be when he finds a shady U.S.-based mining company everywhere he turns. As violence in the political climate escalates, Alex struggles to balance the best interests of the United States with the fate of the Congo and its people. His loyalties are put to the test as he races to determine the right course of action.

A Brief View of the American Mission in the Bombay Presidency, for the Year 1832

The Great American Mission traces how America's global modernization efforts during the twentieth century were a means to remake the world in its own image. David Ekbladh shows that the emerging concept of modernization combined existing development ideas from the Depression. He describes how ambitious New Deal programs like the Tennessee Valley Authority became symbols of American liberalism's ability to marshal the social sciences, state planning, civil society, and technology to produce extensive social and economic change. For proponents, it became a valuable weapon to check the influence of menacing ideologies such as Fascism and Communism. Modernization took on profound geopolitical importance as the United States grappled with these threats. After World War II, modernization remained a means to contain the growing influence of the Soviet Union. Ekbladh demonstrates how U.S.-led nation-building efforts in global hot spots, enlisting an array of nongovernmental groups and international organizations, were a basic part of American strategy in the Cold War. However, a close connection to the Vietnam War and the upheavals of the 1960s would discredit modernization. The end of the Cold War further obscured modernization's mission, but many of its assumptions regained prominence after September 11 as the United States moved to contain new threats. Using new sources and perspectives, *The Great American Mission* offers new and challenging interpretations of America's ideological motivations and humanitarian responsibilities abroad.

The Great American Mission

The strength and prestige of democracy worldwide at the end of the twentieth century are due in good measure to the impact of America on international affairs, argues Tony Smith. Here for the first time is a book that documents the extraordinary history of American foreign policy with respect to the promotion of democracy worldwide, an effort whose greatest triumph came in the occupations of Japan and Germany but whose setbacks include interventions in Latin America and Vietnam. As Americans ponder the challenges of world affairs at the end of the Cold War, Smith suggests that they think back to other times when Washington's decisions were critical: not only to the end of the World Wars in 1918 and 1945, but to the end of the Spanish-American War in 1898 and the Civil War in 1865 as well. They will find that in the aftermath of victory, Washington determined to win the peace by promoting a concept of national security calling ultimately for democratic government in Europe, Latin America, and the Far East. So the Congress set out to "reconstruct" the South in 1867; America aimed to democratize the Philippines in 1898; Wilson sought to "make the world safe for democracy"

America's Mission

The fascinating story of American efforts to liberate and remake Russia since the 1880s.

The American Mission in Egypt

Mission Failure argues that, in the past 25 years, the U.S. military has turned to missions that are largely humanitarian and socio-political - and that this ideologically-driven foreign policy generally leads to failure.

The American Mission and the 'Evil Empire'

The subject of missions-formal efforts at religious conversion of native peoples of the Americas by colonizing powers-is one that renders the modern student a bit uncomfortable. Where the mission enterprise was actuated by true belief it strikes the modern sensibility as fanaticism; where it sprang from territorial or economic motives it seems the rankest sort of hypocrisy. That both elements-greed and real faith-were usually present at the same time is bewildering. In this book seven scholars attempt to create a "new" mission history that deals honestly with the actions and philosophic motivations of the missionaries, both as individuals and organizations and as agents of secular powers, and with the experiences and reactions of the indigenous peoples, including their strategies of accommodation, co-optation, and resistance. The new mission historians examine cases from throughout the hemisphere-from the Andes to northern Mexico to California-in an effort to find patterns in the contact between the European missionaries and the various societies they encountered. Erick Langer is associate professor of history at Carnegie Mellon University. He is the author of *Economic Change and Rural Resistance in Southern Bolivia, 1880-1930* and editor, with Zulema Bass Werner de Ruiz, of *Historia de Tarija: Corpus Documental*. Robert H. Jackson is the author of *Indian Population Decline: The Missions of Northwestern New Spain, 1687-1840* and *Regional Markets and the Agrarian Transformation in Bolivia Cochabamba, 1539-1960*. He is an assistant professor in the Department of History and Geography at Texas Southern University.

The American Mission in Egypt, 1854-1896

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Mission Failure

The overwhelming reality of our time is this: In the opening years of the 21st century, the United States finds itself not only the most powerful nation on earth but the most powerful nation that has ever existed.

Given the contradictory roles America plays in the world, we are fated to be the catalyst for either a new global community or for global chaos. If we don't lead, Zbigniew Brzezinski contends, rather than merely dominate by force, we could face worldwide hostility much like the regional hostility now confronting Israel. Brzezinski argues for a more complex and sophisticated view of our global role than much of our media and political leadership are willing to entertain. We are the world's policeman, but we have to be seen as a fair one. We are entitled to a higher level of security than other nations (because we assume greater risks), but we are also the proponent of essential freedoms. We are uniquely powerful, but our homeland is uniquely -and chronically-vulnerable. "Globalization" precludes immunity for even the most powerful. This is an impressively lucid assessment, informed by decades of experience on the front lines of foreign policy, of where we stand in the world and where we should go from here.

The New Latin American Mission History

Collection of articles about the history of missions from an African-American perspective.

AMER MISSION IN EGYPT 1854-189

Explains the accomplishments of US leadership and the pitfalls the nation encountered due to the tensions between realpolitik and liberal ideology. Through the career of Rusk, the author reflects on the uses and abuses of predominant power in diplomacy, and interprets events and issues.

The Choice

The stereotype of the woman missionary has ranged from that of the long-suffering wife, characterized by the epitaph "Died, given over to hospitality," to that of the spinster in her unstylish dress and wire-rimmed glasses, alone somewhere for thirty years teaching heathen children. Like all caricatures, those of the exhausted wife and frustrated old maid carry some truth: the underlying message of the stereotypes is that missionary women were perceived as marginal to the central tasks of mission. Rather than being remembered for preaching the gospel, the quintessential male task, missionary women were noted for meeting human needs and helping others, sacrificing themselves without plan or reason, all for the sake of bringing the world to Jesus Christ. Historical evidence, however, gives lie to the truism that women missionaries were and are doers but not thinkers, reactive secondary figures rather than proactive primary ones. The first American women to serve as foreign missionaries in 1812 were among the best-educated women of their time. Although barred from obtaining the college education or ministerial credentials of their husbands, the early missionary wives had read their Jonathan Edwards and Samuel Hopkins. Not only did they go abroad with particular theologies to share, but their identities as women caused them to develop gender-based mission theories. Early nineteenth-century women seldom wrote theologies of mission, but they wrote letters and kept journals that reveal a thought world and set of assumptions about women's roles in the missionary task. The activities of missionary wives were not random: they were part of a mission strategy that gave women a particular role in the advancement of the reign of God. By moving from mission field to mission field in chronological order of missionary presence, Robert charts missiological developments as they took place in dialogue with the urgent context of the day. Each case study marks the beginning of the mission theory. Baptist women in Burma, for example, are only considered in their first decades there and are not traced into the present. Robert believes that at this early stage of research into women's mission theory, integrity and analysis lies more in a succession of contextualized case studies than in gross generalizations.

African-American Experience in World Mission

Before this book first appeared in 1963, most historians wrote as if the continental expansion of the United States were inevitable. "What is most impressive," Henry Steele Commager and Richard Morris declared in 1956, "is the ease, the simplicity, and seeming inevitability of the whole process." The notion of inevitability, however, is perhaps only a secular variation on the theme of the expansionist editor John L. O'Sullivan, who in 1845 coined one of the most famous phrases in American history when he wrote of "our manifest destiny to overspread the continent allotted by Providence for the free development of our yearly multiplying millions." Frederick Merk rejected inevitability in favor of a more contingent interpretation of American expansionism in the 1840s. As his student Henry May later recalled, Merk "loved to get the facts straight." --From the Foreword by John Mack Faragher

Dean Rusk

Foreword by Ravi K. Zacharias "Doctors for the Kingdom tells the amazing yet little-known story of the medical mission of the Reformed Church in America in the kingdom of Saudi Arabia. By piecing together archival records, first-person accounts from the past century, and more than 100 photographs and maps, Dr. Paul Armerding -- head of the American Mission Hospital in Bahrain -- chronicles the history and leaders of this extraordinary medical mission. At once educational and inspiring, "Doctors for the Kingdom offers a portrait of Christian-Muslim relations that stands in stark contrast to the picture presented by much of today's media.

American Women in Mission

One of NPR's Best Books of 2014! After witnessing a devastating incident in Darfur, Alex Baines is stripped of his security clearance and relegated to a desk job. He's about to resign when his former mentor—now the current Ambassador to the Congo—offers him an opportunity to start over. But the post isn't what Alex imagined. The US company Consolidated Mining seems to be everywhere. When a hostage situation involving a survey team arises, Alex is sent in, finding himself in the middle of the conflict with a guerilla leader and Marie Tsiolo, a native geologist on the team. As violence escalates in the region, Alex struggles to balance the interests of the U.S. with the greater good of the people of the Congo—and somehow stay alive.

Manifest Destiny and Mission in American History

In 1854, American Presbyterian missionaries arrived in Egypt as part of a larger Anglo-American Protestant movement aiming for worldwide evangelization. Protected by British imperial power, and later by mounting American global influence, their enterprise flourished during the next century. American Evangelicals in Egypt follows the ongoing and often unexpected transformations initiated by missionary activities between the mid-nineteenth century and 1967--when the Six-Day Arab-Israeli War uprooted the Americans in Egypt. Heather Sharkey uses Arabic and English sources to shed light on the many facets of missionary encounters with Egyptians. These occurred through institutions, such as schools and hospitals, and through literacy programs and rural development projects that anticipated later efforts of NGOs. To Egyptian Muslims and Coptic Christians, missionaries presented new models for civic participation and for women's roles in collective worship and community life. At the same time, missionary efforts to convert Muslims and reform Copts stimulated new forms of Egyptian social activism and prompted nationalists to enact laws restricting missionary activities. Faced by Islamic strictures and customs regarding apostasy and conversion, and by expectations regarding the proper structure of Christian-Muslim relations, missionaries in Egypt set off debates about religious liberty that reverberate even today. Ultimately, the missionary experience in Egypt led to reconsiderations of mission policy and evangelism in ways that had long-term repercussions for the culture of American Protestantism.

Doctors for the Kingdom

The Great American Mission traces how America's global modernization efforts during the twentieth century were a means to remake the world in its own image. David Ekbladh shows that the emerging concept of modernization combined existing development ideas from the Depression. He describes how ambitious New Deal programs like the Tennessee Valley Authority became symbols of American liberalism's ability to marshal the social sciences, state planning, civil society, and technology to produce extensive social and economic change. For proponents, it became a valuable weapon to check the influence of menacing ideologies such as Fascism and Communism. Modernization took on profound geopolitical importance as the United States grappled with these threats. After World War II, modernization remained a means to contain the growing influence of the Soviet Union. Ekbladh demonstrates how U.S.-led nation-building efforts in global hot spots, enlisting an array of nongovernmental groups and international organizations, were a basic part of American strategy in the Cold War. However, a close connection to the Vietnam War and the upheavals of the 1960s would discredit modernization. The end of the Cold War further obscured modernization's mission, but many of its assumptions regained prominence after September 11 as the United States moved to contain new threats. Using new sources and perspectives, The Great American Mission offers new and challenging interpretations of America's ideological motivations and humanitarian responsibilities abroad.

The American Mission

The American Board of Commissioners for Foreign Missions (ABCFM) was the country's first creator of overseas Christian missions. Founded in 1810 and supported by a coalition of Calvinist denominations, the ABCFM established the first American missions in India, China, Africa, Oceania, the Middle East, and many other places. It was America's largest missionary organization in the nineteenth century, and its influence was immense. Its missionaries established the first Western schools and hospitals in many parts of the world, and they successfully promoted women's rights and other ideals from the Enlightenment. They also transformed oral languages such as Zulu, Hawaiian, and Cherokee into written form, and they preserved many elements of premodern cultures (albeit not always intentionally). The contributors to this book provide valuable insights on the work of the ABCFM (which exists today under a different name). Some of the contributors profile the lives of notable ABCFM missionaries, others focus on ideological shifts within the Board, and still others chronicle the Board's role in historic events, including the Opium Wars, the colonization of Hawai'i, and the Armenian Genocide. From reading this book, people will come to understand why the ABCFM is widely viewed as America's most historically significant missionary organization.

Vindicating a Vision

Christianity Today Book Award of Merit Winner Outreach Magazine Resource of the Year The world has changed. A century ago, Christianity was still primarily centered in North America and Europe. By the dawn of the twenty-first century, Christianity had become a truly global faith, with Christians in Asia, Africa and Latin America outpacing those in the rest of the world. There are now more Christians in China than in all of Europe, more Pentecostals in Brazil than in the United States, and more Anglicans in Kenya than in Great Britain, Canada and the United States combined. Countries that were once destinations for western missionaries are now sending their own missionaries to North America. Given these changes, some think the day of the Western missionary is over. Some are wary that American mission efforts may perpetuate an imperialistic colonialism. Some say that global outreach is best left to indigenous leaders. Others simply feel that resources should be focused on the home front. Is there an ongoing role for the North American church in global mission? Missions specialist Paul Borthwick brings an urgent report on how the Western church can best continue in global mission. He provides a current analysis of the state of the world and how Majority World leaders perceive North American Christians' place. Borthwick offers concrete advice for how Western Christians can be involved without being paternalistic or creating dependency. Using their human and material resources with wise and strategic stewardship, North Americans can join forces with the Majority World in new, interdependent ways to answer God's call to global involvement. In this critical age, the global body of Christ needs one another more than ever. Discover how the Western church can contribute to a new era of mission marked by mutuality, reciprocity and humility.

American Evangelicals in Egypt

"I am not a civil rights hero. I am a warrior, and I am on a mission from God." —James Meredith James Meredith engineered two of the most epic events of the American civil rights era: the desegregation of the University of Mississippi in 1962, which helped open the doors of education to all Americans; and

the March Against Fear in 1966, which helped open the floodgates of voter registration in the South. Part memoir, part manifesto, *A Mission from God* is James Meredith's look back at his courageous and action-packed life and his challenge to America to address the most critical issue of our day: how to educate and uplift the millions of black and white Americans who remain locked in the chains of poverty by improving our public education system. Born on a small farm in Mississippi, Meredith returned home in 1960 after nine years in the U.S. Air Force, with a master plan to shatter the system of state terror and white supremacy in America. He waged a fourteen-month legal campaign to force the state of Mississippi to honor his rights as an American citizen and admit him to the University of Mississippi. He fought the case all the way to the Supreme Court and won. Meredith endured months of death threats, daily verbal abuse, and round-the-clock protection from federal marshals and thousands of troops to become the first black graduate of the University of Mississippi in 1963. In 1966 he was shot by a sniper on the second day of his "Walk Against Fear" to inspire voter registration in Mississippi. Though Meredith never allied with traditional civil rights groups, leaders of civil rights organizations flocked to help him complete the march, one of the last great marches of the civil rights era. Decades later, Meredith says, "Now it is time for our next great mission from God. . . . You and I have a divine responsibility to transform America."

Report of the Madura American Mission for 1850

The complex relationship between America and the Arab world goes back further than most people realize. In *Artillery of Heaven*, Ussama Makdisi presents a foundational American encounter with the Arab world that occurred in the nineteenth century, shortly after the arrival of the first American Protestant missionaries in the Middle East. He tells the dramatic tale of the conversion and death of As'ad Shidyaq, the earliest Arab convert to American Protestantism. The struggle over this man's body and soul—and over how his story might be told—changed the actors and cultures on both sides. In the unfamiliar, multireligious landscape of the Middle East, American missionaries at first conflated Arabs with Native Americans and American culture with an uncompromising evangelical Christianity. In turn, their Christian and Muslim opponents in the Ottoman Empire condemned the missionaries as malevolent intruders. Yet during the ensuing confrontation within and across cultures an unanticipated spirit of toleration was born that cannot be credited to either Americans or Arabs alone. Makdisi provides a genuinely transnational narrative for this new, liberal awakening in the Middle East, and the challenges that beset it. By exploring missed opportunities for cultural understanding, by retrieving unused historical evidence, and by juxtaposing for the first time Arab perspectives and archives with American ones, this book counters a notion of an inevitable clash of civilizations and thus reshapes our view of the history of America in the Arab world.

Mission Nexus engages people who serve within the Great Commission with ideas, events, and resources which propel the gospel around the world. Keep connected and informed on Great Commission issues through podcasts, webinars, author interviews, book summaries and reviews, and our entire online media library. Book jacket.

The Great American Mission

From *Hell Hawks!* author Bob Dorr, *Mission to Berlin* takes the reader on a World War II strategic bombing mission from an airfield in East Anglia, England, to Berlin and back. Told largely in the veterans' own words, *Mission to Berlin* covers all aspects of a long-range bombing mission including pilots and other aircrew, groundcrew, and escort fighters that accompanied the heavy bombers on their perilous mission.

The Role of the American Board in the World

"Terrific." —Timothy Egan, *The New York Times* "A riveting investigation of both American myth-making and the real history that lies beneath." —Claudio Saunt, author of *Unworthy Republic* From the *New York Times* bestselling author of *Escape From Camp 14*, a "terrifically readable" (*Los Angeles Times*) account of one of the most persistent "alternative facts" in American history: the story of a missionary, a tribe, a massacre, and a myth that shaped the American West. In 1836, two missionaries and their wives were among the first Americans to cross the Rockies by covered wagon on what would become the Oregon Trail. Dr. Marcus Whitman and Reverend Henry Spalding were headed to present-day Washington state and Idaho, where they aimed to convert members of the Cayuse and Nez Perce

tribes. Both would fail spectacularly as missionaries. But Spalding would succeed as a propagandist, inventing a story that recast his friend as a hero, and helped to fuel the massive westward migration that would eventually lead to the devastation of those they had purportedly set out to save. As Spalding told it, after uncovering a British and Catholic plot to steal the Oregon Territory from the United States, Whitman undertook a heroic solo ride across the country to alert the President. In fact, he had traveled to Washington to save his own job. Soon after his return, Whitman, his wife, and eleven others were massacred by a group of Cayuse. Though they had ample reason - Whitman supported the explosion of white migration that was encroaching on their territory, and seemed to blame for a deadly measles outbreak - the Cayuse were portrayed as murderous savages. Five were executed. This fascinating, impeccably researched narrative traces the ripple effect of these events across the century that followed. While the Cayuse eventually lost the vast majority of their territory, thanks to the efforts of Spalding and others who turned the story to their own purposes, Whitman was celebrated well into the middle of the 20th century for having "saved Oregon." Accounts of his heroic exploits appeared in congressional documents, The New York Times, and Life magazine, and became a central founding myth of the Pacific Northwest. Exposing the hucksterism and self-interest at the root of American myth-making, Murder at the Mission reminds us of the cost of American expansion, and of the problems that can arise when history is told only by the victors.

Western Christians in Global Mission

"David Bosch's Transforming Mission, now available in over a dozen languages, is widely recognized as an historic and magisterial contribution to the study of mission. Examining the entire sweep of Christian tradition, he shows how five paradigms have historically encapsulated the Christian understanding of mission and then outlines the characteristics of an emerging postmodern paradigm dialectically linking the transcendent and imminent dimensions of salvation. In this new anniversary edition, Darrel Guder and Martin Reppenhausen explore the impact of Bosch's work and the unfolding application of his seminal vision." --

Memoir of Sarah B. Judson of the American Mission to Burmah

In this revised edition of The Mission Statement Book, author Jeffrey Abrahams, offers an updated, comprehensive selection of corporate mission statements along with everything you need to know to create a statement that's just right for your organization.
