Life of a Star

Find out about the life cycle of stars from their fiery beginning to their spectacular end.

Bridges: Life of a Star

Set during the Nazi occupation of Prague, Life with a Star records the day-to-day life of Josef Roubicek, an ex-bank clerk, who discovers that the prosaic world he has always inhabited is suddenly off-limits to him because he is a Jew. "One of the most powerful works to emerge from the Holocaust; it is a fierce and necessary work of art".--The New York Times.

Life with a Star

Explains how stars are born, how they evolve and their ultimate fates, for a broad general audience.

The Life and Death of Stars

When Donald Justice wrote in "On a Picture by Burchfield" that "art keeps long hours," he might have been describing his own life. Although he early on struggled to find a balance between his life and art, the latter became a way of experiencing his life more deeply. He found meaning in human experience by applying traditional religious language to his artistic vocation. Central to his work was the translation of the language of devotion to a learned American vernacular. Art not only provided him with a wealth of intrinsically worthwhile experiences but also granted rich and nuanced ways of experiencing, understanding, and being in the world. For Donald Justice--recipient of some of poetry's highest laurels, including the Pulitzer Prize, the Bollingen Prize, and the Lannan Literary Award for Poetry--art was a way of life. Because Jerry Harp was Justice's student, his personal knowledge of his subject--combined with his deep understanding of Justice's oeuvre--works to remarkable advantage in For Us, What Music? Harp reads with keen intelligence, placing each poem within the precise historical moment it was written and locating it in the context of the literary tradition within which Justice worked. Throughout the text runs the narrative of Justice's life, tying together the poems and informing Harp's

interpretation of them. For Us, What Music? grants readers a remarkable understanding of one of America's greatest poets.

The Life of a Star

*Includes pictures *Includes a bibliography for further reading When people look up into the night sky, the stars seem fixed and immutable, as unchanging as the darkness of space itself, but the truth is that stars are born, live and die in a never-ending cycle of creation and annihilation. These cycles stretch over such vast spans of time that, to short-lived humans, they seem to last forever. No one knows just how many stars there are, but their number is almost beyond comprehension. When people look up into the night sky, they can see further than they might guess: up to 19 quadrillion miles, the distance to Deneb in Cygnus, a star that is visible from most inhabited parts of Earth. In total, around five thousand stars are visible to the naked eye, though only around two thousand are visible at any one time from a particular place on Earth. All the visible stars are bigger and brighter than the Sun. Of course, there are many more known stars than those that can be seen with the naked eye. Astronomers estimate that in the Milky Way, there may be more than three hundred billion stars, and every other galaxy may have a similar number of stars. How many galaxies are there in the Universe? Again, no one is certain, but most astronomers agree that there must be many billions. Stars begin as vast clouds of dust and gas within galaxies and are known as nebulae. Due to Newton's Law of Global Attraction, the densest areas in these nebulae pull in matter from the surrounding space. The more mass they gain, the more mass they attract. Over time, this accumulation can lead to the creation of a star. From that moment on, an eternal battle begins: gravity tends to contract the star while its growing inner pressure tends to expand it. Nebulae are stellar nurseries, the places where stars are created and an essential part of the life cycle of the Universe. Stars do not last forever. Over time they gradually lose energy and finally die. This process of the creation of new stars and the gradual death of existing stars is part of a vast, cosmic process of recycling that continues all the time. However, that raises the question of how the very first stars were formed and that in turn leads to questions about the origin of the Universe itself. However, the life cycle of stars also has a direct relationship to life here on Earth. Singer Joni Mitchell famously included the line "we are stardust" in her hit song "Woodstock." Surprisingly, it seems that she was absolutely right. In the beginning, the Universe comprised hydrogen, small quantities of helium, minuscule amounts of lithium and almost nothing else. Stars are the engines that provide the raw material from which life itself as well as stellar bodies are created. Each star is like a factory that uses nuclear fusion to convert hydrogen into helium and that in turn is used to create carbon, nitrogen, oxygen and many other elements. When a star dies, it ejects its outer layers, throwing these elements off as cosmic dust. The gravity of planets attracts and captures this dust which settles on the surface, introducing new elements. It is estimated that more than forty thousand tons of cosmic dust arrives on Earth every year and this process has continued as long as there has been a planet Earth. Some of the tiny pieces of dust (most are smaller than one-hundredth the width of a human hair) are very old indeed. Scientists have found what they call "original stardust" on meteorites and asteroids. Many of these have been drifting in space since before the Sun was created. The elements in this dust are the fundamental building-blocks of life and every living organism on Earth is created from elements that were originally produced in long-dead stars. It seems that humans and everything else on the planet really did begin as stardust.

The Life Cycles of Stars

Stellar evolution - the birth, development and death of stars - is central to our current understanding of astronomy, but surprisingly the majority of amateur astronomers lack a full understanding of the physics of stars. Current books on the market tend to be highly theoretical and off-putting, in Observer's Guide to Stellar Evolution, Mike Inglis brings this subject to life in a unique way. By combining a step-by-step introduction with suggestions for practical observations of stars at different stages in their evolution, amateur astronomers regardless of their current level of knowledge, will find this book fascinating and informative. -Accessible to every amateur astronomer, regardless of background knowledge. -Step-by-step introduction to the theory of stellar evolution. -Includes many examples of

stars at different stages in their evolution, that the reader can observe for him/herself. -Mathematics is made accessible by being presented in 'boxes' that readers can skip over if they prefer!

Life of a Star

Why write a book about the stars? Of what use is their study? This book covers this ground with a number of anecdotes arising from the author's almost 60 years' experience as a research scientist who has worked with some of the largest telescopes in the world. The text exposes much of what is glossed over in the canned information that the public get and holds nothing back with respect to uncertainties within the subject. People want answers, want somehow to be reassured that someone out there has a handle on things. This book details the basis for our knowledge of the universe, warts and all, and offers important insights as to where the science is going.

Observer's Guide to Stellar Evolution

Every atom of our bodies has been part of a star. Our very own star, the Sun, is crucial to the development and sustainability of life on Earth. This Very Short Introduction presents a modern, authoritative examination of how stars live, producing all the chemical elements beyond helium, and how they die, sometimes spectacularly, to end as remnants such as black holes. Andrew King shows how understanding the stars is key to understanding the galaxies they inhabit, and thus the history of our entire Universe, as well as the existence of planets like our own. King presents a fascinating exploration of the science of stars, from the mechanisms that allow stars to form and the processes that allow them to shine, as well as the results of their inevitable death. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Evolution of Stars

In *The Secret Life of Stars*, award-winning astronomer Lisa Harvey-Smith takes us on a cosmic journey to meet some of the weirdest, most extreme, and enigmatic stars in the universe. We all know the Sun, the powerhouse of our solar system, but what about Luyten's Flare, the Rosino-Zwicky Object, or Chantal's variable star? For those whose curiosity takes them far beyond Earth's atmosphere, *The Secret Life of Stars* offers a personal and readily understood introduction to some of the Galaxy's most remarkable stars. Written by award-winning astronomer Lisa Harvey-Smith, each chapter explains various different and unusual stars and their amazing characteristics and attributes, from pulsars, blue stragglers, and white dwarfs, to cannibal stars and explosive supernovae. With beautiful chapter illustrations by Eirian Chapman, this book brings to life the remarkable personalities of these stars, reminding readers what a diverse and unpredictable universe we live in and how fortunate we are to live around a stable star, our Sun.

Stars: A Very Short Introduction

Julius Schlesinger, aspiring SS officer, has received orders to remove from the roof of Prague's concert hall the statue of the Jewish composer Felix Mendelssohn. But which of the figures adorning the roof is the Jew? Remembering his course on racial science, Schlesinger instructs his men to pull down the statue with the biggest nose. Only as the statue they have carefully chosen begins to topple does he recognize that it is not Mendelssohn; it is Richard Wagner. Thus begins a story of disarming simplicity that traces the transformation of ordinary lives in Nazi-occupied Prague. Death abetted by the petty malevolence of Nazi functionaries wins all the battles but ultimately loses the war, defeated by the fragile flowering of courage and defiance.

The Secret Life of Stars

Growing up in the inner city of Chicago is not easy for Star Renee Jones, but neither is dodging the traps her family keep setting for her. Drugs tear the Jones family apart and leaves Star in need of her mother, Diamonds love, but Diamond is also in search of love and finds it in the worst places. As Star grows older and experiences a grievous amount of heartbreak and disappointment, she eventually faces a bitter reality- her survival and success depend solely on the strength of her hustle. Star is determined

not to follow in the vicious,destructive cycle she constantly encounters, yet her own actions will prove if she can end the madness or continue in the cause of her own moral genocide.

Mendelssohn is on the Roof

Living with the Stars tells the fascinating story of what truly makes the human body. The body that is with us all our lives is always changing. We are quite literally not who we were years, weeks, or even days ago: our cells die and are replaced by new ones at an astonishing pace. The entire body continually rebuilds itself, time and again, using the food and water that flow through us as fuel and as construction material. What persists over time is not fixed but merely a pattern in flux. We rebuild using elements captured from our surroundings, and are thereby connected to animals and plants around us, and to the bacteria within us that help digest them, and to geological processes such as continental drift and volcanism here on Earth. We are also intimately linked to the Sun's nuclear furnace and to the solar wind, to collisions with asteroids and to the cycles of the birth of stars and their deaths in cataclysmic supernovae, and ultimately to the beginning of the universe. Our bodies are made of the burned out embers of stars that were released into the galaxy in massive explosions billions of years ago, mixed with atoms that formed only recently as ultrafast rays slammed into Earth's atmosphere. All of that is not just remote history but part of us now: our human body is inseparable from nature all around us and intertwined with the history of the universe.

Life of a Star

In Lives of Stars: From Supernovas to Black Holes, students will learn all about the stars that make up the universe and make observations about the Sun, Moon, and stars to describe patterns that can be predicted. Filled with fun facts, young learners will love exploring the scientific information and drawing conclusions about life now and in the future. The Inside Outer Space series takes readers on an intergalactic journey that unravels the mysteries of the universe. Each 24-page book informs readers in grades K–3 on the Sun, Earth, planets, and stars, while also igniting imaginations about the unknown. Stunning photographs and diagrams engage readers, while text-based questions aid in reading comprehension

Living with the Stars

Cecilia Payne-Gaposchkin was the revolutionary scientific thinker who discovered what stars are made of. But her name is hard to find alongside those of Hubble, Herschel, and other great astronomers. Donovan Moore tells the story of Payne's life of determination against all the obstacles a patriarchal society erected against her.

Lives of Stars

Kirk Hammond was a man alone. He had been chosen to ride in the first manned satellite to go out around the Moon and back to Earth. But when the satellite failed to orbit properly, it went on past the Moon into the vastness of outer space, and a whole world watched helplessly as he was borne toward an unthinkable lonely death. Yet destiny decreed that Kirk Hammond should suffer, not death but a pseudo-death. And he awoke from it to find that a hundred centuries had passed and that the space age which had begun in the 20th Century had now grown into a vast galactic civilization that had carried the sons of Earth to countless stars and worlds. But, unexpectedly, the conquest of space had changed Man himself, and the human race had become not one but several species. Hammond was plunged into the climactic struggle between the new races. And in his quest with a desperate band for the mysterious Star of Life that was the key to the struggle, in his relations with the strange and beautiful Thayn Marden who was not a human woman, in his odyssey through the mighty suns and earthly worlds of the galaxy, a man of the 20th Century found himself facing the dangers of the great space age which he himself helped pioneer.

What Stars Are Made Of

Starting from Newton's times this follow-up to the author's Springer book "Our Place in the Universe - Understanding Fundamental Astronomy from Ancient Discoveries" addresses the question of "our place in the Universe" from astronomical, physical, chemical, biological, philosophical and social perspectives. Using the history of astronomy to illustrate the process of discovery, the emphasis is on the description of the process of how we learned and on the exploration of the impacts of discoveries

rather than on the presentation of facts. Thus readers are informed of the influence of science on a broad scale. Unlike the traditional way of teaching science, in this book, the author begins by describing the observations and then discusses various attempts to find answers (including unsuccessful ones). The goal is to help students develop a better appreciation of the scientific process and learn from this process to tackle real-life problems.

The Star of Life

As the twentieth century closed, Fred Adams and Greg Laughlin captured the attention of the world by identifying the five ages of time. In *The Five Ages of the Universe*, Adams and Laughlin demonstrate that we can now understand the complete life story of the cosmos from beginning to end. Adams and Laughlin have been hailed as the creators of the definitive long-term projection of the evolution of the universe. Their achievement is awesome in its scale and profound in its scientific breadth. But *The Five Ages of the Universe* is more than a handbook of the physical processes that guided our past and will shape our future; it is a truly epic story. Without leaving earth, here is a fantastic voyage to the physics of eternity. It is the only biography of the universe you will ever need.

Our Place in the Universe - II

How are the nuclear power plants we call "stars" formed? Where do they get their energy and how do they die--and what does this suggest about the future of the universe? One of the most popular books written on astrophysics, *100 Billion Suns* provides an exhilarating and authoritative life history of the stars.

The Five Ages of the Universe

100 Billion Suns

"In science fiction there is only a handful of books that stretch the mind—and this is one of them."—Arthur C. Clarke In a moving story of sacrifice and triumph, human scientists establish a relationship with intelligent lifeforms—the cheela—living on Dragon's Egg, a neutron star where one Earth hour is equivalent to hundreds of their years. The cheela culturally evolve from savagery to the discovery of science, and for a brief time, men are their diligent teachers. Praise for *Dragon's Egg* "Bob Forward writes in the tradition of Hal Clement's *Mission of Gravity* and carries it a giant step (how else?) forward."—Isaac Asimov "Dragon's Egg is superb. I couldn't have written it; it required too much real physics."—Larry Niven "This is one for the real science-fiction fan."—Frank Herbert "Robert L. Forward tells a good story and asks a profound question. If we run into a race of creatures who live a hundred years while we live an hour, what can they say to us or we to them?"—Freeman J. Dyson "Forward has impeccable scientific credentials, and . . . big, original, speculative ideas."—The Washington Post

Larger Than Life

A human narrator from England is transported out of his body via unexplained means. He realizes he is able to explore space and other planets. After exploring a civilization on another planet in our galaxy at a level of development similar to our own that existed millions of years ago thousands of light years from Earth (the "Other Earth") in some detail, his mind merges with that of one of its inhabitants, and as they travel together, they are joined by still more minds or group-minds. This snowballing process is paralleled by the expansion of the book's scale, describing more and more planets in less and less detail. The disembodied travelers encounter many ideas that are interesting from both science-fictional and philosophical points of view. *Star Maker* tackles philosophical themes such as the essence of life, of birth, decay and death, and the relationship between creation and creator. A pervading theme is that of progressive unity within and between different civilizations.

Based on author Herbie J Pilato's exclusive interviews with Elizabeth Montgomery prior to her death in 1995, *Twitch Upon a Star* includes insider material and commentary from several individuals associated with her remarkable life and career before, during, and after *Bewitched*, including her classic feature films *The Court Martial of Billy Mitchell* (1955), *Who's Been Sleeping In My Bed?* (1963), and *Johnny Cool* (1963). Two of Montgomery's many popular TV movies, *A Case of Rape* (which remains one of the highest-rated TV-movies of all time) and *The Legend of Lizzie Borden* (which will soon be remade as a feature film), were groundbreaking and remain classics. But *Twitch Upon a Star* also goes behind the scenes to explore Montgomery's political activism, including her early advocacy for AIDS sufferers and the peace movement; her support for all minorities, including the gay community and the disabled; and her controversial participation as narrator of the 1988 feature film documentary *Cover-Up* and its 1991 Oscar-winning sequel, *The Panama Deception* (both of which chronicled the Iran/Contra scandal of the 1980s). The book also explores Montgomery's tumultuous relationships with her father, screen legend Robert Montgomery (she was a liberal; he was a staunch conservative), and her four husbands (including actor Gig Young, who later died in a murder/suicide). Through it all—and to family and friends such as fellow performers Ronny Cox, Sally Kemp, and Florence Henderson—she was just Lizzie: down-to-earth and unaffected, just like Samantha, the "witch-with-a-twitch" Stephens, her most famous role.

New York Times bestselling author and Life Designs, Inc. creator Martha Beck shares her step-by-step program that will guide you to fulfill your own potential and create a joyful life. In this book, you'll start by learning how to read the internal compasses already built into your brain and body--and why you may have spent your life ignoring their signals. As you become reacquainted with your own deepest desires, you'll identify and repair any unconscious beliefs or unhealed emotional wounds that may be blocking your progress. This will change your life, but don't worry--although every life is unique, major transformations have common elements, and Beck provides a map that will guide you through your own life changes. You'll learn how to navigate every stage, from the first flickering appearance of a new dream to the planning and implementation of your own ideal life. Based on Dr. Beck's work as a Harvard-trained sociologist, research associate at Harvard Business School, instructor at Thunderbird Business School, and especially on her experiences with her clients over the last six years, *Finding Your Own North Star* offers thoroughly tested case studies, questionnaires, and exercises to help you articulate your core desires and act on them to build a more satisfying life. "Explorers depend on the North Star when there are no other landmarks in sight. The same relationship exists between you and your right life, the ultimate realization of your potential for happiness. I believe that a knowledge of that perfect life sits inside you just as the North Star sits in its unaltering spot." -- Martha Beck

Star of the Sea

'I would rather have been a pianist than anything,' Sybil Thorndike said late in her life, but posterity would never know her as anything other than a majestic actress of stage and screen, whether alongside Marilyn Monroe and Laurence Olivier, or, most famously, as Bernard Shaw's Saint Joan. In this authorized biography, written with unique access to the Thorndike family archive and using hundreds of her unpublished letters, Jonathan Croall has written an engaging, sympathetic, yet critical account of one of the most remarkable women of the twentieth century. As a young actress, Thorndike spent three years traveling around America, playing over a hundred Shakespearean parts.

Finding Your Own North Star

"Five, six, seven, eight!" Defines the life of actress, dancer, choreographer, and director Miriam Nelson. Miriam's life reads like a 1930's musical. While still in her twenties, she appeared in six Broadway shows. On the day she moved to Los Angeles, Miriam ran into old friend Billy Daniels from New York who took her to lunch at Paramount. During lunch, Miriam ran into another New York friend, Paramount president Buddy de Sylva, who hired her on the spot for *Lady in the Dark* starring Ginger Rogers. Miriam has been dancing with the stars ever since! Nelson has tapped and chasséd with countless stars, including Julie Andrews, Ingrid Bergman, Doris Day, Judy Garland, Bette Davis, Bing Crosby, Gene Kelly, John Travolta and Billy Bob Thornton. Miriam was there for the opening day at Disneyland - Walt Disney hired her to choreograph dance numbers around the Park, including the famous Golden Horseshoe Revue. Miriam's career spans both the famous and infamous eras of stage, screen, and television. Encouraged by friends and family to recall her special "behind the scenes" moments, Miriam sorted through memories, scrapbooks and mountains of photographs to enable readers to share the excitement and anticipation, the joy and the sorrow that chronicled her extraordinary life. Fortunately, for those who love to dance and those who love to watch dance, Miriam Nelson remains an exciting part of the professional American dance scene. "You're a darling girl, Miriam, and I love you for all that you did. God bless you always, your dear friend," - Busby Berkley

Allow Adversity to Refine You, Not Define You "[Britney Ruby Miller] is a change agent who brings the possibility of transformation to all those she leads and influences. From hostess to CEO, Britney leads with courage and humility and impacts the lives of her employees, family members, community, and beyond." —Ford Taylor, Founder, Transformational Leadership Crisis rarely comes with a warning. When blindsided by trauma, betrayal, or soul-crushing news, it's natural to want to give up. Is it possible to rise above calamity and even thrive despite the turmoil? Britney Ruby Miller, entrepreneur and CEO of a nationally ranked, family-owned restaurant group, says yes, it absolutely is. Having faced family tragedy, peer rejection, infidelity, infertility, and a pandemic that threatened not only to close her family's business but also to decimate the restaurant industry, Britney battled back with the winning combination of faith and fight that has led to her five-star life. Britney demonstrates what it means to live authentically and effectively as a strong woman in leadership. With captivating stories and practical applications to lead you deeper into principles for success, this book will show you how to increase your faith and hope in the midst of challenges, setbacks, and even tragedy as you persevere to attain your own Five-Star Life. "Every battle [Britney] has faced has been hard won. The scars she has received have become the stars she has earned.... Sit down. Relax. Enjoy. Savor. You're about to experience a delicious meal." —Kathie Lee Gifford

Living with the Stars

States of Matter is a six-volume set that covers many significant aspects of physical science, including atoms, the structure and properties of matter, the nature of nuclear and chemical reactions, the behavior of matter in motion, and how energy and matter interact within the universe. Designed to complement science curricula, the books present the key concepts, terms, and technologies used by scientists and engineers in dealing with matter in its more common states here on Earth (namely gaseous, liquid, solid) and matter in its more extreme states, such as plasma and Bose-Einstein condensates. Although solids, liquids, and gases may be the three most common states in which matter can be found on Earth, there are numerous other states of matter in existence throughout the observable universe. *Extreme States of Matter* discusses many of these states, including plasma, which humans have learned to artificially produce for use in television sets, and black holes, dark matter, and dark energy, which remain baffling to even the most skilled scientists. The book discusses the big bang and how it shaped the universe and also provides a history of humans' understanding of matter, which has grown exponentially since the observations of the ancient Greeks. The volume also includes information on antimatter Bose-Einstein condensate characteristics of stars nanotechnology Newton, Sir Isaac radioactivity thinking matter wormholes The book contains 80 color photographs and four-color line illustrations, sidebars, the Periodic Table, a chronology, a glossary, a detailed list of print and Internet

resources, and an index. States of Matter is essential for high school students, teachers, and general readers who wish to learn about the discovery and use of matter and all its intriguing properties. Book jacket.

My Life Dancing With The Stars

Throughout the four hundred thousand years that humanity has been collecting fossils, sea urchin fossils, or echinoids, have continually been among the most prized, from the Paleolithic era, when they decorated flint axes, to today, when paleobiologists study them for clues to the earth's history. In *The Star-Crossed Stone*, Kenneth J. McNamara, an expert on fossil echinoids, takes readers on an incredible fossil hunt, with stops in history, paleontology, folklore, mythology, art, religion, and much more. Beginning with prehistoric times, when urchin fossils were used as jewelry, McNamara reveals how the fossil crept into the religious and cultural lives of societies around the world—the roots of the familiar five-pointed star, for example, can be traced to the pattern found on urchins. But McNamara's vision is even broader than that: using our knowledge of early habits of fossil collecting, he explores the evolution of the human mind itself, drawing striking conclusions about humanity's earliest appreciation of beauty and the first stirrings of artistic expression. Along the way, the fossil becomes a nexus through which we meet brilliant eccentrics and visionary archaeologists and develop new insights into topics as seemingly disparate as hieroglyphics, Beowulf, and even church organs. An idiosyncratic celebration of science, nature, and human ingenuity, *The Star-Crossed Stone* is as charming and unforgettable as the fossil at its heart.

Chris Hughes walked away from the sizzling hot, smash hit show *Love Island* as its biggest star. Viewers fell in love with this cheeky, happy-go-lucky guy who surprised people by being unafraid to show his vulnerable side just as readily as having a laugh with his mates in the sun. They were captivated by the rollercoaster relationship between Chris and girlfriend Olivia and entertained by the bromance that developed between Chris and best pal Kem. But what really makes Chris tick? What made this down-to-earth country lad swap life on the farm with his family for red carpets and newspaper front pages? Chris reveals all about his life before the hit reality TV show and how the crippling anxiety he has suffered from before still haunts him to this day. He shares how he has found fame and adjusted to his new life as well as the things he is learning about himself as his life is put under the spotlight for all to see. With his trademark sense of humour and way with words, this is Chris's take on the world, his life laid bare.

Life of Pies

Life of Pies: A light hearted travelogue - one man's search for the perfect pie. "Absolutely brilliant book! This is one of the funniest books I've laid my eyes on in a long long while." People often do strange things upon approaching middle age. They try to solve unanswered questions or come over all obsessive about the most innocuous of activities. Some decide to run a marathon or climb Mount Kilimanjaro or learn to play the guitar. Me? I just wanted to find the perfect pie. We all love pies but who is going to be brave enough to take THAT challenge on. Perhaps the only way to find out is to get some lunatic to spend the best part of two years travelling the country to find out. From Inverurie to St Ives. Cornish Pasties to Steak and Gravy. I am that lunatic and this is my story. There have been books on pies written before but they've always been written by experts. The difference with this one is that it's written by a COMPLETE IDIOT. Part culinary review, part travelogue Life of Pies is written with humour, attention to detail and often downright desperation, the story documents exactly what happens when someone takes their hobby just a little bit too seriously. With 400 pies sampled and exactly 314 reviewed, it also serves as a useful reference point as to where to find the best pastry products throughout the heartlands of the UK and gives a whistle stop tour of Britain's finest pie purveyors. Warning: Life of Pies should not be read on an empty stomach.

Life of Pi

Winner of the 2022 Olivier Award for Best New Play "Life of Pi will make you believe in the power of theatre" (Times). After a cargo ship sinks in the middle of the vast Pacific Ocean, there are five survivors stranded on a lifeboat - a hyena, a zebra, an orangutan, a Royal Bengal tiger, and a sixteen year-old boy named Pi. Time is against them, nature is harsh, who will survive? Based on one of the most extraordinary and best-loved works of fiction - winner of the Man Booker Prize, selling over fifteen million copies worldwide - and featuring breath-taking puppetry and state-of-the-art visuals, Life of Pi is a universally acclaimed, smash hit adaptation of an epic journey of endurance and hope. Adapted by acclaimed playwright Lolita Chakrabarti, this edition was published to coincide with the West End premiere in November 2021.

Max and the Cats

Betrayed by his lover's husband, Max Schmidt, the son of a furrier, escapes from the Nazi authorities in his native Germany and boards a ship bound for Brazil, but when the ship sinks, he is stranded in a lifeboat with only a hungry jaguar for company.

Sir Cumference and the Dragon of Pi

For fans of the Sir Cumference series with Pi on their mind, here is the second installment in this fun look at math and language. This time the math adventure is centered around a potion that changes Sir Cumference into a fire-breathing dragon. Can Radius change him back? Join Radius on his quest through the castle to solve a riddle that will reveal the cure. It lies in discovering the magic number that is the same for all circles. Perfect for parent and teachers who are looking to make math fun and accessible for everyone.

Life of Pie

Life of Pie is unique from all other self help books because it provides a self measurement tool for every major life category, then helps you choose the actions and steps to achieve your desired balance. No matter what your weaknesses are, this book helps you balance them with strengths. In this hectic world, it is easy to find yourself hurtling through life in an out of control fashion, failing to recognize the way you are living. Your life has become reactive as you make it through each day in a barely controlled state of chaos. Everything seems rushed because it is! This book provides you with the structure to get control and achieve the life balance you desire. You can regain the belief that you have a purpose and manage the day instead of reacting to it. You can choose your time intentionally rather than being a victim of muddling through. Live your life proactively versus reactively and you will take back the day. Enjoy the process of regaining control!

Beatrice and Virgil

Henry, an acclaimed writer, receives a letter from an elderly taxidermist that poses an irresistible puzzle. As he is pulled into the world of this strange and calculating man, Henry becomes involved with the lives of a donkey and a howler monkey—named Beatrice and Virgil—the taxidermist's 'guides through hell'. Together the three embark on an epic journey. This novel from Yann Martel's is a profound meditation on life, art and the liberating power of stories

Life of Pi

NOW ON BROADWAY The international bestseller and modern classic of adventure, survival, and the power of storytelling is now an award-winning play. After the sinking of a cargo ship, a solitary lifeboat remains bobbing on the wild blue Pacific. The only survivors from the wreck are a sixteen-year-old boy named Pi, a hyena, a wounded zebra, an orangutan—and a 450-pound Royal Bengal tiger. Soon the tiger has dispatched all but Pi Patel, whose fear, knowledge, and cunning allow him to coexist with the tiger, Richard Parker, for 227 days while lost at sea. When they finally reach the coast of Mexico, Richard Parker flees to the jungle, never to be seen again. The Japanese authorities who interrogate Pi refuse to believe his story and press him to tell them "the truth." After hours of coercion, Pi tells a second story, a story much less fantastical, much more conventional—but is it more true? Life of Pi is at once a realistic, rousing adventure and a meta-tale of survival that explores the redemptive power of storytelling and the transformative nature of fiction. It's a story, as one character puts it, to make you believe in God.

The Smitten Kitchen Cookbook

There is a half-galley kitchen in New York with just a single counter, a tiny stove, pans stacked high in the corner - yet it has conjured up stews and slaws, salsas and pestos, tatins and cheesecakes. All to-die-for. This is Deb Perelman's kitchen. Deb is an ordinary home cook who believes food should be a pleasure and deliciousness a guarantee. So she founded her award-winning blog, where she concocts, tweaks and obsessively tests the best imaginable recipes for the everyday cook.

Harvest

A futuristic satire on the trade in live organs from the Third World to the West. Om, a young man is driven by unemployment to sell his body parts for cash. Guards arrive to make his home into a germ-free zone. When his brother Jeetu returns unexpectedly, he is taken away as the donor. Om can't accept this. Java, his wife, is left alone. Will she too be seduced into selling her body for use by the rich westerners? Harvest won first prize in the first Onassis Cultural Competition for Theatre and was premiered in Greek at the Teatro Texnis, Athens. It has also been performed by a youth theatre in the UK, broadcast by the BBC World Service and made into a feature film, directed by Govind Nihalani, titled Body, which was screened at the Regus London Film Festival. The play is also studied by many colleges and universities to explain how globalisation works. Manjula Padmanabhan Born in Delhi to a diplomat family in 1953, she went to boarding school in her teenage years. After college, her determination to make her own way in life led to works in publishing and media-related fields. She won the Greek Onassis Award for her play Harvest. An award-winning film Deham was made by Govind Nihalani based on the play. She has written one more powerful play, Lights Out! (1984), Hidden Fires is a series of monologues. The Artist's Model (1995) and Sextet are her other works.(1996). She has also authored a collection of short stories, called Kleptomania. Her most recent book, published in 2008, is Escape. Apart from writing newspaper columns she created comic strips. She created Suki, an Indian comic character, which was serialized as a strip in the Sunday Observer. Before 1997 (the year her play Harvest was staged) she was better known as a cartoonist and had a daily cartoon strip in The Pioneer newspaper. As playwright 1984 - "Lights Out" 2003. Harvest. Red Velvet

It's like being at a crossroads - a point of absolute, unequivocal change. It makes the blood rush. Theatre Royal, Covent Garden, 1833. Edmund Kean, the greatest actor of his generation, has collapsed on stage whilst playing Othello. A young black American actor has been asked to take over the role. But as the public riot in the streets over the abolition of slavery, how will the cast, critics and audience react to the revolution taking place in the theatre? Lolita Chakrabarti's play creates imagined experiences based on the little-known, but true, story of Ira Aldridge, an African-American actor who, in the nineteenth century, built an incredible reputation on the stages of London and Europe. Red Velvet received its world premiere at the Tricycle Theatre, London, on 11 October 2012, starring Adrian Lester as Ira Aldridge. It was revived at the Tricycle Theatre on 23 January 2014, before transferring to St Ann's Warehouse, New York, on 25 March 2014. This second edition includes the revisions made to the script for the 2014 revival of the play. It also features contextual articles by Lolita Chakrabarti about the real Ira Aldridge, and a piece by Professor Ayanna Thompson about the significance of Aldridge's erasure from standard theatre history and the importance of the play in this regard.

As Nice As Pie

Mavis loves to bake and when a little bird is after a few crumbs she is happy to supply them. As more birds get wind of her generosity however, Mavis finds herself run ragged! So she cooks up a plan to get those lazy birds to help her achieve her dream. A brilliantly fun, rhyming story with a large menagerie of greedy birds! This debut story by Gary Sheppard is sure to become a favourite.

The Story of Lucy Gault

Shortlisted for the 2002 Man Booker Prize 'A masterwork. I doubt that I have read a book as moving in at least a decade. A homage to the redemptive power of love' Independent Summer, 1921. Eight-year-old Lucy Gault clings to the glens and woods above Lahardane - the home her family is being forced to abandon. She knows the Gaults are no longer welcome in Ireland and that danger threatens. Lucy, however, is headstrong and decides that somehow she must force her parents into staying. But the path she chooses ends in disaster. One chance event, unwanted and unexpected, will blight the lives of the Gaults for years to come and bind each of them in different ways to this one moment in time, to this wild stretch of coast . . . 'Flawless. Guaranteed to keep you reading - all through the night if necessary - to find out what happens. Trevor's best novel' New Statesman 'Dark, elegantly written ... a book to relish' Independent on Sunday

Pog

'One of a kind. Utterly fantastic.' Eoin Colfer on Tin David and Penny's strange new home is surrounded by forest. It's the childhood home of their mother, who's recently died. But other creatures live here ... magical creatures, like tiny, hairy Pog. He's one of the First Folk, protecting the boundary between the worlds. As the children explore, they discover monsters slipping through from the place on the other side of the cellar door. Meanwhile, David is drawn into the woods by something darker, which insists there's a way he can bring his mother back ...

Anti-Intellectualism in American Life

Winner of the 1964 Pulitzer Prize in Nonfiction Anti-Intellectualism in American Life is a book which throws light on many features of the American character. Its concern is not merely to portray the scornors of intellect in American life, but to say something about what the intellectual is, and can be, as a force in a democratic society. "As Mr. Hofstadter unfolds the fascinating story, it is no crude battle of eggheads and fatheads. It is a rich, complex, shifting picture of the life of the mind in a society dominated by the ideal of practical success." —Robert Peel in the Christian Science Monitor

Life of Pi (Hindi)

Novel based on human-animal relationships.

The Son Rises

Is the Christian message of Jesus Christ and his resurrection true? Using ten lines of historical evidence, Dr. Craig defends the probability that Jesus was resurrected following his crucifixion. He examines the origin of the Christian movement, and more provocative subjects, such as the Shroud of Turin, parapsychological phenomena and hallucinations.

Violet and the Pie of Life

There's no golden ratio for a family, despite what number-crunching Violet might think. Twelve-year-old Violet has two great loves in her life: math and pie. And she loves her parents, even though her mom never stops nagging and her dad can be unreliable. Mom plus Dad doesn't equal perfection. Still, Violet knows her parents could solve their problems if they just applied simple math. #1: Adjust the ratio of Mom's nagging to her compliments. #2: Multiply Dad's funny stories by a factor of three. #3: Add in romantic stuff wherever possible. But when her dad walks out, Violet realizes that the odds do not look good. Why can't her parents get along like popular, perfect Ally's parents? Would it be better to have no dad at all, like her best friend, McKenzie? Violet is considering the data when she and Ally get cast in the school play, and McKenzie doesn't--a probability that Violet never calculated. Maybe friendship and family have more variables than she thought. Filled with warmth, math-y humor, and delicious pie, this heartfelt middle grade read is perfect for fans of The Miscalculations of Lightning Girl. Includes illustrated charts, graphs, and diagrams throughout.

Family Matters

Nariman Vakeel is a seventy-nine-year-old Parsi widower beset by Parkinson's disease and haunted by memories of the past. He lives with his two middle-aged step-children. When Nariman's illness is compounded by a broken ankle, he's forced to take up residence with his daughter Roxana, her husband Yezad and their two young sons. This new responsibility for Yezad, who is already besieged

by financial worries, proves too much and pushes him into a scheme of deception - with devastating consequences. Wise and compassionate, Family Matters has all the richness, the gentle humour and the narrative sweep that have earned Rohinton Mistry the highest accolades. 'It is rare to discover a novel in which the characters are so well drawn that you feel wrapped up in their problems, rather than just privy to them.' Independent on Sunday 'A brilliant novel from one of India's finest living novelists.' Observer

Vulgar Things

The second novel from Lee Rourke, author of the cult hit 'The Canal'.

The High Mountains of Portugal

THE INTERNATIONAL BESTSELLER Lost in Portugal. Lost to grief. With nothing but a chimpanzee. A man thrown backwards by heartbreak goes in search of an artefact that could unsettle history. A woman carries her husband to a doctor in a suitcase. A Canadian senator begins a new life, in a new country, in the company of a chimp called Odo. From these stories of journeying, of loss and faith, Yann Martel makes a novel unlike any other: moving, profound and magical. Dirt Music

Booker Prize nominee Tim Winton continues to astonish critics and captivate readers with this Australian love story about people stifled by grief and regret; a novel about the odds of breaking with the past.

The Facts Behind the Helsinki Roccamatios

This superb collection, hailed for its power, compassion and elegance, takes in the wide sweep of human experience. From the last hours of a condemned man, to the imaginary life of an AIDS patient, to the first performance of a bizarre new symphony, Yann Martel's stories are moving, thought-provoking and as inventive in form as they are timeless in content. They display the startling mix of dazzle and depth that has made him an international phenomenon.

Freedom Libraries

This book delves into how Freedom Libraries were at the heart of the Civil Rights Movement, and the remarkable courage of the people who used them. As the Civil Rights Movement exploded across the United States, numerous libraries were desegregated on paper only, and there was another virtually unheard of struggle—the right to read.

Lebanon

A reflective examination of everyday life in Lebanon in times of precarity and political torpor.

Self

From the author of Life of Pi, comes an edgy, funny and devastating novel. Self is the fictional autobiography of a young writer at the heart of which is a startling twist. This extraordinary life meanders through a rich, complicated, bittersweet world. The discoveries of childhood give way to the thousand pangs of adolescence, culminating in the sudden shocking news of an accident abroad. And as adulthood begins, indecisively, boundaries are crossed between countries, languages and people .

The Melody

From the Man Booker shortlisted author of Harvest. Alfred Busi, famed in his town for his music and songs, is mourning the recent death of his wife and quietly living out his days in the large villa he has always called home. Then one night Busi is attacked by a creature he disturbs as it raids the contents of his larder. Busi is convinced that what assaulted him was no animal, but a child, 'innocent and wild', and his words fan the flames of old rumour – of an ancient race of people living in the bosk surrounding

the town – and new controversy: the town's paupers, the feral wastrels at its edges, must be dealt with. Once and for all. Lyrical and warm, intimate and epic, *The Melody* by Jim Crace tracks the few days that will see Busi and the town he loves altered irrevocably. This is a story about grief and ageing, about reputation and the loss of it, about love and music and the peculiar way myth seeps into real life. And it is a political novel too – a rallying cry to protect those we persecute. 'The Melody takes its place among his finest [novels] . . . an ecological fable for modern times' Guardian

The Pie Life

In her latest book, *The Pie Life*, work life balance expert, Harvard MBA and radio host Samantha Ettus offers women a powerful but simple framework for balancing a successful career with a fulfilling personal life. Having worked with thousands of women over the past two decades, Ettus knows what it takes to sustain thriving personal and professional lives at the same time. With its unique combination of inspiring stories, motivational messages and practical solutions, *The Pie Life* will turn everything you know about work-life balance on its head. Soon you'll be baking up a lifestyle that is more satisfying, rich, and delicious than you ever thought possible.

Operating Systems

"This book is organized around three concepts fundamental to OS construction: virtualization (of CPU and memory), concurrency (locks and condition variables), and persistence (disks, RAIDS, and file systems"--Back cover.

Tide

From Cnut to D-Day: the history and science of the unceasing tide explored for the first time. Half of the world's population lives in coastal regions lapped by tidal waters. Yet how little most of us know about the tide. Our ability to predict and understand the tide depends on centuries of science, from the observations of Aristotle and the theories of Newton to today's supercomputer calculations. This story is punctuated here by notable tidal episodes in history, from Caesar's thwarted invasion of Britain to the catastrophic flooding of Venice, and interwoven with a rich folklore that continues to inspire art and literature today. With Aldersey-Williams as our guide to the most feared and celebrated tidal features on the planet, from the original maelstrøm in Scandinavia to the world's highest tides in Nova Scotia to the crumbling coast of East Anglia, the importance of the tide, and the way it has shaped - and will continue to shape - our civilization, becomes startlingly clear.

Life of Pi by Yann Martel (Book Analysis)

Unlock the more straightforward side of *Life of Pi* with this concise and insightful summary and analysis! This engaging summary presents an analysis of *Life of Pi* by Yann Martel, a powerful novel about the stories we tell ourselves and others and the nature of belief. It tells the story of Piscine "Pi" Patel, a young Indian man whose family of zookeepers decides to immigrate to Canada due to the political instability in India. However, their ship is capsized by a storm, causing the deaths of everyone on board except Pi, who escapes on a lifeboat with a number of animals. Most of the animals quickly kill and eat each other, except Richard Parker, a Bengal tiger. Pi forms a tentative alliance with Richard Parker, and together they manage to overcome the many perils of the ocean and make their way back to shore – assuming, that is, that Pi's account of his adventures is truthful. *Life of Pi* is the best-known novel by the Canadian author Yann Martel, and won the 2002 Man Booker Prize. It was also adapted into an Oscar-winning film by the director Ang Lee in 2010. Find out everything you need to know about *Life of Pi* in a fraction of the time! The Necessary Angel

Max Jackson, a New Zealander living and lecturing in Paris, has a complicated arrangement with his estranged French wife, Louise. In love with his younger Sorbonne colleague Sylvie, he finds himself entangled with Helen, a troubled young English student. When a Cezanne painting goes missing from

Louise's apartment, the boundaries he has struggled to maintain threaten to collapse. Infused with literary musings and the spirit of Paris, *The Necessary Angel* is as much an ode to the power of literature as a nuanced exploration of love, fidelity and the balance of power within relationships.

Life of Pi

Following on from the short book *Fifty Shades of Nagging*, this is the republished title originally released as *Life of Pie*, but renamed to *Fifty Shades of Nagging 2*. With over 150 pages, still a short book but packed with more funny anecdotes and contra opinion from what one partner will perceive as 'nagging' from the other. This sequel takes the reader through a journey of life, hence the original title "Life of Pie" whereby the different ages of a woman are discussed. From daughters that nag daddy from an early age, teenagers, little women, middle age and to silver surf nagging from mothers and elderly couples. To compensate for the non intentional misogynistic view from a man, there is plenty of counter argument included throughout the book, culminating in a chapter on the clear inadequacies of the male of the species, a "Life of Bragging" While the title change is primarily to boost awareness the content is the same as "Life of Pie," which is still available as an eBook download on the original ISBN's.

Fifty Shades of Nagging 2

From the award-winning author of *SO B. IT*, a story about family, friendship, and...pie! When Alice's Aunt Polly, the Pie Queen of Ipswich, passes away, she takes with her the secret to her world-famous pie-crust recipe. Or does she? In her will, Polly leaves the recipe to her extraordinarily fat, remarkably disagreeable cat, Lardo . . . and then leaves Lardo in the care of Alice. Suddenly, the whole town is wondering how you leave a recipe to a cat. Everyone wants to be the next big pie-contest winner, and it's making them pie-crazy. It's up to Alice and her friend Charlie to put the pieces together and discover the not-so-secret recipe for happiness: Friendship. Family. And the pleasure of doing something for the right reason. With *Pie*, acclaimed author Sarah Weeks has baked up a sweet and satisfying delight, as inviting as warm pie on a cold day. You'll enjoy every last bite.

Pie (Scholastic Gold)

Few twentieth-century writers on architecture and design have enjoyed the renown of Reyner Banham. Born and trained in England and a U.S. resident starting in 1976, Banham wrote incisively about American and European buildings and culture. Now readers can enjoy a chronological cross-section of essays, polemics, and reviews drawn from more than three decades of Banham's writings. The volume, which includes discussions of Italian Futurism, Adolf Loos, Paul Scheerbart, and the Bauhaus as well as explorations of contemporary architecture by Frank Gehry, James Stirling, and Norman Foster, conveys the full range of Banham's belief in industrial and technological development as the motor of architectural evolution. Banham's interests and passions ranged from architecture and the culture of pop art to urban and industrial design. In brilliant analyses of automobile styling, mobile homes, science fiction films, and the American predilection for gadgets, he anticipated many of the preoccupations of contemporary cultural studies. Los Angeles, the city that Banham commemorated in a book and a film, receives extensive attention in essays on the Santa Monica Pier, the Getty Museum, Forest Lawn cemetery, and the ubiquitous freeway system. Eminently readable, provocative, and entertaining, this book is certain to consolidate Banham's reputation among architects and students of contemporary culture. For those acquainted with his writing, it offers welcome surprises as well as familiar delights. For those encountering Banham for the first time, it comprises the perfect introduction.

A revolutionary guidebook to achieving peace of mind by seeking the roots of human behavior in character and by learning principles rather than just practices. Covey's method is a pathway to wisdom and power.

A Critic Writes

Diversely illustrated with 275 photographs and illustrations, *The Making of Life of Pi* tells the inside story of how renowned Academy Award-winning director Ang Lee brought Yann Martel's international bestseller to life as a 3-D film. With a rich, entertaining text and a wide variety of facts, anecdotes, visual portfolios, and sidebars sure to delight readers of all ages, *The Making of Life of Pi* follows the making of the film from pre-production through final cut. Of course, you'll meet Suraj Sharma,

the sixteen-year-old unknown Indian high-school student who won the part of Pi although he had no acting experience and didn't even know how to swim—yet in the end performed all of his own stunts. You'll learn about the massive wave tank, custom-built for the film that replicated a vast, stormy ocean in all its moods, thanks to a complex and specially devised menu of wave and wind combinations, some really powerful machinery, and tons of water. You'll get to look inside the fifty-page fully illustrated "survival guide" that shipwreck survivor Steven Callahan created for Pi to consult on his raft. And you'll read about King, Themis, Minh, and Jonas, the four Bengal tigers used in the film—and discover how visual effects were able to create a seamless 3-D image of the tiger Richard Parker. A foreword by Yann Martel, an introduction by Ang Lee, and an incredible range of visual materials—fine art, vintage archival imagery, and commissioned portfolios by photographer Mary Ellen Mark and artist Alexis Rockman—supplement the film's storyboards, sketches, and stills, rounding out this highly experiential book for lovers of the novel and film viewers alike.

The Making of Life of Pi

"I think this book is kind of malleable. I've never really wanted to put it away and be done with it forever -- the second I first 'finished' it, I wanted to dig back in and change everything around. So I'm looking forward to getting back into the text, and straightening and focusing and deleting. Most of all, I'm thrilled that Vintage will be letting me include all the cool chase scenes, previously censored." -- Dave Eggers
The literary sensation of the year, a book that redefines both family and narrative for the twenty-first century. A Heartbreaking Work of Staggering Genius is the moving memoir of a college senior who, in the space of five weeks, loses both of his parents to cancer and inherits his seven-year-old brother. Here is an exhilarating debut that manages to be simultaneously hilarious and wildly inventive as well as a deeply heartfelt story of the love that holds a family together. A Heartbreaking Work of Staggering Genius is an instant classic that will be read in paperback for decades to come. PAPERBACK EDITION -- 15% MORE STAGGERING - Eggers has written 15,000 additional words for the Vintage Canada edition, including an entirely new appendix.

Karachi Vice

Karachi. Pakistan's largest city is a sprawling metropolis of 20 million people. It is a place of political turbulence in which those who have power wield it with brutal and partisan force, a place in which it pays to have friends in the right places and to avoid making deadly enemies. It is a society where lavish wealth and absolute poverty live side by side, and where the lines between idealism and corruption can quickly blur. It takes an insider to know where is safe, who to trust, and what makes Karachi tick, and in this powerful debut, Samira Shackle explores the city of her mother's birth in the company of a handful of Karachiites. Among them is Safdar the ambulance driver, who knows the city's streets and shortcuts intimately and will stop at nothing to help his fellow citizens. There is Parveen, the activist whose outspoken views on injustice corruption repeatedly lead her towards danger. And there is Zille, the hardened journalist whose commitment to getting the best scoops puts him at increasing risk. As their individual experiences unfold, so Shackle tells the bigger story of Karachi over the past decade: a period in which the Taliban arrive in Pakistan, adding to the daily perils for its residents and pushing their city into the international spotlight. Writing with intimate local knowledge and a global perspective, Shackle paints a nuanced and vivid portrait of one of the most complex, most compelling cities in the world.

Life of Vice

Life of Vice is the story of overwhelmed reporter Shelby Ambrose's experience covering the debauched Las Vegas antics of rock star Becky Vice. Over a ridiculous weekend the pair will get into trouble at casinos, adult entertainment awards, and pro-wrestling matches; but most of all they will become friends.

The Unpunished Vice

The chief art critic of the "New York Times" delivers an uplifting art-is-good-for-you message that goes far beyond what's found in galleries and museums.

The Accidental Masterpiece

"Vice Patrol: Cops, Courts, and the Struggle over Urban Gay Life chronicles how local police and criminal justice systems intruded on gay individuals, criminalizing, profiling, surveilling, and prosecuting them from the 1930's through the 1960's. Anna Lvovsky details the progression of enforcement strategies through the targeting of gay-friendly bars by liquor boards, enticement of sexual overtures by plainclothes police decoys, and surveilling of public bathrooms via peepholes and two-way mirrors to catch someone "in the act." Lvovsky shows how the use of tactics indistinguishable from entrapment to criminalize homosexual men in public and private spaces produced charges brought forward and disputed by attorneys and evidence that had to stand before judges, who at times intervened against punitive policies. In Vice Patrol the author demonstrates how developments in the psychological, medical, and sociological handling of homosexuality filtered into police stations, courthouses, and the wider culture"--

The Beauties of History

This is a story that spans from 1955 to sometime about 2045. It is a four-part story of a family originating from Cape Coast and Dowyaaniyili in the Northern Region, the story of a northern prince Dowbia Zangina that marries a German/Fante screen idol called Mercedes Huntman who loves him dearly and agree to move with him to the Dowyaaniyili, where he becomes chief after the death of his father. A military government throws him into Nsawam Medium Prison for allegedly collaborating with his journalist friend Ernest Dzigbordi to overthrow the military junta, and regains his freedom when a democratically elected government takes over. Their Granddaughter Raabia Sedzro goes into politics and becomes the first woman president of her country. She is a successful president and all her good works are cut short when she is assassinated in 2031. The story of President Lankwei Addison takes the reader into campaign travels to the hinterland of Ghana, including some factual events in the governments of Presidents Rawlings, Kufuor, and Atta Mills. Part Four of the story is drum narrations of historical occurrences not told in the first three parts. As recorded by a media guru Dowbia Yousif, the grandson of Mercedes Huntman.

Priceless

A Pocket Guide to Goodness Few writers have inspired more readers than author C. S. Lewis -- both through the enchanting volumes of his children's series and through his captivating adult classics such as Mere Christianity, The Screwtape Letters, The Great Divorce, and numerous others. Drawn from many works, this volume collects dictionary-like entries of Lewis's keenest observations and best advice on how to live a truly good life. From ambition to charity, despair to duty, hope to humility, Lewis delivers clear, illuminating definitions to live by.

The Portrait of Life, Or the Various Effects of Virtue and Vice Delineated

Chelsea lived an extraordinary life full of pain, grief, and triumph. She tells her story about her painful upbringing, years she spent as an exotic dancer, and leaving a world of hurt and pain behind to explore a life of happiness, forgiveness, and God. She now has been married for over five years to her husband and they have two wonderful children. Chelsea found a way to make a change, even when it seemed impossible, with the help of God.

Vice & Virtue in Everyday Life: Introductory Readings in Ethics

A comprehensive and provocative collection of both classical and contemporary voices in perennial ethical debates, VICE AND VIRTUE has established itself as one of the truly outstanding anthologies for Introduction to Ethics Courses. In contradistinction to many other introduction to ethics books that focus on the application of moral theories to various institutionally based social dilemmas, VICE AND VIRTUE is unabashedly committed to the exploration of private, individual virtue and responsibility. This book provides both an overview of seminal ethical theories as well as many stimulating readings chosen to encourage students' own reflection on how these abstract theories impact decisions they face individually in their everyday lives.
