Parenting Matters

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance,

parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Centuries ago a mysterious family of mad geniuses split into five clans; feuding, hiding, hoarding their secrets of fighting and art, magic and science. Now at the dawn of the mechanical 19th century, only the five clans united can hold back the blood-red tide of industrial apocalypse. Unless they dive into it laughing. I did say 'mad'

The Breeder's Gazette

Over the course of almost half a century, puppeteer Ronnie Le Drew has worked with the greats – from David Bowie in Labyrinth to Michael Caine in The Muppet Christmas Carol. But the role that defined his career was Rainbow's Zippy, who he operated for more than twenty years. Zippy and Me is the first time a Rainbow insider has told the true story of what went on under the counter and inside the suits: the petty squabbles between performers, wrangling with TV executives, and scandals such as the 'love triangle' between musicians Rod, Jane and Freddy. Not to mention the now infamous X-rated episode shot for an ITV Christmas party, which subsequently found its way to the Sun. Interweaved with the dirt on what really went on behind the scenes is the story of Rainbow's heyday in the 1970s and 80s, when its stars found themselves catapulted into an exciting showbiz world – scooping a BAFTA award and even performing for the queen – and the story of a young lad from a south London council estate who defied his parents' protests to become one of the most respected puppeteers of all time.

The end of empire, a romantic story and the social life and culture of an elite British colony - these are the fascinating themes to emerge from this unique collection of letters and diary entries. It is an inside story of Northern Nigeria's independence and of a clash of cultures. Tim Johnston's family was rich in patrician imperial tradition; his father and two uncles were in the 'heaven-born' Indian Civil Service and Tim spent his early years in the Punjab. After his degree at Oxford and the Oxford Colonial Administrative Service course he joined the British Colonial Service in Northern Nigeria. Berrice came from a very different background - a broken home and work in a dress-shop at the age of 14. War service provided a powerful and romantic link: Tim became a war hero and decorated fighter pilot, Berrice joined the ATS and they were married in 1942. Tim returned to Northern Nigeria after the war and was marked as a high flyer. He served a successful apprenticeship as cadet, District Officer and Permanent Secretary to the first Premier of Northern Nigeria, the redoubtable Ahmadu Bello, ultimately becoming Deputy Governor - vital roles in the path to independence. But Berrice could never adjust to the role of 'senior wife' in the social life of the colony. Her inner feelings of self-doubt could lead to aloofness, even a 'frostiness'. She confessed to Lady Sharwood-Smith, the Governor's wife, 'I am not naturally a very social person'. Carolyn Johnston has woven together a series of delightful and revealing letters and diary entries from her parents which show both the social tensions of colonial life and illuminate Northern Nigeria on the brink of independence. 'Harmattan, A Wind of Change' is a rich treasure-house for scholars studying the end of empire and for readers who want to know about the personal impact of empire.

I suppose that I, Humphrey Arbuthnot, should begin this history in which Destiny has caused me to play so prominent a part, with some short account of myself and of my circumstances. I was born forty years ago in this very Devonshire village in which I write, but not in the same house. Now I live in the Priory, an ancient place and a fine one in its way, with its panelled rooms, its beautiful gardens where, in this mild climate, in addition to our own, flourish so many plants which one would only expect to find in countries that lie nearer to the sun, and its green, undulating park studded with great timber trees. The view, too, is perfect; behind and around the rich Devonshire landscape with its hills and valleys and its scarped faces of red sandstone, and at a distance in front, the sea. There are little towns quite near too, that live for the most part on visitors, but these are so hidden away by the contours of the ground that from the Priory one cannot see them. Such is Fulcombe where I live, though for obvious reasons I do not give it its real name. Many years ago my father, the Rev. Humphrey Arbuthnot, whose only child I am, after whom also I am named Humphrey, was the vicar of this place with which our family is said to have some rather vague hereditary connection. If so, it was severed in the Carolian times because my ancestors fought on the side of Parliament.

The White Rose

A bull's-eye of a short fiction collection that spans the master's career. In 1950, fresh out of college and keen to make his name as a writer, Elmore Leonard decided he needed to pick a market, a big one, which would give him a better chance to be published while he learned to write. In choosing between crime and Westerns, the latter had an irresistible pull - Leonard loved movies set in the West. As he researched deeper into settings, Arizona in the 1880s captured his imagination: the Spanish influence,

the stand-offs and shoot-outs between Apache Indians and the US cavalry. This is a fantastic collection of over five decades' worth of stories.

When the World Shook

A heart-stopping thriller from the award-winning crime fiction author whose “novels are almost indecently gripping and enjoyable” (Sophie Hannah, New York Times–bestselling author). Belinda Bauer is a British crime writer of the highest caliber, whose smart, stylish novels have captivated readers and reviewers on both sides of the Atlantic and earned her a reputation as “the true heir to the great Ruth Rendell” (The Mail on Sunday). The Beautiful Dead is a riveting narrative centered on a down-on-her-luck journalist and a serial killer desperate for the spotlight. TV crime reporter Eve Singer's career is flagging, but that starts to change when she covers a spate of bizarre murders—each one committed in public and advertised like an art exhibition. When the killer contacts Eve about her coverage of his crimes, she is suddenly on the inside of the biggest murder investigation of the decade. But as the killer becomes increasingly obsessed with her, Eve realizes there's a thin line between inside information and becoming an accomplice to murder—possibly her own. “Bauer's novel unfolds like an episode of Criminal Minds, with rapid-fire plotting.” —Entertainment Weekly

Your Inner Fish

This book is the first comprehensive overview and evaluation of the origins, history and current size and condition of all of Iceland's major glaciers (including Vatnajökull, the largest in Europe) at the beginning of the twenty-first century. It is not only illustrated with many beautiful photographs and graphs of recent statistics and scientific data, but is also a collection of historical writings and drawings from annals, sagas, folk tales, diaries, reports, stories and poems, as it presents a unique approach to the study of glaciers on an island in the North Atlantic. Balancing and comparing the world of man with the world of nature, the perceptions of art and culture with the systematic and pragmatic analyses of science, The Glaciers of Iceland present a wide spectrum of readers with a new and stimulating view of the origins, development and possible future of these massive natural phenomena, as well as the study and role of glaciology, within specific time lines and geographical locations. Icelandic glaciers the author argues could prove essential for understanding the current unsettling progress of global warming. The glaciers of Iceland, therefore, aims at presenting to a wide readership an original, historical, cultural and scientific overview of these geophysical features in Iceland while also suggesting increasingly important lessons and models for man's future interaction with the world's glaciers as a whole.
