Jamie Raskin hits Republicans with news they've DREADED - Jamie Raskin hits Republicans with news they've DREADED by Brian Tyler Cohen 349,477 views 6 hours ago 50 minutes - CLASS WITH JAMIE RASKIN episode 2: Jamie Raskin takes on the rightwing fallacy that the Second Amendment gives people ...

Does the 2nd Amendment give people the right to overthrow the government with insurrections?

This interpretation of the constitution is an excuse for not passing gun reform

The constitution treats insurrection as a serious and dangerous offense

Forming a militia and attacking the government is unconstitutional and qualifies as treason

The constitution doesn't even guarantee non-violent civil disobedience

Insurrectionists are not "hostages"

The 2nd Amendment is not unlimited

Q&A start

Our lone-wolf shooters are anything but a well-regulated militia

Why did conservatives change their tune in the last 15 years?

They say gun violence is due to "too many doors"

The say gun violence is due to a mental health crisis, but then do nothing about it

What is the upside to the NRA taking extreme stances against reform?

Closing message

This practice exam helps for preparing ...

The pit area in commercial garages, repair and storage areas is classified as Class 1. Division 2 if there is mechanical ventilation providing a minimum of ___ air changes per hour

Flexible Metal Conduit (FMC) must be secured within other termination: A 15 in

If space limitations prevent_of space from the pool, underground wiring must be installed in a complete raceway system

The maximum approval electrical trade size of IMC is

A branch circuit for an appliance that's a continuous load must be rated not less than___of the marked ampere ratings of the appliance

The overcurrent protection device of non-motor appliances must not exceed overcurrent device rating

is not marked: A 20A

For equipment rated 800 A or more personnel doors located less than ___ from the nearest edge of the working space must open in the direction of egress and have listed panic hardware

A flexible cord is permitted for an in-sink waste disposal if the cord length is no longer than

Receptacles not supplying loads directly related to circulation systems must be located not less than ___ from the inside walls of the pool

Load where the maximum current is expected to exist for continuous load

The minimum lighting load for industrial commercial buildings is ___ volt amperes per square foot

All ___ 125V receptacle outlets that are not a part of the permanent wiring of the building used by personnel must be GFCI protected: A. All the options are correct

Overhead conductors rating 600V or less, except for the conductors that supply the amusement ride or attractions, must have a clearance of ___ from portable amusement structures

Grounding type receptacles shall be used on which of the following branch circuits

Paddle fans over

The conductors between the service equipment, a separately derived system, or other power supply and the final branch circuit overcurrent device: A Service drop

Maximum distance to any receptacles shall be ___ along the floor line of any wall space measured horizontally A 12

If internal combustion engines are used as the prime mover, an onsite fuel supply must be provided for not less than ___ of full demand operation of the system

Maximum overcurrent protection for 12 AWG copper conductor is

If installed horizontally, metal wireways must be supported at each end and at intervals not exceeding

Power limited fire alarm circuit conductors must be separated by not less than insulated conductors of electric light, power or Class 1 circuits

Overhead communications cables must have a vertical clearance of at least of roots above which they pass

A cord no longer than with an attachment plug and containing a copper equipment grounding conductor not smaller than 12 AWG is permitted for pool motors

The ampacity adjustment factors don't apply to conductors installed in surface metal raceways if the cross sectional area of the raceway exceeds Asqin

circuit breakers or sets of fuses are acceptable as overcurrent device to provide overload protection in one family dwellings

Splices and taps must be accessible and must not till raceway to more than of its cross-sectional area

The overhead service conductors above a roof with a slope of at least 4.in in 12. in have a minimum clearance of

Flexible cords is permitted to be run through holes in walls, structural ceilings, suspended or dropped ceilings or floors: A True B. False

The feeder circuit for a mobile or a mobile or manufactured home must be rated at not less than at 120/240V

is the maximum approved electrical trade size for PVC conduit

Receptacles must be mounted

The ground detection sensing equipment must be connected as close as practicable to where the system receives its power supply A False B True

GFCI protection is required for ___ 125, general purpose receptacles located in dirt confinement areas for livestock A 15A

A two pole circuit breaker or fusible switch shall be considered as

Except for storable pools, fixed or stationary equipment other than an underwater luminaire cord

At least ___ of free conductor, measured from the point in the box where it emerges from its raceway or cable sheath shall be left at each outlet, junction and switch point

A switch or circuit breaker enclosure may be used as a raceway if the conductor fill does not exceed

A portable generator is required to be grounded if the generator only supplies receptacles mounted on the generator A True

Cables listed for information technology equipment can be used to interconnect information technology equipment without the ___ cable length limited A 12 foot

Ceiling grid which supports the wires may be permitted to support raceways

The coupling means of the Electric Vehicle supply equipment must be stored or located not less

The portion of the grounding electrode conductor that is the sole connection to one or more ground rod is not required to be larger than ___

A vertically mounted luminaire weighting no more than ___ can be supported to a device box or plaster

ring secured to a device box

If multiple power sources supply portable structures, the circuit equipment grounding conductors at each portable structures must be bonded together for all portable structures separated by less than Cord and plug equipment not fastened in place cannot be rated more than circuit rating

Electrical nonmetallic tubing must be secured within ___ of every box, cabinet or temperature fitting such as a conduit body

All fixed metal parts must be bonded to the equipment grid is located more than ___ horizontally from the inside walls of the pool structure

Type NMC cable installed in shallow chases in masonry, concrete or adobe must be protected against nails or screws by a steel plate not less than in thick and covered with adobe or similar finish

Feeder tap conductors in a circuit up to protection at the tap location

For appliances rated at not over the branch eircuit overcurrent device such as plug fuse or circuit breaker can serve as the appliance disconnect: A 1/8 hp

Type NM cable must be secured within feet

Boxes for a luminaire in a ceiling must be designed to support a luminaire weighting a minimum of A common grounding electrode conductor must not be smaller than

Grounding electrode must have atleast_ length in contact with the earth

Metal parts of electrical raceways, cables, enclosures and equipment must be connected to the supply source via an effective ground fault path

A branch circuit for an appliance that is a continuous load must be rated less than marked ampere rating of the appliance
