African-American History

Describes the history and contributions of African Americans as well as creating hands-on activities, songs, and games.

A Kid's Guide to African American History

This book is the first comprehensive survey of the African-American experience. It draws on recent research to present black history in a clear and direct manner, within a broad social, cultural, and political framework. White supremacy, the Great Depression, the building of black community institutions, the equal rights movement, and African-American military service. For anyone who is interested in an in-depth exploration of African-American history as it relates to U.S. history.

The African-American Odyssey

This book provides an introduction to Africa -- covering its physical attributes, history, social structure, and culture. It emphasizes norms, values, and historical experiences as the key variables that define who the people are, rather than labeling them as "tribes." Describes the main traditional cultural forms and institutions found in Africa. Explores the geography and demography of the African continent. Takes a critical look at how the Africans have done since they inherited or recovered political power from the European colonial masters -- the problems they have encountered, the forces that have influenced leaders in their choice of strategies in nation-building or economic development, political and economic reforms.

The American Nation

A multifaceted approach to understanding the central developments in African American history since 1939. It combines a historical overview of key personalities and movements with essays on specific facets of the African American experience, a chronology of events, and a guide to further study. From publisher description.

The African Experience

Every year more colleges and high schools are offering classes (and often making them required classes) in black history. Joanne Turner-Sadler provides a concise and probing treatment of 400 years of black history in America that can be used with age groups ranging from lower high school to college. In African American History: An Introduction the author touches on key figures and events that have shaped African American culture beginning with a look at Africa and its various civilizations and the migration of the African people to America. Some essential topics covered are: the struggle with slavery, the role African Americans played in America's wars (including the current war in Iraq), race riots and unions, the NAACP, civil rights, and black power movements, the Harlem Renaissance, issues in

education, the journey into the West, legal cases such as Plessy vs. Ferguson and Brown vs. Board of Education, African Americans as athletes, entertainers, and statesmen. This book is an indispensable addition to all library collections as well as a teaching tool for instructors. It is heavily illustrated (photos, maps, timelines) with useful end-of-the-chapter questions and activities for further study and includes a handy bibliography of suggested readings and an index. New in this edition is a section on the historic election of Barack Obama, the first African American president of the United States. Interesting connections Obama has to past presidents are explored as well. This edition also contains enhanced discussions of Colin Powell and Condoleezza Rice, and the historic positions both held.

The Columbia Guide to African American History Since 1939

Covers the history of the entire African continent, from prehistory to the present day A Companion to African History embraces the diverse regions, subject matter, and disciplines of the African continent, while also providing chronological and geographical coverage of basic historical developments. Two dozen essays by leading international scholars explore the challenges facing this relatively new field of historical enquiry and present the dynamic ways in which historians and scholars from other fields such as archaeology, anthropology, political science, and economics are forging new directions in thinking and research. Comprised of six parts, the book begins with thematic approaches to African history—exploring the environment, gender and family, medical practices, and more. Section two covers Africa's early history and its pre-colonial past—early human adaptation, the emergence of kingdoms, royal power, and warring states. The third section looks at the era of the slave trade and European expansion. Part four examines the process of conquest—the discovery of diamonds and gold, military and social response, and more. Colonialism is discussed in the sixth section, with chapters on the economy transformed due to the development of agriculture and mining industries. The last section studies the continent from post World War II all the way up to modern times. Aims at capturing the enthusiasms of practicing historians, and encouraging similar passion in a new generation of scholars Emphasizes linkages within Africa as well as between the continent and other parts of the world All chapters include significant historiographical content and suggestions for further reading Written by a global team of writers with unique backgrounds and views Features case studies with illustrative examples In a field traditionally marked by narrow specialisms, A Companion to African History is an ideal book for advanced students, researchers, historians, and scholars looking for a broad yet unique overview of African history as a whole.

African American History

The history of race relations on two continents is enormously enriched by this comparative study

Africa in U.S. Educational Materials

Despite increased interest in recent years in the role of race in Western culture, scholars have neglected much of the body of work produced in the nineteenth and twentieth centuries by black intellectuals. For example, while DuBois' thoughts about Africa may be familiar to contemporary academics, those of his important precursors and contemporaries are not widely known. Similarly, although contemporary figures such as Martin Bernal, Molefi Assante, and other "Afrocentrists" are the subject of heated debate, such debates are rarely illuminated by an awareness of the traditions that preceded them. *Race and The Writing of History* redresses this imbalance, using Bernal's *Black Athena* and its critics as an introduction to the historical inquiries of African-American intellectuals and many of their African counterparts. Keita examines the controversial legacy of writing history in America and offers a new perspective on the challenge of building new historiographies and epistemologies. As a result, this book sheds new light on how ideas about race and racism have shaped the stories we tell about ourselves.

Problems in African History

"American Black History" is a concise yet thorough treatment of 500 years of African American history from its origins in the civilizations of Africa through the grim early years in America and the quest for freedom and civil rights. Richly illustrated, the book vividly details the rise of slavery, the abolitionist movement, the Civil War, Reconstruction, the role of blacks in the nation's wars, the Harlem Renaissance, the emergence of the civil rights era, and the arduous struggle for the full claims of citizenship. Lively portraits of key cultural and political figures such as Harriet Tubman, Sojourner Truth, Frederick Douglass, W. E. B. Du Bois, Martin Luther King, Jr., Malcolm X, and countless others make clear the enormous contributions of blacks in America. Tests, answer key, and bibliography are included.

The African-American Odyssey to 1877

A comprehensive evaluation of how to read African history. Writing African History is an essential work for anyone who wants to write, or even seriously read, African history. It will replace Daniel McCall's classic *Africa in Time Perspective* as the introduction to African history for the next generation and as a reference for professional historians, interested readers, and anyone who wants to understand how African history is written. *Africa in Time Perspective* was written in the 1960s, when African history was a new field of research. This new book reflects the development of African history since then. It opens with a comprehensive introduction by Daniel McCall, followed by a chapter by the editor explaining what African history is [and is not] in the context of historical theory and the development of historical narrative, the humanities, and social sciences. The first half of the book focuses on sources of historical data while the second half examines different perspectives on history. The editor's final chapter explains how to combine various sorts of evidence into a coherent account of African history. Writing African History will become the most important guide to African history for the 21st century. Contributors: Bala Achi, Isaac Olawale Albert, Diedre L. Badéjo, Dorothea Bedigian, Barbara M. Cooper, Henry John Drewal, Christopher Ehret, Toyin Falola, David Henige, Joseph E. Holloway, John Hunwick, S. O. Y. Keita, William G. Martin, Daniel McCall, Susan Keech McIntosh, Donatien Dibwe Dia Mwembu, Kathleen Sheldon, John Thornton, and Masao Yoshida. A Companion to African History

In the decades between the Berlin Conference that partitioned Africa and the opening of the African Hall at the American Museum of Natural History, Americans in several fields and from many backgrounds argued that Africa had something to teach them. Jeannette Eileen Jones traces the history of the idea of Africa with an eye to recovering the emergence of a belief in "Brightest Africa"—a tradition that runs through American cultural and intellectual history with equal force to its "Dark Continent" counterpart. Jones skillfully weaves disparate strands of turn-of-the-century society and culture to expose a vivid trend of cultural engagement that involved both critique and activism. Filmmakers spoke out against the depiction of "savage" Africa in the mass media while also initiating a countertradition of ethnographic documentaries. Early environmentalists celebrated Africa as a pristine continent while lamenting that its unsullied landscape was "vanishing." New Negro political thinkers also wanted to "save" Africa but saw its fragility in terms of imperiled human promise. Jones illuminates both the optimism about Africa underlying these concerns and the racist and colonial interests these agents often nevertheless served. The book contributes to a growing literature on the ongoing role of global exchange in shaping the African American experience as well as debates about the cultural place of Africa in American thought.

Race and the Writing of History

In *Shaded Lives*, Beretta Smith-Shomade sets out to dissect images of the African American woman in television from the 1980s. She calls their depiction "binaristic," or split. African American women, although an essential part of television programming today, are still presented as distorted and deviant. By closely examining the television texts of African-American women in comedy, music video, television news and talk shows (Oprah Winfrey is highlighted), Smith-Shomade shows how these voices are represented, what forces may be at work in influencing these images, and what alternate ways of viewing might be available.

American Black History (eBook)

Publisher Description

Writing African History

In highlighting the political and economic progress of African Americans while pinpointing the historical success of Barack Obama in the last presidential election, the book covers the history of the African peoples in the principal regions of Africa, the Caribbean, North America and South America. In reporting and acutely analyzing the same events of human history spanning over 1500 years, it initially delves into the reactions from the political order in the form of the Tea Party Movement following Obama's victory. Totalling over 500 pages, the book then takes the reader on a trip down memory lane, covering events as the slave trade, discrimination and colonization that pitted Africans and their diasporic descendants against Europeans, and later Americans. After covering the critical stages of African Americans' economic and political development following the Civil War to present day, the book crosses the Atlantic Ocean to cover the major failures of political events after independence on the African continent. Two specific chapters in the book analyze the events under feudal Europe that led to the enslavement of Africans while another does the same on the system of capitalism. The final four chapters report and analyze Africa's present challenges and possible solutions.

World History: Connections to Today

The history of African American Studies is often told as a heroic tale, with compelling images of black power and passionate African American students who refuse to take "no" for an answer. Noliwe M. Rooks argues for the recognition of another story that proves that many of the programs that survived were actually begun due to heavy funding from the Ford Foundation or, put another way, as a result of white philanthropy. Today, many students in African American Studies courses are white, and an increasing number of black students come from Africa or the Caribbean, not the United States. This shift-which makes the survival of the discipline contingent on non-African American students-means that "blackness can mean everything and, at the same time, nothing at all." While the Ford Foundation provided much-needed funding, its strategies, aimed at addressing America's "race problem," have left African American Studies struggling to define its identity in light of the changes it faces today. With unflinching honesty, Rooks shows that the only way to create a stable future for African American Studies is through confronting its complex past.

In Search of Brightest Africa

The Routledge History of American Science provides an essential companion to the most significant themes within the subject area. The field of the history of science continues to grow and expand into new areas and to adopt new theories to explain the role of science and its connections to politics, economics, religion, social structures, intellectual history, and art. This book takes North America as its focus and explores the history of science in the region both nationally and internationally with 27 chapters from a range of disciplines. Part I takes a chronological look at the history of science in America, from its origins in the Atlantic World, through to the American Revolution, the Civil War, the World Wars, and ending in the postmodern era. Part II discusses American science in practice, from scientists as practitioners, laboratories and field experiences, to science and religion. Part III examines the relationship between science and power. The chapters touch on the intersection of science and imperialism, environmental science in U.S. politics, as well as capitalism and science. Finally, Part IV explores how science is embedded in the culture of the United States with topics such as the growing importance of climate science, the role of scientific racism, the construction of gender, and how science and disability studies converge. The final chapter reviews the way in which society has embraced or rejected science, with reflections on the recent pandemic and what it may mean for the future of American science. This book fills a much-needed gap in the history and historiography of American science studies and will be an invaluable guide for any student or researcher in the history of science in America.

African and Afro-American History

It is impossible to understand America without understanding the history of African Americans. In nearly seven hundred entries, the Encyclopedia of African American History, 1619-1895 documents the full range of the African American experience during that period - from the arrival of the first slave ship to the death of Frederick Douglass - and shows how all aspects of American culture, history, and national identity have been profoundly influenced by the experience of African Americans. The Encyclopedia covers an extraordinary range of subjects. Major topics such as "Abolitionism," "Black Nationalism," the "Civil War," the "Dred Scott case," "Reconstruction," "Slave Rebellions and Insurrections," the "Underground Railroad," and "Voting Rights" are given the in-depth treatment one would expect. But the encyclopedia also contains hundreds of fascinating entries on less obvious subjects, such as the "African Grove Theatre," "Black Seafarers," "Buffalo Soldiers," the "Catholic Church and African Americans," "Cemeteries and Burials," "Gender," "Midwifery," "New York African Free Schools," "Oratory and Verbal Arts," "Religion and Slavery," the "Secret Six," and much more. In addition, the Encyclopedia offers brief biographies of important African Americans - as well as white Americans who have played a significant role in African American history - from Crispus Attucks, John Brown, and Henry Ward Beecher to Olaudah Equiano, Frederick Douglass, Sarah Grimke, Sojourner Truth, Nat Turner, Phillis Wheatley, and many others. All of the Encyclopedia's alphabetically arranged entries are accessibly written and free of jargon and technical terms. To facilitate ease of use, many composite entries gather similar topics under one headword. The entry for Slave Narratives, for example, includes three subentries: The Slave Narrative in America from the Colonial Period to the Civil War, Interpreting Slave Narratives, and African and British Slave Narratives. A headnote detailing the various subentries introduces each composite entry. Selective bibliographies and cross-references appear at the end of each article to direct readers to related articles within the Encyclopedia and to primary sources and scholarly works beyond it. A topical outline, chronology of major events, nearly 300 black and white illustrations, and comprehensive index further enhance the work's usefulness.

The Black History Book

For courses in History of African-Americans. Incorporating the basic features and narrative from 'The African-American Odyssey', this concise history presents its major episodes, issues and people.

Shaded Lives

This second edition of Gloria Browne-Marshall's seminal work, tracing the history of racial discrimination in American law from colonial times to the present, is now available with major revisions. Throughout, she advocates for freedom and equality at the center, moving from their struggle for physical freedom in the slavery era to more recent battles for equal rights and economic equality. From the colonial period to the present, this book examines education, property ownership, voting rights, criminal justice, and the military as well as internationalism and civil liberties by analyzing the key court cases that established America's racial system and demonstrating the impact of these court

cases on American society. This edition also includes more on Asians, Native Americans, and Latinos. *Race, Law, and American Society* is highly accessible and thorough in its depiction of the role race has played, with the sanction of the U.S. Supreme Court, in shaping virtually every major American social institution.

Central Africans and Cultural Transformations in the American Diaspora

The variety and complexity of its traditions make African American religion a difficult topic to teach at undergraduate level. The essays in this volume offer practical, innovative ways to teach this subject in a variety of settings.

Reflecting on America's First Black President

The development of Afrocentric historical writing is explored in this study which traces this recording of history from the Hellenistic-Roman period to the 19th century. Afrocentric writers are depicted as searching for the unique primary source of "culture" from one period to the next. Such passing on of cultural traits from the "ancient model" from the classical period to the origin of culture in Egypt and Africa is shown as being a product purely of creative history.

White Money/Black Power

Encourages students to think about the questions raised and form their own opinions.

The Routledge History of American Science

The Struggle for Freedom, a narrative of the black experience in America, uses a distinctive biographical approach to guide the story and animate the history. In each chapter, individual African Americans are the pivot points on which historical changes of the era turn. Life stories capture the rush of events that envelop individuals and illuminate the momentous decisions that, collectively, frame the American past and present. Inasmuch as that history is grounded in struggle--in the consistent and insistent call to the United States to deliver on the constitutional promises made to all its citizens.

Encyclopedia of African American History, 1619-1895

Reproducible student activities cover colonial experiences, including interaction with Native Americans, family and social life, the beginnings of slavery, and the seeds democracy.

Teaching African American Religions

How should Christians respond to terrorism and terrorists in their midst? Terrorism is a global problem, and no society on earth faces it alone. The mainly Christian society of Kenya has suffered more than most as it attempts to counter the threat of al-Shabaab. Some pastors have asked for permission to carry guns. Many Christians support government military action, while others recommend pacifist stances, and strive for dialogue and reconciliation with the Muslim community. In this book, ten Kenyan Christian thinkers and practitioners share their experiences and insights. A response section from seven others, including a Kenyan Muslim scholar, enrich the discussion.

This text illuminates the central place of African Americans in U.S. history by telling the story of what it has meant to be black in America and how African-American history is inseparably woven into the greater context of American history. African Americans draws on recent research to present black history within broad social, cultural and political frameworks. From Africa to the 21st century, this book follows the long turbulent journey of African Americans, the rich culture they have nurtured throughout their history and the quest for freedom through which African Americans have sought to counter oppression and racism. This text also recognizes the diversity within the African-American sphere, providing coverage of class and gender and balancing the lives of ordinary men and women with accounts of black leaders. The Struggle for Freedom

With interest in African American history growing at an unprecedented rate, a single collection of readable, practically organized primary documents has become essential. Volume II in this accessible two-book collection explores the post-Civil War Black Reconstruction through current-day issues such as the Million Man March and the impact of Black conservatives in government. Reflects both the recent trends and the enduring political and social themes regarding gender and culture in African American history. Examines older political and social themes as well as latest research in gender and cultures studies. Features contemporary research. Offers a flexible two-volume format that makes books less expensive and easier to use for readers. A fascinating reference for anyone who wants to learn more about African American history.

The Era of Industrial Growth and Foreign Expansion

The first volume to investigate the accountability and relevance of African American political organizations since the end of the modern Civil Rights Movement in 1968

"Nivaldo Tro's Chemistry: A Molecular Approach presents chemistry visually through multi-level images-macroscopic, molecular, and symbolic representations-to help students see the connections between the world they see around them, the atoms and molecules that compose the world, and the formulas they write down on paper. Interactive, digital versions of select worked examples instruct students how to break down problems using Tro's unique "Sort, Strategize, Solve, and Check" technique and then complete a step in the example. To build conceptual understanding, Dr. Tro employs an active learning approach through interactive media that requires students to pause during videos to ensure they understand before continuing." --Amazon.

A relevant, problem-solving approach to chemistry The Third Edition of Principles of Chemistry: A Molecular Approach presents core concepts without sacrificing rigor, enabling students to make connections between chemistry and their lives or intended careers. Drawing upon his classroom experience as an award-winning educator, Professor Tro extends chemistry to the student's world by capturing student attention with examples of everyday processes and a captivating writing style. Throughout this student-friendly text, chemistry is presented visually through multi-level images that help students see the connections between the world around them (macroscopic), the atoms and molecules that compose the world (molecular), and the formulas they write down on paper (symbolic). The Third Edition improves upon the hallmark features of the text and adds new assets—Self Assessment Quizzes, Interactive Worked Examples, and Key Concept Videos—creating the best learning resource available for general chemistry students. Also Available with MasteringChemistry This title is also available with MasteringChemistry – an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts. Students, if interested in purchasing this title with MasteringChemistry, ask your instructor for the correct package ISBN and Course ID. Chemistry

Adapted from Nivaldo J. Tro's best-selling general chemistry book, Principles of Chemistry: A Molecular Approach focuses exclusively on the core concepts of general chemistry without sacrificing depth or relevance. Tro's unprecedented two- and three-column problem-solving approach is used throughout to give students sufficient practice in this fundamental skill. A unique integration of macroscopic, molecular, and symbolic illustrations helps students to visualize the various dimensions of chemistry; Tro's engaging writing style captures student's attention with relevant applications. The Second Edition offers a wealth of new and revised problems, approximately 50 new conceptual connections, an updated art program throughout, and is available with MasteringChemistry®, the most advanced online tutorial and assessment program available. This package contains: Principles of Chemistry: A Molecular Approach, Second Edition

For courses in Chemistry. Building 21st Century Data Analysis and Problem-Solving Skills in Modern Chemistry The 4th Edition of Nivaldo J. Tro's Chemistry: A Molecular Approach reinforces students' development of 21st century skills including data interpretation and analysis, problem solving and quantitative reasoning, applying conceptual understanding to new situations and peer-to-peer collaboration. Nivaldo Tro presents chemistry visually through multi-level images--macroscopic, molecular,

and symbolic representations—helping students see the connections between the world they see around them (macroscopic), the atoms and molecules that compose the world (molecular), and the formulas they write down on paper (symbolic). The benefits of Dr. Tro's problem-solving approach are reinforced through digital, Interactive Worked Examples that provide students with an office-hour type of environment and expanded coverage on the latest developments in chemistry. New Key Concept Videos explain difficult concepts while new end-of-chapter problems including Group Work questions and Data Interpretation and Analysis questions engage students in applying their understanding of chemistry. The revision has been constructed to easily incorporate material for instructors and students to engage in Before, During, and After class activities.
