LEO LEARNS TO READ - This storybook helps children learn the fundamental keys to reading, and gives children the exciting gift, that they are "Reading to Learn." Some keys when teaching children to read are: Read a book to children every day; - Use books with pictures, short sentences and repetitious words; - Show children how to read a book (top to bottom, left to right and front to back); - When children can say a word, show them the written word; - When labeling objects, or showing children the written word, make the word at least 2 inches high, and in clear black text; - Label as many objects in your home with the name of that object (at least 2 inches high bold lettering); - Start with alphabet recognition and showing children the lower case letter sounds (phonics); - Show whole words (word recognition); - Use alphabet nouns (naming words), then verbs (action words) and act them out; - Always ask questions during the story, such as, "What do you think will happen next?" (this gets children thinking and using their imagination); - Keep children actively involved in the story; - Point out each letter when showing children the written word; - Play word games; - match words to objects; - have children read a story from pictures in the book; - start an alphabet writing book; - Point out words, whenever and wherever you are in the community. Most of these fundamental keys are in the story "Leo Learns To Read."

The Cracking the ABC Code Learn to Read series has been designed to help children develop decoding and fluency skills. The books teach children 200 key words (taken from the Dolch list), representing 70% of our everyday language. These key words may or may not be words that children can decode given their current phonic knowledge, but are words that are frequently used and consequently important to learn in order to achieve reading fluency. The words are introduced in sets of 20 with the same key words used in different sentence structures multiple times throughout two consecutive books (e.g., Books 1 & 2, Books 3 & 4, etc). Once key words have been introduced, they are continually used throughout the series. In addition to the key words, each book uses decodable content words which children can read using their phonic knowledge. It is expected that children using the Learn to Read series already have a good grasp of the alphabet and can easily blend these sounds into words (e.g., can, fun). Each book focuses on a different digraph (e.g., ch, sh, th) and the introduction of these digraphs match the Cracking the ABC Code Multisensory Reading Level 2 books. Again, this knowledge is cumulative in that once a digraph has been introduced words containing those digraphs will continue to be used in subsequent books. Book 1 introduces the 'sh' digraph.

New York Times bestselling author and artist James Dean's Pete the Cat helps kids learn to read with phonics. Who knew reading could be so groovy! Reviewed by a phonics expert, these twelve short full-color books feature repeated examples of short and long vowel sounds and common sight words. Each of the simple stories in this box set is designed to teach kids how to master reading while rocking out with Pete the Cat. Phonics teaches children the relationship between letters and the sounds they make. A child who has mastered these relationships has an excellent foundation for learning to read and spell. According to the National Institute of Child Health & Human Development, a child who has learned phonics has a method to recognize familiar words and "decode" unfamiliar ones. Correlates to the Common Core State Standards in English Language Arts.
