When Earth is clean and healthy

Plants and animals are healthy, too.

Our food, homes, tools, and clothes come from Earth.

Earth has some problems.

PROBLEM: NOT ENOUGH WATER

We need fresh water to live.

Fresh water falls from the sky

We get fresh water

WHAT PEOPLE CAN DO

Turn off water when you brush your teeth.

Take short showers.

Fix faucets if water is dripping.

PROBLEM: DIRTY AIR

When we turn on the TV, we use power.

Using lots of power makes Earth's air dirty.

Using lots of gas

Turn off lights when you leave a room.

Put computers to sleep

Walk or ride your bike more.

Plug cords into power strips.

Let the sun warm up rooms
Drive a small car to use less gas.
Plant trees to help clean up Earth's air.
Then trucks do not use gas
Grow a garden

PROBLEM: TOO MUCH TRASH

Trash dumps are bad
Plastic trash is a danger to animals.
Clean up litter.
Recycle plastic, glass, and paper.
Do not put computers
Use cloth bags instead of plastic bags.
Use things for a long time
before you buy new things.
Give away what you don't need

WORKING TOGETHER

Talk with your friends and family
about helping Earth.
Work together to help fix Earth's problems.
We can have a clean, healthy home.
can have a clean, healthy home, too!

GAO proposed legislation to study the profitability of government contractors and: (1) require major government contractors to annually report financial results to an official designated by the President; (2) define criteria for determining which companies will be subject to reporting requirements; and (3) create a Department of Defense (DOD) Profit Reporting Program. GAO believes the program should require: (1) a consistent methodology to evaluate profitability; (2) a means to establish the reliability

of contractor-furnished data; and (3) mandatory contractor participation. GAO found that contractors and agencies remain opposed to the program because they believe that: (1) DOD ad hoc studies of contractor profitability would be adequate; (2) the costs of the study would outweigh the benefits; and (3) the government could not adequately protect proprietary information.

Cost Accounting Standards Board Regulations as of January 1, 2009 reproduces all Title 48, Chapter 99 regulations issued by the Cost Accounting Standards Board plus the nineteen standards included in Part 9903, Subchapter B of the Federal Acquisition Regulation . These standards apply to negotiated contracts issued by all agencies of the government, but do not apply to small business, sealed bid or commercial item contracts and subcontracts. The rules provide consistency in estimating, accumulating, allocating and reporting costs under negotiated government contracts and subcontracts (both defense and civilian). Compliance or noncompliance has a direct bearing on a contractor's recovery of costs, making the book of great value to any entity involved in government contracts . Universities and colleges will also benefit—this volume includes the standards adopted by the CASB on November 8, 1994, applicable to educational institutions that receive negotiated contracts over \$500,000. Updated annually, with a topical index and detailed table of contents.

Armed Services Procurement Regulation Manual for Contract Pricing

Congress asked the General Accounting Office (GAO) to establish a panel of experts to study and make recommendations regarding the Cost Accounting Standards (CAS) Board and the CAS system against the background of the far-reaching procurement reforms of recent years. This group, the CAS Board Review Panel, believes that there is a continuing need for the CAS and the CAS Board. Cost-based contracts continue to represent the majority of all federal contracting dollars and the original purposes of the CAS--principally the need for uniformity and consistency to protect the government from certain risks inherent in cost-based contracts and to improve communications between the government and contractors with regard to those contracts--remain.

Handbook on Government Contracts Administration

This collection of memorial articles and selected obituaries highlights the careers and contributions to accounting practice, the accounting profession, and the accounting literature of leading American figures in the 20th century. The memorial articles do much more than recite their subject's career. More importantly, they discuss and assess their subject's role in influencing the course of accounting practice and the profession as well as the evolution of their influential writings, revealing the names of the accounting leaders and leading thinkers of the past century. Memorial Articles for 20th Century American Accounting Leaders is useful in providing students and young researchers with a rich source of intelligence on the leaders who have established norms of practice, advanced the profession, and set the terms of debate in the literature – leaders who are cited and even quoted but who are known mostly as names without a full-bodied treatment of their backgrounds and broader roles in shaping the accounting literature.

General Journal

This is General Journal Book (The general journal is one of the books of accounts which records every business transaction relating to all the accounting items) / There are space for Date, Description, Account#, Debit(-), Credit(+), Page / Come with Chart of accounts (is a list of account names with corresponding account numbers) / Checking Account Ledger, Accounting Ledger, Daily Records Every Business Transaction Before It Flows To The Classification of Transactions In Accountancy (First Accounting Book Before General Ledger) / Size 8.5 x11 / NOTE: Differences Between GENERAL JOURNAL vs GENERAL LEDGER: The general journal is a catch-all book of accounts where initial entry of the business transaction is recorded for the first time, in chronological order, making general journal an excellent place to review accounting transactions. The general ledger is more of a summary at the account level of every business transaction which comes from various journals containing chronological accounting entries. This information entered into the journal and summarised into the ledger is then aggregated further into a trial balance, which is used to generate the financial statements of the business entity. // GENERAL JOURNAL vs GENERAL LEDGER (Comparison Table)

1. Meaning Journal is the first entry of financial transaction that is rightly summarized and recorded as per the double entry system. Ledger is recorded from the journal in a "T" format and is the source of trial balance, income statement, and balance sheet.
2. Which is more important? Journal is more important than ledger because if it is done wrong, ledger can't be done right. Ledger is dependent upon the correctness of a journal because if the journal is recorded right, the ledger will follow along.
3. Format The format of a journal is simple and we include date, particulars, ledger folio, debit amount and credit amount. The format of the ledger is "T" format where we use date, particulars, and amount in each side.
4. Label Journal is called "book of original entry". Ledger is called "book of second entry".
5. An act of recording The act of journaling is called journalizing. The act of ledgering is called posting.
6. How is the entry recorded? In a journal, the entry is recorded as per the date of the transaction. In ledger, the entry is recorded account-wise.
7. Narration In a journal, the narration is must to understand the nature of entry. In ledger, the narration is optional.
8. Necessity of balancing Balancing is not required in journal. Balancing is mandatory in ledger.
