Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Shortly after the end of the First World War, General Sir George Macdonagh, wartime director of British Military Intelligence, revealed that Lord Allenby's victory in Palestine had never been in doubt because of the success of his intelligence service. Seventy-five years later this book explains Macdonagh's statement. Sheffy also adopts a novel approach to traditional heroes of the campaign such as T E Lawrence.

Bird Lore Volume V. 21 (1919)

The fullest account yet of the British home front in the First World War and how war changed Britain forever.

A Concise History of Scientists and Scientific Investigations in Yellowstone National Park

The Halifax Explosion of 1917 is a defining event in the Canadian consciousness, yet it has never been the subject of a sustained analytical history. Astonishingly, until now no one has consulted the large federal government archives that contain first-hand accounts of the disaster and the response of national authorities. Canada's recently established navy was at the epicentre of the crisis. Armstrong reveals the navy's compelling, and little-known, story by carefully retracing the events preceding the

disaster and the role of the military in its aftermath. He catches the pulse of disaster response in official Ottawa and provides a compelling analysis of the legal manoeuvres, rhetoric, blunders, public controversy, and crisis management that ensued. His disturbing conclusion is that federal officials knew of potential dangers in the harbour before the explosion, took no corrective action, and kept the information from the public.

Florida Historical Society Stetson Kennedy Award The activists and victories that made Florida a leader in land preservation Despite Florida's important place at the beginning of the American conservation movement and its notable successes in the fight against environmental damage, the full story of land conservation in the state has not yet been told. In this comprehensive history, Clay Henderson celebrates the individuals and organizations who made the Sunshine State a leader in state-funded conservation and land preservation. ÿ Starting with early naturalists like William Bartram and John Muir who inspired the movement to create national parks and protect the country's wilderness, Forces of Nature describes the efforts of familiar heroes like Marjory Stoneman Douglas and May Mann Jennings and introduces lesser-known champions like Frank Chapman, who helped convince Theodore Roosevelt to establish Pelican Island as the first national wildlife refuge in the United States. Henderson details how many of Florida's activists, artists, philanthropists, and politicians have worked to designate threatened land for use as parks, preserves, and other conservation areas. ÿ Drawing on historical sources, interviews, and his own long career in environmental law, Henderson recounts the many small victories over time that helped Florida create several units of the national park system, nearly thirty national wildlife refuges, and one of the best state park systems in the country. Forces of Nature will motivate readers to join in defending Florida's natural wonders.

Handbook to the Birds of Australia Volume

Hi, my name is Jacob Bucy, I am an artist from West Virginia. I began drawing "the Birds" in 1999. What started out as scribbles and doodles in boredom has evolved into my first book. In April of 2021 I began doodling and drawing the various versions of the bird till one day I came home from work and came to the realization I had drawn 5000 drawings in just three weeks. Many things inspired the birds, prehistoric birds, various species like Blue Herons, Ibis, and cranes had a large influence on them. I also drew inspiration from cultures from around the globe. OF the many things that drive me to create, this book began as a result of that day I came home to those 5000 drawings. In 2005 I was diagnosed with bi polar disorder. That night I came home I realized I was in a manic episode. In September I finished writing the first rough drafts for this series. Since April of 2021 to September of 2021 there have been over 8000 drawings and 22 paintings and 36 books in this series. Often in the early days of the birds I would have quirky short stories in my head about a day in the life of these characters. "The Book of the Birds Vol:1 the Tribes of Parlo-5" is my first attempt to bring others into parlo-5 and the lives of the Birds.

Now in its ninth edition, Bird's Engineering Mathematics has helped thousands of students to succeed in their exams. Mathematical theories are explained in a straightforward manner, supported by practical engineering examples and applications to ensure that readers can relate theory to practice. Some 1,300 engineering situations/problems have been 'flagged-up' to help demonstrate that engineering cannot be fully understood without a good knowledge of mathematics. The extensive and thorough topic coverage makes this a great text for a range of level 2 and 3 engineering courses – such as for aeronautical, construction, electrical, electronic, mechanical, manufacturing engineering and vehicle technology – including for BTEC First, National and Diploma syllabuses, City & Guilds Technician Certificate and Diploma syllabuses, and even for GCSE and A-level revision. Its companion website at www.routledge.com/cw/bird provides resources for both students and lecturers, including full solutions for all 2,000 further questions, lists of essential formulae, multiple-choice tests, and illustrations, as well as full solutions to revision tests for course instructors.

Birds of La Plata Volume

The fifth and most popular book of the Ramayana of Valmiki, the Sundarakanda, recounts the adventures of the monkey hero Hanuman in leaping across the ocean to the island citadel of Lanka. Once there, he scours the city for the abducted Princess Sita. The poet vividly describes the opulence of the court of the demon king, Ravana, the beauty of his harem, and the hideous deformity of Sita's wardresses. After witnessing Sita's stern rejection of Ravana's blandishments, Hanuman reveals himself to the princess and restores her hope of rescue. The great monkey then wreaks havoc on the royal park and fights a series of hair-raising battles with Ravana's generals. Permitting himself to be captured by the warrior Indrajit, Hanuman is led into the presence of Ravana, whom he admonishes for his lechery. His tail is set ablaze, but he escapes his bonds and leaping from rooftop to rooftop, sets fire to the city. Taking leave of Sita, Hanuman once more leaps the ocean to rejoin his monkey companions. This is the fifth volume translated from the critical edition of the Valmiki Ramayana. It contains an extensive introduction, exhaustive notes, and a comprehensive bibliography.
