Intro

How to perform a Bayesian data analysis?

Faster Bayesian computation

Stan code 1/ skipping declarations model

A crash course to Stan's syntax. The basic syntax is similar to all "curly bracket" languages, such as C and JavaScript. But vectorization is similar to R

As opposed to JavaScript, R and python, Stan is statically typed, and there are a lot of types specific to statistical modelling

All types can have constraints. Constraints are required for variables acting as parameters.

A Stan program consists of a number of blocks. data # the required data for the model # Declarations

...

Distribution statements define statistical relations between parameters and data.

A minimal Stan program implementing a binomial model.

Running a Stan program is usually done from another language such as Python or R. (Here assuming model_string contains the model from the last slide.)

Quantum Field Theory Lecture 1: Klein-Gordon Equation for a Single Particle - Quantum Field Theory

Lecture 1: Klein-Gordon Equation for a Single Particle by Nick Heumann 23,821 views 1 year ago 59 minutes - Lecture 1 covers the motivation behind developing a **Quantum**, Field **Theory**,, some of the concepts needed to understand it, such ...

Concepts you need to understand

Deriving the Klein-Gordon Equation

Finding the Energy values of the K-G equation

Finding the Probability current and density for KG
