It is a process of managing the assets and liabilities of the credit union to meet the credit union's
specific financial objectives while balancing risk with reward.

How we price our products is influenced by competitor rates.

Once the risk is known, the credit union must review the model reports to determine how the risk and
the financial performance of the credit union is changing

The credit union must have a policy with risk limits and a system to identify and measure the risk.

The credit union will want to ensure that the process is working effectively through strong internal
controls.
