

architecture and identity towards a global eco culture

[#sustainable architecture](#) [#cultural identity design](#) [#global eco culture](#) [#ecological design principles](#) [#architecture and identity](#)

Explore the crucial intersection of architecture and identity, examining how thoughtful design can actively shape and foster a truly global eco culture. This exploration delves into the principles of sustainable architecture and ecological design, aiming to develop built environments that not only reflect unique cultural identity but also contribute harmoniously to a globally conscious and environmentally responsible future.

Our collection supports both foundational studies and cutting-edge discoveries.

Architect | Eco-Friendly Design by Going Green 36,289 views 3 years ago 4 minutes, 6 seconds
- In this video we visit sustainable **architecture**, from around the world to see what **architects**, are
doing to make their buildings more ...

the role that Architects will play in solving the climate crisis.

Now the climate crisis is huge and requires people from all professions to do their part.

Those in the construction industry play a significant role in dealing with the environmental crisis
as buildings are responsible for 40% of global CO2 emissions.

To summarise what I found from my travels. I believe there are 3 distinct ways in which Architects
can help save the planet.

Firstly the most exciting way an Architect can help the planet

an example of this is the Cloud Forest in Singapore which offers environmental education to the
visitors.

The second way in which an Architect can help save the planet is to deal with the existing building
stock

We currently have a vast amount of buildings in our cities which have been poorly designed

It is not possible to simply demolish these buildings as this would require an awful lot of energy and
resources.

The final way I believe that Architects can help save the planet is to provide sustainable education to
others.
