Introduction to Games People Play by Eric Berne, M.D.

Every person has three ego states: Parent, Adult and Child.

Games are predictable interactions between ego states.

Some games are designed to last a lifetime.

Spouses often play games with each other.

Social gatherings often make people play games.

Sexual relationships often provoke games.

People with rule-breaking tendencies often play games.

Psychotherapy offers plenty of room for games.

A life without games offers an opportunity for closer relationships.
