January of 2017: American Los Angeles class submarine U.S.S. Houston is tracking a surface target that is not listed as part of the Russian navy's response to the NATO maneuvers. What they find will set in motion the answers to one of the great mysteries of World War II. With the Russian navy bearing down on the Houston and international tensions running high, the United States Navy declares the Soviet-era derelict legal salvage under international law. With the world's most powerful navies going toe-to-toe in the North Atlantic, the President of the United States calls upon the one organization that has a chance to figure out why this ship is in this time, in this place—Department 5656, also known as the Event Group. When the Group arrives, they are confronted by three warships of the Russian Navy who have come to claim Russian property. The two groups meet and soon discover that the ancient battle cruiser is not a derelict at all, but fully functional with a mysterious apparatus that sent the original crew to their deaths. In the midst of their warfare in the tossing seas, both navies are sent into a realm of unimaginable terror—an alternate world of water, ice, and death. The Event Group has a new mission when relics of the fabled Philadelphia Experiment surface in Beyond the Sea, the twelfth thrilling hit in New York Times bestselling author David L. Golemon's Event Group series.

### Spaces Speak, Are You Listening?

How we experience space by listening: the concepts of aural architecture, with examples ranging from Gothic cathedrals to surround sound home theater. We experience spaces not only by seeing but also by listening. We can navigate a room in the dark, and "hear" the emptiness of a house without furniture. Our experience of music in a concert hall depends on whether we sit in the front row or under the

balcony. The unique acoustics of religious spaces acquire symbolic meaning. Social relationships are strongly influenced by the way that space changes sound. In *Spaces Speak, Are You Listening?*, Barry Blesser and Linda-Ruth Salter examine auditory spatial awareness: experiencing space by attentive listening. Every environment has an aural architecture. The audible attributes of physical space have always contributed to the fabric of human culture, as demonstrated by prehistoric multimedia cave paintings, classical Greek open-air theaters, Gothic cathedrals, acoustic geography of French villages, modern music reproduction, and virtual spaces in home theaters. Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space. Some listeners can learn to "see" objects with their ears, but even without training, we can all hear spatial geometry such as an open door or low ceiling. Integrating contributions from a wide range of disciplines—including architecture, music, acoustics, evolution, anthropology, cognitive psychology, audio engineering, and many others—*Spaces Speak, Are You Listening?* establishes the concepts and language of aural architecture. These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well-being. Aural architecture is not the exclusive domain of specialists. Accidentally or intentionally, we all function as aural architects.

### Overlord

In the stunning conclusion to the Matchstick Man saga that began with *Event* and continued with *Legacy*, the End of Days is upon humanity---invasion has arrived! Some speculate that the war between the two worlds began 700 million years ago, while others say it started in 1947 over a small town in New Mexico called Roswell. Regardless of dates, the war is now upon us, and after centuries of watching, the enemy attacked. The plans of a million years are finally ready for what we have always known was coming---Armageddon. As world allies fall to the wayside, a growing political faction from several nations sends a clear signal that cooperation between the superpowers and the lesser states cannot succeed. As nations start a mad scramble to realign their military structures, the war begins silently in the depths of the oceans, and flares to global brightness with the first military strike in history between two different worlds. Only one element in the arsenal of the world can possibly give Earth a fighting chance at survival---a small being that has already saved the world once in the Arizona desert is now called upon to outthink his former masters---the Matchstick Man. While Matchstick Man searches for the real motivation behind the invasion, the Event Group is the one entity that refuses to accept the inevitable defeat of humankind. They've learned that the answer to this war has always been here on earth buried deeply in our ancient past, and that they may even hold the clue to salvation inside their own artifact vault. But with the devastating loss of its military arm and one of their leaders, Colonel Jack Collins, the group is being torn apart by internal conflict and devastating personal decisions. Even worse, the group's old enemies have returned to take revenge, and the worst fears of Department 5656 are realized---a breach in security allows intruders to get at the secrets inside the complex in Nevada. Can the group come together to defeat their enemy and defend the planet? As the war wages on, countries fall, nations fight to the last man, and the fate of the planet depends on a few good men and women in this action-packed thrill ride from New York Times bestselling author David L. Golemon.

### Carpathian

The Event Group tackles their most challenging mission yet in this no-holds-barred thrill ride from the New York Times bestselling author of *Ripper* and *Legacy*. Perfect for fans of Clive Cussler, James Rollins, and Matthew Reilly, the latest gripping thriller from David L. Golemon takes the Event Group---the nation's most secret agency---to the brink in a heart-stopping race against time. Rumors of the seemingly magical victory that allowed the Exodus of Israelites from Egypt have resonated through the archaeological world for decades. Now evidence has been discovered that points to a new explanation of how the ancient Hebrews destroyed the unstoppable army of Pharaoh with a tribe of warriors who disappeared a generation later, after the destruction of the City of Jericho, taking with them the most valued treasures of a people without a homeland. Today a treasure of a different kind is unearthed at the lost ruins of Jericho, one that will change the history of God's Chosen People for all time---the petrified remains of an animal that could not exist. Enter the Event Group. Led by Col. Jack

Collins, the Group's brilliant men and women gather to discover the truth behind not only the Exodus, but also the magnificent animals that led the defeat of Pharaoh's army. On a whirlwind race to save the most valuable treasure and artifacts in the history of the world from those who would destroy them, the Event Group will come face-to-face with every myth, legend, and historical truth that has ever unfolded in the mythic and larger-than-life Carpathians---or as the area was once known, Transylvania, the land of Vlad the Impaler. The newest pulse-pounding installment in the New York Times bestselling Event Group Series, Carpathian pushes the limits of suspense, where every chapter contains new twists and revelations in this exciting, page-turning read.

### The Research Imagination

The idea that science is a blueprint for research, and imagination gives research its life and purpose inspired this comprehensive explanation of research methodology. The authors' decades of experience have revealed that research is a craft requiring judgment and creativity, not simply memorization and application of the rules of science. Whether one is conducting an intimate one-on-one interview or a large-scale examination of an entire society, human imagination and scientific principles of inquiry go hand in hand. To that end, this book emphasizes scientific method, but also acknowledges its critics. It covers a wide variety of data-collection techniques, but presents them as reinforcing rather than competing with one another, thus striking a balance between qualitative and quantitative methods. It is designed for students and instructors who want a comprehensive treatment of a variety of research techniques with special emphasis on qualitative approaches.

### Daniel Goleman Omnibus

Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

### The Skilled Helper

Internationally recognised for its successful problem-management approach to effective helping, this book offers a step-by-step guide to the counselling process.

### Transforming Performance Measurement

It's no secret that you can't improve your organization's performance without measuring it. In fact, every function, unit, process, and the organization as a whole, is built and run according to the parameters and expectations of its measurement system. So you'd better make sure you're doing it right. All too often, performance measurement creates dysfunction, whether among individuals, teams, or across entire divisions and companies. Most traditional measurement systems actually encourage unhealthy competition for personal gain, creating internal conflict and breeding distrust of performance measurement. Transforming Performance Measurement presents a breakthrough approach that will not only significantly reduce those dysfunctions, but also promote alignment with business strategy, maximize cross-enterprise integration, and help everyone to work collaboratively

to drive value throughout your organization. Performance improvement thought leader Dean Spitzer explains why performance measurement should be less about calculations and analysis and more about the crucial social factors that determine how well the measurements get used. His "socialization of measurement" process focuses on learning and improvement from measurement, and on the importance of asking such questions as: How well do our measures reflect our business model? How successfully are they driving our strategy? What should we be measuring and not measuring? Are the right people having the right measurement discussions? Performance measurement is a dynamic process that calls for an awareness of the balance necessary between seemingly disparate ideas: the technical and the social aspects of performance measurement. For example, you need technology to manage the flood of data, but you must make sure that it supports the people who will be making decisions and taking action crucial to your organization's success. This book shows you how to design that technical-social balance into your measurement system. While it is urgent to start taking action now, transforming your organization's performance measurement system will take time. Transforming Performance Measurement gives you assessment tools to gauge where you are now and a roadmap for moving, with little or no disruption, to a more "transformational" and mature measurement system. The book also provides 34 TMAPs, Transformational Measurement Action Plans, which suggest both well-accepted and "emergent" measures (in areas such as marketing, human resources, customer service, knowledge management, productivity, information technology, research and development, costing, and more) that you can use right away. In the end, you get what you measure. If you measure the wrong things, you will take your company farther and farther away from its mission and strategic goals. Transforming Performance Measurement tells you not only what to measure, but how to do it -- and in what context -- to make a truly transformational difference in your enterprise.

#### Instinct

When the President of the United States falls victim to a weaponized and contagious strain of the disease, the Chess Team—King, Queen, Rook, Knight and Bishop—are assigned to protect Sara Fogg, a CDC detective, as she journeys to the source of the new strain: the Annamite Mountains in Vietnam. Surrounded by Vietnam War era landmines, harsh terrain and more than one military force not happy about the return of American boots to the Ho Chi Minh trail, the fight for survival becomes a grueling battle in the humid jungle. Pursued by VPLA Death Volunteers, Vietnam's Special Forces unit, the team's flight through a maze of archaic ruins reveals an ancient secret...a primal secret that may stop the disease from sweeping the globe—even as it threatens both the mission and their lives.

#### Erin's Heirs

"They will melt like snowflakes in the sun," said one observer of nineteenth-century Irish emigrants to America. Not only did they not melt, they formed one of the most extensive and persistent ethnic subcultures in American history. Dennis Clark now offers an insightful analysis of the social means this group has used to perpetuate its distinctiveness amid the complexity of American urban life. Basing his study on family stories, oral interviews, organizational records, census data, radio scripts, and the recollections of revolutionaries and intellectuals, Clark offers an absorbing panorama that shows how identity, organization, communication, and leadership have combined to create the Irish-American tradition. In his pages we see gifted storytellers, tough dockworkers, scribbling editors, and colorful actresses playing their roles in the Irish-American saga. As Clark shows, the Irish have defended and extended their self-image by cultivating their ethnic identity through transmission of family memories and by correcting community portrayals of themselves in the press and theatre. They have strengthened their ethnic ties by mutual association in the labor force and professions and in response to social problems. And they have created a network of communications ranging from 150 years of Irish newspapers to America's longest-running ethnic radio show and a circuit of university teaching about Irish literature and history. From this framework of subcultural activity has arisen a fascinating gallery of leadership that has expressed and symbolized the vitality of the Irish-American experience. Although Clark draws his primary material from Philadelphia, he relates it to other cities to show that even though Irish communities have differed they have shared common fundamentals of social development. His study constitutes a pathbreaking theoretical explanation of the dynamics of Irish-American life.

#### Ripper

The real Jack the Ripper is loose, and this time he's brought friends to the darkness of the deep desert in the newest adrenaline rush from David Golemon, The New York Times bestselling author of Legacy. In the tradition of works by James Rollins, Preston and Child and Matthew Reilly, Ripper is the latest in an action-packed series about the nation's most secret agency—The Event Group. In 1887, the British Empire contracted brilliant American professor Lawrence Ambrose to create a mutant gene to turn an ordinary person into an aggressive fighting machine. But all too quickly, Ambrose was found to be behind a streak of vicious murders, and in a cover-up of massive proportions, Queen Victoria ordered the project, and Ambrose, terminated. Thus the legend of Jack the Ripper was born. The killings stopped as suddenly as they had begun—but not because Ambrose was caught. Instead, he escaped and returned home to America where he and his formula faded into history. But in 2012, a raid against a Mexican drug lord uncovers a small cache of antiquated notebooks containing long-buried instructions to create blind killers out of normal men. Enter the Event Group and Col. Jack Collins, who are desperate to stop one of their most feared enemies. When the formula is loosed in the underground halls and vaults of the Event Group complex itself, brother will battle brother, and for the first time in many men's brave lives they will understand the true meaning of fear. The next heart-stopping chapter in the New York Times bestselling Event Group series, Ripper takes readers to new levels of suspense, where death could be hiding around any corner on this non-stop thrill ride.

It doesn't matter that Sophie's baby died so that Jess's grandson could live. It only matters that Sophie is a vampire. Vampires can't be trusted. Even if they love you. Aunt Sally loved all the monsters she'd created in the hundreds of years since she died and rose again. She loved her home in the bayou. When her existence was exposed to the human world, she didn't hesitate to destroy her home, and her offspring, to save herself. Herself, and one special girl, Aunt Sally's last chance to be a perfect mother. These people are drawn together from across the United States, bound by love and hatred, by the desire for reunification and for revenge. In their own ways, they are all monsters. Some deserve to live. Some do not. *Motherless Children Trilogy* #1 *Motherless Child* #2 *Good Girls* #3 *Nothing to Devour*

From Publishers Weekly: Even die-hard conspiracy theorists will be dubious about the sinister government-led plots that form the shaky foundation of this political thriller. Alten, best-known for his gory novels featuring giant prehistoric sharks (*Meg*; *The Trench*), goes well beyond the already far-fetched idea that the Bush administration let the devastating 9/11 attacks happen to further the neoconservative agenda of reshaping the Middle East. In 2012, with centrist conservative David McQuinn in the White House, the federal government plots to detonate a nuclear bomb in a U.S. city and blame Iran as a cover to take out that country's radical leadership. Standing in the plotters' way is Ace Futrell, an energy expert whose murdered wife was possibly targeted by U.S. intelligence.
