The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

All That Is Solid

Housing was at the heart of the financial collapse, and our economy is now precariously reliant on the housing market. In this groundbreaking new book, Danny Dorling argues that housing is the defining issue of our times. Tracing how we got to our current crisis and how housing has come to reflect class and wealth in Britain, All That Is Solid radically shows that the solution to our problems - rising homelessness, a generation priced out of home ownership - is not, as is widely assumed, building more homes. Inequality, he argues, is what we really need to overcome.

All that is Solid

In All That is Solid Danny Dorling offers an agenda-shaping look at the UK's dangerous relationship with housing - and how it's all going to come crashing down. Housing was at the heart of the financial collapse, and our economy is now precariously reliant on the housing market. In this ground-breaking book, Danny Dorling argues that housing is the defining issue of our times. Tracing how we got to our current crisis and how housing has come to reflect class and wealth in Britain, All That Is Solid shows that the solution to our problems - rising homelessness, a generation priced out of home ownership - is not, as is widely assumed, building more homes. Inequality, he argues, is what we really need to overcome. An urgent book about an urgent topic . (Lynsey Hanley, New Statesman). A brilliantly original study of our national obsession . (Nick Cohen, Observer). Danny Dorling is Halford Mackinder Professor in Geography at the University of Oxford. He has worked both with the British government and the World Health Organization and is frequently asked to comment on current issues on TV and the radio. He has published more than twenty-five books, including Injustice: Why Social Inequality Exists, So You Think You Know About Britain? and The 32 Stops for Penguin Underground Lines.

Remy thinks life after high school will be easier. He'll go to California Pacific for a year while he gets a handle on his HIV, then after Michael graduates from high school, they'll blast out of there for colleges—and life—on the East Coast. Then Remy visits Boston and everything changes. He realizes he likes CalPac. Turns out, Boston doesn't have anything for him beyond one of the biggest regattas in North America. Life grows more complicated when he gets home. He can't find a way to tell Michael that he's just blown their plan for their lives out of the water. Then Remy's CalPac coaches drop a bomb on him. Those rowing officials who have been watching him? They are recruiters for the national team,

and his coaches want him to try out. They'll even let Lodestone coach him. Now he has to choose, school or crew, CalPac or Michael, and he still hasn't told Michael he can't transfer. Is there even a place for Michael in his life? Somehow they have to withstand training at the highest levels and having different goals. Will love hold them together...or tear them apart?

Metromarxism

"Metromarxism" discusses Marxism's relationship with the city from the 1850s to the present by way of biographical chapters on figures from the Marxist tradition, including Marx, Walter Benjamin, Guy Debord, and David Harvey. Each chapter combines interesting biographical anecdotes with an accessible analysis of each individual's contribution to an always-transforming Marxist theory of the city. He suggests that the interplay between the city as center of economic and social life and its potential for progressive change generated a major corpus of work. That work has been key in advancing progressive political and social transformations.

Communities of Resistance

Ambalavaner Sivanandan was one of Britain's most influential radical thinkers. As Director of the Institute of Race Relations for forty years, his work changed the way that we think about race, racism, globalisation and resistance. *Communities of Resistance* collects together some of his most famous essays, including his excoriating polemic on Thatcherism and the left "The Hokum of New Times". This updated edition contains a new preface by Gary Younge and an introduction by Arun Kundnani.

Reduction, Time and Reality

Each of the contributors examine scientific realism by questioning or rejecting how it was traditionally discussed.

Russia, 1986. In a run-down apartment block in Moscow, a nine-year-old piano prodigy practices silently for fear of disturbing the neighbours. In a factory on the outskirts of the city, his aunt makes car parts, trying to hide her dissident past. In the hospital, a surgeon immerses himself in his work to avoid facing his failed marriage. And in a rural village in Belarus, a teenage boy wakes up to a sky of the deepest crimson. Outside, the ears of his neighbour's cattle are dripping blood. Ten miles away, at the Chernobyl Power Plant, something unimaginable has happened. Now their lives will change forever. *All That is Solid Melts into Air* is an astonishing novel of terrifying beauty that captures the end of an era. 'Daring, generous and beautifully written, *All That is Solid Melts into Air* marks the beginning of a truly significant career. I cannot say it loud enough: McKeon is here to stay.' Colum McCann 'This daring and ambitious novel blends historical epic and love story with a detailed and moving description of the Chernobyl disaster and the fall of the Soviet Union. A book rich with resonance far beyond its historical moment.' Colm Tóibín

Evaluation and Turbulent Times

Now more than ever, policy evaluation is an important component in addressing the world's economic crisis. Before it can do so, the discipline must adapt to changing economic and political environments. The contributors address a basic question: What impact do crises have on evaluation and how can evaluation contribute in times of turbulence? Examining the state of evaluation today, the volume's editors cover a broad range of topics, including post-hoc evaluation; shifting economic paradigms; the World Bank Group's response to the global economic crisis; challenges in evaluating financial literacy; evaluating counter-terrorism programs; evaluation in the context of humanitarian crises; and why civil society organizations in sub-Saharan Africa matter in evaluating poverty interventions. The contributors explore the role of evaluation in the search for solutions to global instability. They recognize, however, that in order to address unprecedented crises, evaluation itself needs to be evaluated and updated as part of the process of change and reform. This volume is the latest in Transaction's well-respected Comparative Policy Evaluation series.

The Medical Times and Gazette

Explores the philosophy of history of Henri Bergson and shows its relevance to contemporary historical thought. Henri Bergson is famous for his explorations of time as duration, yet he rarely referred to history in his writings. Simultaneously, historians and philosophers of history have generally disregarded Bergson's ideas about the nature of time. Modernity has brought change at an ever-accelerating rate, and one of the results of this has been a tendency toward presentism. Only the here and now matters, as past and future have been absorbed by the "omnipresent present" of the digital age. In highlighting the role of history in the work of Bergson, *Bergson and History* shows how his philosophy of life allows us to revise the modern conception of history. Bergson's philosophy situates history within a broader framework of life as a creative becoming, allowing us to rethink important topics in the study of history, such as historical time, the survival of the past, and historical progress. "Bergson and History is groundbreaking and merits a wide readership in the humanities and social sciences. It is full of fresh and original insights. Ter Schure has read widely and deeply, and there is a productive engagement throughout the book with contemporary resources." — Keith Ansell-Pearson, author of *Bergson: Thinking Beyond the Human Condition*

Bergson and History

What might the world look like in the aftermath of COVID-19? Almost every aspect of society will change after the pandemic, but if we learn lessons then life can be better. Featuring expert authors from across academia and civil society, this book offers ideas that might put us on alternative paths for positive social change. A rapid intervention into current commentary and debate, *Life After COVID-19* looks at a wide range of topical issues including the state, co-operation, work, money, travel and care. It invites us to see the pandemic as a dress rehearsal for the larger problem of climate change, and it provides an opportunity to think about what we can improve and how rapidly we can make changes.

Life After COVID-19

What is real? What can we know? How might we act? This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times. Arguing that the concept of security in world politics has long been imprisoned by conservative thinking, Ken Booth explores security as a precious instrumental value which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives. Booth suggests that human society globally is facing a set of converging historical crises. He looks to critical social theory and radical international theory to develop a comprehensive framework for understanding the historical challenges facing global business-as-usual and for planning to reconstruct a more cosmopolitan future. *Theory of World Security* is a challenge both to well-established ways of thinking about security and alternative approaches within critical security studies.

Theory of World Security

"Think of this as 'The Thinking Man's Bloom' or 'The Thinking Woman's Closing of the American Mind.' It takes up debates about education and reasons about them, where Bloom often only blasted away. . . . This is one of the more helpful recent statements of the case for the classics, accompanied by rather venturesome curricular suggestions." —Christian Century "His exciting readable book calls for a return to a study of the classics—and of the Renaissance poets and scholars, like Petrarch, who rediscovered the classics." —Michael Dirda, *Washington Post Book World* " . . . a splendid statement bringing together in a careful and coherent way the prospects for a solid humanities curriculum." —Ernest L. Boyer Ten years ago when this book was first published it was called *Education's Great Amnesia: Reconsidering the Humanities from Petrarch to Freud*. It is being reissued now in a second edition with a different title for a new generation of readers who cannot have forgotten what they never knew. What are the humanities? Can we agree on a core curriculum of humanistic studies? Robert Proctor answers these questions in a provocative, readable book.

Defining the Humanities

Postmodern Time and Space in Fiction and Theory seeks to place the contemporary transformation of notions of space and time, often attributed to the technologies we use, in the context of the ongoing transformations of modernity. Bringing together examples of modern and contemporary fiction (from Defoe to DeLillo, *Frankenstein* to *Finnegans Wake*) and theoretical discussions of the modern and the

post-modern, the author explores the legacy of modern transformations of space and time under five headings: "The Space of Nature"; "The Space of the City"; "Postmodern or Most Modern Time"; "The Time and Space of the Work of Art in the Age of Digital Reproduction"; and "Travel: from Modernity to...?". These five essays re-examine the meanings of modernity and its aftermath in relation to the spaces and times of the natural, the urban and the media environment.

Postmodern Time and Space in Fiction and Theory

Burgeoning national security programs; thickening borders; Wikileaks and Anonymous; immigrant rights rallies; Occupy movements; student protests; neoliberal austerity; global financial crises – these developments underscore that the fable of a hope-filled post-cold war globalization has faded away. In its place looms the prospect of states and corporations transforming a permanent war on terror into a permanent war on society. How, at the critical juncture of a post-globalization era, will policymakers and power-holders in leading states and corporations of the Global North choose to pursue power and control? What possibilities and limits do activists and communities face for progressive political action to counter this power inside and outside the state? This book is a sustained dialogue between author and political theorist, Robert Latham and Mr. V, a policy analyst from a state in the Global North. Mr. V is sympathetic to the pursuit of justice, rights and freedom by activists and movements but also mindful of the challenges of states in pursuing security and order in the current social and political moment. He seeks a return to the progressive, welfare-oriented state associated with the twentieth century. The dialogue offers an in-depth consideration of whether this is possible and how a progressive politics might require a different approach to social organization, power and collective life. Exploring key ideas, such as sovereignty, activism, neoliberalism, anarchism, migration, intervention, citizenship, security, political resistance and transformation, and justice, this book will be of interest to academics and students of Political Science, Sociology, Anthropology, Law, Geography, Media and Communication, and Cultural Studies.

The Politics of Evasion

With the rush of calamitous events in recent years—the September 11 terror attacks, the Iraq imbroglio, and hurricanes Katrina and Rita—Americans feel themselves to be living in dark times. Trust in one another and in the government is at low ebb. People in public service face profound challenges to the meaning and efficacy of their work. Where can a public servant turn for a public philosophy to sustain practice? Inspired by Hannah Arendt and several other philosophers, *Governance in Dark Times* is the first book to explore the philosophical and value underpinnings needed to guide public servants in these times. Featuring down-to-earth discussions of such issues as terrorism, torture, and homeland security, it suggests ways for people in government to think more deeply, judge more wisely, and act more meaningfully. Camilla Stivers argues that the most urgent requirement in dark times is re-kindling what Arendt called "the light of the public," and offers practical steps for public servants to create spaces for citizen dialogue and engagement in public life. Ideas like "governance of the common ground" and "public service as social hope" will spark discussion and encourage renewed dedication to the work of governing. Grounded in the author's more than thirty years of teaching and administrative practice, *Governance in Dark Times* urges public servants in clear, jargon-free prose to reflect, to understand the world we live in, and to act responsibly, both individually and with fellow citizens.

Governance in Dark Times

Presenting highlights from five years of the field journal *Digital Creativity*, this volume republishes twenty-seven contributions from international artists and scientists.

Digital Creativity

In this book, fifteen authors from a wide spectrum of disciplines (ranging from the natural sciences to the arts) offer assessments of the way time enters their work, the definition and uses of time that have proved most productive or problematic, and the lessons their subjects can offer for our understanding of time beyond the classroom and laboratory walls. The authors have tried, without sacrificing analytical rigour, to make their contribution accessible to a cross-disciplinary readership. Each chapter reviews time's past and present application in its respective field, considers the practical and logical problems that remain, and assesses the methods researchers are using to escape or resolve them. Particular attention is paid to ways in which the technical treatment of time, for problem-solving and model-building around specific phenomena, call on - or clash with - our intuitive perceptions of what time is and

does. The spans of time considered range from the fractions of seconds it takes unstable particles to disintegrate to the millions of years required for one species to give way to another. Like all central conceptual words, time is understood on several levels. By inviting input from a broad range of disciplines, the book aims to provide a fuller understanding of those levels, and of the common ground that lurks at their base. Much agreement emerges - not only on the nature of the problems time presents to modern intellectual thought, but also on the clues that recent discoveries may offer towards possible solutions.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

In *Doing Time*, Rita Felski argues that it makes little sense to think of the modern and postmodern as antithetical ideas. Rather, we need a historical perspective attentive to the leaky boundaries between different times as well as the many cultural and political differences within a single time.

Doing Time

Through a comparative analysis of representations of globalization the book *Globalizing Cultures: Theories, Paradigms, Actions* examines the way cultures and individuals oppose, resist and re-center globalization and how people negotiate a sense of identity and belonging in a global context.

Globalizing Cultures

The presence of turbulence in multiple areas of our society--food, fuel, and finances--being but three critical areas presently being impacted means that long-held assumptions are no longer true, that the past is not prologue, and that the future is not clear. And enter into this unstable present the discipline of evaluation--a discipline formed and shaped in the past fifty years of stability, little turbulence, and strong assumptions that everything will go according to plan. If things do not go well, it is because of either a poor theory of change on how to bring about positive outcomes, or weak efforts at implementation. It is not because of the stormy present upsetting our quiet past. As it is, conventional evaluation behavior and beliefs are ill suited for these times. The transformational nature of the 'Arab Spring' is just one arena in which it is clear that a business as usual approach to evaluation is entirely inappropriate. The papers in this volume are from the 2011 Global Assembly of the International Development Evaluation Association (IDEAS). Nearly 350 development evaluators from eighty-five countries came together in Amman, Jordan to discuss and analyze the consequences of turbulence on evaluation. The intent of these papers is to systematically assess what changes have come during this time of turbulence and how these changes are impacting the craft of development evaluation. To be clear: this book is not about how to assess the impacts of crises on development and on people's lives. It is about the meaning of a changed world and changed assumptions on the concepts and methods used in evaluation.

Things fall apart when empires crumble. This time, we think, things will be different. They are not. This time, we are told, we will become great again. We will not. In this new edition of the hugely successful *Rule Britannia*, Danny Dorling and Sally Tomlinson argue that the vote to leave the EU was the last gasp of the old empire working its way out of the British psyche. Fuelled by a misplaced nostalgia, the result was driven by a lack of knowledge of Britain's imperial history, by a profound anxiety about Britain's status today, and by a deeply unrealistic vision of our future.

Nature

In the five years since the first edition of *Injustice* there have been devastating increases in poverty, hunger and destitution in the UK. Globally, the richest 1% have never held a greater share of world wealth, while the share of most of the other 99% has fallen in the last five years, with more and more people in debt, especially the young. Economic inequalities will persist and continue to grow for as long as we tolerate the injustices which underpin them. This fully rewritten and updated edition revisits Dorling's claim that Beveridge's five social evils are being replaced by five new tenets of injustice: elitism is efficient; exclusion is necessary; prejudice is natural; greed is good and despair is inevitable. By showing these beliefs are unfounded, Dorling offers hope of a more equal society. We are living in the most remarkable and dangerous times. With every year that passes it is more evident that *Injustice* is essential reading for anyone concerned with social justice and wants to do something about it.

Rule Britannia

The history of the modern riot parallels the development of the modern novel and the modern lyric. Yet there has been no sustained attempt to trace or theorize the various ways writers over time and in different contexts have shaped cultural perceptions of the riot as a distinctive form of political and social expression. Through a focus on questions of voice, massing, and mediation, this collection is the first cross-cultural study of the interrelatedness of a prevalent mode of political and economic protest and the variable styles of writing that riots inspired. This volume will provide historical depth and cultural nuance, as well as examine more recent theoretical attempts to understand the resurgence of rioting in a time of unprecedented global uncertainty. One of the key contentions of this collection is that literature has done more than merely record riotous practices. Rather literature has, in variable ways, used them as raw material to stimulate and accelerate its own formal development and critical responsiveness. For some writers this has manifested in a move away from classical norms of propriety and accord, and toward a more openly contingent, chaotic, and unpredictable scenography and cast of dramatis personae, while others have moved towards narrative realism or, more recently, digital media platforms to manifest the crises that riots unleash. Keenly attuned to these formal variations, the essays in this collection analyse literature's fraught dialogue with the histories of violence that are bound up in the riot as an inherently volatile form of collective action.

Following on *Well Played 1.0* and *2.0*, this book will also be full of in-depth close readings of video games that parse out the various meanings to be found in the experience of playing a game. Contributors will analyze sequences in a game in detail in order to illustrate and interpret how the various components of a game can come together to create fulfilling a playing experience unique to this medium. Contributors will again be looking at video games, some that were covered in *Well Played 1.0* and *2.0* as well as new ones, in order to provide a variety of perspectives on more great games.

Research on medieval and early modern travel literature has made great progress, which now allows us to take the next step and to analyze the correlations between the individual and space throughout time, which contributed essentially to identity formation in many different settings. The contributors to this volume engage with a variety of pre-modern texts, images, and other documents related to travel and the individual's self-orientation in foreign lands and make an effort to determine the concept of identity within a spatial framework often determined by the meeting of various cultures. Moreover, objects, images and words can also travel and connect people from different worlds through books. The

volume thus brings together new scholarship focused on the interrelationship of travel, space, time, and individuality, which also includes, of course, women's movement through the larger world, whether in concrete terms or through proxy travel via readings. Travel here is also examined with respect to craftsmen's activities at various sites, artists' employment for many different projects all over Europe and elsewhere, and in terms of metaphysical experiences (catabasis).

Writing the Global Riot

Essays tracing the intellectual life of a quintessential New York City writer and thinker Marshall Berman was one of the great urbanists and Marxist cultural critics of the twentieth and twenty-first centuries, and his brilliant, nearly sui generis book *All That Is Solid Melts Into Air* is a masterpiece of the literature on modernism. But like many New York intellectuals, the essay was his characteristic form, accommodating his multifarious interests and expressing his protean, searching exuberant mind. This collection includes early essays from and on the radical '60s, on New York City, on literary figures from Kafka to Pamuk, and late essays on rock, hip hop, and gentrification. Concluding with his last essay, completed just before his death in 2013, this book is Berman's intellectual autobiography, tracing his career as a thinker through the way he read the "signs in the street."

Well Played 3.0

Civilization is in an energy crisis. Human beings have wasted away the majority of their natural resources, but without energy, the world will die. Who will come to the rescue? In secret, a technical team of geniuses has developed a way to harvest usable and never ending energy from polar seas. In concept, their mission is simple; in delivery, it proves to be difficult and possibly tragic. *The Strivers* tells a story of life, love, and the labors undertaken by a brave few who believe in the energy of the ocean. From diverse backgrounds, the team is brought together by a shared mission; they change each other, and relationships evolve that never would have flourished without the world's energy crisis. They are inventors, but they are also human beings, looking for connection in an inhospitable place. With luck, the team will find a way to convert ocean energy into the next great fuel for mankind. Human life is in the hands of the strivers, who must harness the fury of the sea to save the world. Will they succeed, or will the weakness of their humanity make them fail?

The Parliamentary Debates from the Year 1803 to the Present Time

"Human beings are important, especially to themselves! But as science advances, it has become increasingly clear that we are less special and more natural than many people have long believed. This book shows how, as we finally look at ourselves honestly and accurately, we can identify ourselves as wonderfully natural, inseparable from the universe and other living things"--
