Art In Modern Culture

This reader for the Open University's course on Modern Art: Practices and Debates presents a selection of key texts, including classic works from the 1930s to the 1960s, alongside contemporary writings, that introduce the reader to many issues on which critics and art historians have focused.

Art In Modern Culture

This reader for the Open University's course on Modern Art: Practices and Debates presents a selection of key texts, including classic works from the 1930s to the 1960s, alongside contemporary writings, that introduce the reader to many issues on which critics and art historians have focused.

Modern Culture and the Arts

Are the arguments of the Frankfurt School still relevant? Modern Culture and Critical Theory investigates this question in the context of important issues in contemporary cultural politics: neoconservatism and new social movements, discontents with modernity and debates on postmodernism, the political hegemony of Ronald Reagan, and the cultural hegemony of structuralism and poststructuralism. Russell Berman thoughtfully explores the theories of Horkheimer, Adorno, Benjamin, Lyotard, and Foucault and their relevance to both historical and contemporary issues in literature, politics, and the arts.

Modern Culture and Critical Theory

Christianity Today Book of the Year Award of Merit - Culture and the Arts For many Christians, engaging with modern art raises several questions: Is the Christian faith at odds with modern art? Does modernism contain religious themes? What is the place of Christian artists in the landscape of modern art? Nearly fifty years ago, Dutch art historian and theologian Hans Rookmaaker offered his answers to these questions when he published his groundbreaking work, Modern Art and the Death of a Culture, which was characterized by both misgivings and hopefulness. While appreciating Rookmaaker's invaluable contribution to the study of theology and the arts, this volume—coauthored by an artist and a theologian—responds to his work and offers its own answers to these questions by arguing that there were actually strong religious impulses that positively shaped modern visual art. Instead of affirming a pattern of decline and growing antipathy towards faith, the authors contend that theological engagement and inquiry can be perceived across a wide range of modern art—French, British, German, Dutch, Russian, and North American—and through particular works by artists such as Gauguin, Picasso, David Jones, Caspar David Friedrich, van Gogh, Kandinsky, Warhol, and many others. This Studies in Theology and the Arts volume brings together the disciplines of art history and theology and points to the signs of life in modern art in order to help Christians navigate these difficult waters. The Studies in Theology and the Arts series encourages Christians to thoughtfully engage with the relationship between their faith and artistic expression, with contributions from both theologians and artists on a range of artistic media including visual art, music, poetry, literature, film, and more.

Modern Art and the Life of a Culture

A Village Voice Best Book of the Year that examines contemporary cultural politics. With contributions by: Benjamin H.D. Buchloh James Clifford Douglas Crimp Thomas Crow Virginia Dominguez Michael Feher Michael Fried Dan Graham Alice Jardine Silvia Kolbowski Rosalind Krauss Barbara Kruger Trinh T. Minh-Ha Craig Owens Aimee Rankin Martha Rosler Krzysztof Wodiczko Discussions in Contemporary Culture is an award-winning series co-published with the Dia Center for the Arts in New York City. These volumes offer rich and timely discourses on a broad range of cultural issues and critical theory. The collection covers topics from urban planning to popular culture and literature, and continually attracts a wide and dedicated readership.

Discussions in Contemporary Culture

Modern Art Culture: A Reader provides an essential resource for understanding the culture of modern art since the 1960s. In recent years, media theorists and historians have asked whether works of imaginative art can have any impact in our image-saturated culture. Given the power of institutions, how do radical artists produce effective cultural interventions? In the aftermath of September 11th, 2001, many argue that pressing questions about works of art and their meanings are inseparable not only from contemporary social and political issues but also from major debates and developments in the last four decades. To explore such questions and issues, the Reader is divided into six related parts with articles from journals, magazines and exhibition catalogues that exemplify important interventions from the 1960s onwards: Histories, Representations and Remembrance; Art and Visual/Mass/Popular Culture; Institutions; Inclusions/Exclusions; Bodies and Identities; Power and Permissibility. Texts range from artists' engagement with the veil and veiling as metaphors for post-colonialist understandings of representation and contemporary art to early debates about, for example, 'activist art', discourses of the 'body', civil rights, ethnicity, and cultural power. Importantly these selected texts offer examples of analysis that can enable readers to examine, critically, their own selection of representations produced in a variety of contexts.

Modern Art Culture

Hoofdstukken over kunstenaars en kunstuitingen vormen het uitgangspunt van deze Studie over de relatie tussen avant-garde kunst en de massacultuur

Modern Art in the Common Culture

This thesis argues that the contemporary artist's objective is the production of new social space and the institution of new cultural knowledge. It does this by drawing an unexpected parallel between the social and political expectations facing the contemporary artist and the deepest philosophic conception of the artist's function. It traces art's historical trajectory from 20th century modernism, post-modernism to post-colonialism, from a broad range of critical, theoretical and curatorial perspectives.

The Key Issues Concerning Contemporary Art

Short-listed for the Philip Abrams Memorial Prize 2003Museums have been the subject of intense debate in recent years and their history and development raise important questions. What was modern about the art museum? Why did museums emerge when and where they did? How were museums involved with the development of modern art worlds? What was the relationship between art galleries and their audiences and who were the key people involved with their inception? Focusing on the role of national art galleries in continental Europe, England and Scotland, this book explores in depth the interrelationship between artistic and exhibitionary forms, as well as between power and governance in those places where the roots of modern culture were being laid most visibly. Drawing upon debates concerning modernity, Prior investigates how the boundaries of art and culture have been determined within the museum world. In particular, he looks at the interface between the project of the nation and the gallery and how galleries were involved in making certain social groups or bodies feel at home and others excluded.

Museums and Modernity

This collection of original and exciting essays explores the 'visual' character of contemporary culture. Examining film, painting, propaganda, photography and television, this is an indispensible guide to this field.

Visual Culture

Contiene:

The Modern Culture of Latin America

Readins in high & low

Contemporary Cultures of Display

Taking a wide-ranging approach rare in jazz criticism, Ted Gioia's brilliant volume draws upon fields as disparate as literary criticism, art history, sociology, and aesthetic philosophy in order to place jazz within the turbulent cultural environment of the twentieth century. He argues that because improvisation--the essence of jazz--must often fail under the pressure of on-the-spot creativity, we should view jazz as an "imperfect art" and base our judgments of it on an "aesthetics of imperfection." Incorporating the thought of such seminal thinkers as Walter Benjamin, José Ortega y Gasset, and Roland Barthes, The Imperfect Art offers vivid portraits of the giants of jazz and startling insights into this vital musical form and the interaction of society and art.

High & Low

A study of the multiple connections between art and haute couture, in particular the activities of Paul Poiret, focusing on the tension between originality and reproduction in fashion, theater, and visual art.

The Imperfect Art

Bringing together twenty-nine of Lawrence Alloway's most influential essays in one volume, this fascinating collection provides valuable perspectives on the art and visual culture of the second half of the twentieth century. Lawrence Alloway ranks among the most important critics of his time, and his contributions to the spirited and contentious dialogue of his era make for fascinating reading. These twenty-nine provocative essays from 1956 to 1980 from the man who invented the term 'pop art'

bring art, film, iconography, cybernetics and culture together for analysis and investigation, and do indeed examine the context, content and role of the critic in art and visual culture. Featuring a critical commentary by Richard Kalina, and preface by series editor Saul Ostrow, Imagining the Present will be an enthralling read for all art and visual culture students.

Couture Culture

This groundbreaking classic, now reissued, gives a brilliant perspective on the cultural turmoil of the radical sixties and its impact on today's world, as reflected in the art of the time. It describes the social, historical and philosophical context of modern art and culture from a Christian perspective, including much valuable material on Western European art from the Renaissance onward. A respected jazz critic as well as Professor of Art History at the Free University of Amsterdam, Rookmaaker moves freely between the worlds of high culture, popular art and music and Christian faith.

Imagining the Present

Discussing popular culture is one of the keys for understanding arts and more broadly culture. This is something which seems to be shared by the scholars who have contributed to this book. Their essays on popular culture and/or the aesthetics of popular culture serve as a platform for discussing cultural, ethical and political issues. Popular culture and its philosophical reflection also help to unlock themes in law, children's literature, everyday aesthetics, high-cultural heritage, the internet, and material culture. In the Interviews section editors discuss some of the roots of these issues with two thinkers who represent the cream of the discussion. With Richard Shusterman, we delve into his theory of popular culture, and with Gianni Vattimo, the popular goes hand in hand with a discussion that more broadly touches on culture and the arts.

Modern Art and the Death of a Culture

This book seeks to understand culture through the lens of scenes, analyzing them aesthetically and culturally as well as understanding them through the frameworks of gender, social networks, and artworlds. It is common to talk about the cultural and intellectual scenes of early twentieth-century Vienna, the visual art scene of postwar New York, and the music and fashion scene of the swinging London. We often think about artists and works of art as essentially belonging to a certain scene. Scenes might offer a new approach to study what is possible, what is a tradition, and/or to discuss what are the relevant units of contemporary culture for research. The book posits that scenes explain a lot about how the artworld and the cultural field function. Vivienne Westwood, Rene Magritte, Roman Jakobson, Arthur C. Danto, Susan Sontag, James Baldwin, and Didier Eribon are among the figures included in the book, which examines scenes in cities such as Moscow, Bombay, New York, London, Paris, Brussels, Helsinki, and Bratislava. The book will be of interest to scholars working in art history, cultural studies, philosophy, film, literature, and urban studies.

Aesthetics of Popular Culture

"Shine allures and awakens desire. As a phenomenon of perception shiny things and materials fascinate and tantalize. They are a formative element of material culture, promising luxury, social distinction and the hope of limitless experience and excess. Since the early twentieth century the mass production, dissemination and popularization of synthetic materials that produce heretofore-unknown effects of shine have increased. At the same time, shine is subjectified as "glamor" and made into a token of performative self-empowerment. The volume illuminates genealogical as well as systematic relationships between material phenomena of shine and cultural-philosophical concepts of appearance, illusion, distraction and glare in bringing together renowned scholars from various disciplines"--

A Philosophy of Cultural Scenes in Art and Popular Culture

Humorality in Early Modern Art, Material Culture, and Performance seeks to address the representation of the humors from non-traditional, abstract, and materialist perspectives, considering the humorality of everyday objects, activities, and performance within the early modern period. To uncover how humoralism shapes textual, material, and aesthetic encounters for contemporary subjects in a broader sense than previous studies have pursued, the project brings together three principal areas of investigation: how the humoral body was evoked and embodied within the space of the early modern stage; how the materiality of an object can be understood as constructed within humoral discourse; and how

individuals' activities and pursuits can connote specific practices informed by humoralism. Across the book, contributors explore how diverse media and cultural practices are informed by humoralism. As a whole, the collection investigates alternative humoralities in order to illuminate both early modern works of art as well as the cultural moments of their production.

Materials, Practices and Politics of Shine in Modern Art and Popular Culture

How psychological ideas of space have profoundly affected architectural and artistic expression in the twentieth century. Beginning with agoraphobia and claustrophobia in the late nineteenth century, followed by shell shock and panic fear after World War I, phobias and anxiety came to be seen as the mental condition of modern life. They became incorporated into the media and arts, in particular the spatial arts of architecture, urbanism, and film. This "spatial warping" is now being reshaped by digitalization and virtual reality. Anthony Vidler is concerned with two forms of warped space. The first, a psychological space, is the repository of neuroses and phobias. This space is not empty but full of disturbing forms, including those of architecture and the city. The second kind of warping is produced when artists break the boundaries of genre to depict space in new ways. Vidler traces the emergence of a psychological idea of space from Pascal and Freud to the identification of agoraphobia and claustrophobia in the nineteenth century to twentieth-century theories of spatial alienation and estrangement in the writings of Georg Simmel, Siegfried Kracauer, and Walter Benjamin. Focusing on current conditions of displacement and placelessness, he examines ways in which contemporary artists and architects have produced new forms of spatial warping. The discussion ranges from theorists such as Jacques Lacan and Gilles Deleuze to artists such as Vito Acconci, Mike Kelley, Martha Rosler, and Rachel Whiteread. Finally, Vidler looks at the architectural experiments of Frank Gehry, Coop Himmelblau, Daniel Libeskind, Greg Lynn, Morphosis, and Eric Owen Moss in the light of new digital techniques that, while relying on traditional perspective, have radically transformed the composition, production, and experience—perhaps even the subject itself—of architecture.

Humorality in Early Modern Art, Material Culture, and Performance

First published in 1990, this investigative overview of the politics of arts' and cultural funding examines the question of public support for the arts. Looking at both popular commercial forms of culture, including radio, pop music and cinema, and the more traditional highbrow arts such as drama and opera, Art, Culture and Enterprise was the first book of its kind to deal systematically with the politics of contemporary culture. Drawing examples from specific British venues, Justin Lewis shows how innovative projects work in practice, and considers arts marketing and the promotion of culture as an economic strategy. A particularly relevant title in the context of the debate surrounding Arts Council funding, this reissue will prove valuable for artists, administrators and students of media and cultural studies, alongside those with a general interest in the future of public art and culture.

Warped Space

More than any other decade, the sixties capture our collective cultural imagination. And while many Americans can immediately imagine the sound of Martin Luther King Jr. declaring "I have a dream!" or envision hippies placing flowers in gun barrels, the revolutionary sixties resonates around the world: China's communist government inaugurated a new cultural era, African nations won independence from colonial rule, and students across Europe took to the streets, calling for an end to capitalism, imperialism, and the Vietnam War. In this innovative work, James Meyer turns to art criticism, theory, memoir, and fiction to examine the fascination with the long sixties and contemporary expressions of these cultural memories across the globe. Meyer draws on a diverse range of cultural objects that reimagine this revolutionary era stretching from the 1950s to the 1970s, including reenactments of civil rights, antiwar, and feminist marches, paintings, sculptures, photographs, novels, and films. Many of these works were created by artists and writers born during the long Sixties who were driven to understand a monumental era that they missed. These cases show us that the past becomes significant only in relation to our present, and our remembered history never perfectly replicates time past. This, Meyer argues, is precisely what makes our contemporary attachment to the past so important: it provides us a critical opportunity to examine our own relationship to history, memory, and nostalgia.

Art, Culture and Enterprise (Routledge Revivals)

A veteran art critic helps us make sense of modern and contemporary art The landscape of contemporary art has changed dramatically during the last hundred years: from Malevich's 1915 painting of

a single black square and Duchamp's 1917 signed porcelain urinal to Jackson Pollock's midcentury "drip" paintings; Chris Burden's "Shoot" (1971), in which the artist was voluntarily shot in the arm with a rifle; Urs Fischer's "You" (2007), a giant hole dug in the floor of a New York gallery; and the conceptual and performance art of today's Ai Weiwei and Marina Abramovic. The shifts have left the art-viewing public (understandably) perplexed. In The Art of Looking, renowned art critic Lance Esplund demonstrates that works of modern and contemporary art are not as indecipherable as they might seem. With patience, insight, and wit, Esplund guides us through the last century of art and empowers us to approach and appreciate it with new eyes. Eager to democratize genres that can feel inaccessible, Esplund encourages viewers to trust their own taste, guts, and common sense. The Art of Looking will open the eyes of viewers who think that recent art is obtuse, nonsensical, and irrelevant, as well as the eyes of those who believe that the art of the past has nothing to say to our present.

The Art of Return

Today, the arts are characterised by an unprecedented openness to new possibilities, a shifting of established genres, a melding of unlikely forms, and far greater inclusiveness. How then, without an art world establishment with authority over artistic outcomes, do we determine what constitutes art, and make substantive judgements about different artistic works? Outsider Art explores the historical roots of this post-modern condition and analyses the processes of attaining artistic recognition. Leading sociologists, art historians, policy-makers, and artists themselves examine cases from the performing and the visual arts, each contributes exemplifying aspects, stages and strategies of artistic transformation.

The Art of Looking

Art is a concept that has been used by researchers for centuries to explain and realize numerous theories. The legendary artist Leonardo da Vinci, for example, was a profound artist and a genius inventor and researcher. The co-existence of science and art, therefore, is necessary for global appeal and society’s paradigms, literacy, and scientific movements. Contemporary Art Impacts on Scientific, Social, and Cultural Paradigms: Emerging Research and Opportunities provides emerging research exploring the theoretical and practical aspects of present post-aesthetic art and its applications within economics, politics, social media, and everyday life. Featuring coverage on a broad range of topics such as media studies, contemporary storytelling, and literacy nationalism, this book is ideally designed for researchers, media studies experts, media professionals, academicians, and students.

Outsider Art

Since the 1990s, artists and art writers around the world have increasingly undermined the essentialism associated with notions of "critical practice." We can see this manifesting in the renewed relevance of what were previously considered "outsider" art practices, the emphasis on first-person accounts of identity over critical theory, and the proliferation of exhibitions that refuse to distinguish between art and the productions of culture more generally. How Folklore Shaped Modern Art: A Post-Critical History of Aesthetics underscores how the cultural traditions, belief systems and performed exchanges that were once integral to the folklore discipline are now central to contemporary art’s "post-critical turn." This shift is considered here as less a direct confrontation of critical procedures than a symptom of art’s inclusive ideals, overturning the historical separation of fine art from those "uncritical" forms located in material and commercial culture. In a global context, aesthetics is now just one of numerous traditions informing our encounters with visual culture today, symptomatic of the pull towards an impossibly pluralistic image of art that reflects the irreducible conditions of identity.

Contemporary Art Impacts on Scientific, Social, and Cultural Paradigms: Emerging Research and Opportunities

This book calls for education to become an end in itself, as opposed to the means to an end, and for a place to be found in contemporary education for the spiritual, the aesthetic and the ethical.

How Folklore Shaped Modern Art

A collection of intensive discussions about the role of visual arts in public life The past decade has seen American culture deeply divided by debates over social identity, public morality, communal values and freedom of expression. A key focus of these polarizing discussions has been the role of visual arts in

public life. In Art Matters, five leading cultural critics and two prominent contemporary artists show the ways that this debate has profoundly reshaped our view of American culture. Lucy Lippard investigates the extraordinary recent transformations in visual art; Michele Wallace takes on high art, popular culture, and African American identity; David Deitcher discusses queer culture and AIDS; Carole S. Vance ponders censorship and sexually explicit imagery; and Lewis Hyde considers democracy and culture. Projects by artists Julie Ault and Andrea Fraser provide a context for these debates. Art Matters also offers a close examination of attempts to develop alternative funding sources for artists, focusing specifically on the influential private foundation Art Matters-a foundation which became an important proponent for new forms of art and for protecting freedom of expression through its funding and advocacy efforts.

High & Low

In countries around the world, the rise of class divisions and unbridled capitalism are changing the conventional definitions of art and esthetics. Historically, the philanthropy of the elite has played a leading role in supporting, funding, and distributing artistic works. While such measures may be pure in intent, many worry that private funding may be gentrifying the arts and creating a situation in which art will only be valued for its prestige or, worse, its price tag. This collection of essays examines the current movement to democratize the arts and make the world of artistic endeavor open and accessible to all. Instructors considering this book for use in a course may request an examination copy here.

Against the Flow

Received by the British press with equal acclaim and indignation, this book sets out to define and defend high culture against the world of pop, corn, and popcorn. It shows just why culture matters in an age without faith, and gives an extended argument, drawing on philosophy, criticism, and anthropology, against the "post-modernist" world-view. Scruton offers a penetrating attack on deconstruction, on Foucault, on Nietzschean self-indulgence, and on the "culture of repudiation" which has infected the modern academy. But his book is not only negative. It is a celebration of the true heroes of modern culture and a call to the higher life. The American edition of this famous and notorious work has been revised to take account of the controversy which it has inspired, and contains new material specially directed to Americans.

Art Matters

Patricia Phillippy's analysis of the representation of women in literature and visual arts revolves around multiple early modern senses of 'painting'. She focuses on women who paint themselves with cosmetics, women who paint on canvas and women and men who paint women, either with pigment or with words.

Popular Culture Values and the Arts

The inclusion of popular culture in art, and the distinction between the two, we learn in this volume, are problems usefully approached through a careful definition of terms. Walker lays out the terms then surveys the field chronologically, beginning with Courbet and ending with Melrose Place. The third edition contains a new chapter on the art of the 1990's that includes discussion of surveillance, advertising, cinema, Damien Hirst, the Internet, and digital art. c. Book News Inc.
