The Official Guide to the TOEFL iBT with CD-ROM, Third Edition

The official guide from the makers of the TOEFL to ensure your exam success! The Official Guide to the TOEFL® iBT is the leading guide to the most widely accepted English-language proficiency test in the world--the TOEFL test. Written by ETS, the makers of the test, this book includes two real full-length TOEFL tests for practice, as well as explanations of every section of the test and information on what is expected of you for every speaking and writing task. You will learn how to construct your answers and integrate the four skills needed to demonstrate academic English-language proficiency: reading, listening, speaking and writing. The accompanying CD-ROM provides on-screen interactive versions of both real TOEFL tests in the book, just like the one you will encounter on test day.

Mixed Effects Models for Complex Data

Although standard mixed effects models are useful in a range of studies, other approaches must often be used in correlation with them when studying complex or incomplete data. *Mixed Effects Models for Complex Data* discusses commonly used mixed effects models and presents appropriate approaches to address dropouts, missing data, measurement errors, censoring, and outliers. For each class of mixed effects model, the author reviews the corresponding class of regression model for cross-sectional data. An overview of general models and methods, along with motivating examples After presenting real data examples and outlining general approaches to the analysis of longitudinal/clustered data and incomplete data, the book introduces linear mixed effects (LME) models, generalized linear mixed models (GLMMs), nonlinear mixed effects (NLME) models, and semiparametric and nonparametric mixed effects models. It also includes general approaches for the analysis of complex data with missing values, measurement errors, censoring, and outliers. Self-contained coverage of specific topics Subsequent chapters delve more deeply into missing data problems, covariate measurement errors, and censored responses in mixed effects models. Focusing on incomplete data, the book also covers survival and frailty models, joint models of survival and longitudinal data, robust methods for mixed effects models, marginal generalized estimating equation (GEE) models for longitudinal or clustered data, and Bayesian methods for mixed effects models. Background material In the appendix, the author provides background information, such as likelihood theory, the Gibbs sampler, rejection and importance sampling methods, numerical integration methods, optimization methods, bootstrap, and matrix algebra. Failure to properly address missing data, measurement errors, and other issues in statistical analyses can lead to severely biased or misleading results. This book explores the biases that arise when naïve methods are used and shows which approaches should be used to achieve accurate results in longitudinal data analysis.

Construction Specification Writing

This third edition of the standard construction specifications writing guide has been updated to include new information on linking specifications to computer databases and to other parts of the design process. *Construction Specifications Writing* shows how to organize documents, consolidate the Federal government systems, generate well-researched mastertexts, automate specifications, write more condensed text, use full-time specifications consultants, and use the new knowledge-based specifying systems.

TOEFL Reading Practice Book

"*TOEFL Reading Practice Book: Reading Preparation for the TOEFL iBT and Paper Delivered Tests*" by Exam SAM contains three complete TOEFL reading practice tests. Each practice reading test in this book has three passages, just like the actual TOEFL Exam, so there are nine reading passages in the publication for you to study. All of the reading passages in the book are on factual, informative, or academic topics, which is also like the format of the actual TOEFL test. The practice exams have questions of all of the types that you will see on the real TOEFL reading test, so the book has questions on: Finding the main idea Reading for details Making inferences Language coherence Rhetorical functions Word meaning Locating referents Defining key terms Paraphrasing Author's attitude or opinion Summarizing The tips at the beginning of the book explain the format of the TOEFL reading test and tell you what to expect on your exam day. There is a complete answer key with in-depth explanations for each answer, so that you can understand why each answer is the correct one. The explanations give you additional tips to help you improve your test-taking technique. Get a step ahead in your exam preparation with Exam SAM Study Aids & Media.

The Galvanic Circuit Investigated Mathematically

Patricia Crone's *God's Rule* is a fundamental reconstruction and analysis of Islamic political thought focusing on its intellectual development during the six centuries from the rise of Islam to the Mongol invasions. Based on a wide variety of primary sources--including some not previously considered from the point of view of political thought--this is the first book to examine the medieval Muslim answers to questions crucial to any Western understanding of Middle Eastern politics today, such as why states are necessary, what functions they are meant to fulfill, and whether or why they must be based on religious law. The character of Muslim political thought differs fundamentally from its counterpart in the West. The Christian West started with the conviction that truth (both cognitive and moral) and political power belonged to separate spheres. Ultimately, both power and truth originated with God, but they had distinct historical trajectories and regulated different aspects of life. The Muslims started with the opposite conviction: truth and power appeared at the same time in history and regulated the same aspects of life. In medieval Europe, the disagreement over the relationship between religious authority and political power took the form of a protracted controversy regarding the roles of church and state. In the medieval Middle East, religious authority and political power were embedded in a single, divinely sanctioned Islamic community--a congregation and state made one. The disagreement, therefore, took the form of a protracted controversy over the nature and function of the leadership of Islam itself. Crone makes Islamic political thought accessible by relating it to the contexts in which it was formulated, analyzing it in terms familiar to today's reader, and, where possible, comparing it with medieval European and modern political thought. By examining the ideological point of departure for medieval Islamic political thought, Crone provides an invaluable foundation for a better understanding of contemporary Middle Eastern politics and current world events.

Using tricks to handle coupled nonlinear dynamical many-body systems, several advancements have already been made in understanding the behavior of markets/economic/social systems and their dynamics. The book intends to provide the reader with updated reviews on such major developments in both econophysics and sociophysics, by leading experts in the respective fields. This is the first book providing a panoramic view of these developments in the last decade.

Theory and Method in Lexicography

This volume collects 22 papers presented at the 4th International Symposium of the ICA Commission on the History of Cartography, held at Eötvös Loránd University, Budapest, Hungary, on 28-29 June 2012. The overall conference theme is 'Exploration - Discovery - Cartography', but preference has been given to papers dealing with cartography in the 19th and 20th centuries. The papers are classified according to regional sub-themes, i.e. papers on the Americas, papers on Africa, etc.

Nature and History in Modern Italy

Division and Square Root: Digit-Recurrence Algorithms and Implementations is intended for researchers into division and square root and related operations, as well as for designers of the corresponding arithmetic units, either for general-purpose processors or for special purpose components of systems for applications such as signal and image processing. The book can also be used in graduate courses on arithmetic algorithms and processors. As the capabilities of IC technologies improve, hardware implementation of all basic arithmetic operations is becoming common in the design of processors. While the design of fast and efficient adders and multipliers is well understood, division and square root remain a serious design challenge. The reasons are the intrinsic dependence among the iteration steps and the complexity of the result-digit generation function. To limit the effect of these on the execution time, an extensive theory has been developed, based on concepts such as redundant number representations, prediction of result digits, and operand scaling. The authors give a unified presentation of the most relevant aspects of this theory. This can serve as the basis of specific implementations, as well as the foundations for further research. Division and Square Root: Digit-Recurrence Algorithms and Implementations integrates a vast amount of research. The authors have drawn on results of many researchers as well as on their own work. A comprehensive bibliography is provided, as well as bibliographical notes after each chapter.

God's Rule

This collection explores the complex dynamics of corporate land deals from a broad agrarian political economy perspective, with a special focus on the implications for property and labour regimes, labour processes and structures of accumulation. This involves looking at ways in which existing patterns of rural social differentiation – in terms of class, gender, ethnicity and generation – are being shaped by changes in land use and property relations, as well as by the re-organization of production and exchange as rural communities and resources are incorporated into global commodity chains. It goes further than the descriptive ‘what’ and ‘who’ questions, in order to understand the ‘how’ and ‘why’ of these patterns. It is empirically solid and theoretically sophisticated, making it a robust and boundary-changing work. Contributors come from various scholarly disciplines. Covering nearly all regions of the world, the collection will be of interest to researchers from various disciplines, policymakers and activists. This book was originally published as a Special Issue of the Journal of Peasant Studies.

Econophysics and Sociophysics

This useful reference allows readers to compare and learn from best-practice and up-to-date information in this exciting field from Europe, the US and Australia. It shows how to overcome day-to-day and strategic engineering problems, rather than concentrating on policy and market-structural issues.

Our Struggle

A recent technological advance is the art of designing circuits to test themselves, referred to as a Built-In Self-Test. This book is written from a designer's perspective and describes the major BIST approaches that have been proposed and implemented, along with their advantages and limitations.

Sidelines

This book pulls together new research and theory on the verbal communication of emotions by an international, cross-disciplinary group of recognized experts in affective communication. The book's goal is to provide readers with a comprehensive view of current research and encourage cross-disciplinary interaction. Topics include analyses of literal and figurative expressions for emotions, studies of the use of metaphor and other figurative expressions for emotion, analysis of the role of conversational partners in creating emotional meaning, and the effects of culture on emotional communication. The chapters are organized into three broad areas: background theory, figurative language use, and social/cultural aspects of emotional communication. Part I reviews fundamental issues in the verbal communication of emotion. Part II examines the role of metaphor and other figures of speech in emotional communication in both everyday language and psychotherapeutic contexts. Part III looks at ways emotions are embedded in larger socio-culture processes. Taken as a whole, the chapters provide a comprehensive look at the current state of research on the use of language in affective communication and suggest a number of interesting directions for future research.

The New Century Italian Renaissance Encyclopedia

Change Management is a crucial process for gaining the competitive advantage that is the goal of many organisations. Leaders and change agents are often faced with conflicting challenges of motivating and understanding increasingly diverse workforces, accounting to stakeholders and planning for the future in a chaotic environment. Comprising 12 chapters in 6 parts, the text opens with an explanation of the environment of change faced by organisations today. It then deals with managing organisational development, which is a planned process of change which is often subject to the incursions of organisational transformation, a more dramatic and unpredictable type of change. With the field of organisational change continuing to evolve, especially in an international context, future directions of change management are also discussed. Finally, to emphasise the relationship between theory to practice, *Organisational Change: Development and Transformation 6e* provides 10 local and international case studies and a suite of online cases supported by a case matrix. Case studies, exercises and support material present the challenges of change management in a real-life manner - examining issues from a variety of viewpoints.

The Oriental Herald

A guide to analyzing and predicting traffic. It also covers the various problems encountered when designing traffic signal controls and highways to accommodate the varying volume.

The New Enclosures: Critical Perspectives on Corporate Land Deals

Logical development of the concepts and applications of traffic stream theory and operations analysis. Includes many worked examples and homework problems.

The Achehese

For one-semester, junior/senior-level and graduate courses in Reinforced Concrete in the department of civil engineering. Now reflecting the new 2008 ACI 318-08 Code and the new International Building Code (IBC-2006), the Sixth Edition of this cutting-edge text has been extensively revised to present state-of-the-art developments in reinforced concrete. It analyzes the design of reinforced concrete members through a unique and practical step-by-step trial and adjustment procedure. The narrative is supplemented with flowcharts to guide students logically through the learning process. Ample photographs of instructional testing of concrete members decreases the need for actual laboratory testing.

Operation of Market-oriented Power Systems

Emphasizes the major elements of total transportation planning, particularly as they relate to traffic engineering. Updates essential facts about the vehicle, the highway and the driver, and all matters related to these three principal concerns of the traffic engineer.

And yet we played on, because we had hope that we might be the lucky ones." In the early 1900s, teenaged Sunja, the adored daughter of a crippled fisherman, falls for a wealthy stranger at the seashore near her home in Korea. He promises her the world, but when she discovers she is pregnant--and that her lover is married--she refuses to be bought. Instead, she accepts an offer of marriage from a gentle, sickly minister passing through on his way to Japan. But her decision to abandon her home, and to reject her son's powerful father, sets off a dramatic saga that will echo down through the generations. Richly told and profoundly moving, Pachinko is a story of love, sacrifice, ambition, and loyalty. From bustling street markets to the halls of Japan's finest universities to the pachinko parlors of the criminal underworld, Lee's complex and passionate characters--strong, stubborn women, devoted sisters and sons, fathers shaken by moral crisis--survive and thrive against the indifferent arc of history. *Includes reading group guide*
