Small Town Economic Development

We tend to associate small town economic development with the decline of the rural United States--empty houses, shuttered shops and rusting factories. A common diagnosis of sluggish small town recovery is their lack of lifestyle amenities that attract new residents and businesses. Yet many small towns have shown progress and potential in recent years. This collection of recent articles by experts presents stories of small-town America's struggle and describes innovations and practices behind successful revivals.

Everyone Dies Famous in a Small Town

A lyrical and heartfelt collection by an award-winning writer that connects the lives of young people from small towns in Alaska and the American west. Each story is unique, yet universal. In this book, the impact of wildfire, a wayward priest, or a mysterious disappearance ricochet across communities, threading through stories. Here, ordinary actions such as ice skating or going to church reveal hidden truths. One choice threatens a lifelong friendship. Siblings save each other. Rescue and second chances are possible, and so is revenge. On the surface, it seems that nothing ever happens in these towns. But Bonnie-Sue Hitchcock shows that underneath that surface, teenagers' lives blaze with fury, with secrets, and with love so strong it burns a path to the future.

Small Town

A revealing examination of small-town life More than thirty million Americans live in small, out-of-the-way places. Many of them could have joined the vast majority of Americans who live in cities and suburbs. They could live closer to more lucrative careers and convenient shopping, a wider range of educational opportunities, and more robust health care. But they have opted to live differently. In *Small-Town America*, we meet factory workers, shop owners, retirees, teachers, clergy, and mayors—residents who show neighborliness in small ways, but who also worry about everything from school closings and their children's futures to the ups and downs of the local economy. Drawing on more than seven hundred in-depth interviews in hundreds of towns across America and three decades of census data, Robert Wuthnow shows the fragility of community in small towns. He covers a host of topics, including the symbols and rituals of small-town life, the roles of formal and informal leaders, the social role of religious congregations, the perception of moral and economic decline, and the myriad ways residents in small towns make sense of their own lives. Wuthnow also tackles difficult issues such as class and race, abortion, homosexuality, and substance abuse. *Small-Town America* paints a rich panorama of individuals who reside in small communities, finding that, for many people, living in a small town is an important part of self-identity.

Small-Town America

Hidden Truth by Kenneth R. Taylor _____

Hidden History of Hartland

Nick Champion, ex journalist, now a disgraced share trader, departs the city to pick up the pieces of his career in a small town, working as a reporter for a regional newspaper. By chance, he uncovers corruption in the ranks of local government, a front page expose that helps remake his career as a journalist. When a young woman from the town disappears, shortly followed a second and a third, their story was begging to be written but it went nowhere, there were no leads, he like the police had hit a dead end. Tasked with writing the story of the town's homeless, to accompany the launch of a fund to provide them with a shelter, Nick visits the woodlands behind an old cannery where they live. There, from information received and the investigation that followed, the story was finally written, not the one that he had at first envisaged, something bigger, the story of a small town's hidden, dark underbelly, a scoop that captured nationwide attention.

Hidden Truth

In literature and popular culture, small town America is often idealized as distilling the national spirit. Does the myth of the small town conceal deep-seated reactionary tendencies or does it contain the basis of a national re-imagining? During the period between 1940 and 1960, America underwent a great shift in self-mythologizing that can be charted through representations of small towns. Authors like Henry Bellamann and Grace Metalious continued the tradition of Sherwood Anderson in showing the small town--by extension, America itself--profoundly warping the souls of its citizens. Meanwhile, Ray Bradbury, Toshio Mori and Ross Lockridge, Jr., sought to identify the small town's potential for growth, away from the shadows cast by World War II toward a more inclusive, democratic future. Examined together, these works are key to understanding how mid-20th century America refashioned itself in light of a new postwar order, and how the literary small town both obscures and reveals contradictions at the heart of the American experience.

The Dreams, The Visions and Realizations

Small towns have long been a commonplace setting in cozy mysteries, but in recent years writers of realistic crime fiction have discovered fresh possibilities in small town settings. There they can take advantage of distinct facets of small town life--a sense of community, slower pace of life, proximity to nature--and yet deal with social, economic and environmental issues. Because crimes in small communities hit closer to home, the human element can better be emphasized. This book focuses on the work of ten contemporary authors who have placed small towns like Rockburg, Pennsylvania (K. C. Constantine), West Table, Missouri (Daniel Woodrell), Niniltna, Alaska (Dana Stabenow), Aurora, Minnesota (William Kent Krueger), Paradise, Michigan (Steve Hamilton), Millersburg, Ohio (P. L. Gaus), Heartsdale, Georgia (Karin Slaughter), Millers Kill, New York (Julia Spencer-Fleming), Durant, Wyoming (Craig Johnson), and a number of national parks (Nevada Barr) on the map of American crime fiction.

Architecture manifests as a space of concealment and unconcealment, lethe and alêtheia, enclosure and disclosure, where its making and agency are both hidden and revealed. With an urgency to amplify narratives that are overlooked, silenced and unacknowledged in and by architectural spaces, histories and theories, this book contends the need for a critical study of hiding in the context of architectural processes. It urges the understanding of inherent opportunities, power structures and covert strategies, whether socio-cultural, geo-political, environmental or economic, as they are related to their hidescapes – the constructed landscapes of our built environments participating in the architectures of hiding. Looking at and beyond the intentions and agency that architects possess, architectural spaces lend themselves as apparatuses for various forms of hiding and un(hiding). The examples explored in this book and the creative works presented in the interviews enclosed in the interludes of this publication cover a broad range of geographic and cultural contexts, discursively disclosing hidden aspects of architectural meaning. The book investigates the imaginative intrigue of concealing and revealing in design processes, along with moral responsibilities and ethical dilemmas inherent in crafting concealment through the making and reception of architecture.
