Estate Planning for Women

Estate planning strategies and solutions for modern women covering Wills, Trusts, Asset Protection, Special Needs planning and the Probate process.

The Effective Estate Planning Practice

This book provides a current and comprehensive analysis of the context in which Pacific women engage in the private sector, as well as a detailed list of strategies to increase their participation in business. Drawing on research and data from seven Pacific countries, it offers a diversity of innovative and pragmatic ways to empower women and enhance their economic opportunities. Jointly undertaken by the Asian Development Bank's Pacific Private Sector Development Initiative and the Government of Australia, this study is valuable for anyone seeking to support Pacific women and contribute to entrepreneurship, business development, and private sector growth.

Women and Business in the Pacific

Equal rights between men and women are enshrined as a fundamental human right in the UN Charter, and reflected in various internationally agreed instruments, such as the 1979 Convention on the Elimination of All Forms of Discrimination against Women and the 1995 Beijing Declaration and Platform for Action. Although there has been notable progress in some areas, in most nations women are still at a disadvantage in terms of their role and position in the economic and political arenas. This publication examines the gender dimension of trade and seeks to identify policy challenges and responses to promote gender equality in light of increasing globalisation. Issues discussed include: economics of gender equality, international trade and development; multilateral negotiations on agriculture in developing countries; gender-related issues in the textiles and clothing sectors; international trade in services; gender and the TRIPS Agreement; the impact of WTO rules on gender equality; human rights aspects; fair trade initiatives; the role of IT in promoting gender equality, the Gender Trade Impact Assessment and trade reform.

The 48 Laws of Power

Ranging from the age of slavery to contemporary injustices, this groundbreaking history of race, gender and class inequality by the radical political activist Angela Davis offers an alternative view of female struggles for liberation. Tracing the intertwined histories of the abolitionist and women's suffrage movements, Davis examines the racism and class prejudice inherent in so much of white feminism, and in doing so brings to light new pioneering heroines, from field slaves to mill workers, who fought back and refused to accept the lives into which they were born. 'The power of her historical insights and the sweetness of her dream cannot be denied' The New York Times

Trade and Gender

"This report provides a synthesis of the findings from the Jobs, Gender and Small Enterprises in Africa-- a Study on Women's Enterprise Development (the WED Study), which was carried out in Ethiopia, Tanzania and Zambia through 2002. This was an action research project and funded as part of

Ireland Aid's Partnership Programme with the International Labour Organization (ILO) and its InFocus Programme on Boosting Employment through Small Enterprises Development (IFP/ SEED). The study was directed by Gerry Finnegan from the Women's Entrepreneurship Development and Gender in Enterprise (WEDGE) Team within SEED and undertaken by a partnership of three nationally-based research groups-- Julé Development Associates International (JUDAI) Consultants in Zambia, Zewde and Associates PLC in Ethiopia and the University of Dar Es Salaam's Entrepreneurship Centre (UDEC) in Tanzania together with two international consultants Dr. Pat Richardson and Rhona Howarth from the UK"--P. ix.

Women, Race & Class

Regarded as one of the most influential management books of all time, this fourth edition of *Leadership and Organizational Culture* transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

The Challenges of Growing Small Businesses

Around the world, discriminatory legislation often known as family law prevents women from accessing their human rights. Drawing on a range of global case studies and interviews, this book shows how women are contributing to legal reform, helping to shape non-discriminatory policies and counter gender-based violence.

American Book Publishing Record

In the years between the world wars, Manhattan's Fourteenth Street-Union Square district became a center for commercial, cultural, and political activities, and hence a sensitive barometer of the dramatic social changes of the period. It was here that four urban realist painters--Kenneth Hayes Miller, Reginald Marsh, Raphael Soyer, and Isabel Bishop--placed their images of modern "new women." Bargain stores, cheap movie theaters, pinball arcades, and radical political organizations were the backdrop for the women shoppers, office and store workers, and consumers of mass culture portrayed by these artists. Ellen Wiley Todd deftly interprets the painters' complex images as they were refracted through the gender ideology of the period. This is a work of skillful interdisciplinary scholarship, combining recent insights from feminist art history, gender studies, and social and cultural theory. Drawing on a range of visual and verbal representations as well as biographical and critical texts, Todd balances the historical context surrounding the painters with nuanced analyses of how each artist's image of womanhood contributed to the continual redefining of the "new woman's" relationships to men, family, work, feminism, and sexuality.

Organizational Culture and Leadership

"Families around the world look, feel, and live differently today. Families can be "make or break" for women and girls when it comes to achieving their rights. They can be places of love, care, and fulfillment but, too often, they are also spaces where women's and girls' rights are violated, their voices are stifled, and where gender inequality prevails. In today's changing world, laws and policies need to be based on the reality of how families live. UN Women's flagship report, "Progress of the world's women 2019–2020: Families in a changing world", assesses the reality of families today in the context of sweeping economic, demographic, political, and social transformation. The report features global, regional, and national data. It also analyses key issues such as family laws, employment, unpaid care work, violence against women, and families and migration. At a critical juncture for women's rights, this landmark report proposes a comprehensive family-friendly policy agenda to advance gender equality in diverse families. A package of policies to deliver this agenda is affordable for most countries, according to a costing analysis included in the report. When families are places of equality and justice, economies and societies thrive and unlock the full potential of the Sustainable Development Goals (SDGs). The report shows that achieving the SDGs depends on promoting gender equality within families." -- UNWomen.org.

Feminist Advocacy, Family Law and Violence Against Women

This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

The new Woman Revised

Best Life magazine empowers men to continually improve their physical, emotional and financial well-being to better enjoy the most rewarding years of their life.

Progress of the World's Women 2019-2020

This first in-depth study of women's politeness examines the complex relationship individuals had with the discursive ideals of polite femininity. Contextualising women's autobiographical writings (journals and letters) with a wide range of eighteenth-century printed didactic material, it analyses the tensions between politeness discourse which aimed to regulate acceptable feminine identities and women's possibilities to resist this disciplinary regime. Ylivuori focuses on the central role the female body played as both the means through which individuals actively fashioned themselves as polite and feminine, and the supposedly truthful expression of their inner status of polite femininity.

Innovative Business Practices

This title, from Gordon Rugg and Marian Petre, discusses the unwritten rules of the academic world, the things people forget to tell you about doing a doctorate.

Backlash Export Header

... the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, International Journal of Entrepreneurial Behaviour and Research The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography as their main methodological approach to social studies. . . The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, Scandinavian Journal of Management . . . the contributors in this text breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activities. The anecdote, the narrative, the metaphorical, the discursive and the dramaturgical are significant therefore, not only because they bring to the surface voices, emotions, processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase Steyaert, these approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a serious and scholarly way. Denise Fletcher, International Small Business Journal In their edited book Narrative and Discursive Approaches in Entrepreneurship, Daniel Hjorth and Chris Steyaert provide a

fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers. Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and making sense of entrepreneurship was simply a matter of knowing how to interpret one's findings. By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases themselves make for fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, taxi drivers in Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many edited books which have no plot, the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill, US Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of discovery from economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate both the context and place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask, how do these texts move you? they entice, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of t

Women and Politeness in Eighteenth-Century England

What would happen if you made your business decisions by the book? By the Bible that is. This updated version of the best-selling *Business by the Book* offers radical principles of business management that go beyond the Ten Commandments and other biblical maxims. *Business by the Book* is a step-by-step presentation of how businesses should be run according to the Creator of all management rules: God. Larry Burkett, founder and president of Christian Financial Concepts, provides business principles from his own experience as well as what God's Word says on topics such as: Hiring and Firing Decisions Pay Increases and Promotions Management Selection Employee Pay Decisions Borrowing and/or Lending Decisions Forming Corporations and Partnerships Business Tithing Retirement Whether you are the owner of a business, a corporate executive, or a manager, this best-selling classic is for you.

Books In Print 2004-2005

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the *Principles of Management* course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Contributing Authors David S. Bright, Wright State University Anastasia H. Cortes, Virginia Tech University Eva Hartmann, University of Richmond K. Praveen Parboteeah, University of Wisconsin-Whitewater Jon L. Pierce, University of Minnesota-Duluth Monique Reece Amit Shah, Frostburg State University Siri Terjesen, American University Joseph Weiss, Bentley University Margaret A. White, Oklahoma State University Donald G. Gardner, University of Colorado-Colorado Springs Jason Lambert, Texas Woman's University Laura M. Leduc, James Madison University Joy Leopold, Webster University Jeffrey Muldoon, Emporia State University James S. O'Rourke, University of Notre Dame

Current Law Index

This is the fortieth anniversary edition of a classic of law and society, updated with extensive new commentary. Drawing a distinction between experienced "repeat players" and inexperienced "one shotters" in the U.S. judicial system, Marc Galanter establishes a recognized and applied model of how the structure of the legal system and an actor's frequency of interaction with it can predict outcomes. Notwithstanding democratic institutions of governance and the "majestic equality" of the courts, the

enactment and implementation of genuinely redistributive measures is a hard uphill struggle. In one of the most-cited essays in the legal literature, Galanter incisively demolishes the myth that courts are the prime equalizing force in American society. He provides a penetrating analysis of the limitations and possibilities of courts as the source and engine of large-scale social change. Galanter's influential article is now available in a convenient, affordable, and assignable book (in print and ebooks), with a new introduction by the author that explains the origins and aftermath of the original work. In addition, it features his 2006 article applying the original thesis to real-world dilemmas in legal structure and consequence today. The collection also adds a new Foreword by Shaubin Talesh of the University of California-Irvine and a new Afterword by Robert Gordon of Stanford. As Gordon points out, "The great contribution of the article was that it went well beyond local and contingent political explanations to locate obstacles to social reform and redistributive policies in the institutional structure of the legal system itself." Gordon details ways in which Galanter's prophecies have come true and even worsened over four decades. Talesh catalogs the article's place in legal lore: "seminal, blockbuster, canonical, game-changing, extraordinary, pivotal, and noteworthy." Talesh introduces how repeat players gain advantages in the legal system and how "Galanter set out an important agenda for legal scholars, sociologists, political scientists, and economists. In short, "every law and legal studies student should be required to read the article because it contextualizes the procedural system as something more than a set of rules that should be memorized and mechanically applied." A powerful new addition to the Classics of Law & Society Series by Quid Pro Books. Features active contents, linked notes, active URLs, and linked Index.

Narrative and Discursive Approaches in Entrepreneurship

Annotation The Strategic Development of Talent moves beyond HRD to apply the principles of strategic business planning to talent management, knowledge management and workplace learning, and it has been retitled to underscore this emphasis. Anyone who wishes to use talent to support organizational strategy including CEOs, operating managers, and HR, HRD and WLP practitioners will find this text both informative and practical.

Business by the Book

This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

Principles of Management

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by

persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Why the Haves Come Out Ahead

In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ... Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.

Woman, Church, and State

Most discussions about approaches to regulating prostitution occur at the national level--battles, for example, between prohibition and legalization. In reality, however, the impact of prostitution is felt most keenly at the local level, and it is local measures that can have the greatest effect. This book explores various approaches to regulating prostitution and other sex work at the local level, analyzing their aims and outcomes and offering guidance on designing effective regulations through available policy instruments.

Our Women are Free

This book originated in a symposium on business ethics that took place in the Faculty of Commerce at the University of Canterbury in September of 1997. Professor Werhane, who was a visiting Erskine Fellow, provided the keynote address, and many of the papers in this collection were originally presented at this symposium. We are grateful to Kluwer Publishers for the opportunity to publish these essays in their series on International Business Ethics. We want to thank the Olsson Center for Applied Ethics at the Darden School, University of Virginia, and the Erskine Trust and the Department of Management at the University of Canterbury for their support of Professor Werhane's fellowship, research for this text, and funding for its production. We especially want to thank Lisa Spiro, who copy-edited and prepared the manuscript for publication. INTRODUCTION AND OVERVIEW This book originated in a symposium on business ethics that took place in the faculty of commerce, at the University of Canterbury, in September 1997. Professor Werhane, who was a visiting Erskine Fellow, provided the keynote address. Contributions to the proceedings were. inter-disciplinary, spanning theory and practice. Subsequent contributions were obtained from within New Zealand and from Asia. The book starts off on rather a pessimistic note: the new managerialism (the kind of thing Scott Adams jokes about in the world-famous Dilbert cartoons) is economically suspect and psychologically damaging.

The Advocate

This updated edition of Women in Parliament: Beyond Numbers Handbook covers the ground of women's access to the legislature in three steps: It looks into the obstacles women confront when entering Parliament be they political, socio-economic or ideological and psychological. It presents solutions to overcome these obstacles, such as changing electoral systems and introducing quotas, and it details strategies for women to influence politics once they are elected to parliament, an institution which is traditionally male dominated. The first Women in Parliament: Beyond Numbers handbook was produced as part of IDEA's work on women and political participation in 1998. Since its release in English in 1998, there has been an ongoing interest and demand for the handbook, and responding to the request for the translation of the handbook, IDEA has produced Spanish, French and Indonesian language versions and a Russian overview of the handbook during 2002-2003. Since the first handbook was published, the picture regarding women's political participation has slowly changed. Overall the past decade has seen gradual progress with regard to women's presence in national parliaments. This

second edition incorporates relevant global changes in the past years presenting new and updated case studies.--

The Strategic Development of Talent

Although leadership theories have evolved to reflect changing social contexts, many remain silent on issues of equity, diversity, and social justice. *Diversity and Leadership*, by Jean Lau Chin and Joseph E. Trimble, offers a new paradigm for examining leadership by bringing together two domains—research on leadership and research on diversity—to challenge existing notions of leadership and move toward a diverse and global view of society and its institutions. This compelling book delivers an approach to leadership that is inclusive, promotes access for diverse leaders, and addresses barriers that narrowly confine our perceptions and expectations of leaders. Redefining leadership as global and diverse, the authors impart new understanding of who our leaders are, the process of communication, exchange between leaders and their members, criteria for selecting, training, and evaluating leaders in the 21st century, and the organizational and societal contexts in which leadership is exercised.
