## The Financial History of Massachusetts

Excerpt from The Financial History of Massachusetts: From the Organization of the Massachusetts Bay Company to the American Revolution The American revolution marks a natural division of the history of Massachusetts into two periods, each with financial characteristics distinct from those of the other - the period of her dependency upon the British crown, and the period of her membership in the American union. The first of these periods again divides itself into two others, corresponding to the respective lives of the colonial and provincial charters; while the second, though shaken by no such violent political tempests as served to break up the previous history of the commonwealth into epochs, is marked near its middle by the beginning of that great and varied material development which, during the last half century, has completely changed the character of the science of finance in all civilized countries. We thus have four well-defined periods of financial history. The present monograph is devoted to the first two of these periods, comprising the larger one of the dependency of the commonwealth upon the British crown. Presented here for the first time is the history of Boston's evolution as a center of American money management from early settlement to the twenty-first century. Within a few decades after the Revolution, Bostonians built up an impressive mercantile and industrial economy, and used wealth accrued from the China trade, New England mills, and other ventures to establish the most important stock exchange in America. They also created the Boston trustee, a unique professional who managed private fortunes over generations. During the late nineteenth century, Boston financial institutions were renowned as bastions of stability and conservatism in an era of recurrent economic panics and frequent failures. It was not until the twentieth century that Boston became better known for its role in investment management. In 1924, local financiers created the first mutual fund, an innovation almost a century in the making. After World War II, Boston originated venture capital with the founding of American Research & Development. This was soon followed by the development of private equity, the growth of the mutual fund industry, the pension revolution that changed and strengthened money management, the evolution in management of institutional endowments, and the rise of new family offices and hedge funds. The contributions of fiduciaries and investment managers have played an important part in the rise of the New Boston and made the city one of the most vibrant financial capitals in the world. Investment Management in Boston is published in association with Massachusetts Historical Society.

Excerpt from Financial History of Lawrence Academy at Groton, Massachusetts: With a Statement of Its Funds Now Available Committee now have the honor to submit the following report: Owing to the great depression that has prevailed in business circles during the past eighteen months, the income derived from the invested funds of Lawrence Academy has been, seriously lessened. A similar diminution of available money for current expenses has lately fallen to the lot of many other literary institutions. While in the case of the Academy it is unfortunate that this state of affairs should exist, it need not be the subject of discouragement. On other occasions of like emergencies the friends of the institution have come forward and given freely and cheerfully toward its support. ### The Financial History of Massachusetts

Howard Bodenhorn's *State Banking in Early America* studies the financial experimentation that took place in the United States between 1790 and 1860. Dr. Bodenhorn's book explores regional differences in banking structures, which bear indirectly in the connection between financial and economic development. If a single theme emerges, it is that the United States benefitted from its free banking philosophy in which state governments, rather than a centralized authority, created financial structures designed to serve specific, local needs. Thus decentralized federalism provided state legislatures with a great deal of flexibility in their individual approaches to economic and financial issues. The important lessons to be learned from Dr. Bodenhorn's historical account are that successful banking systems are flexible, predictable, and incentive-compatible; they meet the needs of the borrowers, depositors and shareholders, and they reduce downside risks to generally agreed upon levels. These lessons imply that we cannot, a priori, define an optimal, one-size-fits-all banking system. We need to know something about the formal and informal institutions underlying an economy and about the risk preferences of its citizenry. Historically, outsiders view Americans as experimenters and risk takers. Nowhere is this experimentation and risk taking more apparent than in early American banking policies.

Does the 2nd Amendment give people the right to overthrow the government with insurrections?

This interpretation of the constitution is an excuse for not passing gun reform

The constitution treats insurrection as a serious and dangerous offense

Forming a militia and attacking the government is unconstitutional and qualifies as treason

The constitution doesn't even guarantee non-violent civil disobedience

Insurrectionists are not "hostages"

The 2nd Amendment is not unlimited

### The Facing Island

The discovery of a wonderful primary source—the five-year correspondence from Wilson Tong of the New Zealand Expeditionary Force to Edith Harris at Phillip Island—inspired the author to create this rich and unusual memoir, written as she came to terms with a diagnosis of cancer. As the author replies to the long-dead soldier's letters, links and parallels emerge between the young man living with the fear of death and the woman, 80 years later, facing her own death in middle age. She reflects on her life—particularly her childhood on Phillip Island—her work, and her own confrontation with mortality.

### Clio's Lives

Including contributions from leading scholars in the field from both Australia and North America, this collection explores diverse approaches to writing the lives of historians and ways of assessing the importance of doing so. Beginning with the writing of autobiographies by historians, the volume then turns to biographical studies, both of historians whose writings were in some sense nation-defining and those who may be regarded as having had a major influence on defining the discipline of history. The final section explores elements of collective biography, linking these to the formation of historical networks. A concluding essay by Barbara Caine offers a critical appraisal of the study of historians' biographies and autobiographies to date, and maps out likely new directions for future work. Clio's Lives is a very good scholarly collection that advances the study of autobiography and biography within the writing of history itself, taking theoretical questions in significant new directions. The contributors are well known and highly respected in the history profession and write with an insight and intellectual energy that will ensure the book has considerable impact. They examine cutting-edge issues about the writing of history at the personal level through autobiography and biography in diverse and innovative ways. Together the writers have provided reflective chapters that will be widely read for their impressive theoretical advances as well as being inspirational for new entrants to the disciplinary area. — Patricia Grimshaw, University of Melbourne Clio's Lives brings together a most interesting and varied cast of contributors. Its chapters contain sophisticated and well-penned ruminations on the uses of biography and autobiography among historians. These are clearly connected with the general themes of the volume. This delightfully mixed bag makes very good reading and, as well, will serve as a substantial contribution to the study of the biography and autobiography. — Eric Richards, Flinders University

## History, Historians, and Autobiography

Though history and autobiography both claim to tell true stories about the past, historians have traditionally rejected first-person accounts as subjective and therefore unreliable. What then, asks Jeremy D. Popkin in *History, Historians, and Autobiography*, are we to make of the ever-increasing number of professional historians who are publishing stories of their own lives? And how is this recent development changing the nature of history-writing, the historical profession, and the genre of autobiography? Drawing on the theoretical work of contemporary critics of autobiography and the philosophy of Paul Ricoeur, Popkin reads the autobiographical classics of Edward Gibbon and Henry Adams and the memoirs of contemporary historians such as Emmanuel Le Roy Ladurie, Peter Gay, Jill Ker Conway, and many others, he reveals the contributions historians' life stories make to our understanding of the human experience. Historians' autobiographies, he shows, reveal how scholars arrive at their vocations, the difficulties of writing about modern professional life, and the ways in which personal stories can add to our understanding of historical events such as war, political movements, and the traumas of the Holocaust. An engrossing overview of the way historians view themselves and their profession, this work will be of interest to readers concerned with the ways in which we understand the past, as well as anyone interested in the art of life-writing.

## Australian Book Review

The social sciences share a mission to shed light on human nature and society. However, there is no widely accepted meta-theory; no foundation from which variables can be linked, causally sequenced, or ultimately explained. This book advances "life history evolution" as the missing meta-theory for the social sciences. Originally a biological theory for the variation between species, research on life history evolution now encompasses psychological and sociological variation within the human species that has long been the stock and trade of social scientific study. The eighteen chapters of this book review six disciplines, eighteen authors, and eighty-two volumes published between 1734 and 2015—re-reading the texts in the light of life history evolution.

Life is one small unexpected journey at a time moving us towards a destiny we could never imagine. *The Evolution of Intimacy : A Personal Story* is one such journey. The book is an account of taking a leap of faith, with a chance online meeting on a dating site in October, and moving in together in December having only met once. The book details the results of following one's intuition and heart, and moving over three hundred miles to create a new life. It's a story showing how, against all odds, faith and trust changed the fate of two unsuspecting people. It touches on difficult issues of love, marriages, divorces, death, adult children, his and hers, ex-spouses, couples counseling, health, finances and everything in between. The book offers hope, insights and inspiration for anyone struggling with or in a dysfunctional relationship, or was raised in an alcoholic environment, or is an alcoholic, an addict, a compulsive over-eater, or food addict, a sex and love addict, co-dependent, or in a relationship with anyone with an addiction or mental illness. I hope you find the story as inspirational as I did living it.

The only truly successful slave uprising in the Atlantic world, the Haitian Revolution gave birth to the first independent black republic of the modern era. Inspired by the revolution that had recently roiled their French rulers, black slaves and people of mixed race alike rose up against their oppressors in a bloody insurrection that led to the burning of the colony's largest city, a bitter struggle against Napoleon's troops, and in 1804, the founding of a free nation. Numerous firsthand narratives of these events survived, but their invaluable insights into the period have long languished in obscurity—until now. In *Facing Racial Revolution*, Jeremy D. Popkin unearths these documents and presents excerpts from more than a dozen accounts written by white colonists trying to come to grips with a world that had suddenly disintegrated. These dramatic writings give us our most direct portrayal of the actions of the revolutionaries, vividly depicting encounters with the uprising's leaders—Toussaint Louverture, Boukman, and Jean-Jacques Dessalines—as well as putting faces on many of the anonymous

participants in this epochal moment. Popkin's expert commentary on each selection provides the necessary background about the authors and the incidents they describe, while also addressing the complex question of the witnesses' reliability and urging the reader to consider the implications of the narrators' perspectives. Along with the American and French revolutions, the birth of Haiti helped shape the modern world. The powerful, moving, and sometimes troubling testimonies collected in *Facing Racial Revolution* significantly expand our understanding of this momentous event.

*Facing the Spears of Change* takes a close look at the extraordinary life of John Papa ʻŌmākae. Over the years, ʻŌmākae faced many personal and political changes and challenges in rapid succession, which he skillfully parried or seized, then used to fend off other attacks. He began serving in the household of Kamehameha I as an attendant in 1810, at the age of ten, and became highly familiar with the inner workings of the royal household. His early service took place in a time when aliʻi nui (the highest-ranking Hawaiians) were considered divine and surrounded with strict kapu (sacred prohibitions); breaking a kapu pertaining to an aliʻi meant death for the transgressor. He went on to become an influential statesman, privy to the shifting modes of governance adopted by the Hawaiian kingdom. ʻŌmākae's intelligence and his good standing with those he served resulted in a great degree of influence within the Hawaiian government, with his fellow Hawaiians, and with the missionaries residing in the Hawaiian Islands. As a privileged spectator and key participant, his published accounts of aliʻi and his insights into early nineteenth-century Hawaiian cultural-religious practices are unsurpassed. In this groundbreaking work, Marie Alohalani Brown offers an elegantly written and compelling portrait of an important historical figure in nineteenth-century Hawaiʻi. Brown's extensive archival research using Hawaiian and English language primary sources from the 1800s allows access to information which would be otherwise unknown but to a very small circle of researchers.

Where Are the People? How Could the People's Bodies Voice Themselves in the Form of Theatrical Aesthetics? At That Time, the Audience Really Stood Up. In this evening, theater practitioners initiated the conversation with physical action. They engage with contemporary issues through their unique performance styles. From a discursive context, they enter the scene of resistance and undertake the labor of performance. Their performance is not just the preface to a series of dialogues, but also a witness to thirty years of People's Theater. "People's theater" belongs to the people. It is the theater created by the people and speaks for the people as it has appeared in history in diverse forms. People theater in Inter-Asian Societies began to grow in a cross-region, which included Jakarta, Manila, Bangkok, Kuala Lumpur, Hong Kong, Tokyo, Busan, Maputo, Beijing, Shanghai, Hualien, Taichung, and Taipei. Through the writings and images written down by theatrical artists from these spaces, we can figure out the body aesthetics that carry historical conflicts and the experience to find the form and channel of expression, and continue for work of thinking and creation. "People Theater" is nothing but a rehearsal for a revolution. This book has reviewed and reflected on the half-century development of people's theater in inter-Asian societies, demonstrates how the theatrical practitioners and artists in different communities strived to open various spaces, dealt with the censorship from the authoritarian regime to the neoliberal societies, and experimented with diverse aesthetics and local objects to address political issues. •Preface "It is a collection with the premise that can motivate our critical thinking with bodily energy. It reflects how we realize the statement—'Viewing as participating; audience as actors.' It is also a book where some keywords constantly appear, like resistance, politics, the oppressed, and conversation. With its humming buzz and murmur against the present situation, it is a collection of words refusing to remain silent."— Lin Hsin I Associate Professor at the Institute of Applied Art, National Yang Ming Chiao Tung University •People's Theater Practitioners Asian People's Theatre Festival Society (Hong Kong) Assignment Theatre (Taiwan) Centre for Applied Theatre, Taiwan (Taipei) Grass Stage (Shanghai) Langasan Theatre (Hualien) Makhampom Theatre Group (Ching Dao/Bangkok) Oz Theatre Company (Taipei) Philippine Educational Theater Association, PETA (Manila) Shigang Mama Theater (Taichung Shigang) Teater Kubur (Jakarta) Teatro em Casa (Mozambique) Theater Playground SHIIM (Busan) Trans-Asia Sisters Theater (Taiwan) WANG Mo-lin (Taiwan) Wiji Thukul (Solo) Yasen no Tsuki

(Tokyo) •Characteristics of this book 1.Beyond the geographical limitations of Taiwan and East Asia, combined the context of Inter-Asian societies and Third-World society, appreciate the theater work methods that are intertwined with folk culture and community traditions, and promote the practice of public theater. 2. This book focuses on depicting network relationships in specific historical periods, and explores how the cooperation and interaction of troupes in these heterogeneous regions occurred. And how do these interactions affect the characteristics and forms of popular theater organizations in the transition of different policies? 3. What this book looks back on is not only the continuation and development of troupes but also the sudden change or gap between new people theaters and old people theaters.

Lab Girl meets *Why Fish Don't Exist* in this brilliant, fascinating memoir about a young scientist's experience studying penguins in Antarctica—a firsthand account of the beauty and brutality of this remote climate, the direct effects of climate change on animals, and the challenges of fieldwork. Naira de Gracia's *The Last Cold Place* offers a dramatic, captivating window into a once-in-a-lifetime experience: a season living and working in a remote outpost in Antarctica alongside seals, penguins, and a small crew of fellow field workers. In one of the most inhospitable environments in the world (for humans, anyway), Naira follows a generation of chinstrap penguins from their parents' return to shore to build nests from pebbles until the chicks themselves are old enough to head out to sea. In lively and entertaining anecdotes, Naira describes the life cycle of a funny, engaging colony of chinstrap penguins whose food source (krill, or small crustaceans) is powerfully affected by the changing ocean. Weaving together the history of Antarctic exploration with climate science, field observations, and her own personal journey of growth and reflection, *The Last Cold Place* illuminates the complex place that Antarctica holds in our cultural imagination—and offers a rare glimpse into life on this uninhabited continent.

#### King Noanett

Excerpt from *King Noanett: A Story of Old Virginia and the Massachusetts Bay* Time printed. Though first set down (as appears by the context) for the edification of the writer's children, Mr. Carew's views upon some subjects, notably Cromwell and the later Puritans, would have rendered their publication inopportune in New England at a time much before the present. But if he sets forth these matters in a somewhat novel light, he is severer still upon certain phases of early life in Virginia. He speaks without fear or favour, and I have printed it as written, altering only the spelling; and although occasionally he uses words only suited to the robust stomachs of his time, I have let them stand: partly that the sweet and noble temper of his story atones for them, partly that our own stomachs are a trifle over queasy (as to words alone). To use his own, the fighting companies of the Old Dominion were but a ribald crew and the events, even the incidents, which he narrates I have found curiously verified in memoirs nearly contemporary, notably the diaries of his acquaintance.
