SAP Analytics Cloud: Exploring Q1 2024 Release's Features with Experts & Demos - SAP Analytics Cloud: Exploring Q1 2024 Release's Features with Experts & Demos by SAP Products & Services 6,094 views 1 month ago 1 hour, 32 minutes - Check out the latest feature highlights for the quarterly release cycle of **SAP Analytics Cloud**, in Q1 2024 with Orla Cullen, Solution ...

Intro

Administration & Service Management

External hyperlink list for trusted domains

Augmented Analytics

Just ask: next-generation natural language query (NLQ) powered by AI

Predictive Planning – ability to understand individual forecasts

Predictive planning – automation of what-if simulation

Story Design

Applying story, page, local, and linked analysis filter with internal (page or story) hyperlinks

Dynamic text support for geo-local filters

Semantic pattern and color for previous period (color by accounts and pattern by version)

Support pattern in area charts and stacked bar and column charts

Tooltip scale inheritance

Variance as a waterfall chart (for bar-column and horizontal waterfall)

Optimized (unified) story experience – exporting and dynamic text

Variable support – saving a story without preselecting variables

Story Extensibility Updates

Data Exploration Updates

Data Integration Updates

Live SAP BW – improved support of time-dependent hierarchies

Data Modeling

Flexible Modeling Updates

Enterprise Planning

Advanced Formulas - calculated member support

Advanced Formulas – VARIABLEMEMBER support for version dimension

Data Actions - toggle ID or Description for members

Data Actions – cross-model copy with analytic models as a source

Data Actions – manual migration option for existing allocations

New Model – Disaggregation based on another measure

Plan Entry – Fluid Data Entry support for SAP BPC live

Plan Process Management – Calendar rest APIs for execution from SAP Business Process Automation or external systems

Plan Process Management – synchronizing calendar events with Office 365

Table – Sorting of the Version dimension

To-Date Model Formulas

Version Management - display invalid fact records during publishing

Microsoft Office Integration Updates

User Collaboration

Support for data point comments when dimension properties are used in a table

Commenting in models with role-based data security applied

Removal of the “no end date” option when scheduling a publication story

Sending notifications to users when the schedule fails or is partially successful
