Characteristics of and Strategies for Teaching Students with Mild Disabilities

This book describes characteristics of mild disabilities in an easy-to-read-and-understand format. It includes the best teaching practices for inclusion, behavior management, and classroom instruction. A chapter on parents highlights strategies for enhancing this school-family partnership. The book merges practical teaching strategies and solutions with the challenges posed by mildly disabled students. Includes appendices on the history of special education, the side effects of medications, and frequently used tests. Applicable to teachers and administrators who have students with mild disabilities, who are at-risk, or who are "mainstreamed" or included in the classroom.

Characteristics of and Strategies for Teaching Students with Mild Disabilities

Describes the characteristics of students with mild disabilities, and clearly explains the best teaching practices for inclusive education, behavior management, social skill instruction, and modifying classroom instruction for students with mild disabilities.

Characteristics of and Strategies for Teaching Students with Mild Disabilities

This book describes characteristics of mild disabilities in an easy-to-read-and-understand format. It includes the best teaching practices for inclusion, behavior management, and classroom instruction. A chapter on parents highlights strategies for enhancing this school-family partnership. The book merges practical teaching strategies and solutions with the challenges posed by mildly disabled students. Includes appendices on the history of special education, the side effects of medications, and frequently used tests. Applicable to teachers and administrators who have students with mild disabilities, who are at-risk, or who are "mainstreamed" or included in the classroom.

Learning Disabilities and Related Mild Disabilities

The text that has set the standard for students working toward certification in special education has been substantially revised and updated to meet the needs of a new generation of teachers and students. As reflected in the new title, Learning Disabilities and Related Mild Disabilities now includes a cross-categorical emphasis, making it suitable to a broader number of courses. Specifically, the text now accommodates the increased number of courses aimed at teaching students with mild disabilities that are part of many states' certification requirements. Researchers are finding that many students with learning disabilities exhibit coexisting related disorders such as ADHD, Asperger's Syndrome, and nonverbal learning disabilities. Preservice and in-service classroom teachers, who are increasingly responsible for teaching students with special needs within general education or inclusive classrooms, will find this new edition especially helpful. The text describes the characteristics of various mild disabilities and offers teaching strategies for general education teachers, special education teachers, school psychologists, and other related professionals. All of the text's new coverage and special features were developed to align with the Cengage Learning Education Mission Statement-Bridging the gap from preservice to practice-to help new teachers be successful in their future classrooms, and with their future students.

Characteristics of & Strategies for Students with Mild Disabilities

The students "you" teach. With a clear focus on the nature and characteristics of students with the four most prevalent disabilities, this revision allows students and professors to concentrate on the issues that most commonly faced in a school setting. The text explores the cognitive, perceptual, language, academic learning, and social/emotional characteristics of students with Mild Mental Retardation, Learning Disabilities, ADHD, and Emotional/Behavioral Disorders. With real stories and cases, "and" additional resources on the web, this book provides students and teachers with a clearer understanding of the ways children with these disabilities present themselves in the classroom, provides strategies for use when teaching these individuals, and emphasizes the complex nature of mild disabilities. " ...I am impressed by (Learners with Mild Disabilities) " global view" and the reality of dealing with a cluster of issues around individuals with mild disabilities. This book begins with a realistic and promising premise that is useful from a functional educational perspective...the case studies and initial descriptions were superb and resulted in excellent discussions in my class." Bernard H. Graney, PhD, CRC, "Springfield College" " ...both undergraduate and graduate students find the text very user friendly and written at an appropriate intellectual level." Diane M. Gut, "Ohio University" " I LOVED the BEST PRACTICES SECTIONS, they are a very nice addition to the text." Moniqueka E. Gold, Ed.D, "Austin Peay State University"

Learners with Mild Disabilities

Centered on the most recent, scientifically-based practices, Teaching Strategies for Students with Mild/Moderate Disabilities, 1/e, comprehensively details everything that pre-service teachers need to effectively teach students with mild to moderate disabilities. This text includes not only empirically validated instructional strategies, but an array of relevant topics, such as the application of technology to the field and implications for changing demographics within U.S. schools. Each chapter in the book follows a pattern of instruction, by providing key topics, key questions, scenarios, "Technology Spotlights," teacher tips, summary statements, and review questions. This consistency in format throughout the text helps facilitate learning for both instructor and student. Each chapter also includes the Council for Exceptional Children (CEC) standards that are addressed within the chapter, helping instructors align course content to accreditation standards.

Teaching Strategies for Students with Mild to Moderate Disabilities

Vignettes and case studies help to illustrate the strengths and needs of students with disabilities including their cognitive, perceptual, language, academic learning and social/emotional characteristics.

Learners with Mild Disabilities

Outlines and Highlights for Characteristics of and Strategies for Teaching Students with Mild Disabilities by Martin R Henley, Isbn

The Sixth Edition of "Learning Disabilities: Characteristics, Identification, and Teaching Strategies" presents guidelines for using Response to Intervention (RTI) as an eligibility tool and as differentiated instruction for the general education class. Detailed coverage of the most up-to-date classroom practices, the latest research, and critical issues are also presented. Using the author's nearly thirty years of experience in working with children and adolescents who have learning disabilities, this new edition presents the latest research and information on learning disabilities in each developmental area. It focuses on identification and eligibility issues, incorporating the newly released rules and regulations on RTI, IDEA 2004, and the No Child Left Behind legislation. The text stresses both the characteristics of students with learning disabilities and classroom-tested instructional strategies. With up-to-date content, this practical guide also offers insight into practical educational concerns from a teacher's perspective, as well as the relevant scholarship. Highlights of the Sixth Edition: Emphasizes RTI as an assessment option and provides a detailed example of how to complete a response to intervention (Chapter 5). Includes specifics of the IDEA 2004 laws and regulations that became effective in August, 2006. These will drastically reform the field of LD within two years! (Chapters 1-5). Contains research-based reading strategies, as emphasized in the No Child Left Behind legislation (Chapter 6).

Learning Disabilities

The text that has set the standard for students working toward certification in special education has been substantially revised and updated to meet the needs of a new generation of teachers and students. As reflected in the new title, Learning Disabilities and Related Mild Disabilities now includes a cross-categorical emphasis, making it suitable to a broader number of courses. Specifically, the text now accommodates the increased number of courses aimed at teaching students with mild disabilities that are part of many states' certification requirements. Researchers are finding that many students with learning disabilities exhibit coexisting related disorders such as ADHD, Asperger's Syndrome, and nonverbal learning disabilities. Learning Disabilities and Related Mild Disabilities: Characteristics, Teaching Strategies, and New Directions

This text describes the characteristics of learning disabilities as well as various related mild disabilities, and offers teaching strategies for general education teachers, special education teachers, school psychologists and other professionals.

Learning Disabilities and Related Mild Disabilities

A teaching methods book which is focused on the strengths and weaknesses in inclusive instruction while preparing students to teach either a resource class and/or inclusive instructional settings.

Teaching Students with Mild Disabilities

Students in a typical special education methods course are often presented with and overwhelmed by myriad techniques and methods leaving them with insufficient opportunities to practice and reflect on covered practices. In addition, students are often uncertain how to apply the techniques in actual teaching situations. **METHODS AND STRATEGIES FOR TEACHING STUDENTS WITH MILD DISABILITIES: A Case-Based Approach** uses a more focused and integrated approach than other texts in the market. Each chapter presents a limited number of techniques (5 to 7) in detail. Boyle and Scanlon demonstrate effective teaching methods and techniques through application activities, anchor content around case studies, and offer an overview of other techniques not covered in detail. The case study approach is a distinctive feature of this program with both text case studies and video case studies in each chapter. Information addressing culturally, economically, linguistically, and ethnically diverse learners, among others, is integrated throughout the text as well. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Teaching Students with Mild Disabilities

A primary text for use in high-prevalence courses in special education programs. A critical look at four high-prevalence mild disabilities as seen from several unique perspectives. Learners with Mild Disabilities focuses on four high-prevalence disorders: mild intellectual disabilities, learning disabilities, emotional/behavioral disorders, and ADHD. The text also considers the Autism Spectrum Disorders, such as HFA and Asperger's Syndrome, in addition to other mild conditions such as communication disorders. This text looks first at the concept of disability from conventional categorical perspectives, and then shifts to focusing on learners from the perspective of alternative, non-categorical frameworks. It describes students with disabilities and related conditions with respect to a variety of individual strengths and needs, considering their cognitive, perceptual, language, academic learning, and social/emotional characteristics. The reader is encouraged to apply these conceptual frameworks through the analysis of numerous vignettes and extended case studies that are drawn from the experiences of real children and teachers throughout the text. Using this non-categorical framework best prepares special educators for the complex job of providing effective services to the full and unique spectrum of students with mild disabilities.

Methods and Strategies for Teaching Students with Mild Disabilities: A Case-Based Approach

This practical new book focuses attention on a group of learners with unique needs and characteristics, adolescents with disabilities. It describes the wealth of research-proven instructional methods available to address the learning and behavioral problems typical of adolescent learners with such conditions as learning disabilities, behavioral disorders, and mild mental retardation. A cross-categorical focus is used, and a solid grounding in current research ensures the techniques advocated have a proven track-record. The authors' straightforward writing style and minimal use of jargon make all material accessible and understandable to users. Each content area chapter, in addition to presenting techniques for use in special education classes, explores ways in which teachers of adolescents with disabilities can use the material in general education classrooms, as well. Specific methods for use with specific groups of adolescents with mild disabilities are included wherever applicable; for example, cognitive strategies for use with students identified as learning disabled. For educators.

Learners with Mild Disabilities: A Characteristics Approach

Written by a teacher for teachers, this engaging book provides more than 100 practical strategies for students with learning disabilities, along with guidance on accommodations and assessment.

Teaching Students with Mild Disabilities at the Secondary Level

METHODS AND STRATEGIES FOR TEACHING STUDENTS WITH MILD DISABILITIES: A Case-Based Approach, International Edition uses case studies and application activities for a more focused and integrated approach to teaching K-12 special education teaching methods. The case study approach is a distinctive feature of this program with both text case studies and video case studies in each chapter. The text provides a special emphasis on teaching children with mild to moderate disabilities such as ADHD, learning disabilities, mild mental retardation, and emotional/behavioral disorders.

Strategies for Teaching Students With Learning Disabilities

Encouraging high standards and expectations for all students, "Teaching Students with Mild and Moderate Disabilities: Research-Based Practices" goes beyond other methods texts by personally connecting education professionals with the knowledge, tools, and practical strategies to be effective in today's diverse classrooms. Reflecting the latest laws, legislation, and standards, this text includes all the core concepts and best practices for teaching and learning both functional and academic skills for students with learning and behavioral problems. Features of the Text: Each chapter includes "Considering Diversity" features with specific advice, guidelines, and practices when working with students who are culturally and linguistically diverse. Specific content-area chapters based on national performance standards provide specific and balanced strategies that promote learning for students in elementary through secondary schools. "Using Technology" features focus on a variety of low-tech and high-tech materials, assistive technology devices, and software that can be used when teaching students with mild and moderate disabilities. Numerous content-rich examples of traditional and contemporary approaches to teaching show educators how to teach in inclusive to self-contained classrooms. The "Research to Practice" boxes further highlight current research and how curriculum and instruction can be used in the various environments. Offering a consistent format, this text links assessment, planning, organization, implementation, and evaluation through effective collaboration and working with families and other professionals. Located at <http://www.prenhall.com/cohen>, the user-friendly Companion Website provides online resources for professors as well as students and is truly integrated throughout Teaching Students with Mild and Moderate Disabilities: Research-Based Practices.

Methods and Strategies for Teaching Students with Mild Disabilities

Combining the best of concept and application, Strategies for Teaching Students in Inclusive Classrooms: A Case Method Approach covers teaching methods and cases from inclusive education settings. Offering an innovative chapter sequence, it pairs concept chapters with case chapters to ensure readers understand core material and can apply it to real situations. Learn about special education law and inclusion, teaching in the inclusive classroom, effective use of behavior management in inclusive classrooms and effective techniques for teaching basic skills such as reading, writing, and mathematics. See how strategies work in real classrooms through the text's clinical and narrative case studies that illustrate core concepts in action.

Teaching Students with Mild and Moderate Disabilities

The book that set the standard for those working toward certification in special education has been revised and updated to meet the needs of a new generation of teachers and students. A cross-categorical emphasis that makes it suitable for a broad number of courses-including those aimed at teaching students with related disabilities and those teaching students on the Autism Spectrum. The authors describe the characteristics of learning disabilities as well as other disabilities, and offer practical teaching strategies for general education and special education teachers, school psychologists, administrators, and related professionals. Pre-service and in-service classroom teachers, who are increasingly responsible for teaching students with special needs within general education or inclusive classrooms, will find LEARNING DISABILITIES AND RELATED DISABILITIES: STRATEGIES FOR SUCCESS, 13th Edition, especially helpful. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Strategies for Teaching Students with Disabilities in Inclusive Classrooms

Equip and empower today's classroom teachers to ADAPT to the needs of all of their students. Using the research-validated ADAPT framework, Teaching Students with Special Needs in Inclusive Classrooms helps future teachers determine how, when, and with whom to use proven academic and behavioral interventions to obtain the best outcomes for students with disabilities. Through clear language and practical examples, authors Diane P. Bryant, Brian R. Bryant, and Deborah D. Smith show how to create truly inclusive classrooms through evidence-based practices and hands-on strategies. This book will provide the skills and inspiration that teachers need to make a positive difference in the educational lives of struggling learners. The text is written to meet the needs of those majoring in general education, special education, and blended teacher education programs.

Learning Disabilities and Related Disabilities: Strategies for Success

Covering characteristics and methods, this comprehensive book discusses how to teach and understand students with learning and other mild disabilities. Each chapter includes case studies, examples, and narratives from teachers and professionals who work with preK-12 students with learning disabilities. Discussion of the IDEA Improvement Act of 2004 appears throughout, including topics such as: ADHD, inclusion, collaboration, families and communities, diversity and functional behavioral assessment.

Teaching Students With Special Needs in Inclusive Classrooms

Ninth edition main entered under: Polloway, Edward A.

Learning Disabilities

"For years the text of choice for developing excellence as a teacher of K-12 students with moderate and severe disabilities, this clearly written work has now been revised and updated. Chapters provide step-by-step procedures for designing standards-based individualized education plans and evaluating and enhancing student progress. Methods and materials for teaching literacy, mathematics, science, and social studies are described in depth. The book also describes effective ways to build functional daily living skills. User-friendly features include extensive vignettes and classroom examples, end-of-chapter application exercises, and reproducible planning and assessment tools. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size. Subject Areas/Key words: special education, children, adolescents, special-needs learners, disabled, moderately, severely, developmental disorders, academic interventions, academic skills, life skills, intellectual disability, cerebral palsy, autism spectrum disorders, learning disabilities, physical disabilities, inclusion classrooms, systematic instruction, special educators, teachers, literacy, reading, mathematics, textbooks, texts Audience: Students in special education and school psychology; K-12 special educators, school psychologists, reading specialists, classroom teachers, and administrators"--

Strategies for Teaching Learners with Special Needs

The third edition of this classic resource is a comprehensive source of information, strategies, and activities for working with learning disabled students. The book offers special educators, classroom teachers, and parents a wealth of new and proven suggestions and ready-to-use materials for helping LD students of all ages learn and perform at their fullest potential.

Teaching Students with Moderate and Severe Disabilities

Focusing on the needs of secondary-level learners with common disabilities—a group often neglected by other books on the market—Teaching Students with Mild and High Incidence Disabilities at the Secondary Level presents numerous research-proven instructional methods and strategies. It thoroughly examines the methods that are effective "across the board," as well as methods specific to particular challenges. The authors address special education theory and relevant research in simple, straightforward language that uses minimal jargon, making concepts accessible and understandable to all. Using case studies to show actual instruction "as it happens," this book gives readers a realistic portrait of today's diverse student population. Coverage includes: special education and adolescence; instruction methods; and current and future instructional issues. An obvious resource for special education teachers, this book is also an excellent guide for all educators, as it provides information about assessment and curriculum planning.

The Complete Learning Disabilities Handbook

To ensure that all students receive quality instruction, Teaching Students with High-Incidence Disabilities prepares preservice teachers to teach students with learning disabilities, emotional behavioral disorders, intellectual disabilities, attention deficit hyperactivity, and high functioning autism. It also serves as a reference for those who have already received formal preparation in how to teach special needs students. Focusing on research-based instructional strategies, Mary Anne Prater gives explicit instructions and includes models throughout in the form of scripted lesson plans. The book also has a broad emphasis on diversity, with a section in each chapter devoted to exploring how instructional strategies can be modified to accommodate diverse exceptional students. Real-world classrooms are brought into focus using teacher tips, embedded case studies, and technology spotlights to enhance student learning.

Teaching Students with Mild and High-incidence Disabilities at the Secondary Level

Featuring detailed student cases, this book provides proven ways to teach all students academic and lifetime learning skills. Informal assessments and sample IEPs are included.

Teaching Students With High-Incidence Disabilities

Strategy Instruction for Middle and Secondary Students with Mild Disabilities

This very applied text introduces preservice teachers to best practices for teaching learners with mild disabilities. The authors illustrate interactions among regular teachers, special education teachers and students with mild disabilities through the use of eight hypothetical case studies of students and teachers.

Outlines and Highlights for Learning Disabilities and Related Mild Disabilities

Strategies for Students with Mild, Moderate, and Severe Intellectual Disabilities is a textbook for undergraduate and graduate students enrolled in special and general education teacher preparation programs (as well as practicing professionals) offering a solid, research based text on instructional methodologies for teaching students with intellectual disability across the spectrum of intellectual abilities. The book addresses both academic and functional curricula in addition to behavioral interventions. Additionally, Instructional Strategies for Students Mild, Moderate, and Severe Intellectual Disability adopts developmental or life span approach covering preschool through adolescence and young adulthood.

Teaching Learners with Mild Disabilities

For courses on how to teach students with mild disabilities. The updated edition of this text is structured and organized to include recommendations for teacher effectiveness to fully prepare special education students for their role in the 21st century. The text uses a personal tone and interactive approach to present practical, research-based teaching strategies that relate to everyday occurrences in the schools, and describes motivating, experience-based activities, along with detailed lesson plans throughout the text.

Instructional Strategies for Students With Mild, Moderate, and Severe Intellectual Disability

Based on the belief that even small accommodations make a difference in the success of students with disabilities, this text provides classroom teachers with the knowledge, tools, and practical strategies that will empower them to spark learning in every student. From students with disabilities, culturally diverse students, and students with limited English proficiency to economically disadvantaged students Vaughn/Bos/Schumm provides teachers with the tools they need in their diverse classrooms. Revised to reflect recent changes in the law (IDEA 2004 & No Child Left Behind) and current terminology, the strength of the book continues to be its numerous learning activities and sample lessons addressing both elementary and secondary classrooms. This edition continues its very popular multi- chapter unit on curriculum adaptations with specific strategies and activities for teaching reading, writing, mathematics, content areas, and study skills, which has been further strengthened by a new capstone chapter on teaching self-advocacy, study skills and strategies. The strong emphasis on professional planning and collaboration make it an excellent resource for all teachers. The newest edition features a new chapter on Autism; a new chapter on Developing Independence in Learning; an all new "Tech Tips" features that has received rave reviews; a revised chapter "Managing Student Behavior" that emphasizes school-wide behavior management and positive behavioral support; an expanded chapter on "Collaborating and Coordinating with Other Professionals and Family Members" with increased coverage of co-teaching; a revised chapter on "Planning and Grouping Strategies for Special Learners" that reflects an increased emphasis on grouping; and expanded coverage of secondary education via chapter-opening interviews, new photos, and new examples throughout the text.

Teaching Children and Adolescents with Special Needs

Especially for special educators that are being asked to teach special education in a general education setting, this book teaches how to apply effective assessment, instructional and evaluation strategies to that setting, and shows how to develop and implement programs in collaboration with general education classroom teachers. Emphasis on providing special education services within a general education setting. Focuses on how special educators can go into mainstream environments and offer direct and indirect services to address the range of learning and behavioral problems that are typical to students with mild disabilities. Shows how to develop and implement programs in collaboration with regular class teachers. Ideal for special educators wanting to learn more about what his/her role is likely to entail.

Teaching Students who are Exceptional, Diverse, and at Risk in the General Education Classroom

Students in a typical special education methods course are often presented with and overwhelmed by myriad techniques, leaving them with insufficient opportunities to practice and reflect on covered practices. In addition, students are often uncertain how to apply the techniques in teaching situations. **METHODS AND STRATEGIES FOR TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES: A CASE-BASED APPROACH** uses a more focused and integrated approach than other available texts. Each chapter presents a limited number of techniques (five to seven) in detail. The authors demonstrate effective teaching methods and techniques through application activities, anchor content around case studies, and offer an overview of techniques not covered in detail. Information addressing culturally, economically, linguistically, and ethnically diverse learners, among others, is integrated throughout. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Students with Mild Disabilities in General Education Settings

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. A non-categorical, characteristics approach to addressing high-prevalence mild disabilities. **Learners with Mild Disabilities: A Characteristics Approach** focuses on high-prevalence disorders affecting school learners today, including mild intellectual disabilities, learning disabilities, emotional/behavioral disorders, ADHD, autism spectrum disorders, and communication disorders, as well as on low incidence conditions that may manifest in the milder range, for example sensory, physical, health, or TBI. The author lays the foundation for addressing the needs of special learners and then focuses on learners from the perspective of alternative non-categorical frameworks. She describes students with disabilities and related conditions with respect to a variety of individual strengths and needs, considering their cognitive, language, academic learning, and social/emotional characteristics. Readers see how to apply these conceptual frameworks by analyzing a number of vignettes and extended case studies based on the experiences of real children and teachers. Designed as a primary text for use in undergraduate and graduate courses addressing the characteristics of learners with high prevalence or milder levels of disability, the text is also useful for the first specialized course in a special education program. It supports programs in inclusive education or the growing area of generic special education

Methods and Strategies for Teaching Students with High Incidence Disabilities

This concise and practical guide thoroughly presents the characteristics of children with specific mild exceptionalities in today's diverse classroom. Using an active, problem-solving approach that reflects how today's students learn, Dr. Sydney S. Zentall identifies the characteristics of children with mild exceptionalities that can be gleaned from observations, written descriptions, and personal interactions. Unlike many texts on this topic, which overwhelm students with extraneous information, The text focuses on the characteristics of these students within general education and special class settings. With this knowledge readers will better understand the implications of characteristics for accommodations and be ready to apply this knowledge with empirically based interventions.

Learners with Mild Disabilities

To ensure that all students receive quality instruction, **Teaching Students with High-Incidence Disabilities** prepares preservice teachers to teach students with learning disabilities, emotional behavioral disorders, intellectual disabilities, attention deficit hyperactivity, and high functioning autism. Focusing on research-based instructional strategies, Mary Anne Prater gives explicit instructions and strategies for teaching students with special needs, and includes examples throughout in the form of scripted lesson plans. Real-world classrooms are brought into focus through teacher tips, embedded case

studies, and technology spotlights to enhance student learning. The book also emphasizes diversity, with a section in each chapter devoted to exploring how instructional strategies can be modified to accommodate diverse exceptional students.
