In his webcast titled "Cave People" in reference to the philosopher Plato's "Allegory of the Cave," DoubleLine CEO Jeffrey Gundlach on March 12, 2023, briefly reprises his outlook on the federal debt spiral before reviewing other macroeconomic and market topics, including recessionary "storm clouds." Notably, while the government's establishment survey has resilient nonfarm payrolls, Mr. Gundlach marshals evidence showing "the rubric that there's this booming employment economy is contradicted by other areas." Among subjects addressed in the webcast, Mr. Gundlach covers Federal deficit and national debt spiral

Massive COVID-19-era monetary stimulus as explanation for the absence (to date) of recession

Protracted inversion of the U.S. Treasury yield curve

Weakening consumer confidence

U-3 unemployment rate exceeding 12-month moving average and nearing 36-month MA

Questionable veracity of once-trustworthy economic statistics due to plunging survey response rates

Recessionary divergence between cyclical and noncyclical employment

Deteriorating hiring plans at small businesses

Falling average weekly hours worked in manufacturing. "First they cut the hours, and then they cut the bodies."

An ecosystem is made up of all of the ...

An ecosystem is made up of all of the communities that live in it, every single organism from small to big and lots of environmental factors like sunlight and shade in the woodland, streams and other things.

A habitat is the area or environment in which an organism naturally lives - so the woodland in this example.

Whereas populations describes just one species, a community is all of the organisms in the habitat at one time.

A niche describes the role of a species within an ecosystem.

A species is a group of potentially interbreeding individuals, which do not normally reproduce with other species to produce viable, fertile offspring.
