Barber Part 2: General Sciences Chapter 9: The Skin - Structure, Disorders, and Diseases Learning Objectives

Know the Anatomy of the Skin

Skin varies in thickness over different parts of the body. It is thinnest on the eyelids and thickest on

the palms of the hands and soles of the feet.

Fluids of the Skin

Nerves of the Skin

Skin Color

Special cells called melanocytes produce the pigment granules that are scattered throughout the germinativum and papillary layers.

Skin Elasticity

The Glands of the Skin

Sebaceous (Oil) Glands

Absorption Level of the Skin

Functions of the Skin

Identify Disorders and Diseases of the Skin

Primary Lesions of the Skin

Acne (AK-nee), also known as acne vulgaris, is a skin disorder characterized by chronic inflammation of the sebaceous glands from retained secretions.

Acne Treatment

Identify Disorders of the Sudoriferous Glands

Recognize Common Inflammations and Infections of the Skin

Recognize Pigment Disorders and Hypertrophies of the Skin

Identify Types of Skin Pigmentations

Describe Hypertrophies of the Skin

Understand Skin Cancer

Clients should be advised to regularly see a dermatologist for checkups of the skin, especially if any changes in coloration, size, or shape of a mole are detected, if the skin bleeds unexpectedly, or if a lesion or scrape does not heal quickly. Home self-examinations can also be an effective way to check for signs of potential skin cancer between scheduled doctor visits.

The American Cancer Society recommends using the ABCDE Cancer Checklist to help make potential skin cancer easier to recognize.

Information is not limited to the one shown in this video.

COSMETOLOGY/ESTHETICIAN WRITTEN STUDY GUIDE #4 Skin DISORDERS AND DISEASES Identity disorders and diseases of the skin. Lesions of the skin tissues or organs. Primary lesions of the skin Primary lesions are lesions that are a different color than the color of the skin and lesions that are raised above the surface of the skin. They're often differentiated by size in layers of the skin affected. These may require a medical referral

Identify disorders of the Sudoriferous Glands (sweat glands) 1. Anhidrosis is a deficiency in perspiration or the inability to sweat, often a result of damage to autonomic nerves. This condition can be life-threatening and requires medical attention. 2. Bromhidrosis is a foul smelling perspiration, usually noticeable in the underarm or on the feet that is generally caused by bacteria. 3. Hyperhidrosis is excessive sweating, caused by heat or general body weakness.

Understand skin cancer 1. Basal Cell Carcinoma is the most common and least severe skin cancer; characterized by light or Pearly nodules and has a 90% survival rate with early diagnosis and treatment.
