start by taking off the bolts here on the front side

get the last bolt in its own separate hole

take out the pins for the shift lever and the throttle lever

disconnect the bolt

got some ground cables that are grounding out near the spark plugs

disconnect the fuel line right off the inline fuel filter

engine mount bolts

get rid of the fuel and oil

cut the zip ties

take the low-pressure fuel pumps off

disconnect all of your injectors

rotate the motor using this handle

take off the lp fuel pumps
connect this to the oil tank
take off the cover
work the cover up off the o2 sensor
disconnecting the rest of these wires from this side
disconnect the spark plug
push out the flywheel
removed the reed valves
take the reed valves off
remove top of the crankcase
disconnect these tubes at the bottom
slide the piston right out the bottom of the tube
tilt the connecting rod
take off the thermostat cover
