Letters Never Sent, a Global Nomad's Journey from Hurt to Healing

Children who grew up interacting with two or more cultures during their developmental years often have an inability to connect with their home-country peers. This guide addresses the common issues students face when they are making the double transition of not only adjusting to a new life-stage, such as college, but to a cultural change as well.

The Global Nomad's Guide to University Transition

The concept of Third Culture Kids is often used to describe people who have spent their childhood on the move, living in many different countries and languages. This book examines the hype, relevance and myths surrounding the concept while also redefining it within a broader study of transnationality to demonstrate the variety of stories involved.

Migration, Diversity, and Education

Elkind calls readers attentions to the crippling stresses on children forced to grow up too fast, children mimicking adult sophistication while secretly yearning for innocence.

The Hurried Child

"An excellent primer on what it means to live digitally. It should be required reading for adults trying to understand the next generation." -- Nicholas Negroponte, author of *Being Digital* The first generation of children who were born into and raised in the digital world are coming of age and reshaping the world in their image. Our economy, our politics, our culture, and even the shape of our family life are being transformed. But who are these wired young people? And what is the world they're creating going to look like? In this revised and updated edition, leading Internet and technology experts John Palfrey and Urs Gasser offer a cutting-edge sociological portrait of these young people, who can seem, even to those merely a generation older, both extraordinarily sophisticated and strangely narrow. Exploring a broad range of issues -- privacy concerns, the psychological effects of information overload, and larger ethical issues raised by the fact that young people's social interactions, friendships, and civic activities are now mediated by digital technologies -- *Born Digital* is essential reading for parents, teachers, and the myriad of confused adults who want to understand the digital present and shape the digital future.

Born Digital

As *The Giving Tree* turns fifty, this timeless classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a classic that will now reach an even wider audience. "Once there was a tree...and she loved a little boy." So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel Silverstein's incomparable career as a bestselling children's book author and illustrator began with *Lafcadio, the Lion Who Shot Back*. He is also the creator of picture books including *A Giraffe and a Half*, *Who Wants a Cheap Rhinoceros?*, *The Missing Piece*, *The Missing Piece Meets the Big O*, and the perennial favorite *The Giving Tree*, and of classic poetry collections such as *Where the Sidewalk Ends*, *A Light in the Attic*, *Falling Up*, *Every Thing On It*, *Don't Bump the Glump!*, and *Runny Babbit*. And don't miss the other Shel Silverstein ebooks, *Where the Sidewalk Ends* and *A Light in the Attic*!

Life Among the Qallunaat is the story of Mini Aodla Freeman's experiences growing up in the Inuit communities of James Bay and her journey in the 1950s from her home to the strange land and stranger customs of the Qallunaat, those living south of the Arctic. Her extraordinary story, sometimes humorous and sometimes heartbreaking, illustrates an Inuit woman's movement between worlds and ways of understanding. It also provides a clear-eyed record of the changes that swept through Inuit communities in the 1940s and 1950s. Mini Aodla Freeman was born in 1936 on Cape Hope Island in James Bay. At the age of sixteen, she began nurse's training at Ste. Therese School in Fort George, Quebec, and in 1957 she moved to Ottawa to work as a translator for the then Department of Northern Affairs and Natural Resources. Her memoir, *Life Among the Qallunaat*, was published in 1978 and has been translated into French, German, and Greenlandic. *Life Among the Qallunaat* is the third book in the *First Voices, First Texts* series, which publishes lost or under appreciated texts by Indigenous writers. This reissue of Mini Aodla Freeman's path-breaking work includes new material, an interview with the author, and an afterword by Keavy Martin and Julie Rak, with Norma Dunning.

The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

"Neiman reclaims the vocabulary of morality--good and evil, heroism and nobility--as a lingua franca for the twenty-first century. In constructing a framework for taking responsible action on today's urgent questions, [she] reaches back to the eighteenth century, retrieving a series of values--happiness, reason, reverence, and hope--held high by Enlightenment thinkers. In this ... updated edition, Neiman reflects on how the moral language of the 2008 presidential campaign has opened up new political and cultural possibilities in America and beyond"--Back cover.

Journey to the West

What we can learn from a Renaissance nowhere In 1516, a book was published in Latin with the enigmatic Greek-derived word as its title. Utopia—which could mean either “good-place” or “no-place”—gives a traveler's account of a newly discovered island somewhere in the New World where the inhabitants enjoy a social order based purely on natural reason and justice. As the traveler describes the harmony, prosperity, and equality found there, a dramatic contrast is drawn between the ideal community he portrays and the poverty, crime, and often frightening political conditions of 16th century Europe. Written by Sir Thomas More (1477–1535)—then a rising intellectual star of the Renaissance and ultimately the advisor and friend of Henry VIII who was executed for his devoutly Catholic opposition to the king—Utopia is as complex as its author. In the form of a Platonic dialogue, Utopia explores topics such as money, property, crime, education, religious tolerance, euthanasia, and feminism. Claimed as a paean to communism (Lenin had More's name inscribed on a statue in Moscow) as often as it has been seen as a defense of traditional medieval values, Utopia began the lineage of utopian thinkers who use storytelling to explore new possibilities for human society—and remains as relevant today as when it was written in Antwerp 500 years ago. Explore the issues like feminism, euthanasia, and equality through Renaissance eyes Early communist tract or a defense of medieval values? You decide. Peer inside the enigmatic mind of the man who dared stand up to Henry VIII Appreciate the postmodern possibilities of Platonic dialogue Part of the bestselling Capstone Classics series edited by Tom Butler-Bowdon, this edition features an introduction from writer, economist, and historian Niall Kishtainy.

It's the reality today that the coming-of-age process has changed drastically in the last few decades. While prominent national news shows and print media have done intermittent, shock value-focused coverage on this trend, there was no authoritative, comprehensive book on the matter that covered both the physical and psychological aspects from a medical perspective before this one. Authored by an acclaimed pediatric endocrinologist and a clinical psychologist, The New Puberty combines and analyzes decades of research for the first time. For parents, teachers, counselors, administrators, psychologists, pediatricians, and the health-conscious consumer, The New Puberty introduces new theories and strategies on how to handle and nurture girls who are now entering this unique stage of their lives before age 10. At once prescriptive and inspiring, The New Puberty provides a roadmap to making the most of this transition and allowing the girls and young women of today grow into happy, successful adults.

The New Puberty

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out

of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

'Maté's book will make you examine your behaviour in a new light' Guardian 'bold, wise and deeply moral. [Maté] is a healer to be cherished' Naomi Klein, author of No Logo and The Shock Doctrine Children take their lead from their friends: being 'cool' matters more than anything else. Shaping values, identity and codes of behaviour, peer groups are often far more influential than parents. But this situation is far from natural, and it can be dangerous – it undermines family cohesion, interferes with healthy development, and fosters a hostile and sexualized youth culture. Children end up becoming conformist, anxious and alienated. In Hold on to Your Kids, acclaimed physician and bestselling author Gabor Maté joins forces with Gordon Neufeld, a psychologist with a reputation for penetrating to the heart of complex parenting. Together they pinpoint the causes of this breakdown and offer practical advice on how to 'reattach' to sons and daughters, establish the hierarchy at home, make children feel safe and understood, and earn back your children's loyalty and love. This updated edition also addresses the unprecedented parenting challenges posed by the rise of digital devices and social media. By helping to reawaken our instincts, Maté and Neufeld empower parents to be what nature intended: a true source of contact, security and warmth for their children.

Give Your Child the World

In this New York Times bestseller, one of America's premier child psychologists offers a must-read account of the dismal state of parenting today, and a vision for how we can better prepare our children

for the challenges of the adult world In *The Collapse of Parenting*, internationally acclaimed author Leonard Sax argues that rising levels of obesity, depression, and anxiety among young people can be traced to parents abdicating their authority. The result is children who have no standard of right and wrong, who lack discipline, and who look to their peers and the Internet for direction. Sax shows how parents must reassert their authority - by limiting time with screens, by encouraging better habits at the dinner table, and by teaching humility and perspective - to renew their relationships with their children. Drawing on nearly thirty years of experience as a family physician and psychologist, along with hundreds of interviews with children, parents, and teachers, Sax offers a blueprint parents can use to help their children thrive in an increasingly complicated world.

Whether you have a teen who is struggling with exam pressure, a young adult who hasn't settled into university life or you are curious about what lies ahead for your younger child, *How to Grow a Grown Up* will help you to build your child's confidence and resilience - so they can become a strong, happy and independent adult. We're fast approaching the 3rd decade of the 21st century and it's a very different world from the one in which parents (and teachers) grew up in. Challenging issues have come together – including cyber bullying, 'always-on' culture and ever increasing pressure to do well – to create a perfect storm. The result is that teenagers and young adults are now less prepared for a more challenging world – and if they don't develop the skills they need to help them thrive they can become easy prey to mental health problems. In this book Dr Dominique Thompson, the UK's leading GP on student mental health and educational expert Fabienne Vailes, reveal what exactly parents need to do to help teenagers and young adults in this new world – and how to manage problems along the way. It includes: *An overview of the pressures and problems facing this generation of young people - why are they increasingly stressed, anxious or suffering from mental health issues *What exactly parents can do to help their teens and young adults become healthily independent, navigate challenges and flourish in preparation for adult life *How pastoral care at universities and workplaces is changing, and what a parent's role could and should be *Ways to recognise the signs of mental health distress and what to do about it, particularly dealing with problems from a distance

All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin to decline. So what are we waiting for?

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
