Maiasaura

Maiaura's name means 'good mother lizard.' Find out why scientists believe these dinosaurs were such good moms.

Allosaurus

Long ago, a once-mighty Allosaurus stalked the land searching for helpless prey for dinner, too sick to battle stronger dinosaurs. Millions of years later, scientists discovered the bones of this 'different lizard' in Wyoming and named him Big Al. Read how Big Al helped them learn more about Allosaurus and its days on Earth. Additional features to enhance comprehension include informative sidebars, a glossary of key words and phrases, sources for further research, a Did-You-Know section, and an overview of the geologic time scale.

Maiasaura

This book details the life of the dinosaur known as Maiasaura. Readers will develop word recognition and reading skills while learning when Maiasaura lived and what it likely looked like. They will also find out how it lived, from what it ate to how it dealt with enemies. Additional text features and search tools, including a glossary and an index, help students locate information and learn new words.

Maiasaura

Describes what is known about the physical characteristics, behavior, habitat, and life cycle of this plant-eating, duck-billed dinosaur.

Maiasaura

A duck-billed dinosaur, the maiasaura, built nests for its young and watched over them until they could be independent. In 1978 remains of over 10,000 maiasaura were found in Montana. An interesting mix of information, the text is accompanied by watercolor pictures.

Compsognathus

A study of the life and time of the compsognathus.

Dinosaurs

Introduces different species of dinosaurs, including Tyrannosaurus Rex and Triceratops, and describes their size, diet, and how they may have cared for their young.

Velociraptor

"What can scientists learn from an ancient fossil of two dinosaurs locked in battle? Plenty! One of those dinosaurs was a Velociraptor, a 'quick thief' and predator of the Cretaceous period. Like the scientists who study Velociraptor, young readers will discover how much eighty-million-year-old bones still have to say! Additional features to enhance comprehension include informative sidebars, a glossary of key words and phrases, sources for further research, a Did-You-Know section, and an overview of the geologic time scale"--Provided by publisher.

Maia

A baby duckbilled dinosaur living on the North American continent grows up and starts her own family.

Apatosaurus

Describes what is known about the physical characteristics, behavior, habitat, and life cycle of this huge plant-eating dinosaur with the long neck and tail.

The Maiasaura Nests

Examines how Jack's discoveries would soon change how people thought about the way dinosaurs lived.

Triceratops

Describes what is known about the physical characteristics, behavior, habitat, and life cycle of this horned, plant-eating dinosaur.

Dinosaur

An introduction to plant-eating dinosaurs

Maiasaura

Describes what is known about the recently discovered duckbilled dinosaur called Maiasaura, as suggested by current fossil evidence.

The Bedtime Book of Dinosaurs and Other Prehistoric Life

Get to know more than 100 of the world's favourite dinosaurs and other prehistoric life forms with this essential illustrated introduction. This must-have first book on dinosaurs and other ancient creatures is filled with beautiful illustrations and storybook text on every page, perfect for early readers who want to know more about the life that once roamed our planet. The Bedtime Book of Dinosaurs and other Prehistoric Life includes the earliest life that appeared in the ocean, to the giant dinosaurs, and the wonderfully weird mammals that followed them. Children aged 3-5 can discover a huge variety of organisms that are shown within the three chapters, which cover the Paleozoic, Mesozoic, and Cenozoic eras. With old favourites, such as Tyrannosaurus and Triceratops, as well as new discoveries, including Yi and Changmiania, there is something for every young fan of the primeval world. Inside the pages of this exciting dinosaur book, you'll find: - An introduction to the essential information about each prehistoric species in a friendly, accessible way. - Beautiful and accurate illustrations combined with introductory reference text about a wide variety of dinosaurs and other ancient plants and animals.

- Engaging text for young children that can be read aloud - perfect for parents, carers, and children to enjoy at bedtime. - A one-hit introduction to prehistoric life, featuring more than 100 animals - an essential addition to every 3-5 year old's library. This exciting dinosaur guide helps to develop an early understanding of the prehistoric world for little ones and clearly explains the key features of each animal or plant, as well as how to say their names. A timeless gift book, this is a must-have for parents, carers, and educators who want to introduce core dinosaur knowledge at a young age in a fun and engaging way.

Dinosaurs & Ancient Creatures

Learn about Spinosaurus, what he looked like, what he ate, what he did all day, and more.

Spinosaurus

Suitable for children in Year 1 (age 5), Dinosaur is one of nine books from the Cambridge Reading non-fiction strand. This strand has been designed to introduce young readers to information retrieval skills. Six books in this strand have been written by Meredith Hooper. Three of which - Dinosaur, Osprey and Seal, illustrated by Bert Kitchen - are concerned with living things. The remaining three - The Bridge, The Forest and The Harbour, illustrated by Peter Kent - investigate the effect of human intervention on the landscape. Each book uses two levels of text, with the second level being more challenging. Cambridge Reading at Key Stage 1 (Years 1 and 2) includes fiction, non-fiction, poetry and plays to offer children a variety of text types, authors and illustrators and provide a firm base for wider reading.

Camb Reading Pack : Dinosaur

Describes what is known about the physical characteristics, behavior, and habitat of this planteating dinosaur.

Maiasaura

Provides brief descriptions of eight types of dinosaurs that lived in what is now the midwestern part of North America, and speculates on what caused dinosaurs to become extinct.

Maiasaura and Other Dinosaurs of the Midwest

A follow-up title to the highly successful Animals Around the World, Animals Under the Sea and People Around the World. All of the Lift-the-Flap titles feature gentle text, bright, highly-detailed illustration, and 50 lift-the-flap surprises for hours of exploration and discovery. Young paleontologists can dig right in and get busy in this interactive introduction to the natural history of dinosaurs. Beginning with an introduction to dinosaurs, and covering the major periods of dinosaur life around the globe, this book's bright visual detail and accessible writing is perfect for early elementary audiences. More than 50 flaps hide surprises such as fossilized bones, dinosaur footprints, hatching Maiasaura eggs, meat eaters, flying reptiles, swimming reptiles, and so much more. Dinosaurs Around the World: Lift-the-Flap by Susie Brooks, illustrated by Anthony Lewis is perfect for hours of exploration at home, in the classroom, or on the go.

Dinosaurs Around the World Lift the Flap

- Maps - Photodiagrams - Hands-on activity - Definitions of unfamiliar terms in margins - FactHound Internet sites

Maia

This book introduces the maiasaura, which lived in what is now Montana.

Maiasaura
