Intro

1. Define Science, Technology, and Society 1. Explain the relationships between Science, Technology, and Society

any systematic knowledge or practice.

a system of acquiring knowledge based on the scientific method.

The human attempt to understand the natural world, with or without concern for practical uses of that knowledge.

A human activity involved with the making and using of material artifacts. As a human activity, technology is on the same level as art, politics, economics and the like.

Tools * Techniques Procedures for putting the findings of science to practical use

Science explores for the purpose of knowing. Technology explores for the purpose of making something useful from that knowledge.
