Why Highly Sensitive People Feel Alienated: Understanding the 80/20 Split. Tools for Every HSP -

Why Highly Sensitive People Feel Alienated: Understanding the 80/20 Split. Tools for Every HSP by Emotional Badass 4,775 views 6 days ago 54 minutes - Discover the unique world of Highly Sensitive People (HSPs) and explore the profound 80/20 split that sets them apart from the ...

Being a Highly Sensitive Person is inherent and unchangeable, akin to physical characteristics.

HSPs are a minority, making up 15-20% of the population, experiencing the world distinctly.

High Sensitivity is a superpower, with self-respect and management of its challenges crucial.

Highly Sensitive People are influenced by both nature and nurture, with environmental factors and trauma playing roles.

Sensory processing sensitivity demonstrates HSPs' deeper sensitivity to their environments.

Balancing sensitivity requires humility and an understanding to mitigate negative impacts.

Downtime is essential for HSPs to recharge, with both introverted and extroverted HSPs needing breaks from stimulation.

Successful relationships for HSPs involve clear communication of their need for space to recharge.

Multitasking is challenging for HSPs, who excel in focused environments but may struggle with sensory overload.

HSPs' engagement with media and activities is selective, balancing their sensitivity with interests like True Crime from a perspective of resilience.
