[#neurosurgical reconstructive techniques](#) [#cranial defect repair](#) [#skull base reconstruction](#) [#cranioplasty procedures](#) [#dural closure techniques](#)

Plastic techniques in neurosurgery encompass advanced methods for repairing and reconstructing cranial and soft tissue defects following trauma, tumor resection, or congenital anomalies. These critical neurosurgical reconstructive techniques, including cranial defect repair and skull base reconstruction, aim to restore both function and aesthetics, improving patient quality of life through sophisticated cranioplasty and dural closure procedures.

Students can use these syllabi to plan their studies and prepare for classes.
