Get Hired Now!

What if I told you that job hunting could actually be much easier and painless? What if I told you that you could easily make at least \$50,000 more than you do now over the next five years and most of you will easily earn over \$100,000 more by following the techniques I'll teach you? Do I have your attention now? What if I told you that if you are like most people I meet, you are making a huge mistake with your resume that is causing you to miss out on the best opportunities? Would that get your attention? What if I told you that there are online tools available that can give you the names of the managers you really want to speak with? You will learn: * Techniques to help you earn far more money and do it much more easily * How to plan for your job change and for your career * How to enter a company through "the back door," instead of always contacting Human Resources (Would you like to learn the name of the manager to call? I'll show you how to get that, too) * I will help you compute your "staying power" in the job market * How to figure out what is important in the next job or organization * How to find greater job satisfaction than you have known before without compromising your needs * How to evaluate and assess a company in which you have interviewed to see if you are a good fit for each other * How to write "the new cover letter" * How to negotiate salary * How to give your notice * How to find current and past employees of companies you meet with so that you can easily research them * How to find the "meta-job sites" that will save you time and effort * How to network well Will I really learn everything I need to in order to complete my job search? * Do you want to know how to have a resume that stands out without it looking stupid? * Would you like to know what to do if, after a bunch of interviews, you still don't have a job offer? * How about knowing how to track all the resumes you submit so that when the phone rings, you're ready to go? * How to work well with recruiters and search firms. * Why using a recruiter may make sense for you . . . as long as you keep an eye on them. * How to negotiate your new salary (HINT: Most people only know one way. Do you want to know more?) You'll also learn a simple question to ask that will have a potential employer competing against themselves to offer you more money! Job hunting doesn't have to be hard or difficult. You just have to learn how to do it. Every era has its own rules and techniques for success. Some techniques are timeless. But using techniques from the stone ages like mailing resumes on parchment paper will have you miss opportunities that you should be competing for. "Get Yourself Hired NOW! : The Big Game Hunter's Guide to Head Hunting Your Next Job and Every Job After That!" will teach you techniques head hunters use to help people find work every day. It will help you avoid making the mistakes that most people make that sabotage their efforts. * Taking jobs that don't meet their needs * What most job hunters have in common with people working in the kitchen at fast food restaurants * Speaking too little * Stupid interview mistakes * Talking about the wrong job when they are called for an exploratory interview or phone interview * Speaking too much * Being boring! * Getting stuck in "the HR system" * Only taking action when they want to find a new job

Human Resource Management: Text & Cases, 2nd Edition

What is credit? How do I invest? How do I get a job? What about building a career, budgeting, getting rich and all the rest? Come to think of it, how come I never learned any of this in school? We, the general population, are thrown into capitalism with a sea of such questions in tow. Just as we start to discover who it is that we are, we're forced to play a game that we never signed up for without so much as an explanation of the rules or an introductory welcome. This meta game of capitalism has become a ruthless divider between those "in the know" and those who aren't. While the well prepared prosper, the rest of us are left behind to use rather convincing nods amongst dinner conversations to make it seem like we understand how a credit score actually functions. Because, surely, we should have this all figured out by now... right? The contrasting reality is harsh; no one took the time to sit us down and explain how everything works. They only instructed us to find jobs but never explained how to build a career or why. Now, years later, we feel too distant from these concepts to bridge the gap, suffering in silence as we struggle to make ends meet. Well, I say if you're going to play their game, you may as well play it well. So here it all is. I'm sitting you down and showing you their cards. A Capitalism Survival Guide that shows you how this all works in under 200 pages. Let's get started.

You're Hired... Now What?

"This generous and useful book strips away the shame and fear from a job search and can help you get past the resume and see a better way forward." —Seth Godin, bestselling author of This is Marketing If you're struggling to find work in an uncertain job market, Next Job, Best Job by headhunter Rob Barnett delivers game changing strategies to get you hired now. For readers at any phase of a career, Barnett saves you months of wasted time surfing random job postings and uploading resumes into

oblivion. His new process gives you the end-to-end tools to find the work you want. Rob Barnett is an innovator, a two-time entrepreneur, and a senior executive with five decades inside legendary media companies. As an advisor to thousands of job seekers and company heads, he is uniquely positioned to disrupt the job search industry. His inclusive platform is a life-saving escape hatch during the darkest hours of unemployment and an expert guide to the work you deserve. With humor, compassion, and a healthy dose of tough love, Barnett covers everything from the essentials of a modern job search to ageism, ghosting, navigating LinkedIn and Zoom, and mastering the voodoo of social media. Pivot from worrying to winning with inspired steps to:

- * Score perfect job interviews
- * Negotiate like a pro and get to "yes"
- * Rebrand yourself with a unique resume, digital profile, and killer cover letter
- * Ignite focus and restore motivation
- * Identify the best career path

'I'm a HUGE fan of Alison Green's "Ask a Manager" column. This book is even better' Robert Sutton, author of *The No Asshole Rule* and *The Asshole Survival Guide* 'Ask A Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)' - Sarah Knight, New York Times bestselling author of *The Life-Changing Magic of Not Giving a F*ck* A witty, practical guide to navigating 200 difficult professional conversations Ten years as a workplace advice columnist has taught Alison Green that people avoid awkward conversations in the office because they don't know what to say. Thankfully, Alison does. In this incredibly helpful book, she takes on the tough discussions you may need to have during your career. You'll learn what to say when:

- colleagues push their work on you - then take credit for it
- you accidentally trash-talk someone in an email and hit 'reply all'
- you're being micromanaged - or not being managed at all
- your boss seems unhappy with your work
- you got too drunk at the Christmas party

With sharp, sage advice and candid letters from real-life readers, *Ask a Manager* will help you successfully navigate the stormy seas of office life.

The ... Summer Theater Guide

This book surveys methods, problems, and tools used in process control engineering. Its scope has been purposely made broad in order to permit an overall view of this subject. This book is intended both for interested nonspecialists who wish to become acquainted with the discipline of process control engineering and for process control engineers, who should find it helpful in identifying individual tasks and organizing them into a coherent whole. A central concern of this treatment is to arrive at a consistent and comprehensive way of thinking about process control engineering and to show how the several specialities can be organically fitted into this total view.

"'Lose the Résumé' breaks down every aspect of job hunting, explaining what matters and what doesn't." – The New York Times Book Review Lose the resume and land that coveted job Gone are the days of polishing up your resume and sending it out at random. At every level today, you need to "lose the resume" in order to land the right job. In other words, you have to learn to tell a story about yourself that speaks to your competencies, purpose, passion, and values. Lose the Resume, Land the Job shares the new rules of engagement: How you must think, act, and present yourself so you can win. Based on inner exploration drawn from the IP of the world's largest executive recruiting firm, the book gleans insights and stories (the good, the bad, and sometimes the ugly) from Korn Ferry recruiters across the globe who work with thousands of candidates each day. It helps you gain a deeper perspective on who you are, what you're passionate about, the cultures in which you fit, the kind of bosses you should work for, and where you can bring the most value to organizations. • Includes assessments, questionnaires, and other tools • Candid advice for young professionals through middle managers • Offers trusted guidance from the same firm that has shown 8 million executives how to achieve their career goals, and that puts a professional in new job every three minutes • Helps you build a plan for the future so you can contribute more to the next employer Getting a job and, more importantly, building a career has never been more complex. Lose the Resume, Land the Job helps you score the positions that align with your passion and match your attributes — and that will put you on a trajectory toward bigger and better things.
