The Blood Telegram

A riveting history—the first full account—of the involvement of Richard Nixon and Henry Kissinger in the 1971 atrocities in Bangladesh that led to war between India and Pakistan, shaped the fate of Asia, and left in their wake a host of major strategic consequences for the world today. Giving an astonishing inside view of how the White House really works in a crisis, The Blood Telegram is an unprecedented chronicle of a pivotal but little-known chapter of the Cold War. Gary J. Bass shows how Nixon and Kissinger supported Pakistan's military dictatorship as it brutally quashed the results of a historic free election. The Pakistani army launched a crackdown on what was then East Pakistan (today an independent Bangladesh), killing hundreds of thousands of people and sending ten million refugees fleeing to India—one of the worst humanitarian crises of the twentieth century. Nixon and Kissinger, unswayed by detailed warnings of genocide from American diplomats witnessing the bloodshed, stood behind Pakistan's military rulers. Driven not just by Cold War realpolitik but by a bitter personal dislike of India and its leader Indira Gandhi, Nixon and Kissinger actively helped the Pakistani government even as it careened toward a devastating war against India. They silenced American officials who dared to speak up, secretly encouraged China to mass troops on the Indian border, and illegally supplied weapons to the Pakistani military—an overlooked scandal that presages Watergate. Drawing on previously unheard White House tapes, recently declassified documents, and extensive interviews with White House staffers and Indian military leaders, The Blood Telegram tells this thrilling, shadowy story in full. Bringing us into the drama of a crisis exploding into war, Bass follows reporters, consuls, and guerrilla warriors on the ground—from the desperate refugee camps to the most secretive conversations in the Oval Office. Bass makes clear how the United States' embrace of the military dictatorship in Islamabad would mold Asia's destiny for decades, and confronts for the first time Nixon and Kissinger's hidden role in a tragedy that was far bloodier than Bosnia. This is a revelatory, compulsively readable work of politics, personalities, military confrontation, and Cold War brinksmanship.

The Blood Telegram

Finalist for the Pulitzer Prize in General Nonfiction Winner of the Council on Foreign Relations' Arthur Ross Book Award Winner of the Lionel Gelber Prize for Best Foreign Affairs Book Winner of the Asia Society's Bernard Schwartz Book Award Winner of the Cundill Prize for Historical Literature Winner of the Society for Historians of American Foreign Relations' Robert H. Ferrell Book Prize Winner of the Ramnath Goenka Award One of the Best Books of the Year at • The Economist • Financial Times • The New Republic • The Washington Post • Kirkus Reviews • A New York Times Notable Book This magnificent history provides the first full account of Richard Nixon and Henry Kissinger's secret support for Pakistan in 1971 as it committed shocking atrocities in Bangladesh—which led to war between India and Pakistan, shaped the fate of Asia, and left major strategic consequences for the world today. Drawing on previously unheard White House tapes, recently declassified documents, and his own extensive investigative reporting, Gary Bass uncovers an astonishing unknown story of superpower brinkmanship, war, scandal, and conscience. Revelatory, authoritative, and compulsively readable, *The Blood Telegram* is a thrilling chronicle of a pivotal chapter in American foreign policy.

Genocide

Genocide: A Comprehensive Introduction is the most wide-ranging textbook on genocide yet published. The book is designed as a text for upper-undergraduate and graduate students, as well as a primer for non-specialists and general readers interested in learning about one of humanity's enduring blights. Fully updated to reflect the latest thinking in this rapidly developing field, this unique book: Provides an introduction to genocide as both a historical phenomenon and an analytical-legal concept, including the concept of genocidal intent, and the dynamism and contingency of genocidal processes. Discusses the role of state-building, imperialism, war, and social revolution in fuelling genocide. Supplies a wide range of full-length case studies of genocides worldwide, each with a supplementary study. Explores perspectives on genocide from the social sciences, including psychology, sociology, anthropology, political science/international relations, and gender studies. Considers "The Future of Genocide," with attention to historical memory and genocide denial; initiatives for truth, justice, and redress; and strategies of intervention and prevention. Highlights of the new edition include: Nigeria/Biafra as a "contested case" of genocide Extensive new material on the Kurds, Islamic State/ISIS, and the civil wars/genocide in Iraq and Syria. Conflict and atrocities in the world's newest state, South Sudan. The role, activities, and constraints of the United Nations Office of Genocide Prevention. Many new testimonies from genocide victims, survivors, witnesses—and perpetrators. Dozens of new images, including a special photographic essay. Written in clear and lively prose with over 240 illustrations and maps, *Genocide: A Comprehensive Introduction* remains the indispensable text for new generations of genocide study and scholarship. An accompanying website (www.genocidetext.net) features a broad selection of supplementary materials, teaching aids, and Internet resources.

Stay the Hand of Vengeance

International justice has become a crucial part of the ongoing political debates about the future of shattered societies like Bosnia, Kosovo, Rwanda, Cambodia, and Chile. Why do our governments sometimes display such striking idealism in the face of war crimes and atrocities abroad, and at other times cynically abandon the pursuit of international justice altogether? Why today does justice seem so slow to come for war crimes victims in the Balkans? In this book, Gary Bass offers an unprecedented look at the politics behind international war crimes tribunals, combining analysis with investigative reporting and a broad historical perspective. The Nuremberg trials powerfully demonstrated how effective war crimes tribunals can be. But there have been many other important tribunals that have not been as successful, and which have been largely left out of today's debates about international justice. This timely book brings them in, using primary documents to examine the aftermath of the Napoleonic Wars, World War I, the Armenian genocide, World War II, and the recent wars in the former Yugoslavia. Bass explains that bringing war criminals to justice can be a military ordeal, a source of endless legal frustration, as well as a diplomatic nightmare. The book takes readers behind the scenes to see vividly how leaders like David Lloyd George, Winston Churchill, Franklin Roosevelt, and Bill Clinton have wrestled with these agonizing moral dilemmas. The book asks how law and international politics interact, and how power can be made to serve the cause of justice. Bass brings new archival research to bear on such events as the prosecution of the Armenian genocide, presenting surprising episodes that add to the historical record. His sections on the former Yugoslavia tell—with important new discoveries—the secret story of the politicking behind the prosecution of war crimes in Bosnia, drawing on interviews with senior White House officials, key diplomats, and chief prosecutors at the war crimes

tribunal for the former Yugoslavia. Bass concludes that despite the obstacles, legalistic justice for war criminals is nonetheless worth pursuing. His arguments will interest anyone concerned about human rights and the pursuit of idealism in international politics.

A History of Bangladesh

A revised and updated edition of Willem van Schendel's state-of-the-art history, revealing the vibrant and colourful past of Bangladesh.

Nixon, Kissinger, and the Shah

Nixon, Kissinger, and the Shah offers a detailed account of three key historical episodes in the Nixon-Kissinger-Pahlavi partnership that shaped the global Cold War far beyond Iran's borders. It examines the emergence of Iranian primacy in the Persian Gulf as the Nixon administration looked to the shah to fill the vacuum created by the British withdrawal from the region in 1971. It then turns to the peak of the partnership after Nixon and Kissinger's historic 1972 visit to Iran, when the shah succeeded in drawing the United States into his covert war against Iraq in Kurdistan. Finally, it focuses on the decline of the partnership under Nixon's successor, Gerald Ford, through a history of the failed negotiations from 1974 to 1976 for an agreement on U.S. nuclear exports to Iran. Taken together, these episodes map the rise and fall of Iran's Cold War partnership with the United States during the decade of superpower détente, Vietnam, and Watergate.

1971

The war of 1971 that created Bangladesh was the most significant geopolitical event in the Indian subcontinent since partition in 1947. It tilted the balance of power between India and Pakistan steeply in favor of India. Srinath Raghavan contends that the crisis and its cast of characters can be understood only in a wider international context.

War and Secession

A decade after the 1971 wars in South Asia, the principal decisionmakers were still uncertain why wars so clearly unwanted had occurred. The authors reconstruct the complex decisionmaking process attending the break-up of Pakistan and the subsequent war between India and Pakistan. Much of their data derive from interviews conducted with principal players in each of the countries immediately involved-Pakistan, India, and Bangladesh-including Indira Gandhi and leaders of the Awami League in Bangladesh.

1971

The year 1971 exists everywhere in Bangladesh-on its roads, in sculptures, in its museums and oral history projects, in its curriculum, in people's homes and their stories, and in political discourse. It marks the birth of the nation, its liberation. More than 1000 miles away, in Pakistan too, 1971 marks a watershed moment, its memories sitting uncomfortably in public imagination. It is remembered as the 'Fall of Dacca', the dismemberment of Pakistan or the third Indo-Pak war. In India, 1971 represents something else-the story of humanitarian intervention, of triumph and valour that paved the way for India's rise as a military power, the beginning of its journey to becoming a regional superpower. Navigating the widely varied terrain that is 1971 across Pakistan, Bangladesh and India, Anam Zakaria sifts through three distinct state narratives, and studies the institutionalization of the memory of the year and its events. Through a personal journey, she juxtaposes state narratives with people's history on the ground, bringing forth the nuanced experiences of those who lived through the war. Using intergenerational interviews, textbook analyses, visits to schools and travels to museums and sites commemorating 1971, Zakaria explores the ways in which 1971 is remembered and forgotten across countries, generations and communities.

The Making of Martyrs in India, Pakistan & Bangladesh

Making of Martyrs unravels an epic saga of populist politics in the postcolonial Indian subcontinent. Indira Gandhi, Zulfikar Ali Bhutto and Sheikh Mujibur Rahman were towering figures and have been simultaneously loved and hated in equal measure. During their heyday, each of these leaders garnered extraordinary power and charisma. Their followers, admirers and loyal supporters continue to idolise and romanticise them, yet in the eyes of their critics they were ruthless, power-hungry tyrants and

partisan villains. These dichotomies remain irreconcilable since their followers venerate them as a model for the future and their critics relegate them to a haunted past. Drawing on years of research, Faisal Khosa explores the turbulent lives and times of these three leaders and gives us a vivid account of their politics and personalities.

The Trial of Henry Kissinger

'A good liar must have a good memory: Kissinger is a stupendous liar with a remarkable memory.' Christopher Hitchens goes straight for the jugular in *The Trial of Henry Kissinger*. Under his fearsome gaze, the former Secretary of State and National Security Advisor is accused of being a war criminal whose reckless actions and heinous disregard for international law have led to torture, kidnapping, and murder. This book is a polemical masterpiece by a man who, for forty years, was the Anglosphere's preeminent man of letters. In *The Trial of Henry Kissinger*, Hitchens' verve, style and firebrand wit are on show at the height of their potency. 'This is a disturbing glimpse into the dark side of American power, whose consequences in remote corners of the globe are all too often ignored. Its countless victims have found an impassioned and skilful advocate in Christopher Hitchens.' - Sunday Times

Killing Orders

The book represents an earthquake in genocide studies, particularly in the field of Armenian Genocide research. A unique feature of the Armenian Genocide has been the long-standing efforts of successive Turkish governments to deny its historicity and to hide the documentary evidencesurrounding it. This book provides a major clarification of the often blurred lines between facts and truth in regard to these events. The authenticity of the killing orders signed by Ottoman Interior Minister Talat Pasha and the memoirs of the Ottoman bureaucrat Naim Efendi have been two of the most contested topics in this regard. The denialist school has long argued that these documents and memoirs were all forgeries, produced by Armenians to further their claims. Taner Akçam provides the evidence to refute the basis of these claims and demonstrates clearly why the documents can be trusted as authentic, revealing the genocidal intent of the Ottoman-Turkish government towards its Armenian population. As such, this work removes a cornerstone from the denialist edifice, and further establishes the historicity of the Armenian Genocide.

The Price of Power

Price of Power examines Henry Kissinger's influence on the development of the foreign policy of the United States during the presidency of Richard Nixon.

The Colonel Who Would Not Repent

Bangladesh was once East Pakistan, the Muslim nation carved out of the Indian Subcontinent when it gained independence from Britain in 1947. As religion alone could not keep East Pakistan and West Pakistan together, Bengali-speaking East Pakistan fought for and achieved liberation in 1971. Coups and assassinations followed, and two decades later it completed its long, tumultuous transition to parliamentary government. Its history is complex and tragic—one of war, natural disaster, starvation, corruption, and political instability. First published in India by the Aleph Book Company, Salil Tripathi's lyrical, beautifully wrought tale of the difficult birth and conflict-ridden politics of this haunted land has received international critical acclaim, and his reporting has been honored with a Mumbai Press Club Red Ink Award for Excellence in Journalism. *The Colonel Who Would Not Repent* is an insightful study of a nation struggling to survive and define itself.

A Golden Age

Spring, 1971, East Pakistan. Rehana Haque is throwing a party for her beloved children, Sohail and Maya. Her young family is growing up fast, and Rehana wants to remember this day forever. But out on the hot city streets, something violent is brewing. As the civil war develops, a war which will eventually see the birth of Bangladesh, Rehana struggles to keep her children safe and finds herself facing a heartbreaking dilemma.

The Marshall Plan

Traces the history of the Marshall Plan and the efforts to reconstruct western Europe as a bulwark against communist authoritarianism during a two-year period that saw the collapse of postwar U.S.-Soviet relations and the beginning of the Cold War.

The Vortex

LONGLISTED FOR THE CARNEGIE MEDAL FOR EXCELLENCE "[A] tremendous new book." --The Boston Globe "Carney and Miklian write vividly in the fashion of a cinematic disaster flick." --The Washington Post The deadliest storm in modern history ripped Pakistan in two and led the world to the brink of nuclear war when American and Soviet forces converged in the Bay of Bengal In November 1970, a storm set a collision course with the most densely populated coastline on Earth. Over the course of just a few hours, the Great Bhola Cyclone would kill 500,000 people and begin a chain reaction of turmoil, genocide, and war. The Vortex is the dramatic story of how that storm sparked a country to revolution. Bhola made landfall during a fragile time, when Pakistan was on the brink of a historic election. The fallout ignited a conflagration of political intrigue, corruption, violence, idealism, and bravery that played out in the lives of tens of millions of Bangladeshis. Authors Scott Carney and Jason Miklian take us deep into the story of the cyclone and its aftermath, told through the eyes of the men and women who lived through it, including the infamous president of Pakistan, General Yahya Khan, and his close friend Richard Nixon; American expats Jon and Candy Rhode; soccer star-turned-soldier Hafiz Uddin Ahmad; and a young Bengali revolutionary, Mohammed Hai. Thrillingly paced and written with incredible detail, The Vortex is not just a story about the painful birth of a new nation but also a universal tale of resilience and liberation in the face of climate emergency that affects every single person on the planet.

Indira Gandhi

Indira Gandhi's Life Was Part Of The Unfolding History Of India, Intricately Woven With India's Past And Future. It (Became) Inevitable, Therefore, That Politics (Formed) A Backdrop To Her Public And Often Private Actions. Indira Gandhi's Life Spanned Over Two-Thirds Of A Century. By The Time Of Her Brutal Assassination In 1984, She Had Established Herself As The Most Significant Political Leader India Had Seen Since The Death Of Her Father, Jawaharlal Nehru. In This Book, Written With The Close Cooperation Of Her Subject, Pupul Jayakar Seeks To Uncover The Many Personalities That Lay Hidden Within Mrs Gandhi. Much More Than A Political Biography, The Book Reveals The Complex Personality Of Indira Gandhi—Her Thoughts And Feelings, Her Hates And Prejudices, Her Insights And Her Faults, Her Loves And Emotional Entanglements. Full Of Startling Insights, Indira Gandhi: A Biography Paints A Magnificent Portrait—At Once Empathetic And Unprejudiced—Of One Of The Twentieth Century's Most Remarkable Women.

Freedom's Battle

This gripping and important book brings alive over two hundred years of humanitarian interventions. Freedom's Battle illuminates the passionate debates between conscience and imperialism ignited by the first human rights activists in the 19th century, and shows how a newly emergent free press galvanized British, American, and French citizens to action by exposing them to distant atrocities. Wildly romantic and full of bizarre enthusiasms, these activists were pioneers of a new political consciousness. And their legacy has much to teach us about today's human rights crises.

A History of Bangladesh

Bangladesh is a new name for an old land whose history is little known to the wider world. A country chiefly famous in the West for media images of poverty, underdevelopment, and natural disasters, Bangladesh did not exist as an independent state until 1971. Willem van Schendel's history reveals the country's vibrant, colourful past and its diverse culture as it navigates the extraordinary twists and turns that have created modern Bangladesh. The story begins with the early geological history of the delta which has decisively shaped Bangladesh society. The narrative then moves chronologically through the era of colonial rule, the partition of Bengal, the war with Pakistan and the birth of Bangladesh as an independent state. In so doing, it reveals the forces that have made Bangladesh what it is today. This is an eloquent introduction to a fascinating country and its resilient and inventive people.

Open Veins of Latin America

[In this book, the author's] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of ... Latin American history. [The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.-Back cover.

International Law and the Cold War

This is the first book to examine in detail the relationship between the Cold War and International Law.

Magnificent Delusions

The relationship between America and Pakistan is based on mutual incomprehension and always has been. Pakistan—to American eyes—has gone from being a quirky irrelevance, to a stabilizing friend, to an essential military ally, to a seedbed of terror. America—to Pakistani eyes—has been a guarantee of security, a coldly distant scold, an enthusiastic military enabler, and is now a threat to national security and a source of humiliation. The countries are not merely at odds. Each believes it can play the other—with sometimes absurd, sometimes tragic, results. The conventional narrative about the war in Afghanistan, for instance, has revolved around the Soviet invasion in 1979. But President Jimmy Carter signed the first authorization to help the Pakistani-backed mujahedeen covertly on July 3—almost six months before the Soviets invaded. Americans were told, and like to believe, that what followed was Charlie Wilson's war of Afghani liberation, with which they remain embroiled to this day. It was not. It was General Zia-ul-Haq's vicious regional power play. Husain Haqqani has a unique insight into Pakistan, his homeland, and America, where he was ambassador and is now a professor at Boston University. His life has mapped the relationship of the two countries and he has found himself often close to the heart of it, sometimes in very confrontational circumstances, and this has allowed him to write the story of a misbegotten diplomatic love affair, here memorably laid bare.

The Language Instinct

'Dazzling...Pinker's big idea is that language is an instinct...as innate to us as flying is to geese...Words can hardly do justice to the superlative range and liveliness of Pinker's investigations' - Independent
'A marvellously readable book...illuminates every facet of human language: its biological origin, its uniqueness to humanity, its acquisition by children, its grammatical structure, the production and perception of speech, the pathology of language disorders and the unstoppable evolution of languages and dialects' - Nature

The Cruel Birth of Bangladesh

An account of political events prior to the creation of Bangladesh; covers the 1970-1971 period.

Hamoodur Rahman Commission of Inquiry Into the 1971 India-Pakistan War

The Hamoodur Rahman Commission was officially reconstituted in 1974 to interview returning prisoners, particularly senior officers, and issue a supplementary report to their original landmark document. The supplementary report makes fascinating reading, based on the Commissions in-depth interviews with these senior officials and officers who were directly responsible for the conduct of Pakistani forces in East Pakistan. This supplementary report is also easier to read than the original document, being less technical and much shorter. However, it still manages to paint a vivid picture of the circumstances that led to the surrender of Pakistani forces in East Pakistan. The report, just like the original, is also extremely candid in discussing the culpability and responsibility of senior officers in the events that led up to Pakistan's humiliating surrender.

Overthrow

Stephen Kinzer's Overthrow provides a fast-paced narrative history of the coups, revolutions, and invasions by which the United States has toppled fourteen foreign governments -- not always to its own benefit "Regime change" did not begin with the administration of George W. Bush, but has been an integral part of U.S. foreign policy for more than one hundred years. Starting with the overthrow of the Hawaiian monarchy in 1893 and continuing through the Spanish-American War and the Cold War and into our own time, the United States has not hesitated to overthrow governments that stood in the way of its political and economic goals. The invasion of Iraq in 2003 is the latest, though perhaps not

the last, example of the dangers inherent in these operations. In *Overthrow*, Stephen Kinzer tells the stories of the audacious politicians, spies, military commanders, and business executives who took it upon themselves to depose monarchs, presidents, and prime ministers. He also shows that the U.S. government has often pursued these operations without understanding the countries involved; as a result, many of them have had disastrous long-term consequences. In a compelling and provocative history that takes readers to fourteen countries, including Cuba, Iran, South Vietnam, Chile, and Iraq, Kinzer surveys modern American history from a new and often surprising perspective. "Detailed, passionate and convincing . . . [with] the pace and grip of a good thriller." -- Anatol Lieven, *The New York Times Book Review*

A New Map for Relationships

Dorothie and Martin Hellman reveal the secrets that allowed them to transform an almost failed marriage into one where they reclaimed the true love that they felt when they first met fifty years ago. Surprisingly, they found that working on interpersonal and international challenges at the same time accelerated progress on both.

Kissinger's Shadow

A new account of America's most controversial diplomat that moves beyond praise or condemnation to reveal Kissinger as the architect of America's current imperial stance. In his fascinating new book *Kissinger's Shadow*, acclaimed historian Greg Grandin argues that to understand the crisis of contemporary America—its never-ending wars abroad and political polarization at home—we have to understand Henry Kissinger. Examining Kissinger's own writings, as well as a wealth of newly declassified documents, Grandin reveals how Richard Nixon's top foreign policy advisor, even as he was presiding over defeat in Vietnam and a disastrous, secret, and illegal war in Cambodia, was helping to revive a militarized version of American exceptionalism centered on an imperial presidency. Believing that reality could be bent to his will, insisting that intuition is more important in determining policy than hard facts, and vowing that past mistakes should never hinder future bold action, Kissinger anticipated, even enabled, the ascendance of the neoconservative idealists who took America into crippling wars in Afghanistan and Iraq. Going beyond accounts focusing either on Kissinger's crimes or accomplishments, Grandin offers a compelling new interpretation of the diplomat's continuing influence on how the United States views its role in the world.

Conflict and Diplomacy

Conflict and Diplomacy: East Pakistan Becomes Bangladesh delineates East Bengal's long, complicated, and agonising journey from being an integral part of India to East Pakistan, finally to Bangladesh. This reordering of human lives tightly compressed in time inevitably culminated in trauma, generating several new geo-political stress lines of enormous power in the subcontinent. The authors, Jaswant Singh and Maj. S.P. Bhatia, lead the readers along this twisted and torturous path of the birth of Bangladesh under Indian midwifery, intrigued by West Pakistani and the US diplomacy. The declassified US documents provide revealingly informative aspects of the US diplomacy during this challenging period. The excerpts of diplomatic exchanges between Delhi Washington Dhaka, Dhaka Washington, Islamabad Washington, and the off-guard internal conversations of the political and diplomatic string pullers are sure to fascinate and interest the readers.

Henry Kissinger

As national security advisor and secretary of state under President Richard Nixon, and secretary of state for Gerald Ford, Kissinger played a pivotal role in American foreign policy. This work provides coverage of the life and work of one of the 20th century's greatest diplomats with selected writings, related sidebars, and balanced commentary.

The Great War for Civilisation

"This is no chronology of Middle East history but a passionate outcry against the lies and deceit that have sent soldiers to their deaths and killed tens of thousands of men and women - Muslim, Christian and Jew - over the past century. It is also a chronicle of journalists at war, of the rage, humour and frustration of the correspondents who spend their lives reporting the first draft of history, of their occasional courage - and sometimes their deaths. Rarely have first-hand reporting and history been

so powerfully combined than in Robert Fisk's epic story of tragedy and betrayal in the Middle East. As his narrative of bloodshed and cruelty unfolds in Iraq, Afghanistan, Algeria, Iran, Israel, Palestine and other battlefields, the carnage of September 11th, 2001, and the overthrow of Saddam Hussein's brutal regime take on a new and frightening meaning." -Inside front cover.

The Cambridge Dictionary of Modern World History

The untold story of India's Partition. The partition of India in 1947 was the only way to contain intractable religious differences as the subcontinent moved towards independence - or so the story goes. But this dramatic new history reveals previously overlooked links between British strategic interests - in the oil wells of the Middle East and maintaining access to its Indian Ocean territories - and partition. Narendra Singh Sarela reveals here how the Great Game against the Soviet Union cast a long shadow. The top-secret documentary evidence unearthed by the author sheds new light on several prominent figures, including Gandhi, Jinnah, Mountbatten, Churchill, Attlee, Wavell and Nehru. This radical reassessment of one of the key events in British colonial history is important in itself, but its claim that many of the roots of Islamic terrorism sweeping the world today lie in the partition of India has much wider implications.

The Shadow of the Great Game

Is the United States a force for democracy? From China in the 1940s to Guatemala today, William Blum presents a comprehensive study of American covert and overt interference, by one means or another, in the internal affairs of other countries. Each chapter of the book covers a year in which the author takes one particular country case and tells the story - and each case throws light on particular US tactics of intervention.

Killing Hope

This second edition of Historical Dictionary of 'The Dirty Wars' focuses on the period 1954-1990 in South America, when authoritarian regimes waged war on subversion, both real and imagined. This is done through a chronology, an introductory essay, a bibliography, and over 400 cross-referenced dictionary entries on the countries; guerrilla and political movements; prominent guerrilla, human-rights, military, and political figures; local, regional, and international human-rights organizations; and artistic figures (filmmakers, novelists, and playwrights) whose works attempt to represent or resist the period of repression.

Bangladesh

Pakistan is a strategic ally of the US in the 'war on terror'. It is the third largest recipient of US aid in the world. Yet Pakistan is a state run by its army and intelligence service. Operating in the shadows, Pakistan's military industrial complex owns and controls swathes of the economic and political landscape of the country. Military Inc. dares to illuminate the military as an oppressive holding company possessing not just security-related businesses, but also hotels, shopping malls, insurance companies, banks, farms and even an airline. The result is a deeply undemocratic society, where money is funnelled towards the military's economic enterprises, leaving those in need of it impoverished and effectively disenfranchised. With an empirical richness, and a view to Pakistan's recent history, Ayesha Siddiqi offers a detailed and powerful case study of a global phenomenon: corruption, hollow economic growth and elitism. This new edition includes a chapter on the recent developments of the military's foray into the media, and a new preface.

Historical Dictionary of the Dirty Wars

A searing account of a dark "chapter in U.S. Cold War history . . . to help the anti-Soviet aims of American intelligence and national security agencies" (Library Journal). Even before the final shots of World War II were fired, another war began—a cold war that pitted the United States against its former ally, the Soviet Union. As the Soviets consolidated power in Eastern Europe, the CIA scrambled to gain the upper hand against new enemies worldwide. To this end, senior officials at the CIA, National Security Council, and other elements of the emerging US national security state turned to thousands of former Nazis, Waffen SS, and Nazi collaborators for propaganda, psychological warfare, and military operations. Many new recruits were clearly responsible for the deaths of countless innocents as part of Adolph Hitler's "Final Solution," yet were whitewashed and claimed to be valuable intelligence assets.

Unrepentant mass murderers were secretly accepted into the American fold, their crimes forgotten and forgiven with the willing complicity of the US government. *Blowback* is the first thorough, scholarly study of the US government's extensive recruitment of Nazis and fascist collaborators right after the war. Although others have approached the topic since, Simpson's book remains the essential starting point. The author demonstrates how this secret policy of collaboration only served to intensify the Cold War and has had lasting detrimental effects on the American government and society that endure to this day.

Military Inc

Ramachandra Guha's *India after Gandhi* is a magisterial account of the pains, struggles, humiliations and glories of the world's largest and least likely democracy. A riveting chronicle of the often brutal conflicts that have rocked a giant nation, and of the extraordinary individuals and institutions who held it together, it established itself as a classic when it was first published in 2007. In the last decade, India has witnessed, among other things, two general elections; the fall of the Congress and the rise of Narendra Modi; a major anti-corruption movement; more violence against women, Dalits, and religious minorities; a wave of prosperity for some but the persistence of poverty for others; comparative peace in Nagaland but greater discontent in Kashmir than ever before. This tenth anniversary edition, updated and expanded, brings the narrative up to the present. Published to coincide with seventy years of the country's independence, this definitive history of modern India is the work of one of the world's finest scholars at the height of his powers.

Hearts | John 14:1-14 | Authentic Jesus Part 39 by James MacDonald 17,311 views 3 years ago 51
minutes - If your heart isn't troubled today - it likely will be at some time in the future.And the safest
place for you to be is in **God's**, will. In fact ...
Jesus Loved Martha and Her Sister and Lazarus
The Shortest Verse in the Bible
If God Is for Us Who Can Be against Us
There Is no Condemnation to those Who Are in Christ Jesus and God Loves Apart from Performance
No Circumstance Changes God's Love for You
The Safest Place for You Is in the Center of God's Will for You
God Is at Work in every Circumstance Increasing Our Faith

God is a promiser.
God keeps His promises.
God wants us to test His promises.
God's promises are activated by faith.
God's promises are experienced in Jesus Christ. 2 Cor 1:20
Jesus Christ IS the promise of God...
God is always victorious. Romans 16:20

Europe Under Stress

This book explores the political and economic issues currently challenging EU member states affecting both the core Eurozone and non-core states. It analyses and explains how its own economic, and political, relationships have been critically influenced by fierce competition from its rivals in other major global economies, as well as by the systemic weaknesses in the economic and financial model it created. The book provides insight into both the underlying and more immediate economic and social challenges created by: its post-2007 enlargement to 28 countries - excluding the Balkan remnants of former Yugoslavia; the nature of the regulatory regime centralized in Brussels, and the host of issues and critiques this fosters; its 'open borders' policy and precious guiding principle, crystallized in the Schengen agreement; security weaknesses exacerbated by increasing volumes of migration; and the ongoing debt crises as the greatest existential challenge to the EU project. Featuring interviews with high profile key players from inside and outside Europe the book will examine new and underlying stresses - political and economic - to guide a greater understanding of the EU plan.

The European Union and the Eurozone under Stress

Europe Under Stress: Convergence and Divergence in the European Community is the second of two volumes which flow from a Chatham House project on the political implications of economic divergence in the European Community, funded by the Social Science Research Council. This second volume offers an interpretation of the problems that divergence poses for the European Community in a number of key sectors, from the perspective of a political economist. This book begins with a discussion of the

concepts of convergence and divergence followed by an explanation of the methodology adopted in this book. The remaining chapters are organized into two parts. The chapters in Part I examine the attitudes of the major EEC member states to the convergence/divergence issue and what the terms mean for each of them. This part also attempts to relate these positions to the concerns and interests of the countries involved. The chapters in Part II analyze the impact of economic divergence on community policies.

Europe Under Stress

This book offers the first comprehensive political analysis of the Euro crisis that erupted in Greece in 2010 and subsequently threatened the very survival of the Euro area. It has left a profound mark on democratic politics all over Europe, changing public attitudes and voting preferences, institutional and societal norms, and deeply anchored political traditions. The contributors to this volume reveal the extent to which policymakers are torn between the pressures emanating from financial markets and the demands put forward by their own constituents; how they struggle to reconcile national preferences with wider European interests; and how a polarized and politicized Union seeks to maintain some degree of cohesion. The emerging picture is that of a European Union under serious stress, transformed by new governance structures and a shifting balance of power. In response, the authors evaluate the prospects of a more legitimate and democratic Europe. They provide a rich and pluralist set of new analyses and proposals, aimed at understanding and navigating the myriad tensions which surround the EU in the aftermath of the crisis. If the European project is to regain the trust of its citizens, such considerations must take a central place in public debate.

Democratic Politics in a European Union Under Stress

Regionalism is under stress. The European Union has been challenged by the Eurozone crisis, refugee flows, terrorist attacks, Euroscepticism, and Brexit. In Latin America, regional cooperation has been stagnating. Studying Europe and Latin America within a broader comparative perspective, this volume provides an analytical framework to assess stress factors facing regionalism. The contributors explore how economic and financial crises, security challenges, identity questions raised by immigration and refugee flows, the rise of populism, and shifting regional and global power dynamics have had an impact on regionalism; whether the EU crisis has had repercussions for regionalisms in other parts of the world; and to what extent the impact of stress factors is mediated by characteristics of the region that may provide elements of resilience. Written by specialists from Europe and Latin America with a shared interest in the new field of comparative regionalism, this book will be an invaluable resource for students, scholars and policy specialists in regional integration, European politics, EU studies, Latin American studies, and international relations and international law more generally.

Regionalism Under Stress

"European Citizenship, although derived from the nationalities of the Member States, came to play a significant independent role in reforming European constitutionalism in unanticipated ways by undermining some of the key assumptions underlying the notions of citizenship, equality and democratic accountability. Instead of lingering merely as a super-structure atop Member State nationalities, it instead reshuffles the constitutional basics and not all Europeans emerge as winners as a result"--

European Citizenship Under Stress

Examining the uncertainty of the role and scope of traditional political rights in the 21st-century's threat of terrorism, this book reflects on the appropriate scope and strength of protection of political rights, and analyses issues such as party closures, political rights of minorities, and democratization.

Political Rights Under Stress in 21st Century Europe

In this book a distinguished group of political scientists and historians from Europe and the United States use the crisis over Iraq as the starting point for an examination of transatlantic relations and specifically the Atlantic alliance, an examination that is cross-national in scope and multi-disciplinary in approach.

The Atlantic Alliance Under Stress

The European Union (EU) has reached crisis point. Populist and Nativist forces are militating against years of austerity economics, distant elites, and a rising tide of migration. Despite the EU's shortcomings, this book seeks to determine the future of the EU, outlining how the institution can learn lessons from the elements that have plunged much of Europe into social, economic and political turmoil. This book argues for reform not revolution. By interviewing politicians, economists, representatives of national bodies and EU citizens, this book provides unique insights never before disclosed and makes a major contribution to current debates on the future of the EU and the Eurozone.

Survival of the European (Dis) Union

Southern European welfare states - in common with their northern counterparts - are under stress. They have become the object of studies exploring the southern "type" or "model" of welfare. This collection provides a series of both comparative and specific country analyses.

Southern European Welfare States

Weathering the Storm explores the factors leading up to the recent global financial and economic crisis, how the crisis unfolded, and the response of European and national authorities. The book describes the rationale behind the measures undertaken to mitigate the consequences of the recession and to ensure that a similar situation does not happen again in the future. In the wake of the crisis, various major changes continue to significantly affect the life and social organization of Europeans. For instance, a new ESM with a size financially comparable to that of the IMF was created; similarly, the reforms in economic governance imply much more intrusive participation of European countries in each other's macroeconomic policies. Moreover, the organization, regulation, and supervision of the financial sector have been drastically revamped. The decisions taken by European and national authorities affect the daily lives of hundreds of millions of European citizens and countless more around the globe. An insightful read for anyone interested in understanding the topic and its effect on their lives, the book primarily addresses undergraduate students in their final year and graduate students in fields such as economics, finance, and political science. The main messages are explained through examples and charts.

Working on Stress

The years following World War II saw a huge expansion of the middle classes in the world's industrialized nations, with a significant part of the working class becoming absorbed into the middle class. Although never explicitly formalized, it was as though a new social contract called for government, business, and labor to work together to ensure greater political freedom and more broadly shared economic prosperity. For the most part, they succeeded. In *Social Contracts Under Stress*, eighteen experts from seven countries examine this historic transformation and look ahead to assess how the middle class might fare in the face of slowing economic growth and increasing globalization. The first section of the book focuses on the differing experiences of Germany, Britain, France, the United States, and Japan as they became middle-class societies. The British working classes, for example, were slowest to consider themselves middle class, while in Japan by the 1960s, most workers had abandoned working-class identity. The French remain more fragmented among various middle classes and resist one homogenous entity. Part II presents compelling evidence that the rise of a huge middle class was far from inclusive or free of social friction. Some contributors discuss how the social contract reinforced long-standing prejudices toward minorities and women. In the United States, Ira Katznelson writes, Southern politicians used measures that should have promoted equality, such as the GI bill, to exclude blacks from full access to opportunity. In her review of gender and family models, Chiara Saraceno finds that Mediterranean countries have mobilized the power of the state to maintain a division of labor between men and women. The final section examines what effect globalization might have on the middle class. Leonard Schoppa's careful analysis of the relevant data shows how globalization has pushed "less skilled workers down and more skilled workers up out of a middle class that had for a few decades been home to both." Although Europe has resisted the rise of inequality more effectively than the United States or Japan, several contributors wonder how long that resistance can last. *Social Contracts Under Stress* argues convincingly that keeping the middle class open and inclusive in the face of current economic pressures will require a collective will extending across countries. This book provides an invaluable guide for assessing the issues that must be considered in such an effort.

Weathering the Storm

In a representative study made of European workers, twenty-eight per cent of employees reported that stress affects their health and their performance at work. Occupational stress is a serious problem for the performance of individuals, organisations and as a consequence, for national economies. Preventing Stress, Improving Productivity investigates the ways in which companies can combat stress by changing the working environment rather than only treating individual employees with stress symptoms. Costs and benefits of stress prevention are discussed, with an emphasis on approaches that involve both the work situation and the individual worker. The heart of the book consists of eleven European country chapters, each overviewing the current status with respect to occupational stress and its prevention in that country and then presenting one detailed case study an example of good preventive practice. Preventing Stress, Improving Productivity identifies five factors that are critical for a stress reduction programme to work, both in terms of employee health and well-being and from a financial point of view. Successful strategies combine participation from workers and support from top management. Useful as a reference for psychologists, human resource managers, occupational physicians, ergonomists and consultants, this book will also be an invaluable aid to managers in the day-to-day running of organisations.

Social Contracts Under Stress

The collapse of Barings bank and the currency crisis in Mexico are just two instances of stress in an international financial system still largely governed by the institutions established by the Bretton Woods Committee in 1944. Here, the authors put forward an agenda for a new system of international economic institutions to fit the changes in international relations. This agenda includes: * an analysis of the role of the Bretton Woods institutions and their relations with the newly created World Trade Organizations * a discussion of the search for world economic governance * an analysis of the crisis within EMS and the prospects for European Monetary Integration * an examination of the integration of private markets in the new economic architecture.

Preventing Stress, Improving Productivity

Constitutionalism under Stress reflects on comparative constitutionalism in Central and Eastern Europe through the lens of leading legal scholar Professor Wojciech Sadurski, whose writings have anticipated and scrutinized the current decline of liberal democracies and populist challenges to the rule of law in the region. Sadurski's work has chronicled the transition from concern for the most basic of human rights under authoritarian rule to the challenges of democratic governance. The compelling rights discourse of an earlier period gave way to claims of abuse of majoritarian prerogatives as the hopes of liberal democracy encountered the power of illiberalism. The theoretical responses offered for the preservation of liberal democracy, in light of the current turbulence regarding the rule of law in the region, produces a far reaching and effective reference tool on matters of constitutional capture and illiberal democracy.

The Financial System Under Stress

Weathering the Storm explores the factors leading up to the recent global financial and economic crisis, how the crisis unfolded, and the response of European and national authorities. The book describes the rationale behind the measures undertaken to mitigate the consequences of the recession and to ensure that a similar situation does not happen again in the future. In the wake of the crisis, various major changes continue to significantly affect the life and social organization of Europeans. For instance, a new ESM with a size financially comparable to that of the IMF was created; similarly, the reforms in economic governance imply much more intrusive participation of European countries in each other's macroeconomic policies. Moreover, the organization, regulation, and supervision of the financial sector have been drastically revamped. The decisions taken by European and national authorities affect the daily lives of hundreds of millions of European citizens and countless more around the globe. An insightful read for anyone interested in understanding the topic and its effect on their lives, the book primarily addresses undergraduate students in their final year and graduate students in fields such as economics, finance, and political science. The main messages are explained through examples and charts.

Constitutionalism under Stress

The 2020 edition of Health at a Glance: Europe focuses on the impact of the COVID 19 crisis. Chapter 1 provides an initial assessment of the resilience of European health systems to the COVID-19 pandemic and their ability to contain and respond to the worst pandemic in the past century.

Weathering the Storm

Recoge: 1. Prevention at national level -- 2. Work, stressors, stress and health -- 3. The socio-economic model and some illustrative results -- 4. COncclusions.

Health at a Glance: Europe 2020 State of Health in the EU Cycle

The European Landscape is under stress of changing land use and a changing attitude of its users. Globalization, the disappearance of the iron curtain and the recent EU enlargement to 25 countries have changed the economic and environmental dimensions of Europe. Europe is changing its face from a western and eastern part to one European Union and to fast connections between its centres of activity. The rural and cultural heritage of Europe has to be adapted to cope with this change. However, its landscape is worth to be conserved as well, because it represents the European history in the same way as castles and churches. It even more represents the history of the common people, because it has been the tradition of the rural population that made these landscapes. It cannot be prevented that Europe is changing and it is good that Europe adapts to the new dimensions of the world. We, in Europe, have to define what we think is important and what must be conserved, what can be adapted to be used for new functions and what can be abolished because it has no value. These decisions will determine the new dimensions of the European landscapes. The Frontis Workshop on the New Dimensions of the European Landscape was held on 10-12 June 2002. Wageningen University and Research Centre organized this workshop aiming to develop visions on the landscape in Europe, its development and design in the future and to strengthen the international network in landscape planning.

A Model for Assessing the Costs of Stressors at National Level

The crisis threatens the welfare of about 160 million people in the Europe and Central Asia (ECA) region who are poor or are just above the poverty line. Using pre-crisis household data along with aggregate macroeconomic outturns to simulate the impact of the crisis on households transmitted via credit market shocks, price shocks, and income shocks this report finds that adverse effects are widespread and that poor and non-poor households alike are vulnerable. By 2010, for the region as a whole, some 11 million more people will likely be in poverty and over 23 million more people will find themselves just above the poverty line because of the crisis. The aggregate results mask the heterogeneity of impact within countries, including the concentration of the poverty impact in selected economic sectors. Meanwhile, stress tests on household indebtedness in selected countries suggest that ongoing macroeconomic shocks will expand the pool of households unable to service their debt, many of them from among the ranks of relatively richer households. In fact, already there are rising household loan delinquency rates. Finally, there is evidence that the food and fuel crisis is not over and a new round of price increases, via currency adjustments, will have substantial effects on net consumers. Lessons from last year's food crisis suggest that the poor are the worst hit, as many of the poor in Albania, Kyrgyz Republic, and Tajikistan, for example, are net food consumers, with limited access to agricultural assets and inputs. The resilience of households to macroeconomic shocks ultimately depends upon the economy's institutional readiness, the flexibility of the economic policy regime, and the ability of the population to adjust. However, compared with previous crises, the scope for households to engage in their traditional coping strategies may be more limited. Fiscal policy responses in the short-term are also constrained by rapidly falling revenues. Governments in ECA have to make difficult choices over what spending items to protect and what items to cut, social protection programs to reform and scale-up, and new interventions to mitigate the impact of the crisis.

The New Dimensions of the European Landscapes

7 'Stop TTIP': towards a transnational Eurosceptic opposing the Transatlantic Trade and Investment Partnership? -- 8 Transnational Euroscepticism as ideational solidarity? The 'No' campaign in the Irish referendums on the Lisbon Treaty -- 9 Eurosceptic candidate MEPs in the news: a transnational perspective -- 10 Religion and the European Union: a commitment under stress -- 11 Conclusion -- Epilogue: Transnational and pan-Euroscepticism after Brexit -- Index

The Crisis Hits Home

DEMOCRACY UNDER STRESS focuses on the global financial crisis of 2008-2009 and its implications for democracy. Why and how did the crisis come about? Are there any instructive lessons to be drawn from comparisons with the Great Depression of the 1930s? What are the democratic response mechanisms to cope with serious crises? Do they work? Is China a new trend setter? Do values matter? Are global democratic rules a possibility? These are some of the key questions addressed in the volume.

Euroscepticism as a Transnational and Pan-European Phenomenon

Can the political institutions of the transatlantic alliance endure the demise of the Soviet enemy? Did the Iraq crisis of 2002–3 signal the final demise of the Atlantic partnership? If so, what are the likely consequences? In this book a distinguished group of political scientists and historians from Europe and the United States tackle these questions. The book examines the causes and consequences of the crisis in Atlantic relations that accompanied the invasion of Iraq in March 2003. The authors' collective focus is not on the war itself, or how it was conducted, or even the situation in Iraq either before or after the conflict. Instead, the crisis over Iraq is the starting point for an examination of transatlantic relations and specifically the Atlantic alliance, an examination that is cross-national in scope and multi-disciplinary in approach.

Democracy Under Stress

This book explores the visions underlying the attempts to reform the European University as well as two European integration processes. It presents a framework for analyzing ongoing modernization reforms and reform debates that take place at various governance levels and a long-term research agenda. It convincingly argues why the knowledge basis under the current University reforms in Europe should be considerably strengthened.

The Atlantic Alliance Under Stress

Abstract: Is electoral behaviour affected by the current challenges of the EU and, if it is, through which channels and mechanisms? This study offers a cross-national analysis together with a broad understanding of both the crisis phenomenon and electoral behaviour. To investigate this research question appropriately, we first distinguish at the most general level between the two main behavioural alternatives at play when it comes to electoral behaviour, namely abstention and vote choice. Second, and no less important, we differentiate between the mechanisms that mediate the relationship between the 'EU under stress' and electoral behaviour, namely egocentric and sociotropic economic voting motivations. Drawing on data from the European Election Study 2014, our article provides important insights into the study of electoral behaviour in an EU under stress. First, we are able to show that the multiple crises that have hit the EU have the potential to determine both turnout and the decision to

University Dynamics and European Integration

Work-related stress is the second most common occupational health problem after back pain, affecting 28 per cent of workers in the EU. Given that this is often indicative of problems with the psychosocial work environment, the promotion of a preventive culture against psychosocial hazards needs to be given a high priority. This report presents 15 case studies of programmes, practices and experiences on tackling work-related stress, produced by the European Agency for Safety and Health at Work in order to raise awareness of these topics in EU member states.

Electoral Behaviour in a European Union Under Stress

This volume brings together leading scholars of comparative constitutional law to reflect on current challenges to liberal constitutionalism and democratic governance, as inspired by the work of Professor Wojciech Sadurski.

How to Tackle Psychosocial Issues and Reduce Work-related Stress

Summary: v.1 provides an analysis of the role of those institutions established at Bretton Woods and their relations with the newly created World Trade Organization. Particular attention is given to the International Monetary Fund and the World Bank -- v.2 examines the type of global governance

necessary for the changing world economy. Finally -- v.3 discusses the growing integration of capital markets and their role in the new economic architecture.

Constitutionalism Under Stress

The mighty North-American republic at times exerted considerable pressure to force the small European neutral into submission to its immediate, short-range policy goals. This was especially the case during the last years of World War II and the early postwar years. Switzerland, on the whole, successfully withstood this pressure and has seen its viewpoint vindicated more often than not by the course of events.

The Financial System Under Stress

Dokuchaev carried out most of his research in Ukraine. His student and friend, Volodymyr Vernadsky, went on to create trans-disciplinary environmental sciences and the concept of Earth as a living organism, famously taken up by James Lovelock. That spring of ideas still flows and the researches captured in this volume are relevant to present-day problems, and not only in Ukraine. Soils have always been under stress but, in the Anthropocene, mankind is in the driving seat. As a sequel to *Soil Science Working for a Living: Applications of soil science to present-day problems*, we consider issues of policy as well as soil genesis, attributes and functions in various environments, natural and man-made. We consider human impacts on the soil cover through its use and misuse, highlight methods of research and assessment of soil quality, and the threats of soil degradation. The distinguished contributors also describe and propose various options for evaluation and remediation of degraded soils, drawing on the latest methods of modelling and cartography as well as long-term field experiments and long experience. The book will be invaluable to researchers and practitioners in soil science including graduate and post-graduate education, academics and professionals.

Friendship Under Stress

The European economy is emerging from its deepest recession since the 1930s. This volume, which brings together economic analysis from the European Commission services, explains how swift policy response avoided a financial meltdown. Europe also needs an improved co-ordinated crisis-management framework to help it respond to any similar situations that may arise in the future. *Economic Crisis in Europe* is a much-anticipated volume which shows that the beginnings of such a crisis-management framework are emerging, building on existing institutions and legislation and complemented by new initiatives.

Osh in Figures

In the years following World War II the health and well-being of the nation was of primary concern to the British government. The essays in this collection examine the relationship between health and stress in post-war Britain through a series of carefully connected case studies.

Soils Under Stress

Stress at work is a priority issue of the European Agency of Safety and Health at Work. The report addresses the following issues and questions: the nature of stress at work; stress management strategies; does work stress affect health and well-being and, if so, how?; the implications of existing research for the management of work-related stress. This report examines the difficulties involved in placing work stress in the context of other life stress factors. It is stated that work stress is a current and future health and safety issue, and, as such, should be dealt with in the same logical and systematic way as other health and safety issues.

Economic Crisis in Europe

Examining the uncertainty of the role and scope of traditional political rights in the 21st-century's threat of terrorism, this book reflects on the appropriate scope and strength of protection of political rights, and analyses issues such as party closures, political rights of minorities, and democratization.

Stress in Post-War Britain

European welfare states are currently under stress and the 'social contracts' that underpin them are being challenged. First, welfare spending has arguably 'grown to limits' in a number of countries while expanding everywhere in the 1990s in line with higher unemployment. Second, demographic change and the emergence of new patterns of family and working life are transforming the nature of 'needs'. Third, the economic context and the policy autonomy of nation states has been transformed by 'globalization'. This book considers the implications of these challenges for European welfare states at the end of the twentieth century with interdisciplinary contributions from first-rate political scientists, economists and sociologists including Paul Ormerod.

Research on Work-related Stress

This volume brings together the leaders in the field of PTSD research to present an up-to-date summary and understanding of this complex disorder. All of our current knowledge and controversies concerning the diagnosis, epidemiology, course, pathophysiology and treatment are described in detail. The evidence for efficacy for each of the different forms of psychotherapy and pharmacotherapy is reviewed. Particular attention is paid to at-risk groups, including minorities, and coverage of PTSD throughout the world is reviewed as well. The authors present state-of-the-art findings in genetics, epigenetics, neurotransmitter function and brain imaging to provide the most current and comprehensive review of this burgeoning field.

Political Rights Under Stress in 21st Century Europe

This volume is the first work to emerge from a major international comparative research project exploring the political economy of globalization. This inter-disciplinary team of scholars is focusing on the semi-periphery of world power. Whether defined in social, cultural, economic or simply spatial terms, 'semi-peripheral' countries share two qualities: they are conscious of their subordination to the hegemonic powers at the centre of the global system - the United States and the European Union; they are also strong enough to have some ability to resist their domination. The structural position of these middle powers in global capitalism is unlike those countries at the centre that do not experience domination, and different from those Third World countries on the periphery that have no means to achieve more cultural and political autonomy, more distinctive and diversified development, or greater social equity and better income redistribution. Four countries in North America, Central America, Europe and the Antipodes - namely Canada, Mexico, Norway and Australia - have been selected in order to explore the complexities of globalization from the perspective of the semi-periphery. Opening chapters examine the international institutions, including the North America Free Trade Agreement, the World Trade Organization and the European Union, which now amount to a quasi-constitutional conditioning framework for middle powers under globalization. In the second part, contributors detail the pressures with which these countries have to cope and consider their ability to pursue policies appropriate to the needs and democratically defined goals of each. And in the concluding part, after discussing the new economic, political and social issues of 'governing under stress', they appraise the possibilities for middle powers to chart distinctive national courses in the face of globalization's constraining challenge.

The Future of European Welfare

Credibility is the bedrock of any crisis stress test. The use of stress tests to manage systemic risk was introduced by the U.S. authorities in 2009 in the form of the Supervisory Capital Assessment Program. Since then, supervisory authorities in other jurisdictions have also conducted similar exercises. In some of those cases, the design and implementation of certain elements of the framework have been criticized for their lack of credibility. This paper proposes a set of guidelines for constructing an effective crisis stress test. It combines financial markets impact studies of previous exercises with relevant case study information gleaned from those experiences to identify the key elements and to formulate their appropriate design. Pertinent concepts, issues and nuances particular to crisis stress testing are also discussed. The findings may be useful for country authorities seeking to include stress tests in their crisis management arsenal, as well as for the design of crisis programs.
