Make Your Life a Blockbuster

Make Your Life a Blockbuster. _____ Growing up as kids, we once believed we could be anything, do anything, including what most adults termed "impossible," so we asked questions, challenged everything and looked at the world with eyes filled with wonder. As we got older, we experienced more than our fair share of disappointments; we sometimes stumbled and other times we fell flat on our faces. These experiences changed how we think and therefore act. We get the feeling that we are no longer as invincible as we once thought we were as children. We are filled with doubts, negativity, and a phobia for embarrassment or worse yet failure. This ultimately cripples us and douses our passion. This book is meant to reignite that child-like passion within you. It is filled with inspirational stories, more than a few are drawn from the author's personal life experiences and anecdotes challenging you to once again dare. Each of us has greatness within us; reading this book

and taking the lessons to heart will help remind, teach and inspire you on how to make your life a blockbuster.

Poetry Workbook Years 7-8

What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

Blockbuster Plots Pure and Simple

"A sprightly and clear-eyed testimonial to the value of globalization" (The Wall Street Journal) as seen through six surprising everyday goods—the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the blockbuster HBO series Game of Thrones. Trade allows us to sell what we produce at home and purchase what we don't. It lowers prices and gives us greater variety and innovation. Yet understanding our place in the global trade network is rarely simple. Trade has become an easy excuse for struggling economies, a scapegoat for our failures to adapt to a changing world, and—for many Americans on both the right and the left—nothing short of a four-letter word. But as Fred P. Hochberg reminds us, trade is easier to understand than we commonly think. In *Trade Is Not a Four-Letter Word*, you'll learn how NAFTA became a populist punching bag on both sides of the aisle. You'll learn how Americans can avoid the grim specter of the \$10 banana. And you'll finally discover the truth about whether or not, as President Trump has famously tweeted, "trade wars are good and easy to win." (Spoiler alert—they aren't.) Hochberg debunks common trade myths by pulling back the curtain on six everyday products, each with a surprising story to tell: the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the smash hit HBO series Game of Thrones. Behind these six examples are stories that help explain not only how trade has shaped our lives so far but also how we can use trade to build a better future for our own families, for America, and for the world. *Trade Is Not a Four-Letter Word* is the antidote to today's acronym-laden trade jargon pitched to voters with simple promises that rarely play out so one-dimensionally. Packed with colorful examples and highly digestible explanations, *Trade Is Not a Four-Letter Word* is "an accessible, necessary book that will increase our understanding of trade and economic policies and the ways in which they impact our daily lives" (Library Journal, starred review).

The blockbuster best seller *Primal Leadership* introduced us to "resonant" leaders--individuals who manage their own and others' emotions in ways that drive success. Leaders everywhere recognized the validity of resonant leadership, but struggled with how to achieve and sustain resonance amid the relentless demands of work and life. Now, Richard Boyatzis and Annie McKee provide an indispensable guide to overcoming the vicious cycle of stress, sacrifice, and dissonance that afflicts many leaders. Drawing from extensive multidisciplinary research and real-life stories, *Resonant Leadership* offers a field-tested framework for creating the resonance that fuels great leadership. Rather than constantly sacrificing themselves to workplace demands, leaders can manage the cycle using specific techniques to combat stress, avoid burnout, and renew themselves physically, mentally, and emotionally. The book reveals that the path to resonance is through mindfulness, hope, and compassion and shows how intentionally employing these qualities creates effective and enduring leadership. Great leaders are resonant leaders. *Resonant Leadership* offers the inspiration--and tools--to spark and sustain resonance in ourselves and in those we lead.

The Magic of Thinking Big

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
