The Report: Qatar 2014

2013 saw the transition of power from the former Emir, Sheikh Hamad bin Khalifa Al Thani, to Sheikh Tamim bin Hamad Al Thani, his fourth son and second son with Sheikha Moza bint Nasser, a move unprecedented elsewhere in the Gulf but not unexpected in Qatar. With sustained, long-term economic growth, the highest per capita income in the world, a stable and well-capitalised banking sector, a sovereign wealth fund that is of true global significance and one of the largest reserves of natural gas just offshore, Qatar today has many advantages. It is clear that the country is in a strong position from which to continue its robust economic performance, and the years ahead will see a vast construction drive, in line with the principles of Qatar National Vision 2030 and catalysed by preparations for the 2022 FIFA World Cup. Oil and gas accounted for around 51.5% of Qatar's economic output in 2013, while developing downstream facilities that add value to energy by-products, for example, has helped build a portfolio of petrochemicals, chemicals and fertiliser companies and looks set to see Qatar's economic strength continue. With more than \$222bn of projects in the pipeline, the construction sector's growth has been forecast at 15% for 2014, while spending on infrastructure is set to reach \$150bn in the run-up to the 2022 FIFA World Cup. Against this backdrop, Qatar looks set to continue offering a wide variety of opportunities for foreign investors.

International Management

International Management: A Stakeholder Approach applies a practical, engaging and real time approach to the evolving topics related to International Management. In thirteen chapters, the authors discuss the complexities managers must address when making decisions in a global marketplace, including the complexity of globalization; the external global environment; ethics and social responsibility;

culture; communication; entry strategies; global strategies; management decision making; motivation; leadership and organizational change; and human resources.

Food Identity Preservation and Traceability

A Practical Roadmap to IPT Integration From baby formula and peanut butter, to E. coli-tainted peppers and salmonella-tainted pistachios, no food product or means of its production is immune to risks. And while these risks may never be fully eliminated, identity preservation and traceability (IPT) systems make it easier to determine the source and extent of contamination, thereby reducing the often deadly consequences. With a core emphasis on grain, this encyclopedic reference documents the state-of-the-science throughout the entire food chain in both domestic and international markets as it relates to food safety and economics. The book provides a cohesive introduction to IPT systems and summarizes the programs currently available, in effect developing a conceptual model of IPT at the producer level. Addresses the History, Theory, and Design Components Beginning with an informative history of IPT, the book continues with examples of IPT programs and standards of official seed organizations. It then provides a sampling of government, industry, and company approaches toward IPT systems throughout the past two decades. For ease of use as a reference, most chapters begin with a brief description of the essentials necessary to understand the chapter's contents allowing readers to jump right in, rather than having to read chapters in sequential order. Providing an in-depth understanding of the complexity of IPT systems, the rules they function under, and how they are shaped and modified, this valuable resource effectively demonstrates why IPT is a critical practice for food safety.

The Report: Qatar 2008

In the world of FinTech, scholars face an overwhelming dilemma; it is challenging to access comprehensive and up-to-date information across various regions with regards to timeliness. The transformative power of FinTech, driven by innovations such as blockchain, AI analytics, and mobile payment systems, has reshaped financial transactions, influenced economic growth, and spurred competition among traditional financial institutions. However, the lack of a comprehensive, scholarly resource hinders the ability of academics, policymakers, and industry professionals to navigate and comprehend these intricate developments. The need for a centralized repository of knowledge has become increasingly urgent, hindering the collective understanding of the complex dynamics of FinTech on a global scale. Exploring Global FinTech Advancement and Applications stands as a groundbreaking solution to the academic community's pressing need for a comprehensive understanding of this global financial landscape. Through meticulous assessments of countries across each global region, each chapter delves into market size, FinTech adoption rates, services offered, key players, investments, infrastructure, government policies, economic impacts, security concerns, academic research synthesis, and future trends. By consolidating this wealth of information, the book becomes an indispensable reference guide

for scholars, researchers, policymakers, investors, and industry professionals seeking to navigate the intricate dynamics of FinTech on a global scale.

The sudden outbreak of the COVID-19 pandemic has curbed human lifestyle by imposing restrictions on regular daily movements that had been taken for granted. Due to the pandemic, the welfare segment has received more attention, and every possible effort is being made to prioritize the services at the top. This can be made possible while using the latest tools, technologies, and resources that impact the human culture and welfare of well-being. Novel methods and devices that make the welfare services more efficient, adaptive, transparent, and cost-effective need to be explored. The Handbook of Research on Lifestyle Sustainability and Management Solutions Using AI, Big Data Analytics, and Visualization offers extensive research on lifestyle management and services that contribute towards indication, detection, conduction, protection, and technological enhancement including machine learning, deep learning, artificial intelligence, big data analytics, and visualization. It also provides mechanisms that can improve lifestyle monitoring and help in increasing the immunity of the human body. Covering topics such as big data, robot therapy, and wearable technology, it is ideal for students, researchers, technologists, IT specialists, computer engineers, systems engineers, data scientists, doctors, hospital administrators, engineers, academicians, and technology providers.

McFarlin and Sweeney provide students with an accessible, application-oriented approach to international management, focusing on key challenges including motivation, leadership, and communication across cultural boundaries. The book gives students a global perspective on the process of hiring, training, and developing employees, as well as strategic decision making in relation to foreign markets. Questions, case studies, examples of creative problem solving, and testimonials from real-world managers operating in the international arena are just a few of the tactics McFarlin and Sweeney use to help students begin to think about applied theory on a global level. All chapters have been updated with recent articles from leading business sources and academic journals, and new case studies have been incorporated.

Founded in 1975, Commercial Bank of Qatar is the second-largest conventional bank in the country. In 2021, the net profit of the bank amounted to QAR2.3 billion, up 77.1% compared to 2020. This special report includes seven exclusive interviews with representatives from the bank's key personnel, focusing on the main features, such as digitalization, that have made CBQ one of the most dynamic financial institutions in the Qatari market. Additionally, given Qatar's imminent hosting of the FIFA World Cup 2022, the words of the featured banking professionals address what Qatar's future could be like in its aftermath, which will be marked by the development of the North Field Expansion project, expected to take Qatar's LNG production capacity from 77 million tons per annum (MTPA) to 126 MTPA, as well as by the realization of Qatar National Vision 2030.

Kuwait is one of the biggest players in the global energy market, with its proven oil reserves currently the sixth largest in the world. Although revenues from hydrocarbons account for more than 60% of GDP and 95% of exports, the country's low production costs and sizeable fiscal reserves mean it is well positioned to cope with lower oil prices in the short term. This is clear from the government's ongoing commitment to delivering projects outlined in the national development strategy, Kuwait Vision 2035. In the financial services sector, Kuwait continues to perform well, as a series of regulations put in place by the Central Bank of Kuwait in recent years have served to shore up the sector's recovery from the global economic downturn.

This richly illustrated book examines the full potential of Digital Twins (DTs) as a means of creating more sustainable urban habitats. It reveals how, in this digitally-enabled age, DTs are increasingly being adopted by cities as a tool for urban governance, with the hope of increasing operational efficiencies and enhancing citizens' lives. While the study and implementation of DTs has been critically explored as virtual, dynamic 3D replicas of physical entities across different disciplines and industries, this book establishes a strategy that recognises the need for the 'software' behind virtual DT platforms to not only represent the 'hardware' of our physical cities but also to reflect the 'heartware' of socio-economic and cultural practices. Knowledge gaps and challenges in existing DTs are identified and insights into rethinking their purpose are provided to propose a new DT paradigm model for city-wide application. With multiple case studies illustrating the different concepts of DTs being applied in cities from Europe, North America, The Middle East, Asia and Oceania, the book highlights the reasons why and how DTs can play an integral role in the sustainability of our urban habitats. Beautifully designed and illustrated in full colour throughout, this book combines academic theory with practical application and will be a useful reference for professionals, students, academics and policymakers, working in the fields of smart cities, sustainable urbanism, and the digitisation, digitalisation and digital transformation of the built environment industry.

Organizations can use the valuable tool of data envelopment analysis (DEA) to make informed decisions on developing successful strategies, setting specific goals, and identifying underperforming activities to improve the output or outcome of performance measurement. The Handbook of Research on Strategic Performance Management and Measurement Using Data Envelopment Analysis highlights the advantages of using DEA as a tool to improve business performance and identify sources of inefficiency in public and private organizations. These recently developed theories and applications of DEA will be useful for policymakers, managers, and practitioners in the areas of sustainable development of our society including environment, agriculture, finance, and higher education sectors.

An increasing number of States have entered the market looking to invest resources in foreign assets. This emergence of States acting as investors, managing the wealth of a nation and competing in the marketplace with private investors, has attracted growing and wide attention. This book is the first in-depth analysis of the international tax aspects of sovereign wealth investors, and serves as a comprehensive guide to designing tax policy, from a source State perspective, toward inbound sovereign wealth investment. Drawing on a wide range of relevant sources, including international instruments, domestic tax legislation, administrative practice, (international) case law and the writings of highly qualified publicists, the author fully addresses the following aspects of the subject: – the definition, functions, legal form, governance, home State tax status, etc. of sovereign wealth investors; – tax policy considerations and objectives (i.e., neutrality, equity and international attractiveness) from a source State perspective vis-à-vis foreign sovereign wealth investors; and – the potential impact of the sovereign immunity principle, bilateral tax treaties and European (Union) law on source States' ability to achieve these tax policy objectives in relation to foreign sovereign wealth investors. The conceptual framework developed by the author will greatly assist source States in introducing new tax policy or in evaluating or reconsidering their existing tax policy vis-à-vis foreign sovereign wealth investors. In addition, practitioners, academics and (home States of) sovereign wealth investors will welcome this first authoritative analysis of an important but insufficiently understood subject in international tax.

The Business Year has charted the course of the Qatari economy for the best part of a decade, including every development since it won the right to host the 2022 FIFA World Cup. As the first Middle Eastern country to host the tournament, Qatar has focused much effort on making sure it not only puts on a good show, but that its legacy extends well into the future. It is in this atmosphere that we carried out research for this publication, The Business Year: Qatar 2022, World Cup Special Edition.

For the first time in my life, I was shot at as I approached the Beirut shore. I know now that if they wanted to kill me, they could have that night. This is just one of the many adventures the author has faced during his 44 years of living and working in the volatile Middle East. As the famous writer and lecturer, Helen Keller once wrote: "Life is a daring adventure, or it is nothing at all". In the author's own lifetime he has experienced a profuse number of adventures, and many were truly amazing life-changing episodes, in fact so many that he has decided to share them by writing his third book, The Last American in Damascus.
