Cambridge IGCSE Modern World History

By investigating the major changes in world history during the past five hundred years, Woodruff explains to what extent world forces have been responsible for shaping both the past and the present. This extraordinary book tells of the rise and fall of empires and civilizations; it recounts the growing communality and interdependence of nations; it shows how so many problems of the contemporary world are the legacy of an unprecedented era of western domination - the end of which was hastened by the two world wars. In explaining how the world has come to be what it is, the author examines the implications surrounding the end of the cold war, the unravelling of communism in Eastern Europe, and the growing challenge of the non-western world to western superiority. It is Woodruff's belief that we have reached a crucial transitional stage in world history in which the world will no longer be shaped by the single image of western modernism, but increasingly by the image of all cultures and civilizations. With the shift of geopolitical and geoeconomic power to Asia, and with the growing

world-wide influence of religious fundamentalism and revolutionary nationalism, the need for a global perspective has become acute. A Concise History of the Modern World encompasses the learning and the insights gleaned by the author from a life-time career as a world historian.

New GCSE History Complete Revision & Practice - For the Grade 9-1 Course (with Online Edition)

We live in a world that is increasingly vulnerable to climatic shocks - affecting agriculture and industry, government and international trade, not to mention human health and happiness. Serious anxieties have been aroused by respected scientists warning of dire perils that could result from upsets of the climatic regime. In this internationally acclaimed book, Emeritus Professor Hubert Lamb examines what we know about climate, how the past record of climate can be reconstructed, the causes of climatic variation, and its impact on human affairs now and in the historical and prehistoric past. This 2nd Edition includes a new preface and postscript reviewing the wealth of literature to emerge in recent years, and discusses implications for a deeper understanding of the problems of future climatic fluctuations and forecasting.

A Concise History of the Modern World

This book is a thematic history of the world from 1780, the pivotal year of the revolutionary age, to the outbreak of the First World War in 1914. It brings together historical data and arguments from different societies in order to show how interconnected the world was, even before the onset of modern globalization. "The Birth of the Modern World, 1780-1914 demonstrates how events in Asia, Africa, and South America, from the decline of the eighteenth-century Islamic empires to the anti-European Boxer rebellion of 1900 in China, had a direct impact on European and American history. Conversely, it sketches the "ripple effects" of crises such as the European revolutions and the American Civil War. The book also considers the great themes of the nineteenth-century world: the rise of the modern state, industrialization, liberalism, and the progress of world religions. Engaging and original, this book both challenges and complements the dominant regional and national approaches traditionally adopted by historians.

Climate, History and the Modern World

The Origins of the Modern World offers a refreshing alternative to Eurocentric histories by exploring the roles that Asia, Africa, and the New World played in creating the world we know today. Starting in 1400, it brings the saga of the modern world to the present, considering how and why the United States emerged as a world power in the 20th century and why Asia is experiencing resurgence now.

AQA GCSE Modern World History

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows

us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students. The Open Access version of this book has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

The Cambridge History of Warfare

Today's world textile and garment trade is valued at a staggering \$425 billion. We are told that under the pressure of increasing globalisation, it is India and China that are the new world manufacturing powerhouses. However, this is not a new phenomenon: until the industrial revolution, Asia manufactured great quantities of colourful printed cottons that were sold to places as far afield as Japan, West Africa and Europe. Cotton explores this earlier globalised economy and its transformation after 1750 as cotton led the way in the industrialisation of Europe. By the early nineteenth century, India, China and the Ottoman Empire switched from world producers to buyers of European cotton textiles, a position that they retained for over two hundred years. This is a fascinating and insightful story which ranges from Asian and European technologies and African slavery to cotton plantations in the Americas and consumer desires across the globe.

A History of the Modern World

The era from 1400 to 1800 saw intense biological, commercial, and cultural exchanges, and the creation of global connections on an unprecedented scale. Divided into two books, Volume 6 of the Cambridge World History series considers these critical transformations. The first book examines the material and political foundations of the era, including global considerations of the environment, disease, technology, and cities, along with regional studies of empires in the eastern and western hemispheres, crossroads areas such as the Indian Ocean, Central Asia, and the Caribbean, and sites of competition and conflict,

including Southeast Asia, Africa, and the Mediterranean. The second book focuses on patterns of change, examining the expansion of Christianity and Islam, migrations, warfare, and other topics on a global scale, and offering insightful detailed analyses of the Columbian exchange, slavery, silver, trade, entrepreneurs, Asian religions, legal encounters, plantation economies, early industrialism, and the writing of history.

Edexcel GCSE Modern World History Revision Guide 2nd edition

Against the Modern World is the first history of Traditionalism, an important yet surprisingly little-known twentieth-century anti-modern movement. Comprising a number of often secret but sometimes very influential religious groups in the West and in the Islamic world, it affected mainstream and radical politics in Europe and the development of the field of religious studies in the United States, touching the lives of many individuals. French writer Rene Guenon rejected modernity as a dark age and sought to reconstruct the Perennial Philosophy - the central truths behind all the major world religions. Guenon stressed the urgent need for the West's remaining spiritual and intellectual elite to find personal and collective salvation in the surviving vestiges of ancient religious traditions. A number of disenchanted intellectuals responded to his call. In Europe, America, and the Islamic world, Traditionalists founded institutes, Sufi brotherhoods, Masonic lodges, and secret societies. Some attempted unsuccessfully to guide Fascism and Nazism along Traditionalist lines; others later participated in political terror in Italy. Traditionalist ideas were the ideological cement for the alliance of anti-democratic forces in post-Soviet Russia, and in the Islamic world entered the debate about the relationship between Islam and modernity. Although its appeal in the West was ultimately limited, Traditionalism has wielded enormous influence in religious studies, through the work of such Traditionalists as Ananda Coomaraswamy, Huston Smith, Mircea Eliade, and Seyyed Hossein Nasr.

"A house of wonders itself. . . . Wonderland inspires grins and well-what-d'ya-knows" —The New York Times Book Review From the New York Times–bestselling author of *How We Got to Now* and *Extra Life*, a look at the world-changing innovations we made while keeping ourselves entertained. This lushly illustrated history of popular entertainment takes a long-zoom approach, contending that the pursuit of novelty and wonder is a powerful driver of world-shaping technological change. Steven Johnson argues that, throughout history, the cutting edge of innovation lies wherever people are working the hardest to keep themselves and others amused. Johnson's storytelling is just as delightful as the inventions he describes, full of surprising stops along the journey from simple concepts to complex modern systems. He introduces us to the colorful innovators of leisure: the explorers, proprietors, showmen, and artists who changed the trajectory of history with their luxurious wares, exotic meals, taverns, gambling tables, and magic shows. In *Wonderland*, Johnson compellingly argues that observers of technological and social trends should be looking for clues in novel amusements. You'll find the future wherever people are having the most fun.

The Cambridge World History

Cross-Cultural Encounters in Modern World History explores cultural contact as an agent of change. It takes an encounters approach to world history since 1500, rather than a political one, to reveal different perspectives and experiences as well as key patterns and transformations. It studies the spaces between cultures historically to help us transcend human differences today in a rapidly globalizing world. The text focuses on first encounters that suggest long-term developments and particularly significant encounters that have changed the direction of world history. Because of the complexities of these encounters, the author takes a user-friendly approach to keep the text accessible to students with varying backgrounds in history.

Against the Modern World

How important has the sea been in the development of human history? Very important indeed is the conclusion of this ground-breaking four volume work. The books bring together the world's leading

maritime historians, who address the question of what difference the sea has made in relation to around 250 situations ranging from the earliest times to the present. They consider, across the entire world, subjects related to human migration, trade, economic development, warfare, the building of political units including states and empires, the dissemination of ideas, culture and religion, and much more, showing how the sea was crucial to all these aspects of human development. The *Sea in History - The Early Modern World* covers the period from around the end of the fifteenth century up to the conclusion of the Napoleonic Wars in 1815. It examines the establishment and growth of 'the Atlantic World', but also considers maritime developments in the Indian Ocean, Southeast and East Asia and Africa, and highlights the continuing importance of the North Sea and the Baltic. A very wide range of maritime subjects is explored including trade, which went through a huge global expansion in this period; fishing; shipping, shipbuilding, navigation and ports; the role of the sea in the dissemination of religious ideas; the nature of life for sailors in different places and periods; and the impact of trade in particularly important commodities, including wine, slaves, sugar and tobacco. One particularly interesting chapter is on the Hanse, the important maritime commercial 'empire' based in north Germany, which extended much more widely than is often realised and whose significance and huge impact have often been overlooked. 33 of the contributions are in English; 42 are in French. CHRISTIAN BUCHET is Professor of Maritime History, Catholic University of Paris, Scientific Director of Océanides and a member of l'Académie de marine. GÉRARD LE BOUDEC is Emeritus Professor of the University of South Brittany.

This is the second, amended and enlarged edition of a familiar standard work, first published in 1958. Like its predecessor, it describes the open conflicts of the Reformation from Luther's first challenge to the uneasy peace of the 1560s. Reforming movements in all the principal countries are discussed against the background of constitutional development and the political struggles of the ruling dynasties. Europe's relations with the outside world are given due prominence. The second edition incorporates the results of some thirty years of further research and fills some of the gaps, especially in the history of central Europe, which beset the first edition. All chapters that remain from 1958 have been revised, some very substantially, while other contributions are wholly new. The only other volume of *The New Cambridge History* planned to appear in a second edition is Volume I: *The Renaissance* scheduled for 1991.

Cross-Cultural Encounters in Modern World History

This book examines the fortunes of the Weimar Republic in the year 1918-33, Hitler's rise to power, how Hitler created a Nazi dictatorship and the domestic policies of the Nazi party.

The Sea in History

This book covers the major topics of modern world history in a clear and concise style. After a general introduction, themes are developed in more detail, with headings, key words, and phrases underlined. With its easy to follow cross-referencing and helpful problem-solving approach, this text is the ideal introduction to higher level study of modern world history.

Atlas of Modern World History

With the end of the Second World War, a new world was born. The peace agreements that brought the conflict to an end implemented decisions that not only shaped the second half of the twentieth century, but continue to affect our world today and impact on its future. In 1946 the Cold War began, the state of Israel was conceived, the independence of India was all but confirmed and Chinese Communists gained a decisive upper hand in their fight for power. It was a pivotal year in modern history in which countries were reborn and created, national and ideological boundaries were redrawn and people across the globe began to rebuild their lives. In this remarkable history, the foreign correspondent and historian Victor Sebestyen draws on contemporary documents from around the world - including Stalin's personal notes from the Potsdam peace conference - to examine what lay behind the political decision-making. Sebestyen uses a vast array of archival material and personal testimonies to explore how the lives of generations of people across continents were shaped by the events of 1946. Taking

readers from Berlin to London, from Paris to Moscow, from Washington to Jerusalem and from Delhi to Shanghai, this is a vivid and wide-ranging account of both powerbrokers and ordinary men and women from an acclaimed author.

The New Cambridge Modern History: Volume 2, The Reformation, 1520-1559

A History of the Modern World: An Outline is an introductory text that provides a well-rounded historical account of the processes of the modern world, ranging from the French Revolution and Napoleon to the Cold War. The work assesses major moments and transitions in European and world history such as the Enlightenment, the Industrial Revolution, the American Civil War, and the World Wars of the twentieth century. One of the primary objectives of this book is to understand how revolutions, wars, dictatorships and empires have led to long-term experiments with nationalism, democracy, liberalism, human rights, socialism, sustainable development, and global peace. This book will be of use to school and university students, competitive examinees, and general readers who require a clear and concise delineation of modern world history.

Germany, 1918-1939

A bestselling historian shows how the British Empire created the modern world, in a book lauded as "a rattling good tale" (Wall Street Journal) and "popular history at its best" (Washington Post) The British Empire was the largest in all history: the nearest thing to global domination ever achieved. The world we know today is in large measure the product of Britain's Age of Empire. The global spread of capitalism, telecommunications, the English language, and institutions of representative government -- all these can be traced back to the extraordinary expansion of Britain's economy, population and culture from the seventeenth century until the mid-twentieth. On a vast and vividly colored canvas, Empire shows how the British Empire acted as midwife to modernity. Displaying the originality and rigor that have made Niall Ferguson one of the world's foremost historians, Empire is a dazzling tour de force -- a remarkable reappraisal of the prizes and pitfalls of global empire.

Mastering Modern World History, 4th Ed.

A History of the Modern World is a careful, well-written narrative of major events from the late Middle Ages to the political and religious conflicts at the beginning of the twenty-first century. It offers a wide-ranging survey that helps readers understand both the complexities of great events (e.g., the French Revolution, the First World War, or the collapse of great imperial systems) and the importance of historical analysis. It also provides a careful summary of the modern political changes that have affected the social and cultural development of all modern cultures. Throughout the book's lifetime, A History of the Modern World has been hailed as an elegantly written historical narrative, filled with analysis and balanced historical insights as well as its traditional attention to the processes of historical change, conflict, and political transformations. The tenth edition has been updated to include the clear maps, the survey of global economic connections, the chronologies, the illustrations, and the up-to-date bibliographies that today's students need and expect.

1946: The Making of the Modern World

NEW YORK TIMES BESTSELLER • The startling true history of how one extraordinary man from a remote corner of the world created an empire that led the world into the modern age—by the author featured in *Echoes of the Empire: Beyond Genghis Khan*. The Mongol army led by Genghis Khan subjugated more lands and people in twenty-five years than the Romans did in four hundred. In nearly every country the Mongols conquered, they brought an unprecedented rise in cultural communication, expanded trade, and a blossoming of civilization. Vastly more progressive than his European or Asian counterparts, Genghis Khan abolished torture, granted universal religious freedom, and smashed feudal systems of aristocratic privilege. From the story of his rise through the tribal culture to the explosion of civilization that the Mongol Empire unleashed, this brilliant work of revisionist history is nothing less than the epic story of how the modern world was made.

The Take a Stand! World History Teacher's Edition has the entire student book, answers to all research questions, teaching tips, writing lessons designed for the teacher to teach Take a Stand! writing, and grading rubric for student work. The Take a Stand! series teaches students how to be historians. They learn not what to think or memorize, but how to analyze the events of the past. This unique approach makes the student an active participation in the analysis of the past. This is the best of critical thinking, Socratic discussion, and analytical writing in history. The Take a Stand! series is not a set of textbooks, but rather thinking, reading, speaking, and writing guides. Take a Stand! shows the student how to be a historian. You will need to use history texts and documents to complete the Take a Stand! method.
