## Treasure Baskets and Heuristic Play

Heuristic Play is a tightly described, but freely accessed activity, using a specific range of 'found' or everyday objects, and, in its pure sense, is only really applicable to a specific age range (from 12 months to about two and a half). However, there is now plenty of evidence that heuristic play has continuing value for children throughout the Foundation Stage and well into the primary years. Collections of objects, carefully selected and offered in both adult-led and child-initiated sessions, indoors and outside, can build on the experience of treasure baskets In this informative and helpful book you will find further information on the process of using both treasure baskets and heuristic play with babies and young children. You will also find chapters which explore the benefits of heuristic play with objects for children throughout the early years from six months to seven years. Of course, the materials, the provision and the adult role will develop and change as children mature, so this book also gives guidance on how heuristic play itself should change to meet the needs of children at different stages of development.

## Developing Play for the Under 3s

We currently live in a two dimensional world of tapping and sliding fingers on screens, but babies and young children need to touch, taste, smell, shake and bang three dimensional objects in order to develop thinking and learning skills. The Treasure Basket and Heuristic play approach is all about offering natural and household objects to babies and young children to play with. This simple approach promotes extraordinary capacities of concentration, intellectual curiosity and manipulative mastery. Full of resource ideas and activities, this book offers accessible explanations of how the under 3's think and learn, step by step guidance for setting up play sessions and descriptions of the best materials to

offer. Featuring original interviews between the author and Elinor Goldschmied, who was the pioneer of the Treasure Basket and Heuristic Play, this third edition of Developing Play for the Under 3s has been thoroughly updated to include: A new chapter with case studies to show how Heuristic Play can be offered to the 2-4 year olds. A new chapter exploring the myths and misunderstandings of this approach. Links to the Forest School movement. Research evidence supported by case studies. The characteristics of effective learning and how the Treasure Basket and Heuristic Play promote these. Information about the Froebel Archive project, bringing the story of Elinor Goldschmied's work alive through film. Based on a wealth of research into how babies learn and the principles of learning, together with the author's own personal experience of working with the under 3s, this book will be indispensable for anyone involved in the care and development of children in this age group.

## Heuristic Play

How to encourage investigative, discovery play with babies and children aged 0-5. Heuristic Play is a form of exploratory, investigative play that builds a whole range of skills for all children from birth to five. This guide looks at four age groups from birth to five and provides practical activities for setting up heuristic play sessions. Each session comes with expert advice on: - How to set up the session for each age group - The level of adult involvement - How to plan for these activities within the EYFS - How heuristic play relates to schemas of behaviour This easy to read and practical guide is the only one of its kind and an absolute essential for anyone working in the early years.

## Treasure Baskets And Beyond: Realizing The Potential Of Sensory-Rich Play

"This accomplished book represents an impressive and important extension of previous writing in the field and is sure to expand practitioners' understanding of the fascinating medium that is the treasure basket." Janet Moyles, Professor Emeritus, Anglia Ruskin University, UK Watching a child play with a Treasure Basket can give a powerful insight into the wonder of children's minds; their developmental levels, interests, likes and dislikes; repeated patterns of behaviour; and even glimpses of a child's personality. This book draws extensively upon observations of children's play as well as contemporary and original research in neuroscience and sensory play, to offer fresh insights into the use and benefits of Treasure Baskets and sensory-rich play. The book demonstrates how babies through to primary school children, including those with special educational needs, can derive rich and meaningful hands-on learning from sensory-rich objects and the wider application of sensory play. Key features of the book: Discovering how sensory play presents opportunities for problem solving and meaning making as well as developing creativity and imagination Understanding the benefits and potential of sensory-rich play and its powerful effect upon brain development and memory Learning about the role of the adult in supporting and maximising sensory-rich play Gaining insights from a range of case studies and activities If you have already witnessed deeply absorbing Treasure Basket play in action and marvelled at children's fascination and focus, then this book helps explain something of the 'behind the scenes' processes in action. For those who have not yet encountered this deceptively complex play, this book whets the appetite, giving a taste of what Treasure Baskets and sensory-rich play have to offer. This timely and empowering book is written for practitioners and students working with babies through to primary-aged children.

## Treasure Basket Explorations

For the littlest learners, everything is an activity--feeling a rock, trying to lick a bubble, smelling a flower, or poking sand. In Treasure-Basket Explorations: Heuristic Learning for Infants and Toddlers, teachers and caregivers of infants and toddlers will learn how these simple explorations support cognitive and vocabulary development. Grounded in the theory of early education pioneer Elinor Goldschmied, the book explains heuristic learning--discovery by trial and error--and how to encourage this type of learning to boost development.Teachers will learn how to set up treasure baskets that encourage heuristic play: containers filled with easy-to-find items that support explorations in emergent language, math, and science skills. Encourage children to discover the sounds that a metal cup makes when banged on the floor. Invite them to feel the velvety texture of soft fabric or the bumpiness of a loofah sponge. Let them explore what a wooden ring and a cotton handkerchief can do together.Through his explorations, the child is answering some fundamental questions: What is this and what can I do with it? Later, he will add to his knowledge: What else can this do and what can this become? This is cognitive development in action!

## Planning in the Moment with Young Children

Young children live in the here and now. If adults are to make a real difference to their learning they need to seize the moments when children first show curiosity, and support their next steps immediately. This book embraces the concept of planning "in the moment" and emphasises the critical role of the adult in promoting child-led learning, giving early years practitioners the confidence and insight to work and plan in the moment, and enabling the children in their care to live, learn, play and develop in the here and now. Planning in the Moment with Young Children maintains a strong link to practice, providing numerous examples of how practitioners can integrate spontaneous planning and rich adult–child interactions into their everyday practice and early years curricula. From timetabling to setting clear rules, creating enabling environments, keeping records and making use of a variety of materials, the book demonstrates the multitude of ways in which practitioners can encourage child autonomy and respond to the unique needs of each child. Examples from practice are rooted in theory, fully contextualised, and exemplified by original documentation sourced from the author's own experiences and from a wide variety of settings. Key features include: over 180 full colour photographs to illustrate practice; photocopiable pages including planning sheets, documentation and activity sheets; advice on working with parents, individual children and groups; tailored guidance on working with children at different stages of development from birth to age 6 years; relevance to a range of settings, including childminders, pre-schools, nurseries and schools. When children are allowed to select where, with what, and how to play, they are truly invested in their play, they become deeply involved and make dramatic progress. This book is an outstanding testament to a responsive and child-led way of working in early years environments. Practitioners will be guided, inspired and supported to work spontaneously and reactively – planning as they go and celebrating the results!

## Sensory Play

Sensory Play draws upon current research findings and observations to present an informative and practical guide to maximising children's sensory play opportunities. This guide enables practitioners to understand the values and benefits of sensory play, incorporating case studies and current research findings to make practical links to the EYFS. Sensory play is set within a wider context, highlighting links to child development theories. This title explains how sensory play can be a valuable tool in delivering curriculum outcomes in a wide variety of settings.

## Working with Babies and Children

'This book should be required reading for all those with responsibility for children under the age of three and is the ideal guide for students on training courses...or for those pursuing continuing professional development - Early Years Educator 'All the material presented is accessible and clear...it is an invaluable source of information for further research....It comes highly recommended' - Early Years Update 'From the very first page, Cathy Nutbrown and Jools Page lay down the twin cornerstones of this fabulous book, the sheer brilliance of babies' minds and the daunting challenges facing those who work with them professionally....This is a principled book, underpinned by a commitment to advocacy

and respect for under threes. Yet it is practical too, rich in case vignettes and linked reflections. I hope it will come to be regarded as required reading by those with responsibility for children under three' - Peter Elfer, Senior Lecturer in Early Childhood Studies, Roehampton University This book is an essential companion for all who work with children under three. It makes current research accessible, and provides practical support material for curriculum, learning, teaching, planning and assessment. The authors focus on work in settings of all kinds to promote best practice and offer a high quality experience for the age range. Key features of the book are: - a theoretical foundation relevant to different social contexts - an accessible summary of research into learning and development - a review of current policies on provision - a discussion of international approaches to support learning and development - case studies and practice-based examples of approaches to developing effective and appropriate provision in group settings and home care. This book is for students on initial training courses including foundation degrees, NVQ, early childhood studies degrees and those seeking Early Years Professional Status. It is also for practitioners whether in initial training, BA and MA degrees or in continuing professional development.

## Bringing the Froebel Approach to your Early Years Practice

Have you ever wondered about the origins of the kindergarten and the influence of Froebel on early years practice? What did Froebel mean by a garden for children? Why did he believe that play is central in young children's learning? Bringing the Froebel Approach to your Early Years Practice looks at the founder of the kindergarten and his profound influence on provision and practice for young children today. The Froebelian approach is not a method but includes distinctive principles which shape and guide practice. This new edition has been fully updated in line with the revised EYFS and includes: extra material on using the approach with children of different ages and the role of the adult a discussion of key Froebelian principles such as play, imagination, creativity, learning through self-activity and making connections an examination of block play and how this can be developed in contemporary settings Froebel's ideas on nature and outdoor play and why these are fundamental to young children's learning how Froebel used movement, song, rhythm and rhyme to provide key learning experiences With examples of innovative practice and ideas for reflection, this convenient guide will help practitioners and students fully understand what the Froebel approach can offer their setting and children.

## Little Book of Treasure Baskets

A wealth of practical and inspiring ideas for setting up themed treasure baskets for preschool children at all stages of development.

## The Montessori Method

The Montessori Method is an all-encompassing introduction to Dr. Montessori's popular alternative approach to educating and nurturing children as they develop, written by the Italian physician. The Montessori teaching method focuses on a child's natural abilities and interests, and encourages hands-on learning. Removing the formality of traditional elements of education, such as examinations, Dr. Montessori's approach to teaching gives children the opportunity to learn from their mistakes and develop at their own pace. First published in 1912 and featuring original illustrations, this introduction to the method is clear and simple, making it an ideal read for teachers and parents alike. This volume features the following chapters: - How the Lesson Should be Given - Exercises of Practical Life - Nature in Education - Education of the Senses - Intellectual Education - Method for the Teaching of Reading and Writing - Teaching of Numeration: Introduction to Arithmetic

## Key Concepts in Early Childhood Education and Care

This new edition of Cathy Nutbrown2s much loved book explains the key ideas and issues in Early Childhood clearly and concisely, keeping students up-to-date with the latest developments in the field. There are brand new entries on: - Attachment - Babies2 learning and development - Children2s Centres - Citizenship - Digital Technologies - Early Years Foundation Stage - Early Years Professional Status - Neuroscience - Sexualities The rest of the book has also been thoroughly updated and revised, and includes coverage of heuristic play, Early Literacy Development and Parental Involvement. The book offers starting points which provide a clear focus, further reading and discussion of research on thirty-five key topics. It is a must for students following courses in early childhood education and care. Professor Cathy Nutbrown directs and teaches on Masters and Doctoral programmes in Early Childhood Education at the University of Sheffield.

## People Under Three

Services for young children have gone through a period of rapid transformation in recent years, which have been paralleled by great advances in our knowledge of early child development. However, care and education in the first three years of life continues to be a neglected area. Thoroughly updated to take account of key policy and practice changes in childcare provision, this landmark text translates child development theory and research into everyday practice. All the practical ideas in the book have been developed and tested in nurseries, family and children's centres and include the importance of providing opportunities for adventurous and exploratory play for babies and toddlers, understanding and responding to children's emotional needs and offering personalized and sensitive care. The book also explores different ways of working with parents and the role of early years settings and practitioners in helping to keep children safe. It includes chapters on: Childcare policy and services Planning spaces for living, learning and playing Babies in day care Heuristic play with objects Mealtimes Learning out of doors Leading and managing a childcare centre Involving and working with parents Safeguarding children People Under Three is an established practical text for all those training to work with young children or managing day care facilities. Focusing on the care and learning of very young children, it is designed specifically for those who look after them day by day, as well as being a useful resource for social work students and policy makers.

## Key Persons in the Early Years

Key Persons in the Early Years aims to explain what a Key Person is, the theory behind the approach and the practicalities of implementation. Practical in its approach and containing case studies as examples of reflective practice, this second edition details the role of the Key Person across all ages in the early years. This new edition has been fully updated in line with the EYFS and features a new chapter on the Key Person approach with 3-5 year olds. The book offers guidance on: making the Key Person approach work in your setting with realistic strategies; the benefits of this approach for children's well being, for their learning and to ensure equal chances for all children; potential challenges and problems and how to overcome them drawing on accounts from practitioners of their journey in implementing this approach. This book will be an essential text for practitioners and students who wish to fully understand the Key Person role and how it can benefit children, parents and their setting.

## Celebrating Children's Learning

In response to growing pressure on early years practitioners to adopt a 'tick-box' approach to recording children's progress, Celebrating Children's Learning sets out a bold, alternative vision for assessment in the early years. Drawing upon an inspiring collaboration between London nursery schools, this book explores and reconsiders the purpose of observation in early years settings. Contributors provide a range of examples to guide early years practitioners as they develop their own methods of observation. Play, social interaction, and cooperation with parents are shown to be valuable opportunities for keen observation. Chapters discuss: - moving beyond data-focussed assesment - Characteristics of Effective Learning - ensuring inclusive assessment - collaborating with parents from diverse backgrounds - outdoor learning – a Forest School approach. Inspiring and empowering, Celebrating Children's Learning is essential reading for teachers, practitioners, and students involved in early education.

## Sensory Play

An ideal introduction to the pioneers of educational theory for anyone studying childcare, child development or education – whether at further or higher education level. The first edition of this book has been a best-seller for almost a decade, identified as one of the top ten books for students of child development or early childhood care and education. In this new edition, there is an increased emphasis on both what practice based on particular theories of learning looks like and on criticisms of each theory. A glossary is included in sections highlighting words and concepts particular to the theorist in question. Full-colour photographs are used to illustrate some aspects of each theory or approach. How Children Learn looks at a wide range of theorists and practitioners who have influenced current understandings of how children learn and what this means for work with young children. The book summarises the findings and ideas of famous giants such as Montessori and Piaget as well as the more recent ideas of writers and thinkers such as Howard Gardner and Margaret Donaldson. It begins by looking at the work and life of Comenius who is widely described as the father of modern education and looks at the theory behind different approaches to early childhood care and education such as Steiner Waldorf education, HighScope and Te Whariki. You will find this book invaluable in giving you a clearer picture of how ideas about children's learning have developed over the past four centuries.

## How Children Learn (New Edition)

Why is it that, when children play, some behave like butterflies, flitting around among the flowers of the activities on offer, landing for a moment before moving on to the next attractive flower (activity) while others behave with the single minded concentration of bees? As children grow and learn, they acquire skills through play and practical activities. This recently acquired learning is tenuous and is secured through practice, repeating the skills in different contexts, with different people. Only then will learning be 'hard wired' for life. It is now evident that where children are able to select resources, play companions and activities for themselves, they can practise emerging skills and concepts by selecting the resources they need and using them in ways which are unique to them. This book, written by a group of experts in early years practice, explores the place and purpose of child-intitiated learning in high quality early years practice. Child-initiated learning is a key feature of the Early Years Foundation Stage.

## Supporting Child-initiated Learning

Historical changes in play are taking place in childhood all over the world, with the digitalisation of children's lives. Researchers are worried about the disappearance of advanced forms of play and the prioritization of time spent with loving adults, supporting play with babies and toddlers. At the same time,

our understanding about the crucial importance of individual development is becoming clearer. The Routledge International Handbook of Early Childhood Play explores these issues and more. It proposes the importance of adult participation in play, as adult guidance brings the possibility of moral, cultural and symbolic elements to children's play, and enhances the educational opportunities in adult-child joint play. The book also examines the aesthetic dimension of play and its role in the development of imagination and creativity. With contributors from many parts of the world, this unique handbook brings together the latest research and highlights practice which focuses on play. This is an essential and engaging read for all students, academics, teachers and practitioners with an interest in play.

## The Routledge International Handbook of Early Childhood Play

Play takes up much of the time budget of young children, and many animals, but its importance in development remains contested. This comprehensive collection brings together multidisciplinary and developmental perspectives on the forms and functions of play in animals, children in different societies, and through the lifespan. The Cambridge Handbook of Play covers the evolution of play in animals, especially mammals; the development of play from infancy through childhood and into adulthood; historical and anthropological perspectives on play; theories and methodologies; the role of play in children's learning; play in special groups such as children with impairments, or suffering political violence; and the practical applications of playwork and play therapy. Written by an international team of scholars from diverse disciplines such as psychology, education, neuroscience, sociology, evolutionary biology and anthropology, this essential reference presents the current state of the field in play research.

## The Cambridge Handbook of Play

The Practical Guidance in the Early Years Foundation Stage series will assist practitioners in the smooth and successful implementation of the Early Years Foundation Stage. Each book gives clear and detailed explanations of each aspect of Learning and Development and encourages readers to consider each area within its broadest context to expand and develop their own knowledge and good practice. Practical ideas and activities for all age groups are offered along with a wealth of expertise of how elements from the practice guidance can be implemented within all early years settings. The books include suggestions for the innovative use of everyday ressources, popular books and stories. This book offers an in-depth understanding of children's thinking skills from a psychological perspective. The book introduces the Learning Tools model, a vital cognitive tool used by children to learn and solve problems, and gives practical ideas on how practitioners can use everyday materials to promote problem solving and early numeracy skills through play. Readers are encouraged to reflect on their own practice and understanding to help them provide learning opportunities to meet the unique needs of all children in their setting.

## Problem Solving, Reasoning and Numeracy in the Early Years Foundation Stage

Use loose parts to spark children's creativity and innovation Loose parts are natural or synthetic found, bought, or upcycled materials that children can move, manipulate, control, and change within their play. Alluring and captivating, they capture children's curiosity, give free reign to their imagination, and motivate learning. The hundreds of inspiring photographs showcase an array of loose parts in real early childhood settings. And the overviews of concepts children can learn when using loose parts provide the foundation for incorporating loose parts into your teaching to enhance play and empower children. The possibilities are truly endless.

## The Story of the Kindness Elves

There are so many ways practitioners can get children ready for writing and Alistair explores these in this step by step practical guide. Starting with the theory this book takes practitioners through the developmental stages, looks at gender differences in mark making and then provides some innovative ideas for intervention such as Dough Gym and writing like a Jedi! Alistair is convinced that once practitioners understand the developmental stages of becoming a mark maker (from palm gripping to shoulder pivot) and are given the tried and tested activities to use, they will see a significant difference in progress.

## Loose Parts 2

British Froebelian Women from the Mid-Nineteenth to the Twenty-First Century presents a series of critical case studies of individual women who worked and advocated for the cause of Froebelian and progressive pedagogy in Britain from the mid-nineteenth century until the present day. The book presents a compelling picture of how women have contributed in powerful ways to educational life and child-centred practices. The book examines the beliefs and values of its subjects, offering crucial insights into how these women forged their professional identities and practice as new thinking about education and childhood emerged, and considers the differing forms of inspiration they drew from their connections with the Froebelian community. This book will be of great interest for postgraduate students and academics in the fields of Women's Studies, History of Education, Early Childhood Education and Early Childhood Studies.

## Nurse Executive Review and Resource Manual, 3rd Edition

Nursing professional development specialists (NPDSs) and unit-based educators are integral to the development and performance of healthcare professionals in a variety of clinical settings and special- ties. Yet, in today's healthcare workplace, delivering effective education can be challenging. Nursing Professional Development for Clinical Educators examines the ever-changing scope and standards of NPDS practice and the healthcare trends that influence the NPDS role. The book provides essential guidance in understanding the roles and responsibilities of nursing staff development, orienting nursing staff to the clinical unit, developing educational programs, and helping staff develop as professionals. This volume updates and revises the author's previous work, Unit-Based Staff Development for Clinical Nurses, first published in 2004. The new update looks at healthcare trends and changes in nursing professional development, examines the roles and responsibilities of the nursing professional development specialist, and details how best to prepare for the role. The book also features an extended orientation chapter, which explores competency, residency programs, and dedicated education units.

As the world faces many serious challenges informed, courageous and mindful leadership is needed for a better future. The Tourism Education Futures Initiative (TEFI) is the collective effort of a group of innovative, thoughtful and committed scholars and industry leaders seeking to provide vision, knowledge, and a framework for tourism education programs that promote global citizenship and optimism for a better world. This book consolidates some of TEFI's work as it seeks to be the leading, forward-looking network that inspires, informs and supports tourism educators and students to passionately and courageously transform the world for the better. It makes the case for why change is needed, and how tourism educators can respond to that change with strategies and values-based tools. The book contains papers published in special TEFI issues of the Journal of Teaching in Travel & Tourism (JTTT), which question and explore some of the most important theoretical, conceptual and practical issues facing tourism education now and into the future. The book concludes by integrating the special issues' key contributions with a brief conceptualisation of education futures before it outlines TEFI's framework for action over the coming years. Tourism educators worldwide will find that this volume serves two important purposes. On the one hand, it challenges educators to think both critically and proactively about tourism education, while on the other sharing examples of teaching and learning tools that seek to prepare our students for the future and to be global citizens that live lives of consequence. This book is a collection of articles from the Journal of Teaching in Travel and Tourism.
