

Musculoskeletal Exam Documentation

[#musculoskeletal exam documentation](#) [#orthopedic exam notes](#) [#physical assessment charting](#) [#MSK documentation best practices](#) [#clinical musculoskeletal assessment](#)

Effective musculoskeletal exam documentation is crucial for accurate patient care, legal compliance, and continuity. This involves meticulously recording findings from orthopedic exam notes and physical assessment charting, ensuring all aspects of the clinical musculoskeletal assessment are captured. Following MSK documentation best practices leads to comprehensive records that support diagnosis, treatment planning, and inter-professional communication.

Our platform ensures every textbook is original, verified, and aligned with academic standards.

Thank you for accessing our website.

We have prepared the document Orthopedic Exam Charting just for you.

You are welcome to download it for free anytime.

looking at the skin through each body system

start by looking at the hair i'm looking at the texture

start with cranial nerve

check peripheral vision for optic nerve

bring your hands in three times per side at the top

check her extra ocular movements

moving on to cranial nerves five and seven

put my hands on the side of her face

whisper a number in your right ear

move to cranial nerves nine and twelve

move to cranial nerve 10

checking the thyroid gland

put them on the thyroid gland

move to the neck

check the other carotid artery

lay back at a 45 degree angle

looking for any jugular venous distension

start with the upper extremities

check the radial pulses

checking range of motion

check her pulses in her lower extremities
check her capillary refill
check the plantar flexion and the dorsiflexion
check your spine
checking the levelness of the scapula
looking for the work of breathing
listening for bronchoviscular
move to the posterior thorax
start above the scapula
coming in between the scapula
auscultate the heart
find the first intercostal space
auscultate for an apical heart rate for one full minute
assess the abdomen with the client laying flat
inspect for the contour
flip the head of my stethoscope away from the diaphragm
assess for the renal arteries
capture at least some vowel sounds
palpate the abdomen
move to the urinary system
