Roland Fantom X Video Owner's Manual - Roland Fantom X Video Owner's Manual by Iain Bryden 46,706 views 4 years ago 2 hours, 9 minutes - Contents: 0:00:41 - INTRODUCTION ===== 0:02:06 - Front Panel 0:03:33 - Skip Back Sampling 0:04:45 - Rear Panel 0:05:50 ...

So Let's Get Started by Looking over the Front Panel Central of the Front Panel Is a Huge Color Lcd Screen Which Can Be Navigated Around by Using the 8f Keys Directly below the Screen We Have a Number of Dedicated Buttons Up Here for Selecting Patches the Mixer Mode and So On with the Ability To Cruise around any Given Screen like the Sky Here We Can Cruise around Using the Cursor Buttons to the Left and the Right and Now Whatever Is Selected You Can Then Turn the Value Dial or Use the Increment Decrement Keys To Change Whatever Is Highlighted on the Screen Now if You Ever Lost some Place down the Menu

And You'll Come to this Screen this Shows What Patch Is Selected Up Here on the Keyboard You Can Use the Cursor Buttons To Select Which Bank You Want To Use We Have the User Bank if You Don't Make any Changes You Wish Eight Preset Banks a through Ha Gm or General Midi Bank for Compatibility with Other Senses if You're Ever Gonna Be Say Exchanging Standard Midi Files and Finally a Pc Card Bank Here and once You've Selected the Bank Let's Go Back to User Here You Can Cursor Over and Select any Patch

Now We Have a Listing of all of the Patches all Categorized for You if You Say if You Wanted To Go Ahead and Find a Bell Sound We Can Use F2 F1 and F2 Will Move Up and Down through the Banks so for Example We're Here Just Looking through All the Bell Sounds Now Only the Bell Patches Will Be Less on the Right Hand Side the Same Thing We'd Say Organs Harmonic Acoustic Guitar and So on You Can Scroll through Banks if You Like underneath F5 Now these Are Banks or Categories under F4 You Can Even Use F7 Here Preview To Have Your Phantom Ex Play a Built-In Riff To Help Aid You in Your Selection

It's Very Natural for Us To Go Back to Our Personal Favourites I Used To Keep Track of All these by Sticking Labels on the Front or on Pieces of Paper There or Listing Out All My Favorites We Have a Much Slicker Solution and It's Called Favorites if You Press F2 You'll Come to the Favorite Patch Pop-Up Window Here We Have Eight Banks of Eight Patches Which We Can Scroll through Using the Value Dial and Then We Can Use the F Keys along the Bottom like the Screen Says I Can Press the Exit Button To Close this Window That Takes Care of Recalling

Others I Can Make Simultaneous Changes to More than One Tone at the Same Time Let's Make this Small Clue with an Example We'll Use this Patch and with All these Tones Selected I'll Press Exit Now any Changes I Make Will Affect all Four of these Tones at the Same Time Let's Go Ahead and Tab Down To Pitch Here and We'll Go to the Course Tuning Here Now if I Make the Changes You Can See It Changes all Them Let's Imagine I Only Wanted To Make the Change Maybe Just the Last Tone Here Go Ahead and Press F8 and I'll Just Select the Last Tone You Can See

So that's an Overview of How You Edit a Patch First You Select the Patch Decide Which Tones underneath F8 Here You Want Active and Which Ones You Want To Edit Here Then Just Go through the Tabs Here Just in the Parameters as You Go Now My Advice for Editing Would Be to First Start from a Patch That's Pretty Close to What You Want and Then Just Go On from There

You Can Have Tone Stacked Up on Top of each Other You Can Have Them Interact with each Other in a Form of Additive Synthesis or You Could Split Them across the Keys That each Tone Can Have Its Own Filter Envelopes and Lfo S and the Key to Programming Is To Remember Which Tone You Are Messing with Take this Initialize Patch for Example We Can See underneath the Information That's on the Top of Pretty Much every Screen underneath Patch Edit That We Have Only One of the Four Available Tones Switched On Right Now and We Have that First Tone Selected for Editing and by the Way You Can Go Ahead and Hold Jump Down and You Can Use the Eight F Keys Down Here To Activate or Select Tones for Editing

You Are Messing with Take this Initialize Patch for Example We Can See underneath the Information That's on the Top of Pretty Much every Screen underneath Patch Edit That We Have Only One of the Four Available Tones Switched On Right Now and We Have that First Tone Selected for Editing and by the Way You Can Go Ahead and Hold Jump Down and You Can Use the Eight F Keys Down Here To Activate or Select Tones for Editing It's like a Momentary Switch Instead of Doing It underneath the F8 Key Now To Give You an Idea of How To Edit Let's Go Ahead and Replace this First Piano Tone with Something Else We'll Tap Down to Wave and with this Field Selected Here We Can Go Ahead and Turn the Value Dial or if You Press Enter It'll Drop You Down into the Wave List Here and There's a Fact this I Think over 1200 Waves in a Stock Phantom X

And with this Field Selected Here We Can Go Ahead and Turn the Value Dial or if You Press Enter It'll Drop You Down into the Wave List Here and There's a Fact this I Think over 1200 Waves in a Stock Phantom X Now You Can Scroll through Them One at a Time Using the Value Dial or Hold Down Shift and You'll Scroll through Ten at a Time and in Fact You Can Even Use the Dynamic Pads as Numeric Keypad That Is a Lot of Waves and of Course You Can Stack Ways if You Like Let Me Just Select this Guy Here by Activating another Time I'll Hold Down Jump

And Then Go Ahead and Store It in any of the 256 User Locations and as You Scroll Down through the Patch Locations That You Want To Write to You Can Audition the Patch That You're About To Write Over by Pressing Compare So once You're Happy with What You're About To Write over You Can Just Go Ahead and Press F8 To Write Now that You've Seen How You Can Edit Patches It's a Breeze To Understand How You Can Edit Rhythm Kits Let's Go Ahead and Select the Pad Part Here and We'll Move Over and Select the First Preset Which Is Standard Kit Press Patch Edit Now each Rhythm Set Has 16 Pads Assigned to It and each Pad Has up to 4 Drum Sounds a Sign Using the Same Buttons Down Here if We Go Ahead and Press F8 Here You Can See like the Kick Drum Here Has Tones 1 3 & 4 Aside to It the Side Stick Has 2 There in Fact if I Was To Turn these Off I'd Get Nothing Turn Them On and You Start Building Up that

That's a Side Stick with a Hi-Hat Stacked on Top of each Other So Editing a Rhythm Set Is Comprised of Selecting a Pad Then Selecting a Tone or Tones That Are Active and in Making those Adjustments on the Screen some Settings To Be Aware of Are Set the Pan Settings on the Tva or that Amp Page You Can Go Ahead and Set Your Pan There for each Tone and Also the Effects Sends on the Output Page You Can Even Send each Rhythm Key Out to the Direct Outs if You Want To Get Your Hands on Further

You Can Press Enter There Give It a New Name and Then Just like We Said before You Can Save that to any of the 32 User Locations once You've Decided on a Particular Place To Store It To Press F8 + F8 Again and that'll Be Stored There's Actually another Element of Your Fan x that Really Defines a Patch or a Rhythm Kit and that's the Powerful Effect Processes within the Unit You Could Imagine that this Is What They Might Look like I inside We Have Three Count on Three Multi Effect Processes They Can Do Anything from Echo to Flashing to Distortion of Speaker Modeling Just a Ton of Effects And this Allows You To Make Settings Down at the Tone Level Then You Can Make those Different Settings Just by Turning the the Value Dial Up Here and Make Different Settings for each of these Tones Let's Go Ahead and Just Select the Entire Patch To Go through Multi Effects One Processor and You Can See that this Whole Screen Gives You Kind Of Control over Where the Signal Goes On from There so It's Going into the Multi Effects and Then That Can Go to either the Outputs if You Like or Then You Can Go Ahead and Send the Output of that Guy Down into the Chorus and Reverb

There's a Really Cool Graphic Here As Well to Kind Of Give You an Idea of What Is Changing as You Go Along Now What's Up with these Little Numbers Down Here One through Four Well these Relate to the Front Panel Controllers Here and in Fact if I Turn this Guy Here It Will Make those Changes on the Screen Just like I Was Grabbing that and Turning that Value Down Here Same Thing with Chorus

by Pres Chorus Here Choose a Chorus Type and Make Your Adjustments Here with the Knobs on the Front Panel the Next Choice or Is It Yep Here We Are in Delay Here Even Allows You To Sync Your Delays in Musical Terms so that Echoes Can Fall Right on the Beat You Might Wonder Why Delay Is Lumped Together with Course with the Course Settings Well the Thing Is Chorus Is Actually a Delay Based Effect

If You Want To Make any Other Changes Then Just Go Ahead and Move Down into that Field and Use the Value Dial Here if You Want To Control the Effects Even Further in Real Time Go Ahead and Press F4 Which Is Multi Effects Control Here Here You Can Set Up to Four Settings so You Could Route any of these Continuous Controllers to any of these Effect Controls this Is Great for You Guys Who Use the Phantom X with Computer Based Sequences Using Midi Controllers Here You Can Totally Automate Your Effects Now Apart from the Multi Effect Processor and the Chorus in the Reverb There's Actually One More Effect That Is Common to Your Entire Phantom X and that Is the Mastering Effect Press F7

This Is Great for You Guys Who Use the Phantom X with Computer Based Sequences Using Midi Controllers Here You Can Totally Automate Your Effects Now Apart from the Multi Effect Processor and the Chorus in the Reverb There's Actually One More Effect That Is Common to Your Entire Phantom X and that Is the Mastering Effect Press F7 and We Have Five Preset and One User Setting of the Mastering Effect Which Is Applied to the Entire a Phantom X Now Like Most Mastering Effects Its a Multiband Compressor It Compresses Three Bands of Frequencies Independently You Can See that We Have the Low or Base Frequencies the Mids and the High or Treble Frequencies each of these Have Their Own Compression Settings To Tame Their Dynamics

You Can See that We Have the Low or Base Frequencies the Mids and the High or Treble Frequencies each of these Have Their Own Compression Settings To Tame Their Dynamics this Is Useful if You'Re Going To Be Say Producing a Dance Song Where You Want the Bass Just Pumping and Right in Your Face You Can Compress the Heck out of the Low Band and Leave the Mids and Highs at a Medium Compression Now if You Don't Want To Know about all of this Just Go Ahead and Select One of the Presets and Go from There Oh One Last Thing I'LI Go Over before We Move on Let's Exit out of Here Arpeggio

We Will Look at the Chord Shape of Your Hand So either Arpeggios Can Be Set Up To Be Rhythmic Presets That Look at the Chord Shape of Your Hand or if Set to Phrase Will Play Back a Riff with the Intervals Coming from within the Arpeggio Go Ahead and Press F7 Which Is Edit Okay Here's Our Intervals Here You Can See It's a Major Triad Now You Can Decide How Many Steps each Hour Pgo Will Have by Pressing F1 Up Set Up Let's Go Ahead and Set this to Eight Steps Eight Steps Great and Close It Out and I'LI Use the Cursor Keys To Move Over to the Fourth Step Press F8 Which Is Step Record Let's Play in a Then B Flat Then a Then G Then E Now You Notice the Velocity Was You'Re Going To Want To Be Able To Save that Press F8 for Right You Can Go Ahead and Give It a Name and Then Save that into any User Location Right Down Here Let's Exit out of Here and We'LI Go Ahead and Look at Cord Memory Press Shift and Cord Memory and Here We Are We Have 64 User and 64 Presets Here if You Wish To Have Your Cords Rolled You Can Hit F1 Hit F1 Again and the Wall Play at the Same Time or Rolled It's Easy To Write any Court in Go Ahead and Press Edit Let's Go Ahead and Delete All the Notes Here To Make an Empty Chord

Many Engines blowing up...

How did we get the M1000RR?

Issues from the BEGINNING

There's an issue with finding good techs in the industry

Drove 19 HOURS to Cleveland to get it checked

Discovering that the issue is bigger than we thought

BMW DENIED warranty

Faulty Engine Assembly!!

Feedback from BMW engineers...

Many similar engine failures... CaliMotoTV, CarWow, Etc

They refuse to send us a letter of denying warranty

We bought a new \$15,000engine

The M1000RR is sold
