Ask the Author: Performance of Maritime Logistics - Ask the Author: Performance of Maritime Logistics by International Transport Forum 684 views Streamed 1 year ago 33 minutes - In this 30-minute online presentation and question and answer session, author Olaf Merk presents the new ITF report ...

Intro

Main topics of the report 1. Performance of containerised shipping 2. Causes and effects of maritime performance 3. Impacts: trade, modal shift, vertical integration 4. Policy implications 5. Policy recommendations

Causes and effects Demand/supply balance demand explosion occurred in the US, but not in most other world regions. • Port congestion: a few world regions (US and China) suffer from port congestion, arguably due to poor ship reliability that has disrupted berth planning. Ship capacity management: capacity withdrawal during lockdowns and beyond; capacity repositioning, e-g. from Asia Europe to Transpacific

Impacts Trade patterns: some industries have seen changes in trade patterns. E.g. less exports of textiles from Asia to Europe, more near sourcing

Policy implications - Local supply chain problems (Us demand explosion and port congestion) have spilled over to other regions and created world-wide problems - Globally integrated networks have undermined resilience and buffers that could have stopped spillovers - Public policies have facilitated this, eg, by allowing joint capacity management via consortia and alliances. - Actions by one regulator have consequences for other jurisdictions . Global liner networks, but no global regulation or coordination

Policy recommendations Improve competition monitoring in container shipping - Reconsider the competition arrangements for liner shipping - Focus regulatory attention on fair competition in door-to-door container transport - Increase transparency of container shipping rates and charges - Collect performance information on the containerised transport chain Secure the strategic value of container shipping - Charge users of public maritime infrastructure more to increase cost coverage
