Tales of the Sentinel

The aeons passed on Earth, its evolving simians unaware of a strange artefact that patiently waited for them to make their introduction. Inevitably, as the ancient guest continued its orbit around the Sun in the void between Venus and the blue world the humans noticed its presence. However, would their inquisitive nature truly want to know the story recorded within the artefact? Was humanity prepared for the revelations that the ancient object had to offer? A set of ideas and mathematical understanding that would gift them a means to take control of their technological destiny. Yet as a notable human once said, nothing is free. So what price would have to be paid to claim their quarry?

The Sentinel

The best collection ever of Arthur C. Clarke's short fiction, including the stories on which 2001: A Space Odyssey and Childhood's End were based. The Sentinel is a magnificent retrospective showcase of

Arthur C. Clarke's finest shorter fiction. Spanning four decades of writing, this book includes many gems of a genius at the height of his powers. The title piece is the story that inspired 2001. 'Guardian Angel' is a rarely anthologised work that gave birth to *Childhood's End*, and 'The Songs of Distant Earth' is the original version of Clarke's own favourite novel. Along with other vaulting tales of imagination are fascinating introductions telling the history of each story from conception to completion. From one of the greatest science-fiction writers of all time. The Sentinel is one of those all-too-few collections that must be read, re-read, then treasured.

A Study Guide for Arthur C. Clarke's The Sentinel

A Study Guide for Arthur C. Clarke's "The Sentinel," excerpted from Gale's acclaimed Short Stories for Students. This concise study guide includes plot summary; character analysis; author biography; study questions; historical context; suggestions for further reading; and much more. For any literature project, trust Short Stories for Students for all of your research needs.

Wildland Sentinel

Shadow of the Sentinel

Explores the legacy of a Civil War-era secret society, the Knights of the Golden Circle, and describes efforts to crack the society's system of codes and symbols to identify hidden treasure sites across the American south and west.

The Sentinel

Jeffrey Konvitz's New York Times–bestselling horror novel about a young woman descending into demonic madness who discovers it's not simply in her mind Aspiring model Allison Parker finally moves into her dream apartment: a brownstone on Manhattan's Upper West Side. But her perfect home quickly turns hellish. The building is filled with a cast of sinister tenants, including a reclusive blind priest, who seems to watch her day and night through an upstairs window. Eventually, Allison starts hearing strange noises from the empty apartment above hers. Before long, she uncovers the building's demonic secret and is plunged into a nightmare of sinful misdeeds and boundless evil. In the tradition of *Rosemary's Baby*, this gripping novel was adapted into a feature film starring Ava Gardner, Cristina Raines, and Chris Sarandon. *The Sentinel* is classic horror at its best.

#1 NEW YORK TIMES BESTSELLER • THE BLOCKBUSTER JACK REACHER SERIES THAT INSPIRED TWO MAJOR MOTION PICTURES AND THE STREAMING SERIES REACHER Jack Reacher is back! The “utterly addictive” (The New York Times) series continues as acclaimed author Lee Child teams up with his brother, Andrew Child, fellow thriller writer extraordinaire. “One of the many great things about Jack Reacher is that he’s larger than life while remaining relatable and believable. *The Sentinel* shows that two Childs are even better than one.”—James Patterson As always, Reacher has no particular place to go, and all the time in the world to get there. One morning he ends up in a town near Pleasantville, Tennessee. But there’s nothing pleasant about the place. In broad daylight Reacher

spots a hapless soul walking into an ambush. "It was four against one" . . . so Reacher intervenes, with his own trademark brand of conflict resolution. The man he saves is Rusty Rutherford, an unassuming IT manager, recently fired after a cyberattack locked up the town's data, records, information . . . and secrets. Rutherford wants to stay put, look innocent, and clear his name. Reacher is intrigued. There's more to the story. The bad guys who jumped Rutherford are part of something serious and deadly, involving a conspiracy, a cover-up, and murder—all centered on a mousy little guy in a coffee-stained shirt who has no idea what he's up against. Rule one: if you don't know the trouble you're in, keep Reacher by your side.

The Sentinel

Escaping from a failed relationship, Kathleen Devine flees to an isolated lighthouse off the Victorian coastline. Taking up the position of Head Teacher to the lighthouse keepers' children, she is ensnared in the lives of those marooned on the lonely outpost and soon realises no-one can escape their past. When the fearsome Head Lightkeeper, Mr Johansson forms an unlikely friendship with the daughter of one of the keepers, it threatens to destroy their fragile peace. Can Kathleen find the strength to survive?

Historic Tales of Henry Cowell Redwoods State Park: Big Trees Grove

Visiting the redwoods in nineteenth-century California meant coming to Big Trees Grove, now part of Henry Cowell Redwoods State Park. This forest of giants in the Santa Cruz Mountains attained fame through the 1846 exploits of explorer John Charles Frémont, whose namesake tree still stands. Saved from the logger's axe by Joseph Warren Welch in 1867, these were the first coastal redwoods preserved for public recreation. As a world-renowned resort for sixty years, Big Trees Grove hosted thousands of visitors--from picnickers to presidents, including Theodore Roosevelt. Join author Deborah Osterberg as she recounts the stories of those first visitors and the awe-inspiring landscape they preserved for future generations.

One morning he ends up in a town near Pleasantville, Tennessee. But there’s nothing pleasant about the place. The Sentinel

Secret societies have existed for millennia; their purposes myriad. Generally, they are exclusive and require members to take an oath to keep their organization and activities secret. They possess guarded means of identification and communication. Some exist in the open, their purposes known, their activities undisclosed, and their practitioners anonymous. The US Army Security Agency was a separate organization within the Army having its own installations, training, academic, logistic, communications and scientific institutions and members took an oath to keep the organization and its activities secret, their identity and communications guarded. Until the advent of the Vietnam War, their purpose was intelligence gathering for national strategic objectives. As the US role expanded from advisory to active combat, intelligence support to combat units changed the structure and character of the Agency. Organizational secrecy, guarded communications, and member anonymity remained. The 265th Radio Research Company (Airborne) sentinels operated in the shadows, yet stood beside their warrior counterpart providing intelligence to the 101st Airborne Division. 101st Airborne units involved in the war are etched in the stone of their memorial at Arlington Cemetery. The 265th RRC (ABN), the only unit etched on the back, remains in the shadows. Nearly forty years have passed since the last Sentinel departed Vietnam. This is their story.

Lincoln and the Sleeping Sentinel

They say the country of Zeuten no longer has any need for heroes. Quests have been completed, the great Powers have withdrawn from the world, and the Sentinels who guard the last Relics are largely forgotten. Unlike their neighbours in the country of Aestin, whose Invokers wield the magic of the deities

in exchange for glory and prestige, they leave the gods alone, and the gods extend the same courtesy to them. When Zeuten's last Sentinel disappears, Zelle, her granddaughter, intends to track her down. Instead she runs into an Aestinian stranger with no memories of his past, who claims to be looking for a long-lost Relic hidden in the mountains by the first Sentinels. To Zelle, the rumours of lost Relics are just stories told to trick gullible travellers, but the hordes of enemies on the stranger's tail suggest otherwise. Armed with nothing but her grandmother's sentient (and temperamental) magical staff, Zelle finds herself tasked with keeping them both alive. Between monstrous beasts, magical storms, and an enthusiastic but inept aspiring assassin and her dragon sidekick, Zelle has her work cut out if she wants to survive long enough to save her grandmother and prevent the destruction of a nation. Maybe Zeuten is in need of a few heroes after all... Keywords: fantasy adventure, magic, epic fantasy, dragons, quest, sword and sorcery, coming of age fantasy

A Woman's Impression of the Philippines

A Woman's Impression of the Philippines is an interesting take on the country based on a California citizen's travels to Honolulu, Manila, and throughout the Philippines. Excerpt: "On the morning on which we drew our travel-pay checks, one of the Radcliffe girls was most eager to get downtown before the bank closed. The shops of Manila had been altogether too alluring for the very small balance which remained in her purse after our ten days at Honolulu. The efforts of the small boys were fruitless, so she resorted to the expedient of trying to gather up a carromata from someone leaving his at the Exposition Building."

I Find the Transport Ship Buford and My Stateroom—Old Maids and Young Maids Bound for the Orient—The Deceitful Sea—Making New Friends and Acquaintances. On a hot July day the army transport *Buford* lay at the Folsom Dock, San Francisco, the Stars and Stripes drooping from her stern, her *Blue Peter* and a cloud of smoke announcing a speedy departure, and a larger United States flag at her fore-mast signifying that she was bound for an American port. I observed these details as I hurried down the dock accompanied by a small negro and a dressing-bag, but I was not at that time sufficiently educated to read them. I thought only that the *Buford* seemed very large (she is not large, however), that she was beautifully white and clean; and that I was delighted to be going away to foreign lands upon so fine a ship. Having recognized with relief a pile of luggage going aboard—luggage which I had carefully pasted with red, white, and blue labels crossed by the letters "U.S.A.T.S." and *Buford*—I dismissed the negro, grasped the dressing-bag with fervor, and mounted the gangway. To me the occasion was momentous. I was going to see the world, and I was one of an army of enthusiasts enlisted to instruct

our little brown brother, and to pass the torch of Occidental knowledge several degrees east of the international date-line.

I was much interested in the babies, who were strutting about in their finest raiment and were unquestionably annoyed at its restrictions. Filipino babies are sharp-eyed, black-polled, attractive little creatures. Whether of high or low degree, their ordinary dress is adapted to the climate, and consists usually of a single low-necked garment, which drapes itself picturesquely across the shoulders like the cloaks of Louis the Fourteenth's time seen on the stage. On state occasions, however, they are inducted into raiment which their deluded mothers fancy is European and stylish; but there is always something wrong. Either one little ruffled drawers leg sags down, or the petticoat is longer than the dress skirt, or the waistband is too tight, or mamma has failed to make allowance in the underclothing for the gauziness of the outer sheathing. As for the sashes with which the victims are finally bound, they fret the little swelled stomachs, and the baby goes about tugging at his undesirable adornment, and wearing the frown of one harassed past endurance. Sometimes it ends in flat mutiny, and baby is shorn of his grandeur, and prances innocently back into the heart of society, clad in a combination of waist and drawers which is associated in my memory with cotton flannel and winter nights. Nobody is at all embarrassed by the neglig e; and as for the baby himself, he would appear in the garments of Eve before the Fall without a qualm. After everybody had been served with sweets, a young Filipina was led to the piano. She played with remarkable technique and skill. Another young lady sang very badly. Filipinos have natural good taste in music, have quick musical ears, and a natural sense of time, but they have voices of small range and compass, and what voice they have they misuse shamefully. They also undertake to sing music altogether too difficult for any but professionals. Contents I. The Voyage Begins II. From San Francisco to Honolulu III. Our Ten Days' Sightseeing IV. An ambitious history of flags, stamps, and currency—and the role they played in US imperialism. In *Imperial Material*, Alvita Akiboh reveals how US national identity has been created, challenged, and transformed through embodiments of empire found in US territories, from the US dollar bill to the fifty-star flag. These symbolic objects encode the relationships between territories—including the Philippines, the Hawaiian Islands, Puerto Rico, and Guam—and the empire with which they have been entangled. Akiboh shows how such items became objects of local power, their original intent transmogrified. For even if imperial territories were not always front and center for federal lawmakers and administrators, their inhabitants remained continuously aware of the imperial United States, whose presence announced itself on every bit of currency, every stamp, and the local flag.

This interdisciplinary study analyzes the role of sport during the American occupation of the Philippines and how it related to race, religion, government, and more. It examines how sport was used by colonial authorities to achieve occupation aims and argues that similar strategies continue to be prominent factors in U.S. foreign policy.

Even before the desegregation of the military and public education and before blacks had full legal access to voting, racial barriers had begun to fall in American sports. This collection of essays shows that for many African Americans it was the world of athletics that first opened an avenue to equality and democratic involvement. *Race and Sport* showcases African Americans as key figures making football, baseball, basketball, and boxing internationally popular, though inequalities still exist today. Among the early notables discussed is Fritz Pollard, an African American who played professional football before the National Football League established a controversial color barrier. Another, the boxer Sugar Ray Robinson, exemplifies the black American athlete as an international celebrity. African American women also played an important role in bringing down the barriers, especially in the early development of women's basketball. In baseball, both African American and Hispanic players faced down obstacles and entered the sports mainstream after World War II. One essay discusses the international spread of American imperialism through sport. Another shows how mass media images of African American athletes continue to shape public perceptions. Although each of these six essays explores a different facet of sports in America, together they comprise an analytical examination of African American society's tumultuous struggle for full participation both on and off the athletic field.

The Filipino Woman

This book explores the professional, civic, and personal roles of women teachers throughout American history. Its themes and findings build from the mostly unpublished writings of many women. Clifford

studied personal history manuscripts in archives and consulted printed autobiographies, diaries, correspondence, oral histories, interviews to probe the multifaceted imagery that has surrounded teaching. This work surveys a long past where schoolteaching was essentially men's work, with women relegated to restricted niches such as teaching rudiments of the vernacular language to young children and socializing girls for traditional gender roles.

Sport and the American Occupation of the Philippines

"This groundbreaking work offers a sensory history of the British in India from the formal imposition of their rule to its end (1857-1947) and the Americans in the Philippines from annexation to independence (1898-1946). A social and cultural history of empire, it analyzes how the senses created mutual impressions of the agents of imperialism and their subjects, and highlights connections between apparently disparate items, including the lived experience of empire, the comments (and complaints) found in memoirs and reports, the appearance of lepers, the sound of bells, the odor of excrement, the feel of cloth against skin, the first taste of meat spiced with cumin or of a mango. Men and women in imperial India and the Philippines had different ideas from the start about what looked, sounded, smelled, felt, and tasted good or bad. Both the British and the Americans saw themselves as the civilizers of what they judged backward societies and believed that a vital part of the civilizing process was to put the senses in the right order of priority and to ensure them against offense or affront. People without manners that respected the senses lacked self-control; they were uncivilized and thus unfit for self-government. Societies that looked shabby, were noisy and smelly, felt wrong, and consumed unwholesome food in unmannerly ways were not prepared to form independent polities and stand on their own. It was the duty of allegedly more sensorily advanced westerners to put the senses right before withdrawing the most obvious manifestations of their power. This study of Indians and Filipinos' ideas of what constituted sensory civilization and the imperial encounter with British and American sense-orders shows the compromises between these nations' sensory regimes"--

The Filipino Woman in Focus

When the United States took control of the Philippines and Puerto Rico in the wake of the Spanish-American War, it declared that it would transform its new colonies through lessons in self-government and the ways of American-style democracy. In both territories, U.S. colonial officials built extensive public school systems, and they set up American-style elections and governmental institutions. The officials aimed their lessons in democratic government at the political elite: the relatively small class of the wealthy, educated, and politically powerful within each colony. While they retained ultimate control for themselves, the Americans let the elite vote, hold local office, and formulate legislation in national assemblies. *American Empire and the Politics of Meaning* is an examination of how these efforts to provide the elite of Puerto Rico and the Philippines a practical education in self-government played out on the ground in the early years of American colonial rule, from 1898 until 1912. It is the first systematic comparative analysis of these early exercises in American imperial power. The sociologist Julian Go unravels how American authorities used "culture" as both a tool and a target of rule, and how the Puerto Rican and Philippine elite received, creatively engaged, and sometimes silently subverted the Americans' ostensibly benign intentions. Rather than finding that the attempt to transplant American-style democracy led to incommensurable "culture clashes," Go assesses complex processes of cultural accommodation and transformation. By combining rich historical detail with broader theories of meaning, culture, and colonialism, he provides an innovative study of the hidden intersections of political power and cultural meaning-making in America's earliest overseas empire.

The US Army and the Spanish-American War Era, 1895-1910

We live in a world populated not just by individuals but by figures, those larger-than-life people who in some way express and challenge our conventional understandings of social types. This innovative and collaborative work takes up the wide range of figures that populate the social and cultural imaginaries of contemporary Southeast Asia—some familiar only in specific places, others recognizable across the region and even globally. It puts forward a series of ethnographic portraits of figures that represent and give voice to something larger than themselves, offering a view into social life that is at once highly particular and general. They include the Muslim Television Preacher in Indonesia, Miss Beer Lao, the Rural DJ in Thailand, the Korean Soap Opera Junkie in Burma, the Filipino Seaman, and the Photo Retoucher in Vietnam. *Figures of Southeast Asian Modernity* brings together the fieldwork of over eighty scholars and covers the nine major countries of the region: Burma (Myanmar), Cambodia, Indonesia,

Laos, Malaysia, the Philippines, Singapore, Thailand, and Vietnam. An introduction outlines important social transformations in Southeast Asia and key theoretical and methodological innovations that result from ethnographic attention to the study of key figures. Each section begins with an introduction by a country editor followed by short essays offering vivid and intimate portraits set against the background of contemporary Southeast Asia. The result is a volume that combines scholarly rigor with a meaningful, up-to-date portrayal of a region of the world undergoing rapid change. A reference bibliography offers suggestions for further reading. *Figures of Southeast Asia Modernity* is an ideal teaching tool for introductory classes to Southeast Asia studies, anthropology, and geography.

Philippine Woman in America

The Athletic Crusade is the first book to systematically analyze the role of sports in the expansion of U.S. empire from the 1890s through World War II. Gerald R. Gems details how white, Anglo-Saxon Protestant males set the standard for inclusion within American society, transferred that standard to foreign territories, and subtly used American sports to instill allegedly desirable racial, moral, and commercial virtues in colonial subjects. In the realm of such expansion, sports provided a less harsh, less militaristic means of instilling belief in a dominant system's values and principles than more overt methods such as war. The process of change, however, had unexpected consequences as subordinate groups adapted or even rejected American overtures. Sport became a means for nonwhites to challenge whiteness, Social Darwinism, and cultural hegemony by establishing their own physical prowess, claiming a measure of esteem, and creating a greater sense of national identity. Gems shows the direct influence of sports in Hawaii, the Philippines, Puerto Rico, Cuba, and the Dominican Republic and explores their comparatively minimal influence in countries such as China and Japan. Amid increasing globalization, *The Athletic Crusade* offers a welcome perspective on how the United States has attempted to spread its influence in the past and the implications for the future of indigenous and other societies.
