If you have a car like this then you can save thousands as you bring it back up to specification - for your safety or as a restoration project this is the book you need. It is now 40 years since the first BMW 5 Series went down the production lines at Dingolfing. Back in 1972, only the BMW executives with the greatest of foresight could have predicted that in 2012, the 5 Series would still be in production and still be the class leader - and it's amusing to note that the latest model - the F10 520i - is also a two litre four cylinder just as those first Fives were. BMW occupies a unique position in the hearts of car buyers and enthusiasts for no other marque of car has such a wide fan base. From what are probably the finest range of cars in the world to an enjoyable secondhand car, through to concours events, track days to drifting championships plus huge clubs and countless forums, no other manufacturer has such a huge and diverse following as BMW. The large numbers of the first three generations of the 5 Series that still

survive attest to that, and this book is aimed at owners wanting to know more and pick up some useful maintenance, repair and restoration tips.

The Matrimony Plan (Mills & Boon Love Inspired Historical)

How did pre-industrial London build the biggest water supply industry on earth? Beginning in 1580, a number of competing London companies sold water directly to consumers through a large network of wooden mains in the expanding metropolis. This new water industry flourished throughout the 1600s, eventually expanding to serve tens of thousands of homes. By the late eighteenth century, more than 80 percent of the city's houses had water connections—making London the best-served metropolis in the world while demonstrating that it was legally, commercially, and technologically possible to run an infrastructure network within the largest city on earth. In this richly detailed book, historian Leslie Tomory shows how new technologies imported from the Continent, including waterwheel-driven piston pumps, spurred the rapid growth of London's water industry. The business was further sustained by an explosion in consumer demand, particularly in the city's wealthy West End. Meanwhile, several key local innovations reshaped the industry by enlarging the size of the supply network. By 1800, the success of London's water industry made it a model for other cities in Europe and beyond as they began to build their own water networks. The city's water infrastructure even inspired builders of other large-scale urban projects, including gas and sewage supply networks. *The History of the London Water Industry, 1580–1820* explores the technological, cultural, and mercantile factors that created and sustained this remarkable industry. Tomory examines how the joint-stock form became popular with water companies, providing a stable legal structure that allowed for expansion. He also explains how the roots of the London water industry's divergence from the Continent and even from other British cities was rooted both in the size of London as a market and in the late seventeenth-century consumer revolution. This fascinating and unique study of essential utilities in the early modern period will interest business historians and historians of science and technology alike.

Haunted Media

January Sanders grew up believing karma was more reliable than an imaginary higher power, but after suffering her worst heartbreak in 29 years, she's open to just about anything, including taking a temporary position at her aunt's church. Keeping her lack of faith a secret, January is determined to use her photographic memory to help Grace Community's overworked staff, all while scraping herself off rock bottom. What she doesn't count on is meeting the church's handsome and charming guitarist, who not only is a strong believer, but has also dedicated his life to Christian music. It's a match set for disaster, and yet January has no ability to stay away, even if it means pretending to have faith in a God she doesn't believe in. Only this time, keeping secrets isn't as easy as she thought it would be. Especially when she's constantly running into her aunt's landscape architect, who seems to know everything about her past and present sins and makes no apologies about pushing her to deal with feelings she'd rather keep buried. Torn between two worlds incapable of coexisting, can January find the healing that's eluded her or will her resistance to the truth ruin any chance of happiness?

The Clarke Papers

In this first critical account of Matta-Clark's work, Pamela M. Lee considers it in the context of the art of the 1970s—particularly site-specific, conceptual, and minimalist practices—and its confrontation with issues of community, property, the alienation of urban space, the "right to the city," and the ideologies of progress that have defined modern building programs. Although highly regarded during his short life—and honored by artists and architects today—the American artist Gordon Matta-Clark (1943-78) has been largely ignored within the history of art. Matta-Clark is best remembered for site-specific projects known as "building cuts." Sculptural transformations of architecture produced through direct cuts into buildings scheduled for demolition, these works now exist only as sculptural fragments, photographs, and film and video documentations. Matta-Clark is also remembered as a catalytic force in the creation of SoHo in the early 1970s. Through loft activities, site projects at the exhibition space 112 Greene Street, and his work at the restaurant Food, he participated in the production of a new social and artistic space. Have art historians written so little about Matta-Clark's work because of its ephemerality, or, as Pamela M. Lee argues, because of its historiographic, political, and social dimensions? What did the activity of carving up a building in anticipation of its destruction—suggest about the conditions of art making, architecture, and urbanism in the 1970s? What was one to make of the paradox attendant on its making—that the production of the object was contingent upon its ruination? How do these projects address the very writing of history, a history that imagines itself building toward an ideal work in the service of progress? In this first critical account of Matta-Clark's work, Lee considers it in the context of the art of the 1970s—particularly site-specific, conceptual, and minimalist practices—and its confrontation with issues of community, property, the alienation of urban space, the "right to the city," and the ideologies of progress that have defined modern building programs.

From the body to the ever-present lens, the world is increasingly preoccupied with the visual. What exactly is the visual' and how can we interpret the multitude of images that bombard us every day? Reading the Visual takes as its starting point a tacit familiarity with the visual, and shows how we see even ordinary objects through the frameworks and filters of culture and personal experience. It explains how to analyse the mechanisms, conventions, contexts and uses of the visual in western cultures to make sense of visual objects of all kinds. Drawing on a range of theorists including John Berger, Foucault, Bourdieu and Crary, the authors outline our relationship to the visual, tracing changes to literacies, genres and pleasures affecting ways of seeing from the Enlightenment to the advent of virtual technology. Reading the Visual is an invaluable introduction to visual culture for readers across the humanities and social sciences. Eloquently written, admirably clear, passionately argued, Schirato and Webb have given us one of the best textbooks on the emergent field of visual culture. Smart, clear and relevant examples challenge readers to question their visual environments and become critics and creators themselves.' Professor Sean Cubitt, University of Waikato This is a splendid book. It is both intellectually sophisticated and written in an extremely accessible manner.' Professor Jim McGuigan, Loughborough University This book treats the interpretation and value of visual artefacts

with depth, while remaining highly accessible. It is very readable: written in a lively and engaging style with examples that are refreshing and up-to-date.' Professor Guy Julier, Leeds Metropolitan University

Redeeming Love

In all the arts a war is being waged between modernists and postmodernists. Radicals have tended to side with the modernists against the forces of conservatism. Postmodern Culture is a break with this tendency. Its contributors propose a postmodernism of resistance - an aesthetic that rejects hierarchy and celebrates diversity. Ranging from architecture, sculpture and painting to music, photography and film, this collection is now recognised as a seminal text on the postmodernism debate. The essays are by Hal Foster, Jürgen Habermas, Kenneth Frampton, Rosalind Krauss, Douglas Crimp, Craig Owens, Gregory L. Ulmer, Fredric Jameson, Jean Baudrillard, and Edward W. Said.

Sir Ernest George (1839-1922) was one of England's greatest architects of the late 19th and early 20th centuries. He specialised in domestic work and was responsible for beautiful and imaginative houses in both town and country, and with his three successive partners, he carried out over 200 works both in Britain and abroad. He was also a watercolourist of considerable stature whose work in the medium was acclaimed in his own time. This richly illustrated book is the first study of the man and his work and will establish him as one of the major names in his profession. His life and career is fully documented, the buildings are described and a full catalogue of works is provided. A special feature is a study of pupils and assistants who passed through George's office, including several who went on to be famous and successful - Edwin Lutyens, Guy Dawber, J. J. Joass, R. Weir Schultz - and also the first woman to become a member of the Royal Institute of British Architects, Ethel Mary Charles. Hilary Grainger is a dean at the London College of Fashion and is the recognised expert on George and his architecture. She is also a leading authority on the architecture of cremation and is the chair of the Victorian Society.

Essays address the masters of the form, including Art Spiegelman, Alan Moore, and Marjane Satrapi, and reflect on their publishing history as well as their social and political effects. This ambitious history offers an extensive, detailed and expansive scholarly account of the graphic novel, and will be a key resource for scholars and students.

The book focuses on four major factors which have influenced development in textile conservation practice since the 1980s: the changing context, an evolution in the way conservators think about objects, the greater involvement of stakeholders, and technical developments. These are all integral to effective conservation decision-making. • Includes case studies from the UK, USA and mainland Europe and Asia • Assesses the conservation of objects in some of the world's major cultural institutions • Highly illustrated in full colour to show the effect of conservation in practice Textile Conservation is a reference manual for textile conservators, textile conservation students and museum and heritage professionals.

The Discovery of America

Narratology has been conceived from its earliest days as a project that transcends disciplines and media. The essays gathered here address the question of how narrative migrates, mutates, and creates meaning as it is expressed across various media. Dividing the inquiry into five areas: face-to-face narrative, still pictures, moving pictures, music, and digital media, Narrative across Media investigates how the intrinsic properties of the supporting medium shape the form of narrative and affect the narrative experience. Unlike other interdisciplinary approaches to narrative studies, all of which have tended to concentrate on narrative across language-supported fields, this unique collection provides a much-needed analysis of how narrative operates when expressed through visual, gestural, electronic, and musical means. In doing so, the collection redefines the act of storytelling. Although the fields of media and narrative studies have been invigorated by a variety of theoretical approaches, this volume seeks to avoid a dominant theoretical bias by providing instead a collection of concrete studies that inspire a direct look at texts rather than relying on a particular theory of interpretation. A contribution to both narrative and media studies, Narrative across Media is the first attempt to bridge the two disciplines.

 Overall, Thanatos was the god of non-violent death or the personification of death and a minister of Hades.
 erroneously identified with Orcus, whose Greek equivalent was Horkos, God of the Oath.
 Thanatos was a son of Nyx (Night) and Erebus (Darkness) and twin brother of Hypnos (Sleep).
 The ancient Greeks had a large respect for the dead and treated each funeral with a great deal of ceremony.
 blood-craving sisters, the Keres, spirits of slaughter and disease.
 In time, the figure of Thanatos would evolve into the image of the Grim Reaper.
 The Greeks called him the "Reaper of Souls."
 Thanatos shows up in two Greek myths
 Myth 1: Alcestis and Admetus
 One small twist though: Artemis' brother, Apollo, who had been punished for killing someone Zeus favoured
 At Alcestis' funeral, it so happened that Hercules had attended (between one of his Twelve Labours).
 Myth 2: Thanatos and Sisyphus
 In another story, Thanatos was captured by the gods-despised criminal Sisyphus, who trapped him in a burlap sack
 Sisyphus had a long rap sheet; he often killed guests and travellers, which completely went against certain laws
 Zeus ordered Thanatos to take Sisyphus' soul and throw him into Tartarus
 Kind of like a super-max prison for the worst criminals, but with cruel torture. Forever.
 Days passed, and because the god of death wasn't out doing his job, no human or monster could die
 This time he was going to Hades, the lord of the Underworld, for a final judgement on his fate.
 In Roman sculptural reliefs he was portrayed as a youth holding a down-turned torch
 Thanatos was born to Nyx, goddess of the night and Erebus, the Titan of Darkness
 He and his brother, Hypnos, shared a comfortable cavern in the Underworld, where the river Lethe (aka, forgetfulness)
