From the moment we are born, we all begin ageing.

This is the start of a life course which is complex and varied.

Each of us lives through different life events, we make choices

we face the consequences of policies and systems and forms of discrimination which influence our lives.

As we grow older, the impact on us of these different experiences accumulates

This line shows your wellbeing today and across your lifecourse

Jose was recently diagnosed with diabetes.

We all experience ageing in a different way

We benefit from growing experience and knowledge and form meaningful family and social relationships.

But we also carry the cumulative impact of challenging life experiences

How policies and programmes are implemented affects our lives across the life course and influences our wellbeing in old age.

but also look back and respond to older people's diverse past experiences
