The Secret Doctrine

Excerpt from The Secret Doctrine, Vol. 1: The Synthesis of Science, Religion, and Philosophy; Cosmogenesis The aim of this work may be thus stated: to Show that Nature is not a fortuitous concurrence of atoms, and to assign to man his rightful place in the scheme of the Universe; to rescue from degradation the archaic truths which are the basis of all religions; to uncover, to some extent, the fundamental unity from which they all spring; finally, to Show that the Occult side of Nature has never been approached by the Science of modern civilization. The Secret Doctrine, Vol. 1

The Secret Doctrine, the Synthesis of Science, Religion and Philosophy, a book originally published as two volumes in 1888 written by Helena Blavatsky. The first volume is named Cosmogenesis, the second Anthropogenesis. It was an influential example of the revival of interest in esoteric and occult ideas in the modern age, in particular because of its claim to reconcile ancient eastern wisdom with modern science. Blavatsky claimed that its contents had been revealed to her by 'mahatmas' who had retained knowledge of humanity's spiritual history, knowledge that it was now possible, in part, to reveal. Volume one (Cosmogenesis) In Volume One, Blavatsky details her interpretation of the origin and evolution of the universe itself, in terms derived from the Hindu concept of cyclical development. The world and everything in it is said to alternate between periods of activity (manvantaras) and periods of passivity (pralayas). Each manvantara lasts many millions of years and consists of a number of Yugas, in accordance with Hindu cosmology. Blavatsky attempted to demonstrate that the discoveries of "materialist" science had been anticipated in the writings of ancient sages and that materialism would be proven wrong.

The Secret Doctrine

The Secret Doctrine, Volume I. Cosmogenesis H. P. Blavatsky - The author the writer, rather feels it necessary to apologize for the long delay which has occurred in the appearance of this work. It has been occasioned by ill-health and the magnitude of the undertaking. Even the two volumes now issued do not complete the scheme, nor do these treat exhaustively of the subjects dealt with in them. A large quantity of material has already been prepared, dealing with the history of Occultism as contained in the lives of the great Adepts of the Âryan Race, and showing the bearing of Occult Philosophy upon the conduct of life, as it is and as it ought to be. Should the present volumes meet with a favourable reception, no effort will be spared to carry out the scheme of the work in its entirety. This scheme, it must be added, was not in contemplation when the preparation of the work was first announced. As originally announced, it was intended that The Secret Doctrine should be an amended and enlarged version of Isis Unveiled. It was, however, soon found that the explanations which could be added to those already put before the world, in the last-named and other works dealing with Esoteric Science, were such as to require a different method of treatment; and consequently the present volumes do not contain, in all, twenty pages extracted from Isis Unveiled.

The Secret Doctrine

The Secret Doctrine, Volume II. Anthropogenesis H. P. Blavatsky - The Secret Doctrine is the seminal work of the Theosophical Movement and established Blavatsky as one of the most vocal and outspoken advocate of the Wisdom Teachings of the East. Almost every contemporary spiritual movement can trace its lineage back to the impulses expressed most consummately in this, Blavatsky's Magnum Opus. Based upon a disclosure and exposition of the hitherto unknown - and academically, quite controversial - "Stanzas of Dzyan," The Secret Doctrine elaborates on the teachings first brought to the world through the "Masters" Koot Humi and Morya and introduced in A. P. Sinnett's "Esoteric Buddhism," to which Blavatsky continuously refers and clarifies. In the two volumes (the first being Cosmogogenesis) she portrays a sweeping vision of the evolution of humanity and the cosmos out of the spirit, unfolding in "rounds" and cycles of descent and reascent from and to the spirit, through cycles of reincarnation. This ebook edition has been meticulously prepared, with over 1000 footnotes linked from within the text. This complex and challenging work is presented in a highly readable format that invites a fresh approach to the text. Volume I, Cosmogogenesis

The Secret Doctrine

The Secret Doctrine, the Synthesis of Science, Religion and Philosophy, a book originally published as two volumes in 1888 written by Helena Blavatsky. The first volume is named Cosmogogenesis, the second Anthropogenesis. It was an influential example of the revival of interest in esoteric and occult ideas in the modern age, in particular because of its claim to reconcile ancient eastern wisdom with modern science. Blavatsky claimed that its contents had been revealed to her by 'mahatmas' who had retained knowledge of humanity's spiritual history, knowledge that it was now possible, in part, to reveal. Volume two (Anthropogenesis) The second half of the book describes the origins of humanity through an account of "Root Races" said to date back millions of years. The first root race was, according to her, "ethereal"; the second root had more physical bodies and lived in Hyperborea. The third root race, the first to be truly human, is said to have existed on the lost continent of Lemuria and the fourth root race is said to have developed in Atlantis. According to Blavatsky, the fifth root race is approximately one million years old, overlapping the fourth root race and the very first beginnings of the fifth root race were approximately in the middle of the fourth root race. [citation needed] "The real line of evolution differs from the Darwinian, and the two systems are irreconcilable," according to Blavatsky, "except when the latter is divorced from the dogma of 'Natural Selection'." She explained that, "by 'Man' the divine Monad is meant, and not the thinking Entity, much less his physical body." "Occultism rejects the idea that Nature developed man from the ape, or even from an ancestor common to both, but traces, on the contrary, some of the most anthropoid species to the Third Race man." In other words, "the 'ancestor' of the present anthropoid animal, the ape, is the direct production of the yet mindless Man, who desecrated his human dignity by putting himself physically on the level of an animal."

The Secret Doctrine: the Synthesis of Science, Religion, and Philosophy

The Secret Doctrine is one of the most influential esoteric and occult books of all time. In the first part of the book the author explains the origin and evolution of the universe itself, in terms derived from the Hindu concept of cyclical development. While in the second part she describes the origins of humanity through an account of "Root Races" said to date back millions of years.

The Secret Doctrine

This is the second section of the first volume of a theosophical work by Helena Petrovna Blavatsky. Originally published in 1917, it contains chapters on 'Symbolism and Ideographs', 'The Mundane Egg',

'the Lotus as a Universal Symbol', and much more, taking the reader on a journey through the various overlapping aspects of science, religion, and philosophy. To the republication of this work, a specially commissioned new biography of the author has been added. This is a fascinating work for anyone with an interest in the writings of this renowned author of philosophy and occultism.

The Secret Doctrine

A three-volume 'synthesis of science, religion, and philosophy' by one of the nineteenth century's most controversial spiritualists.

An Abridgement

This volume contains the collected writings and thoughts of Blavatsky, founder of theosophy and enigmatic teacher of the Secret Wisdom, published after her death. Some of the writings are attributed to Besant, so the book remains as controversial as thought-provoking.

Cosmogogenesis

Creating a sensation when it was first published in 1877, the first major work by the young Russian noblewoman who would found the Theosophical Society devoted 1200 pages to the mysteries of ancient and modern science and theology. This new edition abridged by Theosophical scholar Michael Gomes breathes fresh life into this classic of Western esoteric thinking. Stripped of its lengthy quotations from other writers and its repetitious commentary, Isis Unveiled is revealed to be a clear and readable exploration of the universal truths of the Ancient Wisdom Tradition by one of the most remarkable women of modern times.

The Secret Doctrine

The Secret Doctrine, the Synthesis of Science, Religion and Philosophy, a book originally published as two volumes in 1888, is Helena Blavatsky's magnum opus. It was an influential example of the revival of interest in esoteric and occult ideas in the modern age, in particular because of its claim to reconcile ancient eastern wisdom with modern science. The book purports to explain the origin and evolution of the universe itself. Helena Petrovna Blavatsky (1831 -1891) was a Russian occultist, spirit medium, and author who co-founded the Theosophical Society in 1875. She gained an international following as the leading theoretician of Theosophy, the esoteric religion that the society promoted.
