New thinking is needed on the age-old conundrum of how to connect research and policymaking. Why does a disconnect exist between the research community, which is producing thousands of studies relevant to public policy, and the policy community, which is making thousands of decisions that would benefit from research evidence? The second edition updates community dissonance theory and provides an even stronger, more substantiated story of why research is underutilized in policymaking, and what it will take to connect researchers and policymakers. This book offers a fresh look into what policymakers and the policy process are like, as told by policymakers themselves and the researchers who study and work with them. New to the second edition: • The point of view of policymakers is infused throughout this book based on a remarkable new study of 225 state legislators with an extraordinarily high response rate in this hard-to-access population. • A new theory holds promise for guiding the study and practice of evidence-based policy by building on how policymakers say research contributes to policymaking. • A new chapter features pioneering researchers who have effectively influenced public policy by engaging policymakers in ways rewarding to both. • A new chapter proposes how an engaged university could provide culturally competent training to create a new type of scholar and scholarship. This review of state-of-the-art research on evidence-based policy is a benefit to readers who find it hard to keep abreast of a field that spans the disciplines of business, economics, education, family sciences, health services, political science, psychology, public administration, social work, sociology, and so forth. For those who study evidence-based policy, the book provides the basics of producing policy relevant research by introducing researchers to policymakers and the policy process. Strategies are provided for identifying research questions that are relevant to the societal problems that confront and confound policymakers. Researchers will have at their fingertips a breath-taking overview of classic and cutting-edge studies on the multi-disciplinary field of evidence-based policy. For instructors, the book is written in a language and style that students find engaging. A topic that many students find mundane becomes germane when they read stories of what policymakers are like, and when they learn of researcher's tribulations and triumphs as they work to build evidence-based policy. To point students to the most important ideas, the key concepts are highlighted in text boxes. For those who

desire to engage policymakers, a new chapter summarizes the breakthroughs of several researchers who have been successful at driving policy change. The book provides 12 innovative best practices drawn from the science and practice of engaging policymakers, including insights from some of the best and brightest researchers and science communicators. The book also takes on the daunting task of evaluating the effectiveness of efforts to engage policymakers around research. A theory of change identifies seven key elements that are fundamental to increasing policymaker's use of research along with evaluation protocols and preliminary evidence on each element.

On Reading - Scholar's Choice Edition

The past decades public interest in history is booming. This creates new opportunities but also challenges for professional historians. This book asks how historians deal with changing public demands for history and how these affect their professional practices, values and identities. The volume offers a great variety of detailed studies of cases where historians have applied their expertise outside the academic sphere. With contributions focusing on Latin America, Africa, Asia, the Pacific and Europe the book has a broad geographical scope. Subdivided in five sections, the book starts with a critical look back on some historians who broke with mainstream academic positions by combining their professional activities with an explicit political partisanship or social engagement. The second section focusses on the challenges historians are confronted with when entering the court room or more generally exposing their expertise to legal frameworks. The third section focuses on the effects of policy driven demands as well as direct political interventions and regulations on the historical profession. A fourth section looks at the challenges and opportunities related to the rise of new digital media. Finally several authors offer their view on normative standards that may help to better respond to new demands and to define role models for publicly engaged historians. This book aims at historians and other academics interested in public uses of history.

Expository Thoughts on the Gospels

Jonathan Edwards is the greatest theologian of colonial America as well as its first important philosopher. As a theologian, he represents without any concession Calvinistic Orthodoxy, re-thought and re-lived through the experience of the Great Awakening. The large majority of his writings are of a theological character, yet this theology is articulated and expressed through a systematic philosophical reflection. Edwardsian thought covers three major areas: First, being, grace, and glory; then, the doctrine of the will extending to the study of the original sin and evil; finally, an entirely original theory of knowledge synthesizing spirituality, aesthetics, and epistemology. The present book, the first edition of which appeared in French almost thirty years ago, is a uniquely comprehensive study of the work of Jonathan Edwards. It discusses all the aspects of his thought over against the background of classical Protestant theology and of seventeenth- and eighteenth-century Western philosophy. Our time witnesses a significant renewal of interest in Jonathan Edwards. Professor Veto's book should prove to be a major contribution to assist and to guide the readers of "America's Theologian."

The Thought of Jonathan Edwards

'A stimulating, elegant yet pugnacious essay'—Observer In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

The One I Knew the Best of All

Reflecting a growing interest in the history of knowledge, this book explores the importance of scholarly virtues during the late nineteenth century. The practice of science is moulded on notions of scholarly values, such as diligence, impartiality, meticulousness and patience, but here, the author focuses on the virtues of collegial loyalty and critical independence. By analysing how virtues were reflected in day-to-day scholarly work, and examining the possibility that these virtues may have come into conflict with each other, this book sheds light on what is often described as 'the moral economy of scholarship,' a metaphor which draws attention to the changeability of the expectations raised by virtue. Highlighting the pre-eminence and exemplary nature of German scholarship during the nineteenth century, the author provides a detailed analysis of four evaluative practices used by scholars across the humanities, social sciences and natural sciences in a number of German universities. This allows a nuanced understanding of the complex relationship between collegial loyalty and critical independence in the academic working environment, and draws comparisons across varying disciplines. A welcome contribution to a growing field of research, this book provides a comparative and transdisciplinary overview of scholarly virtues and will be of interest to those researching the history of science and the humanities.

Orientalism

This book uses the mutual interactions between Chinese and Western culture as a point of departure in order to concisely introduce the origins and evolution of Chinese culture at the aspects of constitution, thinking, values and aesthetic. This book also analyzes utensil culture, constitution culture and ideology culture, which were perfected by absorbing classic arguments from academia. As such, the book offers an essential guide to understanding the development, civilization and key ideologies in Chinese history, and will thus help to promote Chinese culture and increase cultural awareness.

Scholarly Virtues in Nineteenth-Century Sciences and Humanities

Whether we want to accept it or not, "the youth of today" shall be the leaders of tomorrow. They shall become our business leaders, political leaders, and the professionals of tomorrow. The current generation of school-goers face tremendous opportunity and significant challenges, socially and economically. "Saints and Scholars" seeks to assist the young in their journey across the threshold into adulthood and seeks to help them raise their awareness of themselves, their strengths and gifts and how to create a life of purpose and authenticity for themselves so that they can Be More, Do More and Have More.

Thinking Jewish Culture in America argues that Jewish thought extends our awareness and deepens the complexity of American Jewish culture. This volume stretches the disciplinary boundaries of Jewish thought so that it can productively engage expanding arenas of culture by drawing Jewish thought into the orbit of cultural studies. The eleven contributors to Thinking Jewish Cultures, together with Chancellor Arnold Eisen's postscript, position Jewish thought within the dynamics and possibilities of contemporary Jewish culture. These diverse essays in Jewish thought re-imagine cultural space as a public and sometimes contested performance of Jewish identity, and they each seek to re-enliven that space with reflective accounts of cultural meaning. How do Jews imagine themselves as embodied actors in America? Do cultural obligations limit or expand notions of the self? How should we imagine Jewish thought as a cultural performance? What notions of peoplehood might sustain a vibrant Jewish collectivity in a globalized economy? How do programs in Jewish studies work within the academy? These and other questions engage both Jewish thought and culture, opening space for theoretical works to broaden the range of cultural studies, and to deepen our understanding of Jewish cultural dynamics. Thinking Jewish Culture is a work about Jewish cultural identity reflected through literature,

visual arts, philosophy, and theology. But it is more than a mere reflection of cultural patterns and choices: the argument pursued throughout *Thinking Jewish Culture* is that reflective sources help produce the very cultural meanings and performances they purport to analyze.

The air transport industry is highly vulnerable to environmental changes as was seen when the recent COVID-19 pandemic caused most airline operations to cease. However, for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover, it impacts other industries such as tourism, hotels, and restaurants, which contribute to the derailment of economic and social activities. Thus, it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. *Global Air Transport Management and Reshaping Business Models for the New Era* provides a comprehensive collection of knowledge on the new era of business management on air transport. It provides strategies, technologies, and tools used in the reshaping of the air transport business model. Covering topics such as customer experience, robotic process automation, and airline alliances, this major reference work is an essential resource for airline managers, supply chain specialists, air transport managers, students and faculty of higher education, libraries, researchers, economists, government officials, and academicians.
