This Thing Has Eight Twenty Micro Farad 450 Volt Filter Capacitors in Two Different Cans Okay So each Can Has Four Twenty Micro Farad 450 Voltar's in It So Here's the First Section of the First Can and You Can See I've Disconnected the Wire I've Connected My Suncor Z Meter Capacitor Checker to It and Right off the Bat We'Re Going To Notice that Well Let Me Pick the Camera Up so You Can See It It's Reading Double What It Should Leakage It Just Leaks and Leaks and Leaks and Leaks and Leaks and It Never Stops Doing that

So if You Look You Have One Two Three Four Five Six Seven Capacitors Okay Which Represents the Seven That Are in There and that that Part Is Relatively Correct but What They've Done Here Is with the Extra Capacitor in the Other Section They Tied these Two Together so You Can See Right Here Where They Tied Together and that's Where You Have Right There Okay So Right in Here I Just Kind Of Drew that On and and You Can See Basically What You Have Is You Have Your 6 X 4 Rectifier It Comes Up Here and It Goes It Branches this Way and I Haven't Traced this Side Through Yet and Then It Goes Up to this Little Resistor Network of the 1k

You Want To Leave It There because What's Going To Happen Is if You Put Too Much Capacitance Directly on the Output of a Rectifier Vacuum Tube That Actual Inrush Current Will Actually Overload this Tube Temporarily and Cause It to Flashover and Eventually It Will Damage the Tube So Always Keep this One the Same and So When They Modified this Circuit from that Original One from the Other Model of Oscilloscope by Increasing this to 40 Micro Farad Instead of 20 It Really Doesn't Hurt Anything because You Have these Resistors in Here To Limit the Inrush Current so There's no Harm no Foul with that so that I Kept that the Same

Because I Kind Of Want To Get this in a Safe Zone before We Start Playing Around Putting Power because these Vacuum Tubes in Here I Haven't Tested any of Them but They Sure Look Perfect I Have a Feeling this Thing Was Built in School as a Kit by the Student and Then He Took It Home and Never Used It so It Just Kind Of Sat on a Shelf for a Long Time and that's Why It's in Such Good Condition and Whoever Did It Did an Extraordinarily Good Job Wiring It It's Very Neat Very Neat Wire Runs and Everything

And if You Look Underneath Here Let's See if We Can See You Can See Where Does this Wire Go Here's the Red Wire Look Where It's Going and Guess What that Is and You See It Going Right To Ground So Essentially They Have that Wire on the Wrong Terminal and as a Result It They'Re Taking this and They'Re Just Running It Directly to Ground So this Is a Dead Short Which Is Probably Part of the Problems That They've Been Having with this Thing All Along

Saab Owners Workshop Manual

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

Lemon-Aid New Cars and Trucks 2012

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."
