Victorine Texts in Translation

This volume deals with the Trinity and Creation, central themes in the theology of the twelfth century Augustinian Canons of the Abbey of St. Victor.

Trinity and Creation

This volume collects works on spiritual life of the most influential religious writers of the Middle Ages. The Canons following the Rule of St Augustine at St Victor in Paris were some of the most influential religious writers of the Middle Ages. They combined exegesis and spiritual teaching in a theology that was deeply rooted in tradition but also attuned to current developments in the schools of Paris. This selection of their writings on the spiritual life is divided into three sections. The first presents three works by Achard and Richard which treat the development of Christian life from the beginnings of conversion to the perfection of love and contemplation. Prayer, meditation and the gifts of the Holy Spirit are the subjects of the works by Hugh and Richard included in the second section. The final section presents poetical, exegetical and homiletic works honoring Mary by Hugh, Adam, Richard, Godfrey, and Walter. This rich and representative sampling of Victorine works is a clear window into a world that still has much to offer modern readers.-- Publisher description.

Interpretation of Scripture

The version of the Rule of St Augustine used at the Abbey of St Victor began with the command to love God above all things and one's neighbor as oneself. Not surprisingly, then, love was a pervasive theme in the writings produced there, many of which are introduced and translated here : (1) five lyrical essays by Hugh of St Victor (d. 1141): The Praise of Charity; The Betrothal Gift of the Soul; In Praise of the Spouse; On the Substance of Love; What Truly Should Be Loved ?; (2) On the Four Degrees of Violent Love, by Richard of St Victor (d. 1173), which traces the likenesses and differences between romantic love and the love of God; (3) Achard of St Victor (d. 1170), Sermon 5 and two of Adam of St Victor's sequences are examples of how these authors wove love into their writings ; (4) excerpts

from the *Microcosmus* by Godfrey of St Victor (d. ca. 1195), summarize the central place of love in his humanistic theological anthropology.

Writings on the Spiritual Life-Victorine Texts in Translation

The Canons following the Rule of St Augustine at St Victor in Paris were some of the most influential religious writers of the Middle Ages. They combined exegesis and spiritual teaching in a theology that was deeply rooted in tradition but also attuned to current developments in the schools of Paris. The importance of Victorine Christology in this great age of theological speculation is unquestionable. The writings translated in this volume cover the foundational and maturing periods of Victorine Christology during the 1130s to the 1150s when Hugh of St Victor championed the paradigm of the assumed man (*homo assumptus*) and Robert of Melun advanced his Christology into the most comprehensive treatment in the twelfth century.

Interpretation of Scripture

Thanks to the pathbreaking work of Beryl Smalley, more than a half century ago, today we recognize the central place of the so-called School of Saint Victor in the history of biblical exegesis. By the mid-twelfth century, the abbey had gained a reputation for solid Christian teaching, with an emphasis on biblical studies and history. This volume contains commentaries and examples of biblical exegesis by Hugh and Andrew of Saint Victor, Sermons by Richard of Saint Victor and Maurice of Sully, the *Quaestiones in divina pagina* by Robert of Melun, Richard's invective against judaizers, *De Emmanuele*, and a poetic paraphrase of Ruth by Leonius of Saint Victor, encompassing the broad range of biblical exegetical practice at the abbey.

On Love

Starting from the theory of scriptural interpretation elaborated by Hugh of St Victor, the Augustinian Canons of twelfth-century St Victor in Paris were leading theorists and practitioners of scriptural exegesis. This volume contains translations of the exegetical theories elaborated in Hugh of St Victor's (d. 1141) *Didascalicon*, *On Sacred Scripture and its Authors*, *The Diligent Examiner*, and *On the Sacraments* (prologues); Andrew of St Victor's (d. 1175) prologues to select commentaries; Richard of St Victor's (d. 1173) *Book of Notes and Apocalypse* commentary; Godfrey of St Victor's *Fountain of Philosophy*; Robert of Melun's *Sentences*; and the anonymous *Speculum on the Mysteries of the Church*. The editors of this volume are Franklin T. Harkins (PhD, Notre Dame; Theology Dept. Fordham University), author of *Reading and the Work of Restoration: History and Scripture in the Theology of Hugh of St Victor* (2009) and Frans van Liere (PhD, Groningen; Dept. of History, Calvin College), editor of Andrew of St Victor's commentaries on Samuel and Kings (1996; ET 2010) and on the Twelve Prophets (2007, with Mark Zier) (*Corpus Christianorum, Continuatio Mediaevalis*), and author of a forthcoming book on the Bible in the Middle Ages.

Victorine Christology

The authors trace the history of the abbey, but focuses on the canons' life and ministry, theology, biblical exegesis during the twelfth century, concluding with an examination of reception of Victorine scholarship in the later Middle Ages.

On the Sacraments

In Richard of St. Victor's Theory of Imagination, Palmén advances a detailed analysis of the ideas about imagination of Richard of St. Victor (d. 1173), dealing with epistemology, the interpretation of biblical language, metaphors, rhetoric, and even the possibility of creative imagination.

Writings on the Spiritual Life

An annotated translation of Bonaventure's *Itinerarium mentis in Deum* presenting both the Latin text side-by-side with a new English translation which attempts to avoid the use of Latin cognates while remaining critically faithful to Bonaventure's text. Using endnotes to open the text, Regis Armstrong opens each chapter from the perspective of historical theology referring the reader to authors prior to Bonaventure, e.g. Augustine, the Victorines, Philip the Chancellor, Avicenna, as well as first-and-second-generation Franciscan authors. While maintaining Bonaventure's architectonic approach, Armstrong studies each chapter as Bonaventure does by focusing on its unique character, e.g. by means of cosmology, epistemology, biblical theology, mystical theology. In a same way, the translator attempts to explain his translation of certain cognates into Anglo-Saxon English by citing contemporary linguistic tools, e.g., Brepolis Latin Texts.

Interpretation of Scripture

This volume brings together a number of texts that shed light on life in the Abbey of Saint Victor in Paris, from its ideals to its daily routine. The *Liber ordinis* builds a framework and ideal vision for life at the Abbey of Saint Victor. Richard's *De quaestionibus*, Hugh's *De institutione novitiorum*, the letters of Odo, William of Aebelholt's *Vita*, and the other documents translated here reflect the spirit of Victorine reform. Its central theme was the *vita apostolica*, with its emphasis on sharing resources and living in a community. By incorporating prayer, pastoral care, moral discipline, and education, the Victorines believed their lifestyle would help to reform the greater Christian world that was so in need of restoration to the image in which God had created it. Many of the texts gathered here are translated into English for the first time, and are an invaluable resource for the study of the Abbey of Saint Victor, twelfth-century church reform, and medieval spirituality.

Interpretation of Scripture

This book provides new perspectives on the formation of Western intellectual history by contextualizing both Christian and Jewish exegesis from Theodulf of Orléans to Rashi (800–1100).

The Wiley-Blackwell Companion to Christian Mysticism

Truth and Reality: The Wisdom of St Bonaventure is a thorough study and exposition of the last work for which St Bonaventure was responsible before his death in 1274. Collations on the Hexaëmeron, also called The Illuminations of the Church, is comprised of lectures that he gave in Paris in 1273 to Franciscan and other students and masters in the university there. They were recorded by two independent witnesses, and one version, the definitive one, was prepared for publication and approved by Bonaventure. One of the most interesting, original and important texts of medieval theology, it has been well translated and edited in a new edition. In this study, Dales examines the precise context for the approach that Bonaventure took, placing this work as the culmination of his spiritual theology and providing the reader with a lucid epitome of the contents of the text, while drawing out their significance for theology and prayer in the life of the Church today.

On Love

The Oxford Handbook of Christian Monasticism addresses, for the first time in one volume, multiple strands of Christian monastic practice. Forty-four essays consider historical and thematic aspects of the Catholic, Eastern Orthodox, Oriental Orthodox, Protestant, and Anglican traditions, as well as contemporary 'new monasticism'.

Richard of St. Victor's Theory of Imagination

An accessible account of the Bible in the Middle Ages that traces the formation of the medieval canon.

Into God

The Oxford Handbook of Mystical Theology provides a guide to the mystical element of Christianity as a theological phenomenon. It differs not only from psychological and anthropological studies of mysticism, but from other theological studies, such as more practical or pastorally-oriented works that examine the patterns of spiritual progress and offer counsel for deeper understanding and spiritual development. It also differs from more explicitly historical studies tracing the theological and philosophical contexts and ideas of various key figures and schools, as well as from literary studies of the linguistic tropes and expressive forms in mystical texts. None of these perspectives is absent, but the method here is more deliberately theological, working from within the fundamental interests of Christian mystical writers to the articulation of those interests in distinctively theological forms, in order, finally, to permit a critical theological engagement with them for today. Divided into four parts, the first section introduces the approach to mystical theology and offers a historical overview. Part two attends to the concrete context of sources and practices of mystical theology. Part three moves to the fundamental conceptualities of mystical thought. The final section ends with the central contributions of mystical teaching to theology and metaphysics. Students and scholars with a variety of interests will find different pathways through the Handbook.

From Theodulf to Rashi and Beyond: Texts, Techniques, and Transfer in Western European Exegesis (800 – 1100)

What do Jews think scripture is? How do the People of the Book conceive of the Book of Books? In what ways is it authoritative? Who has the right to interpret it? Is it divinely or humanly written? And have Jews always thought about the Bible in the same way? In seventeen cohesive and rigorously researched essays, this volume traces the way some of the most important Jewish thinkers throughout history have addressed these questions from the rabbinic era through the medieval Islamic world to modern Jewish scholarship. They address why different Jewish thinkers, writers, and communities have turned to the Bible—and what they expect to get from it. Ultimately, argues editor Benjamin D. Sommer, in understanding the ways Jews construct scripture, we begin to understand the ways Jews construct themselves.

Truth and Reality

Francis of Assisi's reported reception of the stigmata on Mount La Verna in 1224 is almost universally considered to be the first documented account of an individual miraculously and physically receiving the five wounds of Christ. The early thirteenth-century appearance of this miracle, however, is not as unexpected as it first seems. Interpretations of Galatians 6:17--I bear the marks of the Lord Jesus Christ in my body--had been circulating since the early Middle Ages in biblical commentaries. These works perceived those with the stigmata as metaphorical representations of martyrs bearing the marks of persecution in order to spread the teaching of Christ in the face of resistance. By the seventh century, the meaning of Galatians 6:17 had been appropriated by bishops and priests as a sign or mark of Christ that they received invisibly at their ordination. Priests and bishops came to be compared to soldiers of Christ, who bore the brand (stigmata) of God on their bodies, just like Roman soldiers who were branded with the name of their emperor. By the early twelfth century, crusaders were said to bear the actual marks of the passion in death and even sometimes as they entered into battle. The Stigmata in Medieval and Early Modern Europe traces the birth and evolution of religious stigmata and particularly of stigmatic theology, as understood through the ensemble of theological discussions and devotional practices. Carolyn Muessig assesses the role stigmatics played in medieval and early modern religious culture, and the way their contemporaries reacted to them. The period studied covers the dominant discourse of stigmatic theology: that is, from Peter Damian's eleventh-century theological writings to 1630 when the papacy officially recognised the authenticity of Catherine of Siena's stigmata.

The Oxford Handbook of Christian Monasticism

An original and profound exploration of contemplation from philosopher, theologian, and poet Kevin Hart. In *Lands of Likeness*, Kevin Hart develops a new hermeneutics of contemplation through a meditation on Christian thought and secular philosophy. Drawing on Kant, Schopenhauer, Coleridge, and Husserl, Hart first charts the emergence of contemplation in and beyond the Romantic era. Next, Hart shows this hermeneutic at work in poetry by Gerard Manley Hopkins, Marianne Moore, Wallace Stevens, and others. Delivered in its original form as the prestigious Gifford Lectures, *Lands of Likeness* is a revelatory meditation on contemplation for the modern world.

Writings on the Spiritual Life

Christianity has understood the environment as a gift to nurture and steward, a book of divine revelation disclosing the divine mind, a wild garden in need of cultivation and betterment, and as a resource for the creation of a new Eden. This *Cambridge Companion* details how Christianity, one of the world's most important religions, has shaped one of the existential issues of our age, the environment. Engaging with contemporary issues, including gender, traditional knowledge, and enchantment, it brings together the work of international scholars on the subject of Christianity and the Environment from a diversity of fields. Together, their work offers a comprehensive guide to the complex relationship between Christianity and the environment that moves beyond disciplinary boundaries. To do this, the volume explains the key concepts concerning Christianity and the environment, outlines the historical development of this relationship from antiquity to the present, and explores important contemporary issues.

An Introduction to the Medieval Bible

Reading has become a problem--not just of attention, comprehension, or growing rates of illiteracy, but of politics, society, and religion. The questions of how and what to read are not just matters of taste. Answers are often indicative of one's entire view of culture, church, and the cosmos, as well as the impasses of religion, reason, and moral vision. As a result, reading has become divisive

and uninspiring. Reading has become a drag. The *Mystified Letter* offers a hopeful alternative to this malaise--a theology of reading centered on mystical encounter. It retrieves medieval Christian reading culture to build a constructive case for a mystical theology of literature. The mystification of literature in twelfth- and thirteenth-century monasteries and schools involved rhetorical, aesthetic, liturgical, and theological strategies that invested reading with a sense of ineffability and unintelligibility, wonder and awe, a disposition that applied not only to sacred but even secular literature. The *Mystified Letter* explores how *littera* (a Latin term meaning both "the letter" and "literature" itself) came to be a site of the sacred. By showing how medieval theologians, especially the Victorine monks of Paris, came to see the letter as a vehicle for encounter with the unknowable, unspeakable, and illegible God, The *Mystified Letter* shows how the practice of mystical reading can treat some of the spiritual ailments affecting both the church and the academy, and explores how we can foster reading cultures around the mystified letter today.

The Oxford Handbook of Mystical Theology

This book is a study of the nine short poems, called romances, composed by the Spanish mystic Saint John of the Cross (San Juan de la Cruz). The focus of the poems is the Trinity, and their point of departure is the opening verses of the Gospel of John. This is the first in-depth, English-language analysis of these poems, and looks at their literary, historical, scriptural, theological, and mystical elements. It also ties these works to San Juan's better-known lyrical poems and his prose commentaries. It will appeal to anyone interested in Spanish mystical poetry and the sources that inform that poetry.

American Benedictine Review Preview

The treatise by the Pseudo-Dionysius *De Mystica Theologia* was translated into Latin in the ninth century, but it had to await the first decades of the thirteenth to receive interpretation and commentary. Thomas Gallus, a member of the Victorine School at Paris, glossed the Latin version of Iohannes Sarracenus in 1233. This new, critical edition and translation are based upon all five manuscripts, two of which are recent discoveries. The commentary by Bishop Grosseteste was made at Lincoln around 1242. It was based upon his new version of the Greek text. Both are published here with a translation. These earliest Latin commentators ventured a full-scale reappropriation of the contents of *The Mystical Theology*. They explored the trans-conceptual ecstasy of the individual soul that passes through purification and illumination to union with God by means of an exceptional grace of divine love. Between them they provided the context which not only the later mystical theology of monastery and university but also the actual spiritual experience of countless souls was formed.

The Stigmata in Medieval and Early Modern Europe

The Trinity is the central mystery of the Christian faith. What can we say about the divine nature, and what does it mean to say that God is Father, Son, Holy Spirit, three persons who are one in being? In this book, best selling author Thomas Joseph White, OP, examines the development of early Christian reflection on the Trinity, arguing that essential contributions of Patristic theology are preserved and expanded in the thought of Thomas Aquinas. By focusing on Aquinas' theology of the divine nature as well as his treatment of divine personhood, White explores in depth the mystery of Trinitarian monotheism. *The Trinity: On the Nature and Mystery of the One God* also engages with influential proposals of modern theologians on major topics such as Trinitarian creation, Incarnation

and crucifixion, and presents creative engagements with these topics. Ultimately any theology of the cross is also a theology of the Trinity, and this book seeks to illustrate how the human life, death, and resurrection of Jesus reveal the inner life of God as Trinity.

Lands of Likeness

The idea of determinate or single meaning in biblical interpretation has long been considered to be a purely modern idea, indissolubly wedded to the hermeneutics of historical criticism. At a time when historical criticism is increasingly viewed with theological suspicion, it must be asked whether determinate meaning has a future in biblical interpretation. *Written for Our Learning* explores the various expressions of single meaning within Christian theology, from the apostolic period to the present, and argues for the preservation of the discernment of determinate meaning as the goal of biblical reading and study.

The Cambridge Companion to Christianity and the Environment

In a growing secular society, what distinguishes a Christian from a non-Christian? Is a Christian identified by certain religious and ceremonial activity, social action, principles, or do their relationships identify them as Christian? This book suggests that a Christian person is in a continual relationship with the Triune God through the Holy Spirit. Furthermore, this living relationship reflects the eternal relationship of the Father, Son, and Holy Spirit, because people have been created in the image and likeness of the Triune God. This book uses historical, theological, philosophical, and biblical approaches to understand the Christian person. Throughout this book, the reader will be engaged with the modern Greek theologian, John Zizioulas. However, this book is a study on the person of the Holy Spirit, though never separated from the trinitarian relationship, who makes a human person a Christian.

Chinese-English Dictionary of Chinese Medical Terms

Containing over 33,000 terms, the Chinese-English Dictionary of Chinese Medicine is the largest, fully searchable list of Chinese medical terms ever published. It is the only sufficiently comprehensive list of Chinese medical terms to be an ultimate go-to for any translator, student, or clinician. It contains a

vast array of general terms, including the 5,000 or more of Practical Dictionary of Chinese Medicine (Paradigm Publications, 1997). It also contains the 1,500 standard and alternate acupoint names from Grasping the Wind (Paradigm Publications, 1989) and over 10,000 standard and alternate names of medicinals described in the Comprehensive Chinese Materia Medica (Paradigm Publications, 2023) derived from the Zhong Yao Da Ci Dian. The present e-book version offers maximum searchability without the need of indexes. Chinese terms are given in simplified and complex characters, so that they can be found by anyone who knows Chinese. Pinyin is given in accented and unaccented form, so that users can search by it whether they know the tones or have a system capable of entering tone marks. General terms can be searched by English, acupoints by alphanumeric codes, and medicinals can be searched by English and Latin pharmacognostic names. To make for the greatest utility without overly burdening the text, a standard set of graphical indicators are used throughout this and other related e-books. Square brackets ([]) indicate elements of terms that can be omitted (such as omissible elements of medicinal names) or notes to Chinese and English terms. A double asterisk (**) indicates polysemous medicinal names. A gray sidebar in the left-hand margin indicates a commonly used item. This dictionary has a history of over thirty years of continual expansion and refinement. It began with a database created while writing Fundamentals of Chinese Medicine (Paradigm Publications, 1985). It was published in the form of Glossary of Chinese Medical Terms (Paradigm Publications in 1990). It was expanded and republished in the form of the English-Chinese, Chinese-English Dictionary of Chinese Medicine (Hunan Science and Technology Press, 1995). And in 2014, after further expansion, it was made available as the Online TCM Dictionary on Paradigm Publications' website. These decades of development and publication have given the terms here presented the benefit of other scholars' contributions, as well as the refinements inspired by public critique. Chinese-English Dictionary of Chinese Medicine is an invaluable asset for translators and teachers engaged in compiling or presenting information from primary sources. As a bilingual term list, it has met the critical test of actual translations of the classical Chinese medical texts, the Sheng Han Lun (Paradigm Publications, 1999) and Jinchao Guo Yao Lue (Paradigm Publications, 2013) Chinese Medicine: Theories of Modern Practice (Paradigm Publications, 2022) shows this terminology to be up to the challenge of presenting the entire theoretical knowledge of professional Chinese medical education. This e-book version offers translators suggestions for translation problems they come across in their work, without proprietary restrictions and at an extremely low cost. However, the notion that Chinese medicine does not possess a terminology that requires a corresponding terminology in English and other languages has not faded from the Western world. In view of this, the present work also includes an introduction explaining issues surrounding terminology and translation.

We are all haunted by histories. They shape our presuppositions and ballast our judgments. In terms of science and religion this means most of us walk about haunted by rumors of a long war. However, there is no such thing as the "history of the conflict of science and Christianity," and this is a book about it. In the last half of the twentieth century a sea change in the history of science and religion occurred, revealing not only that the perception of protracted warfare between religion and science was a curious set of mythologies that had been combined together into a sort of supermyth in need of debunking. It was also seen that this collective mythology arose in the nineteenth and twentieth centuries by historians involved in many sides of the debates over Darwin's discoveries, and from there latched onto the public imagination at large. Flat Earths and Fake Footnotes takes the reader on a journey showing how these myths were constructed, collected together, and eventually debunked. Join us for a story of flat earths and fake footnotes, to uncover the strange tale of how the conflict of science and Christianity was written into history.

Tian Gan Nei Gong is indispensable to the practice of Ba Gua Zhang and the martial arts in general. The Tian Gan Exercises develop the ability of the legs and waist to generate the torsional spiraling power known as "Silk Reeling" Energy. Tian Gan also trains the correct internal mechanics for many of Ba Gua Zhang's martial actions such as: piercing (chuan), chopping (kan), splitting (pi), drilling (zuan), rolling (gun), pulling (la), leading (ling), seizing (na), covering (gai), overturning (fan), pressing (an), uplifting (tiao), rotating (zhuan), twisting (ning), coiling (chan) and wrapping (guo). Tian Gan literally means "Heavenly Stem." The name Tian Gan refers to the longitudinal energetic axis or stem (the "Central Channel") that passes through the body. In practicing Tian Gan Nei Gong, the spiraling and turning actions of the body and Central Channel, combined with the movements of the arms and legs, stimulate and open the meridians, while simultaneously "wringing out" the spine and its surrounding structures. This helps maintain the health of the spine, the brain and the nervous system. Tian Gan Nei Gong can be an important adjunctive practice method for various types of Daoist meditation, and a useful pre-requisite to Micro-Cosmic Orbit meditation. Ba Gua Spinal Meditation is a unique training method that enables one to sense the subtle internal movements of the spine. A detailed discussion of Spinal Meditation is included in this book because this exercise forms a natural complement to the Tian Gan

Robert Altman's Soundtracks

This title explores the issue of innovation engineering, a feature that is essential to the continuation of growth and development in the commercial world. Discussion is divided into three parts: Part I covers the historical basis of innovation, noting that diversity rests upon a duality between concepts in theory and applications put into practice, as well as discussing how innovation has resulted from the interaction of numerous factors, be they societal, human, managerial, organization or technological. Part II focuses on practical applications – the technologies, tools and methods employed in putting theoretical innovation into practice – while Part III looks at what factors underpin success, discussing the social and psychological aspects involved in successful innovation engineering. Consideration is also given to recent developments and systems which will assist in ensuring the continuation of this process in the future.

Aging & Blood Stasis

A unique interdisciplinary study, this book examines the British and European tradition of the wren hunt, in which a bird ordinarily revered and protected for most of the year was killed around the time of the annual solstice. In focusing on this ancient ritual, Elizabeth Atwood Lawrence draws on her training in cultural anthropology and biology to cast a fresh light on the complexities of human-animal relationships. Following an introductory chapter on animal symbolism, Lawrence proceeds in subsequent chapters to describe the wren both as a biological entity and as the subject of numerous tales and legends, to delineate the details of the wren hunt ceremony and the various meanings ascribed to it, and, finally, to relate the ceremony to important contemporary issues in human-animal interactions and current attitudes toward the living environment. Whereas most other studies tend to concentrate solely on human perceptions of animals and fail to include the animal's role in the relationship, Lawrence's approach shows how the participation of both animal and human determines the symbolic status of the animal -- which in turn influences the treatment of that animal within a particular society. At a time when human destructiveness toward nature has reached tragic proportions, Lawrence contends, it is critical that we understand the processes by which certain cultural beliefs, in combination with observations about the natural history of a particular animal, result in emotional and mental responses that may ultimately determine the fate of that species. The author argues persuasively that the wren hunt -- with

its ancient roots, associated beliefs, and complex meanings in the preindustrialized world -- still has much to teach us.

This book is a textbook and clinical manual on the treatment of modern Western medical diseases with Chinese medicine. By modern Western medical diseases, we mean all the disease categories of Western medicine excluding gynecology and pediatrics. By Chinese medicine, we mean standard contemporary professional Chinese medicine as taught at the two dozen provincial Chinese medical colleges in the People's Republic of China. The two main therapeutic modalities used in the practice of this style of Chinese medicine are acupuncture-moxibustion and the internal administration of multi-ingredient Chinese medicinal formulas. Treatment plans for each disease discussed herein are given for each of these two main modalities.

Hide production is one of the oldest crafts known to humans. Yet this is the first volume to critically explore the gendered nature of this universal activity amongst hunters-gatherers for its meaning in craft production, status, identity and cultural change. Using ethnoarchaeological and archaeological examples from North America and Africa, the authors provide new insights of the gendered nature of human behavior.

Two questions are braided together in Luke's Gospel. Who is Jesus, and what does it mean to be his student and apprentice? The church has spent much of its intellectual energies on the first question, but not so much on the second. We are precise in our Christology and vague in our Discipleology (my new word!). Of the four biographies that open the New Testament, Luke is perhaps the best equipped to answer the question of what it means to follow Jesus along with others, and what we can expect in the process. Luke's Gospel is dense with story after story about Jesus's stumbling, goofy, persistent disciples. And his second volume—Acts—continues the tale. There is a deep continuity, as Luke teaches, between Jesus's original disciples and the ones who later declared their allegiance to him after his resurrection. We walk in the footsteps of pioneers in this new way of living with a Jesus who is always near but just beyond sight. The aim of this book is to plunder the fruits of New Testament scholarship, especially the tools of rhetorical and narrative criticism, to highlight what an incredible adventure came with the call to follow me.

The argument of this book is that the divide between psychiatry and religion is an artificial one and that there is much room for understanding the same phenomena from different perspectives. In it thirteen senior mental health professionals and pastoral workers come together to explore what their different philosophies have to offer each other for the benefit of the individuals in their care. The book as a whole: * sets the relationship between psychiatry and religion in historical context * provides detailed information about specific religions and the significance of their belief systems for mental health management * examines the relationship between psychopathology, psychiatry and religion.

Master Sorai's Responsals was to eighteenth-century Japan what *The Prince* was to Renaissance Italy. Like Machiavelli, Ogyu Sorai (1666-1728) was a humanist scholar who served a prince (one of the shogun's chief lieutenants) and drew on his experiences as a house philosopher and on his vast knowledge of history and political affairs in his work. In 1720, when he began to write the letters that comprise this text, the Tokugawa regime was more than a hundred years old and beset with grave administrative and fiscal problems, about which Sorai had much to say. Samuel Yamashita's impressive translation of this work offers modern readers a rare glimpse of the prevailing political discourse of the day and the specific concepts that rulers had at their disposal as they struggled to manage their domains, find talented men for their bureaucracies, create new sources of revenue, and keep their subjects well fed and happy. Sorai himself, of course, is a presence in the text. He is by turns earnest, frank, impatient, utterly confident, and occasionally condescending. Unlike his Renaissance counterpart, he is something of an optimist: he was convinced that the introduction of archaic Chinese culture and institutions to Japan would solve its myriad problems. Well-versed in Chinese history, philosophy, religion, medicine, and belles lettres, Sorai holds forth on everything from archaic Chinese divination to Sung poetry and prose. He offers advice on how to become a Confucian gentleman, how to learn to read classical Chinese, and which books to read and which to avoid. He even discusses his belief in a sentient, Chinese-style “heaven,” a topic not well understood by modern scholars. Long regarded as one of Sorai's best works, **Master Sorai's Responsals** bristles with the sharp and clear opinions of the most influential thinker of Tokugawa Japan.

Selected as a Book of the Year 2016 in the Guardian Shortlisted for the International Dylan Thomas Prize 'One of the most compelling and unusual novels I've read this year.... A fascinating story of hunters and observers, old mythical gods and modern politics.' Sarah Hall, Guardian Books of the Year When a young elephant is brutally orphaned by poachers, it is only a matter of time before he begins terrorising the countryside, earning his malevolent name from the humans he kills and then tenderly buries with leaves. Manu, the studious son of a rice farmer, loses his cousin to the Gravedigger and is drawn into the alluring world of ivory hunting. Emma is working on a documentary set in a Kerala wildlife park with her best friend. Her work leads her to witness the porous boundary between conservation and corruption and she finds herself caught up in her own betrayal. As the novel hurtles toward its tragic climax, these three storylines fuse into a wrenching meditation on love and revenge, fact and myth, duty and sacrifice. In a feat of audacious imagination and arrestingly beautiful prose, *The Tusk That Did the Damage* tells an original and heartbreaking story about how we treat nature, and each other. *Tania James's spellbinding new novel *Loot* is available for pre-order now!*

Advancing to higher levels of ritual magic with purpose and power requires an exaltation of consciousness—a spiritual transformation that can serve as an antidote to the seeming banality of modern life. Based on Kabbalistic techniques, the teachings of the Hermetic Order of the Golden Dawn, and an Hermetic tradition spanning nearly two thousand years, this innovative new work introduces the history of the Golden Dawn and its mythology, the Tree of Life, Deities, demons, rules for practicing magic, and components of effective ritual. A comprehensive course of self-initiation using Israel Regardie's seminal *Golden Dawn as a Key Reference Point*, *Kabbalah, Magic and the Great Work of Self-Transformation* guides you through the levels of the Golden Dawn system of ritual magic. Each grade in this system corresponds with a sphere in the Kabbalistic Tree of Life and includes daily rituals, required reading, written assignments, projects, and additional exercises. A History of Codex Bezae's Text in the Gospel of Mark

As the principal Greek witness of the so-called "Western" tradition of the gospels and Acts, Codex Bezae's enigmatic text in parallel Greek and Latin columns presents a persistent problem of New Testament textual criticism. The present study challenges the traditional view that this text represents a vivid retelling of the canonical narratives cited by ancient writers from Justin Martyr to Marcion and translated early into Syriac and Latin.

Alexander the Great is the towering hero of the classical world: a fearless general, the conqueror of the Persians, and the visionary ruler of a vast empire. In this seminal biography, Paul Cartledge, one of the world's foremost scholars of ancient Greece, gives us the most reliable and intimate portrait of the man himself. Cartledge brilliantly evokes Alexander's remarkable political and military accomplishments, cutting through the myths to show why he was such a great leader. He explores our endless obsession with Alexander and gives us insight into both his capacity for brutality and his sensitive grasp of international politics. As he brings Alexander vividly to life, Cartledge also captures his enduring impact on world history and culture.

Everyone needs food to live. It gives you energy to work and play. It also gives you nutrients to grow well and stay healthy. Do you eat a balanced diet with lots of different nutrients ?

Your body needs proteins to build muscles. Proteins are also important for healthy hair and fingernails. You can get lots of proteins from meat, fish and eggs. Dairy products, like milk, cheese and yogurt, also contain proteins. Many people don't eat animal products, but they can get proteins from plant products. Pulses, like beans and lentils, are rich in proteins. Many grains, nuts and seeds have proteins, too. Which of these foods do you eat?

of meat and fish have a lot of fats. Dairy products, like butter and cheese, have fats, too. You can also get fats from plant products like nuts, seeds and vegetable oils. Be careful! Too many fats can make you fat.

Your body also needs minerals. You need calcium for strong bones and healthy teeth. Dairy products, like milk and yogurt, are good sources of calcium. You also need iron for healthy blood. Most waste materials decompose. They break down into very small pieces. Food waste decomposes fast, but some waste materials decompose slowly. Paper materials take from two to five months to decompose. Some metal materials take from eighty to one hundred years, and plastic materials take maybe up to one thousand years. Some materials, like glass, never decompose.

The sun is a star. It's very, very hot! The sun has lots of heat and light. Heat and light from the sun come to Earth. The heat and light make Earth warm so we can live here. Light from the sun comes to Earth in eight minutes.

Some places are warm and sunny all year, and they have no seasons. Some places have seasons. In summer, there's more light from the sun, so it's warm. In winter, there's less light from the sun, so it's cold. Is it warm and sunny where you live?

¡Viva Cristo Rey!

Between 1926 and 1929, thousands of Mexicans fought and died in an attempt to overthrow the government of their country. They were the Cristeros, so called because of their battle cry, ¡Viva Cristo Rey!—Long Live Christ the King! The Cristero rebellion and the church-state conflict remain one of the most controversial subjects in Mexican history, and much of the writing on it is emotional polemic. David C. Bailey, basing his study on the most important published and unpublished sources available,

strikes a balance between objective reporting and analysis. This book depicts a national calamity in which sincere people followed their convictions to often tragic ends. The Cristero rebellion climaxed a century of animosity between the Catholic church and the Mexican state, and this background is briefly summarized here. With the coming of the 1910 revolution the hostility intensified. The revolutionists sought to impose severe limitations on the Church, and Catholic anti-revolutionary militancy grew apace. When the government in 1926 decreed strict enforcement of anticlerical legislation, matters reached a crisis. Church authorities suspended public worship throughout Mexico, and Catholics in various parts of the country rose up in arms. There followed almost three years of indecisive guerrilla warfare marked by brutal excesses on both sides. Bailey describes the armed struggle in broad outline but concentrates on the political and diplomatic maneuvering that ultimately decided the issue. A de facto settlement was brought about in 1929, based on the government's pledge to allow the Church to perform its spiritual offices under its own internal discipline. The pact was arranged mainly through the intercession of U.S. Ambassador Dwight Morrow. His role in the conflict, as well as that of other Americans who decisively influenced the course of events, receives detailed attention in the study. The position of the Vatican during the conflict and its role in the settlement are also examined in detail. With the 1929 settlement the clergy returned to the churches, whereupon the Cristeros lost public support and the rebellion collapsed. The spirit of the settlement soon evaporated, more strife followed, and only after another decade did permanent religious peace come to Mexico.

The Best of American Heritage: The Old West

Here in this remarkable collection from American Heritage, such noted authors as Tom Brokaw, Wallace Stegner, John Lukacs, and others bring to life many of the most famous men and women of the Old West - from Lewis and Clark to Charles Frémont, Billy the Kid, Wyatt Earp, Chief Joseph, Frederick Remington, the defenders of the Alamo, the Texas Rangers, and the riders of the Pony Express. It also shines a light on topics such as the origins of scalping, the famous Lincoln County War, the grim medical reality of Western gunfights, cowboy jargon, and the first rodeo.

A comprehensive overview of New Mexican folk arts from the 16th century to the present time.

The National union catalog, 1968-1972

As a social phenomenon and a commonplace of internet culture, virality provides a critical vocabulary for addressing questions raised by the global mobility and reproduction of early modern artworks. This book uses the concept of virality to study artworks' role in the uneven processes of early modern globalization. Drawing from archival research in Asia, Europe, and the Americas, Stephanie Porras traces the trajectories of two interrelated objects made in Antwerp in the late sixteenth century: Gerónimo Nadal's *Evangelicae historiae imagines*, an illustrated devotional text published and promoted by the Society of Jesus, and a singular composition by Maerten de Vos, *St. Michael the Archangel*. Both were reproduced and adapted across the early modern world in the seventeenth century. Porras examines how and why these objects traveled and were adopted as models by Spanish and Latin American painters, Chinese printmakers, Mughal miniaturists, and Filipino ivory carvers. Reassessing the creative labor underpinning the production of a diverse array of copies, citations, and reproductions, Porras uses virality to elucidate the interstices of the agency of individual artists or patrons, powerful gatekeepers and social networks, and economic, political, and religious infrastructures. In doing so, she tests and contests several analytical models that have dominated art-historical scholarship of the global early modern period, putting pressure on notions of copying, agency, context, and viewership. Vital and engaging, *The First Viral Images* sheds new light on how artworks, as agents of globalization, navigated and contributed to the emerging and intertwined global infrastructures of Catholicism, commerce, and colonialism.

This bilingual anthology brings together a collection of Spanish entremeses, the comic interludes that were performed between the acts of a comedia. Penned by authors such as Lope de Rueda, Cervantes, Calderón, Quevedo, and Quiñones de Benavente, many of these plays appear here for the first time in English. Translated for performability, these plays create a panoramic view of one-act plays from Spain's classical theater period. Presented with discussions of dramaturgical and performance possibilities and difficulties, including relevant historical, cultural, and social information for the plays, the collection opens with two precursors to the entremés, moves through the breadth of the entremés form, and concludes with works from the 18th century, including a sainete. There are also examples of trans-adaptation that show how these works can be interpreted through strong directorial concepts that relocate the plays in historical time and location. The selected titles raise challenges to social mores and expectations, surprise with their humor, and delight with their stagecraft. Whether aimed at the classroom or the stage, the collection is valuable for research, pedagogy, and performance.

National Union Catalog

In Search of the Sacred Book studies the artistic incorporation of religious concepts such as prophecy, eternity, and the afterlife in the contemporary Latin American novel. It departs from sociopolitical readings by noting the continued relevance of religion in Latin American life and culture, despite modernity's powerful secularizing influence. Analyzing Jorge Luis Borges's secularized "narrative theology" in his essays and short stories, the book follows the development of the Latin American novel from the early twentieth century until today by examining the attempts of major novelists, from María Luisa Bombal, Alejo Carpentier, and Juan Rulfo, to Julio Cortázar, Gabriel García Márquez, and José Lezama Lima, to "sacralize" the novel by incorporating traits present in the sacred texts of many religions. It concludes with a view of the "desacralization" of the novel by more recent authors, from Elena Poniatowska and Fernando Vallejo to Roberto Bolaño.

Before there was Che Guevara, there was Emiliano Zapata, the charismatic revolutionary who left indelible marks on Mexican politics and society. The sequel to Samuel Brunk's 1995 biography of Zapata, *The Posthumous Career of Emiliano Zapata* traces the power and impact of this ubiquitous, immortalized figure. Mining the massive extant literature on Zapata, supplemented by archival documents and historical newspaper accounts, Brunk explores frameworks of myth and commemoration while responding to key questions regarding the regime that emerged from the Zapatista movement, including whether it was spawned by a genuinely "popular" revolution. Blending a sophisticated analysis of hegemonic systems and nationalism with lively, accessible accounts of ways in which the rebel is continually resurrected decades after his death in a 1919 ambush, Brunk delves into a rich realm of artistic, geographical, militaristic, and ultimately all-encompassing applications of this charismatic icon. Examining all perspectives, from politicized commemorations of Zapata's death to popular stories and corridos, *The Posthumous Career of Emiliano Zapata* is an eloquent, engaging portrait of a legend incarnate.
