Death in the Long Grass

As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's *Death in the Long Grass* takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it—leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, *Death in the Long Grass* portrays the great killers of the African bush—not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some of the most ferocious killers in the world—underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle.

Combat Operations: Stemming the Tide, May 1965 to October 1966 (Paperback)

Combat Operations: Stemming the Tide describes a critical chapter in the Vietnam conflict, the first eighteen months of combat by the U.S. Army's ground forces. Relying on official American and enemy primary sources, John M. Carland focuses on initial deployments and early combat and takes care to present a well-balanced picture by discussing not only the successes but also the difficulties endemic to the entire effort. This fine work presents the war in all of its detail: the enemy's strategy and tactics, General William C. Westmoreland's search and destroy operations, the helicopters and airmobile warfare, the immense firepower American forces could call upon to counter Communist control of the battlefield, the out-of-country enemy sanctuaries, and the allied efforts to win the allegiance of the South Vietnamese people to the nation's anti-Communist government. Carland's volume demonstrates that U.S. forces succeeded in achieving their initial goals, but unexpected manpower shortages made Westmoreland realize that the transition from stemming the tide to taking the offensive would take longer. Bruising battles with the Viet Cong and North Vietnamese in the Saigon area and in the Central Highlands had halted their drive to conquest in 1965 and, with major base development activities afoot, a series of high-tempo spoiling operations in 1966 kept them off balance until more U.S. fighting units arrived in the fall. Carland credits the improvements in communications and intelligence, the helicopter's capacity to extend the battlefield, and the availability of enormous firepower as the potent ingredients in Westmoreland's optimism for victory, yet realizes that the ultimate issue of how effective the U.S. Army would be and what it would accomplish during the next phase was very much a question mark.

Lesson Plan

A fascinating exploration of the profound loss of pleasure in our daily lives and the seven steps for restoring it. Pleasure. We know what it feels like and many of us spend our days trying to experience it. But can too much pleasure actually be bad for us? Yes, says Dr. Archibald Hart, clinical psychologist and expert in behavioral psychology. Backed by recent brain-imaging research, Dr. Hart shares that to some extent, our pursuit of extreme and overstimulating thrills hijacks our pleasure system and robs us of our ability to experience pleasure in simple things. We are literally being thrilled to death. In this insightful book, Dr. Hart explores the stark rise in a phenomenon known as anhedonia, an inability to experience pleasure or happiness. Previously linked only to serious emotional disorders, anhedonia is now seen as a contributing factor in depression (specifically nonsadness depression) and in the growing number of people who complain of profound boredom. This emotional numbness and loss of joy are results of the overuse of our brain's pleasure circuits. In *Thrilled to Death*, Dr. Hart explains the processes of the brain's pleasure center, the damaging trends of overindulgence and overstimulation,

the signs and problems of anhedonia, and the seven important steps we must take to recover our wonderful joy in living.

A thought experiment in future-shock survivalism' Robert MacFarlane 'Gripping ... of all science fiction's apocalypses, this is one of the most haunting' Financial Times WITH AN INTRODUCTION BY ROBERT MACFARLANE A post-apocalyptic vision of the world pushed to the brink by famine, John Christopher's science fiction masterpiece *The Death of Grass* includes an introduction by Robert MacFarlane in Penguin Modern Classics. At first the virus wiping out grass and crops is of little concern to John Custance. It has decimated Asia, causing mass starvation and riots, but Europe is safe and a counter-virus is expected any day. Except, it turns out, the governments have been lying to their people. When the deadly disease hits Britain, society starts to descend into barbarism. As John and his family try to make it across country to the safety of his brother's farm in a hidden valley, their humanity is tested to its very limits. A chilling psychological thriller and one of the greatest post-apocalyptic novels ever written, *The Death of Grass* shows people struggling to hold on to their identities as the familiar world disintegrates - and the terrible price they must pay for surviving. John Christopher (1922-2012) was the pen name of Samuel Youd, a prolific writer of science fiction. His novels were popular during the 1950s and 1960s, most notably *The Death Of Grass* (1956), *The World in Winter* (1962), and *Wrinkle in the Skin* (1965), all works depicting ordinary people struggling in the midst of apocalyptic catastrophes. In 1966 he started writing science-fiction for adolescents; *The Tripods* trilogy, the *Prince in Waiting* trilogy (also known as the *Sword of the Spirits* trilogy) and *The Lotus Caves* are still widely read today. If you enjoyed *The Death of Grass*, you might like John Wyndham's *The Day of the Triffids*, also available in Penguin Modern Classics.

The Death of Grass

What challenges will America face in armed conflicts of the future and how will we prepare for them? National security depends upon the ability of the military to "predict" the future nature of war. Despite the difficulty in making such predictions, one must remember: nation states and other countries will continue to use armed conflict as a means to further their aims, and these aims will, at times, run contrary to American interests. As a result, the United States will continue to be confronted with armed conflict in the days and years ahead. A military theorist and experienced armor officer, Brian Steed provides insights into the future of armed conflict by focusing on what has occurred in the past—not because the past repeats itself, but because it reveals timeless principles of warfare. Five battles, one each in Korea, Vietnam, the Falklands, the Persian Gulf, and Somalia are analyzed historically, geographically, and strategically. Steed's analysis of these engagements clearly demonstrates that the key to victory on the battlefields of the future is the small unit. In refreshing layman's prose, the author focuses on why the events occurred as they did, and explores the significance of each battle in terms of its political and military ramifications. He concludes with lessons learned that will greatly benefit future American ground combat commanders. *Armed Conflict* informs the reader about the historical trends of combat operations and the realities of war—today and into the future. It will also serve to guide a new generation of military and civilian leaders as they prepare to face the inevitable conflicts in the new century.

The Honourable Mr. Martindale welcomes life as a recluse. A widower, he's made his fortune and now hopes to dedicate his time to working the land and raising his two young children—free of interference from the locals. Yet before long Lady Theresa has worked her way into Martindale's quiet life and hatched an outrageous plan to win the village's approval for both the man and his unusual children. But what she fails to see is how badly the plan could backfire, or how it could jeopardize her own place in a family she has come to cherish—and in the heart of the man she has come to love. Lesson Plans in Fourth Grade History

A Los Angeles Times Notable Book: Short fiction by the author of *Eveningland*, "a writer of the first rank" (*Esquire*). "These 10 distinctive and intensely affecting stories confirm Knight as a writer of significant gifts. In short narratives that invariably entice the reader with an arresting opening sentence, he establishes a solid sense of place, using the local color of his native Alabama, and transforms ordinary people into nearly mythic figures. The first story, 'Now You See Her,' sets the stage, constructing a conflict of nearly Oedipal proportions. A veterinarian widower and his teenage son, Xavier, who calls himself X, spy on Grace, their next-door neighbor, who 'it would appear . . . renounced clothing altogether'; the surprising climax occurs when her dog suddenly takes ill. In many of Knight's offerings, animals act as agents of change: in the title story, a dogfight is the catalyst for an adulterous affair and results in a parallel clash between the dogs' owners. 'Gerald's Monkey' uses a man's desire for a pet monkey to examine the emotional aftermath of Vietnam. Knight demonstrates agility with a diversity of viewpoints: he is equally at ease with first-person narration or third, an adult perspective or an adolescent's, as in a stunner called 'A Bad Man, So Pretty' (taken from a Muhammad Ali quote) that works up to a Cain and Abel-style confrontation. Knight's characters are both recognizable and transcendent, suddenly drawn into trespassing the ordinary limits of their lives to enter the realm of allegory." —Publishers Weekly
