Higher-Grade English: History of the Language: Analysis, Style, Prosody

In the 19th century, education became accessible to much wider circles of society in a great number and variety of schools and the teaching of grammar came to be obligatory from 1870/72 with the advent

of general education. Whereas these general trends of the 19th century are well-known to scholars working in different disciplines of social history, and the history of education in particular, it is still true that major sections of the evidence are largely uncollected. This is especially so for school books: there is virtually a gap between the 18th century and the present grammatical tradition. This bibliography lists some 1930 works on English grammar published in the 19th century, mainly in Britain and the US, half of which are accompanied by short descriptions of their physical make-up, content and affiliation.

Comparative Stylistics of Welsh and English

The comparative analysis of Welsh and English found in this book is based on a translation corpus consisting of just over thirty novels and autobiographies from the late nineteenth century up to the early twenty-first century. Many of the original Welsh texts contain stylistic features which, in a context of intense bilingualism with English, benefit from the deliberate discussion and analysis in this volume. However, the work is intentionally descriptive rather than prescriptive, laying out patterns that are observed in the corpus, and making them available to Welsh writers and translators to adopt if or as required. As similarly the classic work in the field by Vinay and Darbelnet, this book examines its topics through the lens of translation techniques such as transposition, modulation and adaptation.

Investigating English Style

A series to meet the need for books on modern English that are both up-to-date and authoritative. For the scholar, the teacher, the student and the general reader, but especially for English-speaking students of language and linguistics in institutions where English is the language of instruction, or advanced specialist students of English in universities where English is taught as a foreign language.

A Dictionary of Stylistics

This text provides a valuable reference work for students and teachers of stylistics. This edition explains terminology clearly and concisely, and unravels many ambiguities.

Critical Stylistics

This original and engaging textbook is concerned with stylistic choices, and the textual analysis which can illuminate the choices that a text producer has made. It combines the strengths of two approaches – critical discourse analysis and stylistics – to uncover the deep-seated ideologies of everyday texts. In so doing, it introduces a comprehensive set of tools which will help readers to explain and analyse the power of written texts. Each chapter focuses on a particular linguistic feature – such as naming and describing, prioritizing, negating, and hypothesizing – gives an overview of its argument and then explains the technical aspects of the feature along with a wealth of examples. This book will be ideal reading for students on a wide range of courses, including stylistics, discourse analysis, critical discourse analysis, English functional grammar and advanced composition.

Language in Literature

Over a period of over forty years, Geoffrey Leech has made notable contributions to the field of literary stylistics, using the interplay between linguistic form and literary function as a key to the 'mystery' of how a text comes to be invested with artistic potential. In this book, seven earlier papers and articles, read previously only by a restricted audience, have been brought together with four new chapters, the whole volume showing a continuity of approach across a period when all too often literary and linguistic studies have appeared to drift further apart. Leech sets the concept of 'foregrounding' (also known as defamiliarization) at the heart of the interplay between form and interpretation. Through practical and insightful examination of how poems, plays and prose works produce special meaning, he counteracts the 'flight from the text' that has characterized thinking about language and literature in the last thirty years, when the response of the reader, rather than the characteristics and meaning potential of the text itself, have been given undue prominence. The book provides an enlightening analysis of well-known (as well as less well-known) texts of great writers of the past, including Keats, Shelley, Samuel Johnson, Shaw, Dylan Thomas, and Virginia Woolf.

Language, Discourse and Literature

This collection shows students of English and applied linguistics ways in which language and literary study can be integrated. By drawing on a wide range of texts by mainly British and American writers, from a variety of different periods, the contributors show how discourse stylistics can provide models for the systematic description of, for example, dialogue in fiction; language of drama and balladic poetry; speech presentation; the interactive properties of metre; the communicative context of author/reader. Among the texts examined are novels, poetry and drama by major twentieth-century writers such as Joyce, Auden, Pinter and Hopkins, as well as examples from Shakespeare, Donne and Milton. Each chapter has a wide range of exercises for practical analysis, an extensive glossary and a comprehensive bibliography with suggestions for further reading. The book will be particularly useful to undergraduate students of English and applied linguistics and advanced students of modern languages or English as a foreign language.

English Stylistics

This accessible textbook hinges on the central assumptions of Cognitive Linguistics and Cognitive Grammar, introducing students to the analytical tools they need to approach Stylistics, an essential area in language analysis. The author verifies the claim that alterations in style, triggered by different cognitive processes, reflect alterations in meaning, and shows how they are employed to achieve

particular effects in context. The book links theory with practice, aiming both to acquaint students with the cognitive principles that account for stylistic expressions, and to provide them with the tools and techniques to conduct their own analyses. The textbook explores and explains how writers use the resources of language to create meaning, and how readers interpret texts. It will be of interest to advanced undergraduate and postgraduate students on courses in English Linguistics, as well as those working on other languages and in related areas such as Composition and Creative Writing.

This Handbook is the definitive account of the field, drawing on linguistics and related subject areas such as psychology, sociology, anthropology, educational pedagogy, computational methods, literary criticism and critical theory. Placing stylistics in its intellectual and international context, each chapter includes a detailed illustrative example and case study of stylistic practice, with arguments and methods open to examination, replication and constructive critical discussion. The volume focuses on the three domains of healthcare, law and education, as well as on the language of the new technologies, with the aim of showing how a knowledge of stylistics can provide the key for appropriate and acceptable language use, enabling successful communication and potential membership of professional communities.

Stylistics and the Teaching of Literature

This volume forms part of the Applied Linguistics and Language Study collection that looks at the field of analysing and appreciating literary texts. First published in 1975, this text makes a considerable contribution to extending our view of the principles underlying language teaching and curriculum design. The author begins by distinguishing the idea that discipline from the pedagogic subject in order to

demonstrate that stylistics is Janus like in the way it can be treated, for example, at school or university, as a way from linguistics to literary study or the reverse. To understand this bidirectionality he explains distinctions between the linguist's text and the critic's messages by introducing the concept of discourse as a means through which to understand the communicative value of passages of language.
