All You Have to Do Is Ask

A set of tools for mastering the one skill standing between us and success: the ability to ask for the things we need to succeed. Imagine you're on a deadline for a big project, and feeling overwhelmed. Or you're looking for a job, but can't seem to get your foot in the door. Or you're dying for tickets to a sold out concert, and all your leads have gone cold. What do these problems have in common? They can all be solved simply by reaching out to a colleague, friend, or wider network and making an ask. Studies show that asking for help makes us better and less frustrated at our jobs. It helps us find new opportunities and new talent. It unlocks new ideas and solutions, and enhances team performance. And it helps us get the things we need outside the workplace as well. And yet, we rarely give ourselves permission to ask. Luckily, the research shows that asking—and getting—what we need is much easier than we tend to think. Here, Wayne Baker shares a set of strategies—used at companies like Google, GM, and IDEO—that individuals, teams, and leaders can use to make asking for help a personal and organizational habit, including: • A quiz to identify your asking-giving style • SMART criteria for who, when, and how to ask • “Plug-and-play” routines that make requests a standard component of meetings • Mini-games that incentivize asking within teams • The Reciprocity Ring, a guided activity that allows people to tap into the giving power of a network Picking up where the bestselling book Give and Take left off, All You Have to Do Is Ask shows us how to ignite the cycle of giving and receiving by asking for the things we need. Advance praise for All You Have to Do Is Ask “Asking for help and support has been a key to my success. Wayne Baker expertly shares how everyone can do it.”—Shellye Archambeau, former CEO, MetricStream, and board director, Verizon and Nordstrom “Wayne Baker shares the formula for driving personal, organizational, and social change by tapping the power of

our teams and networks for help. This insightful book is a must-read for anyone seeking practical and proven solutions to make our workplaces and world a better place.”—Noel Tichy, professor, University of Michigan, and author of *Judgment and Control Your Destiny or Someone Else Will*

All About a Man Who Says Nothing and Does Nothing

Born to an Ontario farm family in the post-war baby boom, Wayne Baker was an original from the get-go. Already a fluent reader of *Treasure Island* and many other books by the time he started school, he was soon bored in his one-room classroom, excelling each year despite increasingly erratic attendance. High school and university careers would follow a similar pattern of high achievement coupled with a skeptical attitude, a fondness for practical jokes and sports, a willingness to play the system and unwillingness to suffer fools (or rules) gladly. *All About a Man Who Says Nothing and Does Nothing* is part one of Mr. Baker's memoirs, taking readers from his earliest memories and school career, through his emigration to Australia as a young newlywed and new-minted teacher and his years teaching and travelling there. But with a family history of difficult relationships, alcoholism and mental illness, life is not all clear sailing. Mr. Baker also has to deal with personal conflicts, a bizarre drug dealing accusation and his own use of booze (finally giving up alcohol altogether). Along the way readers are treated to the musings, deadpan humour and frank opinions of an incisive and outspoken observer and critic of Life....

Best of Baker

Glenn A Baker brings to the world his wry sense of humour as he travels to Cuba and meets Castro himself, considers the moral dilemma of travelling to Burma, and attends archery and wrestling in Mongolia, to name but a few. This is Glenn's passage, both off and on beaten tracks, with stops aplenty along the way.

Department of Homeland Security Appropriations for 2008

First came the time-storm, which erased half the population. Then came the Dinosaur Apocalypse ... How did it all begin? That depends on where you were and who you ask. In some places it started with the weather—which quickly became unstable and began behaving in impossible ways. In still others it started with the lights in the sky, which shifted and pulsed and could not be explained. Elsewhere it started with the disappearances: one here, a few there, but increasing in occurrence until fully three quarters of the population had vanished. Either way, there is one thing on which everyone agrees—it didn't take long for the prehistoric flora and fauna to start showing up (often appearing right where someone was standing, in which case the two were fused, spliced, amalgamated). It didn't take long for the great Time-displacement called the Flashback—which was brief but had aftershocks, like an earthquake—to change the face of the earth. Nor for the stories, some long and others short, some from before the maelstrom (and resulting societal collapse) and others after, to be recorded. These are the stories of a group of experienced survivors and their incredible machine, Gargantua: How they came to possess it, and what they did with it after. This is the recounting of a heist in Seattle in which they barely escaped with their lives ... and a journey to Lost Angeles to find their forever home--which just happened to be occupied when they got there. These are their Travels With Gargantua ...

How social networks, the personalized Internet, and always-on mobile connectivity are transforming—and expanding—social life. Daily life is connected life, its rhythms driven by endless email pings and responses, the chimes and beeps of continually arriving text messages, tweets and retweets, Facebook updates, pictures and videos to post and discuss. Our perpetual connectedness gives us endless opportunities to be part of the give-and-take of networking. Some worry that this new environment makes us isolated and lonely. But in *Networked*, Lee Rainie and Barry Wellman show how the large, loosely knit social circles of networked individuals expand opportunities for learning, problem solving, decision making, and personal interaction. The new social operating system of "networked individualism" liberates us from the restrictions of tightly knit groups; it also requires us to develop networking skills and strategies, work on maintaining ties, and balance multiple overlapping networks. Rainie and Wellman outline the "triple revolution" that has brought on this transformation: the rise of social networking, the capacity of the Internet to empower individuals, and the always-on connectivity of mobile devices. Drawing on extensive evidence, they examine how the move to networked individualism has expanded personal relationships beyond households and neighborhoods; transformed work into less hierarchical, more team-driven enterprises; encouraged individuals to create and share content; and changed the way people obtain information. Rainie and Wellman guide us through the challenges and opportunities of living in the evolving world of networked individuals.

Traveling Through Time

This is a story of unfaltering self-belief, immense hardship and struggle and hilariously wild times, as Wayne Rabbit Bartholomew sets off from Australia's Gold Coast, surfboard under his arm, to conquer the surfing world. From his spartan days of living on rice and oats while tackling the huge waves of Hawaii, to a glorious rollercoaster ride of parties, fast cars and perfect waves, Rabbit here recalls outrageous adventures shared with surfing's most famous figures including Nat Young, Michael Peterson, Mark Richards, Tom Carroll and Kelly Slater.

Nineteenth-century Travels, Explorations and Empires

As the American economy surged in the 1990s, economic sociology made great strides as well. Economists and sociologists worked across disciplinary boundaries to study the booming market as both a product and a producer of culture, tracing the correlations they saw between economic and social phenomena. In the process, they debated the methodological issues that arose from their interdisciplinary perspectives. The *New Economic Sociology* provides an overview of these debates and assesses the state of the burgeoning discipline. The contributors summarize economic sociology's accomplishments to date, identifying key theoretical problems and opportunities, and formulating strategies for future research in the field. The book opens with an introduction to the main debates and conceptual approaches in economic sociology. Contributor Neil Fligstein suggests that the current resurgence of interest in economic sociology is due to the way it brings together many sociological subdisciplines including the study of markets, households, labor markets, stratification, networks, and culture. Other contributors examine the role of economic phenomena from a network perspective. Ron Burt, for example, demonstrates how social relationships affect competitive dynamics in the marketplace. A third set of chapters addresses the role of gender in economic sociology. In her chapter, Barbara Reskin rethinks conventional notions about discrimination and points out that the law only covers one type of discrimination, while in recent years social scientists have uncovered other forms of hidden discrimination, which must be addressed as well. The *New Economic Sociology* also addresses the problem of economic development and change from a sociological perspective. Alejandro Portes and Margarita Mooney elaborate on one of the key emerging concepts in economic sociology, arguing that social capital—as an attribute of communities and regions—can contribute to economic and social

well-being by fostering collaboration and entrepreneurship. The contributors concur that economic action must be interpreted through the cultural understandings that lend it stability and meaning. By rendering these often complex debates accessible, *The New Economic Sociology* makes a significant contribution to this still rapidly developing field, and provides a useful guide for future avenues of research.

Ted's Travelling Circus

A new examination of contemporary federalism and federation, which delivers a detailed theoretical study underpinned by fresh case studies. It is grounded in a clear distinction between 'federations', particular kinds of states, and 'federalism', the thinking that drives and promotes them. It also details the origins, formation, evolution and operations of federal political interests, through an authoritative series of chapters that: analyze the conceptual bases of federalism and federation through the evolution of the intellectual debate on federalism; the American Federal experience; the origins of federal states; and the relationship between state-building and national integration explore comparative federalism and federation by looking at five main pathways into comparative analysis with empirical studies on the US, Canada, Australia, India, Malaysia, Belgium, Germany, Austria, Switzerland and the EU explore the pathology of federations, looking at failures and successes, the impact of globalization. The final chapter also presents a definitive assessment of federal theory. This book will be of great interest to students and researchers of federalism, devolution, comparative politics and government.

Networking Smart

First published in 1988, this book contains entries on famous American Humorists. Humor has been present in American literature, from the beginning, and has developed characteristics that reflect the American character, both regional and national. Although American literature was, in the past, treated as inferior to British literature, there has always been a large popular audience for the genre, which this book shows. The figures with entries in this encyclopedia not only amuse in their writing, but also aim to enlighten- setting out to expose the foibles and foolishness of society and the individuals who compose it. It is the manner in which these authors try to accomplish this end that determines whether they appear in the volume. Indeed, the book will demonstrate that the best humor has at its base, a ready understanding of human nature.

Christ and the Covenant

When Terry Mulligan's sons, Brennan and Colin set off on separate around the world journeys, she has a hunch her life is going to get stressful--it does. One son runs out of air while scuba diving; the other flies head over heels off a motorcycle. Then, Terry gets a call saying, "Colin needs you to wire him the \$3000 in his savings account." Partly through emails and letters, readers join these explorers in seventeen countries, on three continents, as they pay homage to sacred sites, bask in the kindness of strangers, and discover beauty in the world and in themselves. Ranging from heartwarming to heart thumping, and oftentimes hilarious, this smartly conceived book also confronts the complexity of parent-child love--including the endangered art of tough love--that helps boys become men.

Bustin' Down the Door

Military chaplains are highly trained professionals with multiple graduate degrees and varying civilian pastoral experience. They enter the chaplaincy after a rigorous selection process and military courses, which all must verify their calling to military ministry. Throughout a chaplain's career, he or she will attend many continuing education seminars, civilian education graduate programs, and conferences, all provided by the military. However, chaplains are challenged with the rigorous multitasked environment of this ministry. Multiple deployments into combat have negatively impacted the personal lives of those seeking to care for the souls of the soldier. This book encourages the importance of spiritual resiliency in the lives of leaders, both military and civilian. Leaders who regularly practice spiritual disciplines will be less likely to suffer personal and professional failure, or burnout. Second, the leader's practice of spiritual disciplines is essential to fostering positive modeling and mentoring for young chaplains and those wishing to serve. Third, practicing historic Christian spiritual disciplines will benefit those who strive to lead congregations and especially military installations in the free exercise of their faith.

The New Economic Sociology

'Wonderfully learned, wonderfully written, a microscopic examination of the acorn from which a truly mighty oak would spring. I learnt a huge amount.' - Tom Holland, author of *Dominion: The Making of the Western Mind* 2020 sees the 400th anniversary of the sailing of the Mayflower - the ship that took the Pilgrim Fathers to the New World. It's a foundational event in American history, but it began as an English story, which pioneered the idea of religious freedom. The illegal underground movement of Protestant separatists from Elizabeth I's Church of England is a story of subterfuge and danger, arrests and interrogations, prison and executions. It starts with Queen Mary's attempts to burn Protestantism out of England, which created a Protestant underground. Later, when Elizabeth's Protestant reformation didn't go far enough, radicals recreated that underground, meeting illegally throughout England, facing prison and death for their crimes. They went into exile in the Netherlands, where they lived in poverty - and finally the New World. Stephen Tomkins tells this fascinating story - one that is rarely told as an important piece of English, as well as American, history - that is full of contemporary relevance: religious violence, the threat to national security, freedom of religion and tolerance of dangerous opinions. This is a must-read book for anyone interested in the untold story of how the Mayflower came to be launched. 'A rattling good read' - The Archbishop of York, Dr John Sentamu

Comparative Federalism

Retrospective accounts of the careers of twelve prominent management scholars The field of academic management is more competitive than ever before. Moreover, scholars have to deal with rapid advances in technology and an increasingly globalized discipline. But, for those who are prepared, there are also great opportunities to generate new and noteworthy scholarship. In this book, Xiao-Ping Chen and H. Kevin Steensma bring together the wisdom of some of the most prominent voices in the field to show how to develop influential research and succeed in the world of management studies. In *A Journey toward Influential Scholarship*, twelve prominent management scholars provide retrospective accounts of their professional journeys. These specialists share how they originated, developed, and published their research, as well as the mistakes they made along the way. Their stories offer insights to new scholars, including how to properly observe organizational phenomena, how to ask important research questions, and how to transform these questions into potentially fruitful areas of research. The book also provides useful strategies for developing collaborative relationships, managing the peer review and publication process, and disseminating findings. In combination, the essays provide scholars with an array of pathways for turning research into influential scholarship. More broadly, this is an essential guide for how to pursue a successful career in the field of management.

Most of Fort Wayne's buildings and architecture from the early- to mid-1900s has been lost in the last fifty years to modern structures or parking lots. *Fort Wayne Through Time* reaches into the area's

largest public and private image archives to compare what was and what is. Included with each of the comparative sets of images is an interesting history of the structure, company, or event. Who were the Fort Wayne Daisies? What happened to the 5,000-seat League Park? When was the courthouse constructed? Where did Anthony Wayne's statue originally sit? Why was Reservoir Park built? These and hundreds of other questions are answered in this informative journey through Fort Wayne's past. Randolph Harter is a Fort Wayne historian and author of two previous local history books. Daniel Baker is an award-winning photographer who has been documenting Northeast Indiana the past fifteen years.

A Wandering Englishman - in the Western USA

Wayne Cordeiro found himself paralyzed by burnout. He had been in ministry for 30 years, and 10 years after founding what is now the largest church in Hawaii, he found himself depleted. Wayne took a season out of his growing ministry to recharge and refocus on the truly important. He was able to get back in touch with his life, get back in proper balance, and re-energize his spirit through Christ in a way that propelled him forward to greater levels of service. Wayne first gave this message at a recent Willow Creek Leadership Summit, where it was the highest-rated presentation by those in attendance. Pulling no punches, Wayne talks about the walls leaders must break through and how to move on with integrity. Included are ways to care for oneself physically and emotionally as well as spiritually.
